ArtistikCity

Admin Guide

Running ArtistikCity: courses, reviews, sales, the marketplace, landing pages, people, content and system settings, with an end-to-end playbook for each daily job.

For super admins, moderators and instructors · Version 1.0 · November 2026
Screenshots come from a test copy of the site with sample data. The live site's names, figures and lists will be different.

How to use this guide

The admin console is where the studio runs the site: publishing courses, reviewing students' work, fulfilling orders, approving marketplace listings, building campaign landing pages and changing site settings. Everything is under `/admin`, behind its own sign-in.

Chapter 1 covers signing in, the roles and the layout. Chapters 2–8 follow the sidebar from top to bottom, one screen at a time. Chapter 9 brings it together as playbooks for the jobs you will do every week. The appendix lists every status the site uses.

Conventions

- **Bold** words are buttons, tabs and labels exactly as on screen; the sidebar path is written like Sales › Marketplace.
- **Tip** boxes give shortcuts; **Important** boxes explain rules that protect money, data or students.
- Each chapter says which role can use the screen. If your role cannot, the sidebar simply does not show it.

Golden rules

- An order only counts as paid after the payment provider has confirmed it. Never mark a payment by hand on the strength of a screenshot from a customer.
- Refunds are never automatic: they wait in Sales › Refunds for a person to confirm.
- Hide things instead of deleting them. Courses with orders, groups in use and used coupons cannot be deleted, by design.
- Important changes are recorded in the Security log with who, when and what changed.

CHAPTER 1

Getting started

Who can do what, how to sign in safely and how the console is laid out.

1.1 Roles

Every staff account has one role (persona). The role decides which parts of the console appear.

AREA	SUPER ADMIN	MODERATOR	INSTRUCTOR
Overview, Verification desk, Student tasks	Yes	Yes	Yes (own courses)
Courses, workshops, seats, catalogue lists	Yes	-	Yes (own courses)
Course orders, refunds, payouts & ledger	Yes	-	-
Commissions	Yes	Yes	-
Marketplace	Yes, all tabs	Review, holds, orders, messages	Own paintings, orders and messages
Landing Page Management	Everything	Content	Content (own courses)
People & roles	Yes, incl. staff	-	Students (read)
Testimonials, gallery, reports & bans	Yes	Yes	-
Studio Stories, FAQ, newsletter, contact messages	Yes	-	-
System parameters, Security log	Yes	-	-

A super admin can also give one person extra landing-page permissions (Content manager, Marketing manager, Finance / payments, Publisher) without changing their role: Landing Page Management › Settings & roles › Team access.

1.2 Sign in and two-step verification

1. Go to `/admin/login` (staff sign in here, not on the student log-in page).
2. Enter your staff e-mail and password.
3. If two-step verification is on for your account, type the 6-digit code from your authenticator app (or a backup code).
4. You land on the Overview. Use the account menu (top right) for Profile, Account security and Log out.

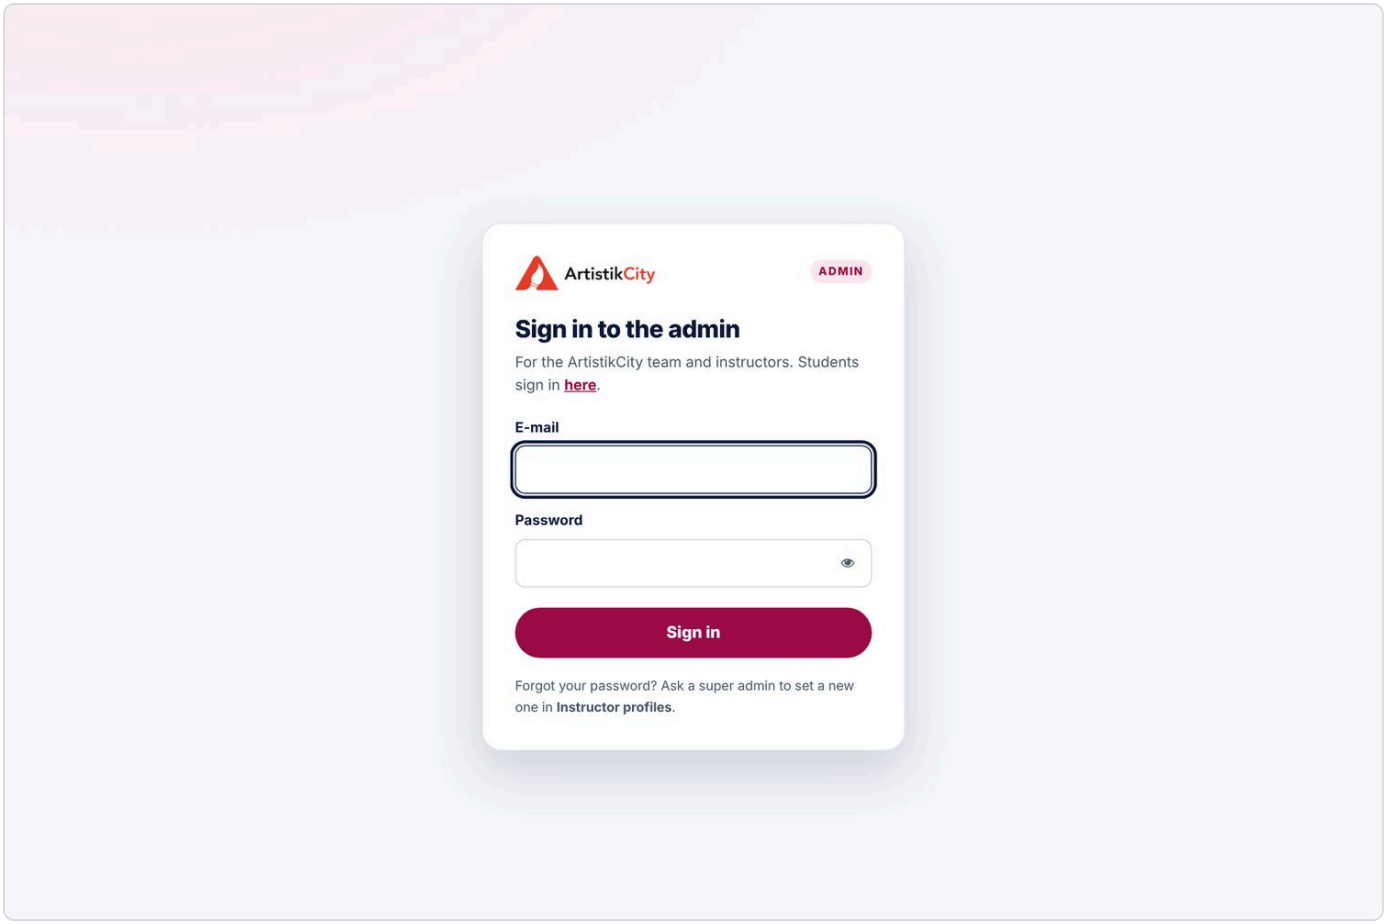

Figure 1. Staff sign-in.

Turn on two-step verification

1. Account menu › Account security.
2. **Set up two-step verification**: scan the QR code with an authenticator app (Google Authenticator, Microsoft Authenticator, 1Password …) and type the code it shows.
3. Save the backup codes somewhere safe; each works once if you lose your phone.

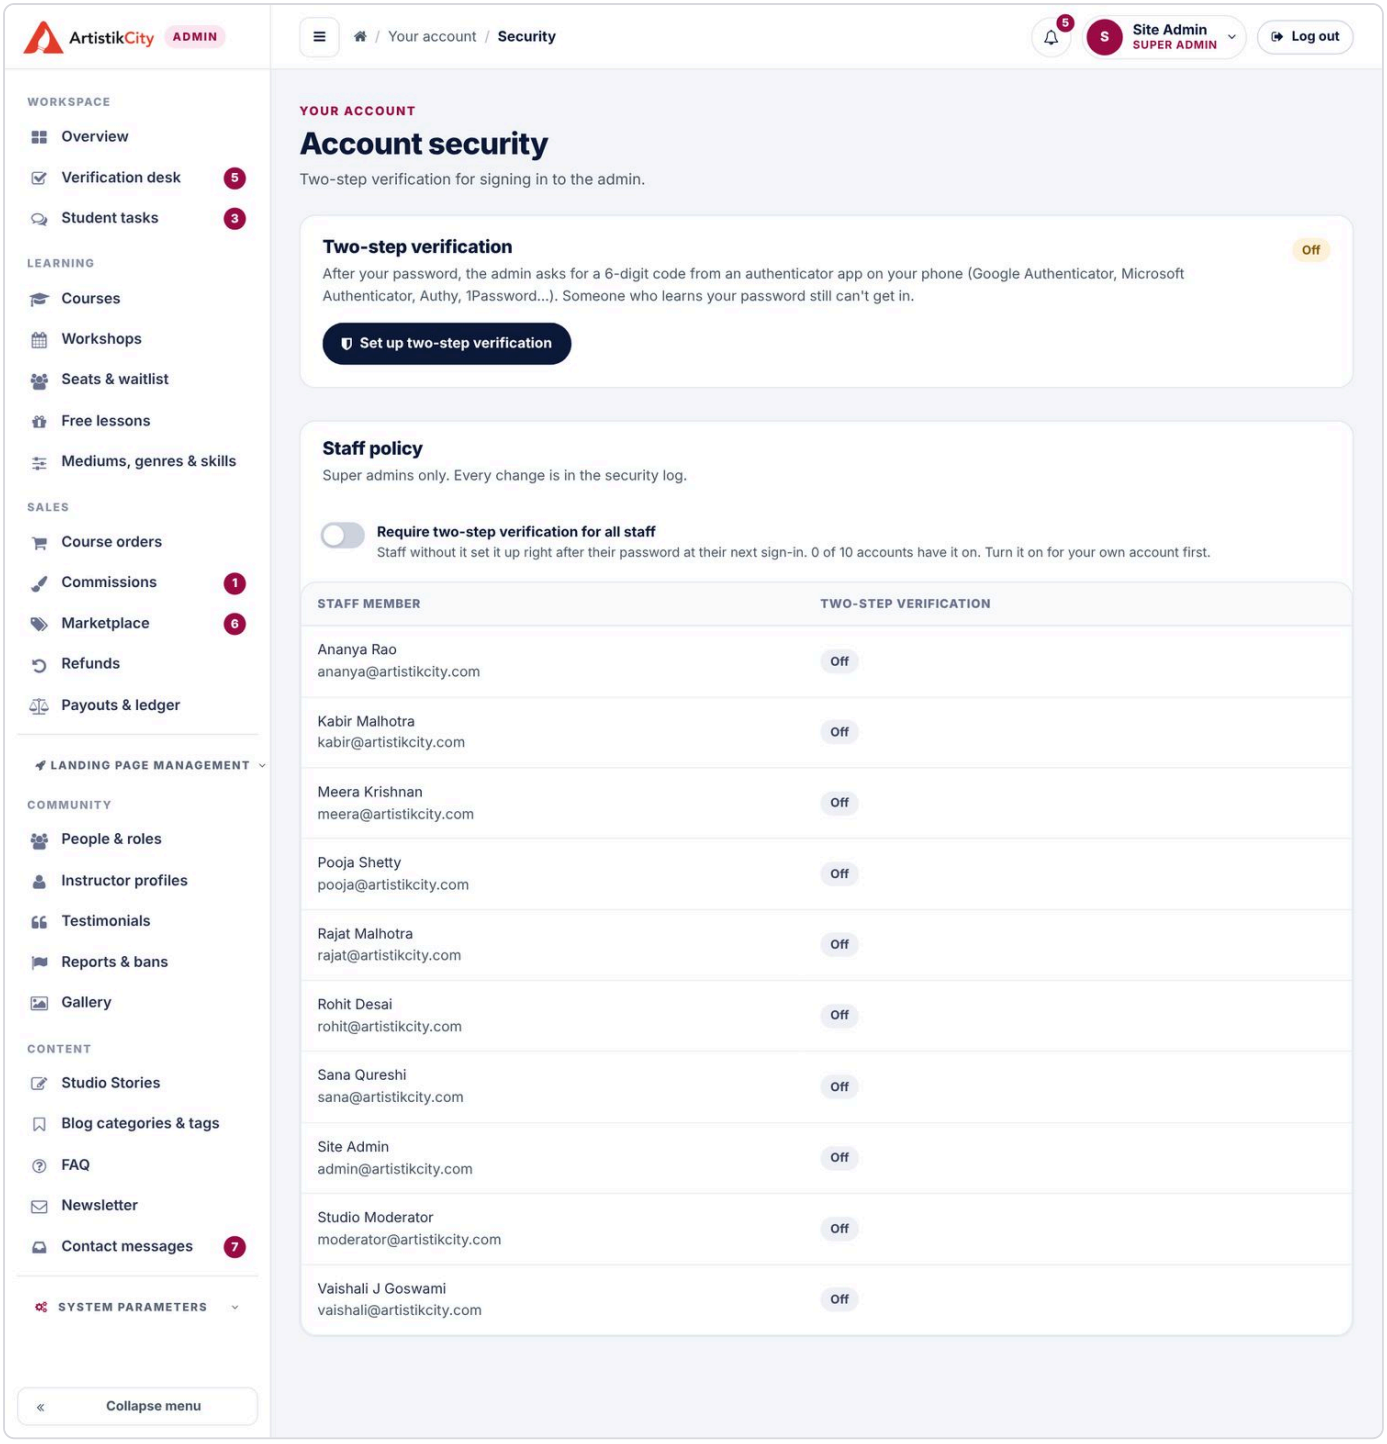

Figure 2. Account security, with the staff policy that a super admin can switch on to require two-step verification for everyone.

> **IMPORTANT** After five refused requests in ten minutes the console signs a staff session out, and every refusal is written to the Security log. If you see “This area isn’t part of your role”, ask a super admin instead of retrying.

1.3 The console layout

- **Sidebar**: grouped into Workspace, Learning, Sales, Landing Page Management, Community, Content and System Parameters. Red badges count what is waiting (for example submissions to review). Collapse menu shrinks it to icons.
- **Header**: the menu button, breadcrumbs (click to go back up), the notification bell, the account menu and Log out.

- **Tables**: search, filters and sortable columns; the choice is kept in the address, so a link shows the same view. Rows per page at the bottom right.
- **Forms**: required fields have a red star; mistakes appear under the field; the save bar at the bottom shows “All changes saved” or the unsaved state.

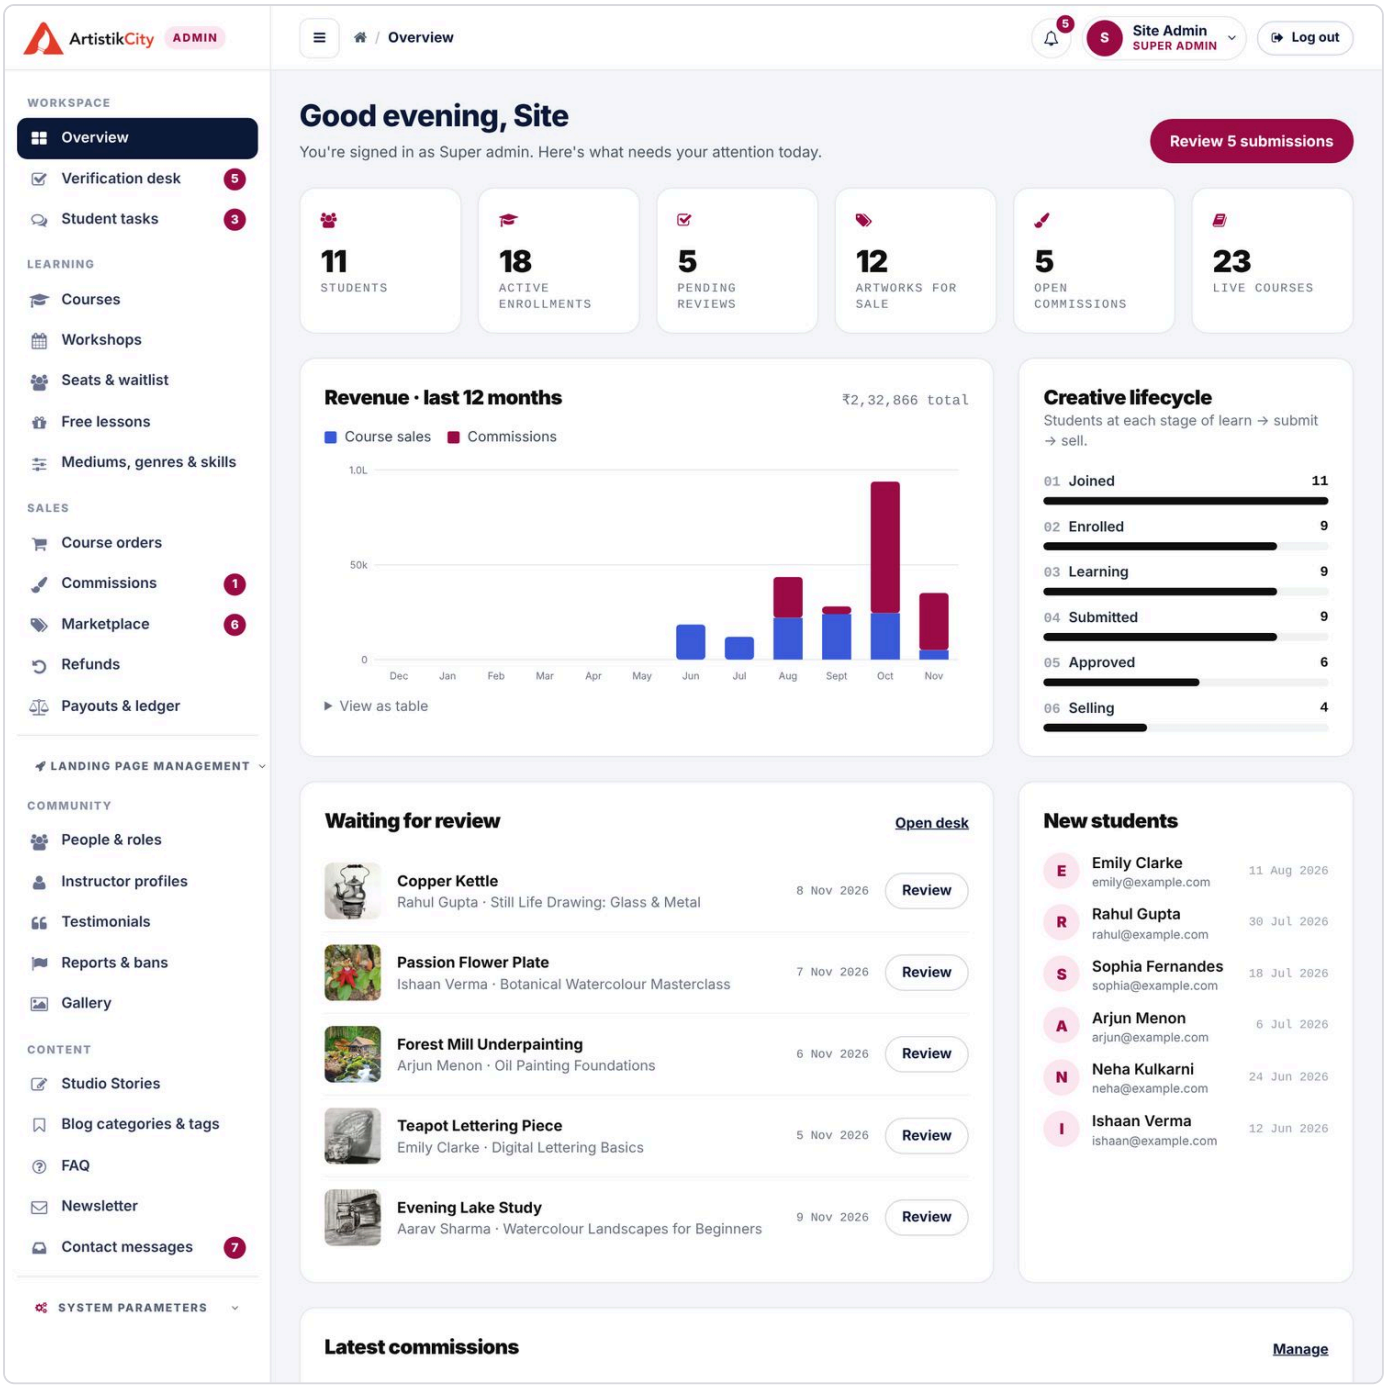

Figure 3. The console with the Overview open.

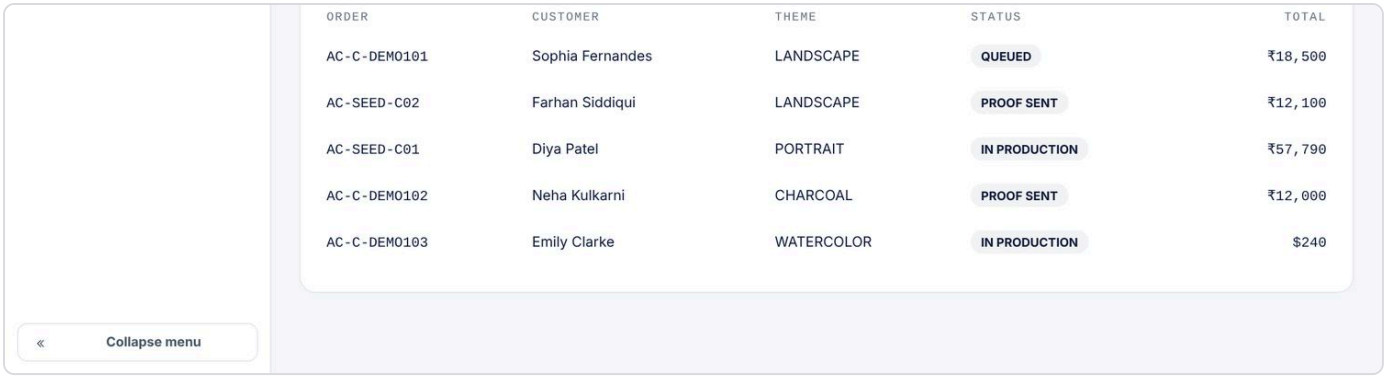

Figure 3. The console with the Overview open. (continued, part 2 of 2)

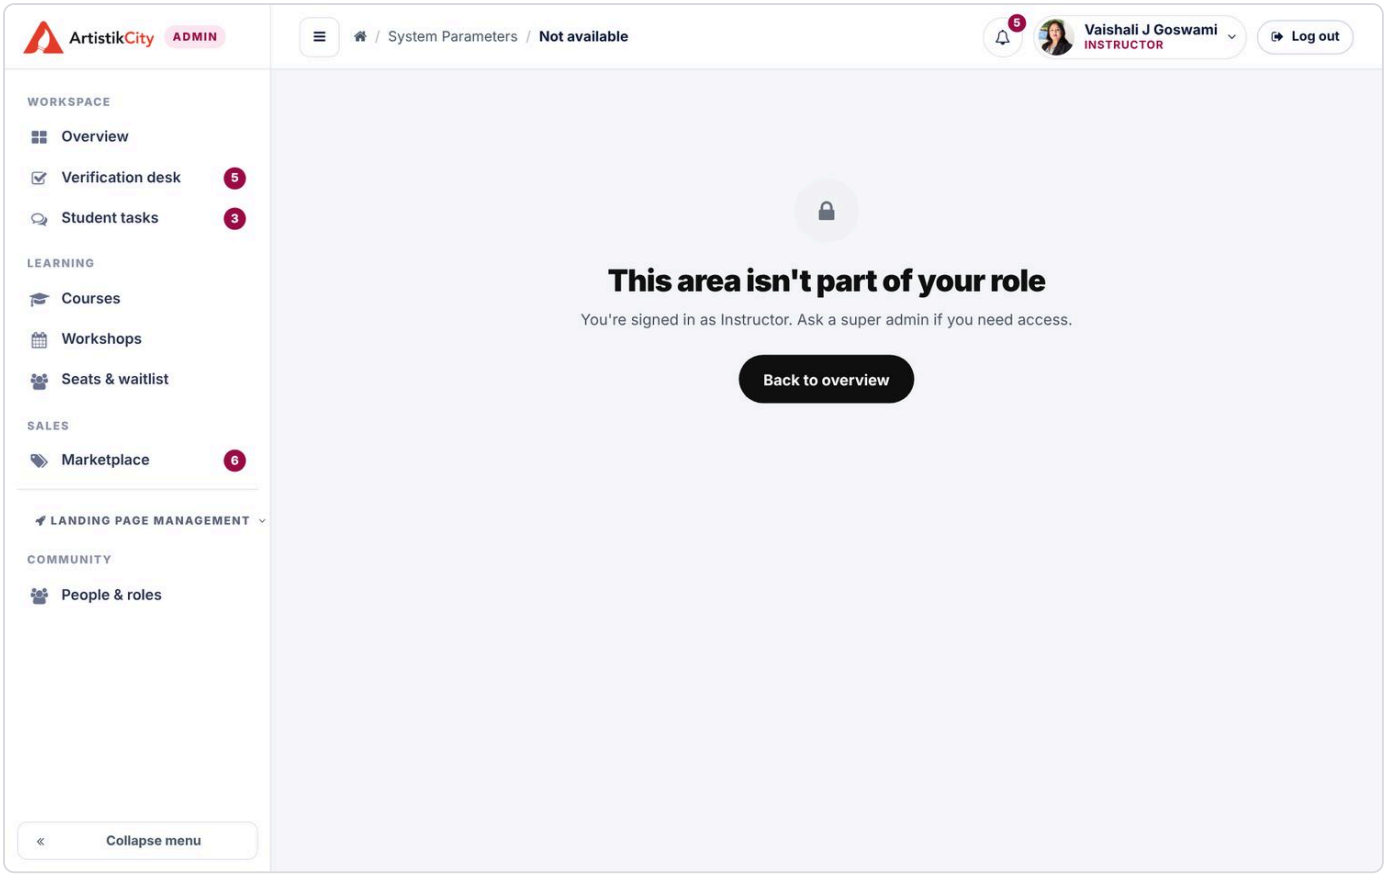

Figure 4. What staff see when they open a page outside their role.

1.4 Your profile

Account menu › Profile: your name, designation, photo and short bio (shown on courses you teach), plus a password change.

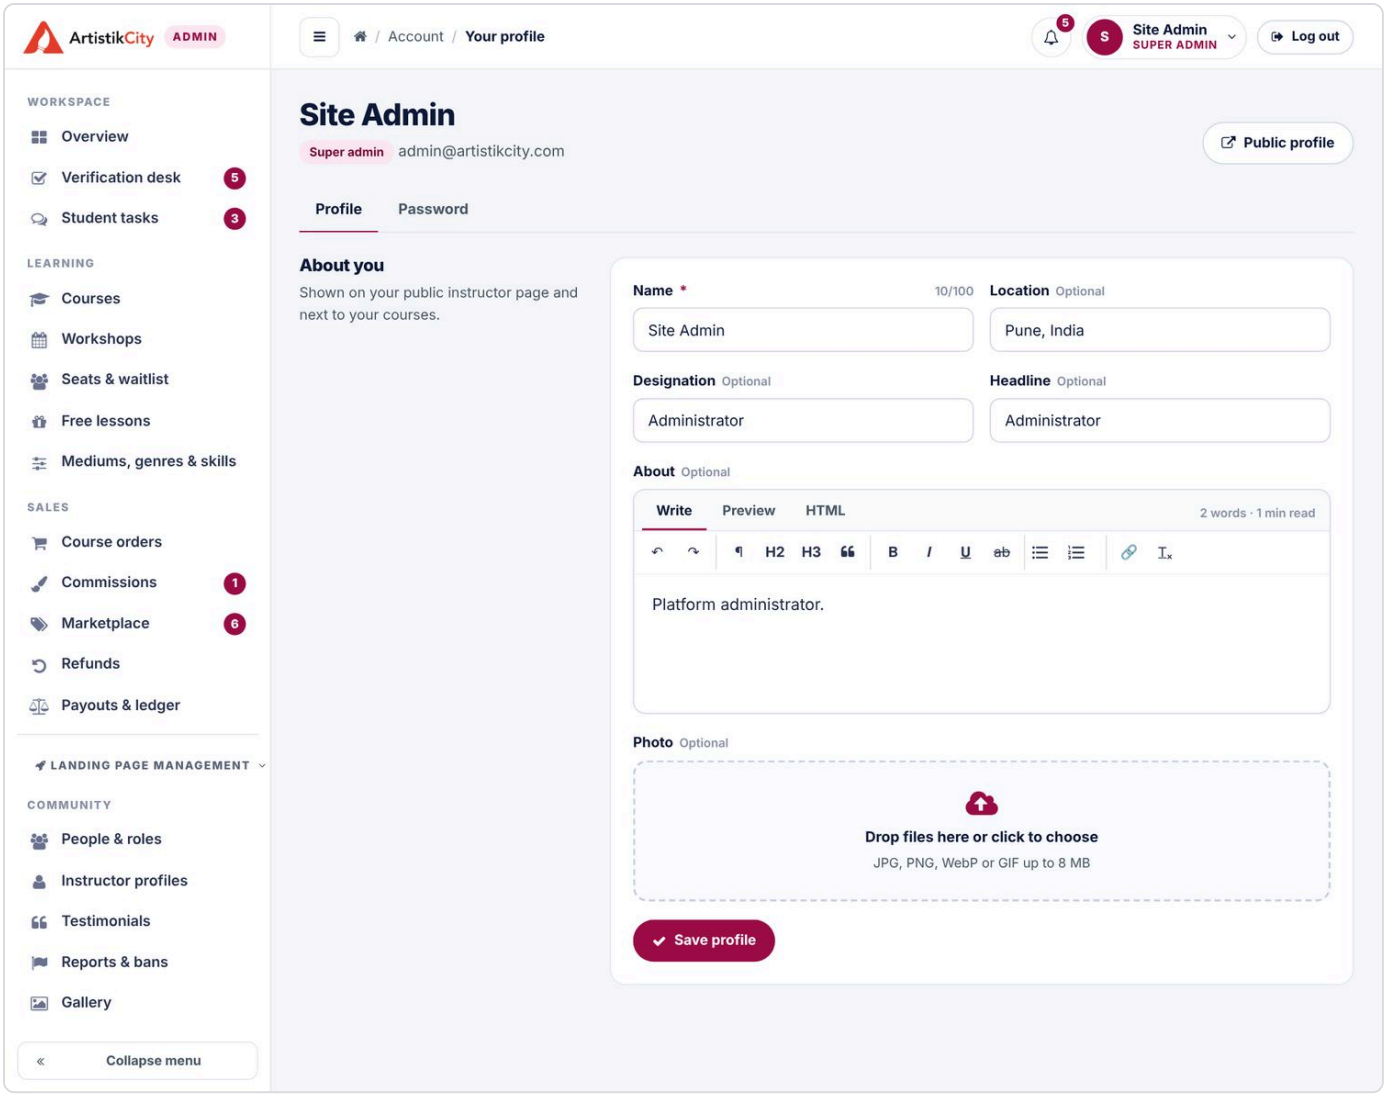

Figure 5. Staff profile.

CHAPTER 2

Workspace: the daily desk

Three screens tell you what needs doing today.

2.1 Overview

- Counters: students, active enrolments, pending reviews, artworks for sale, open commissions, live courses.
- Revenue for the last 12 months (course sales and commissions; test orders are left out), with View as table.
- Creative lifecycle: how many students are at each stage, from joined to selling.
- Waiting for review: the newest submissions with a Review button.
- New students and latest commissions.

Instructors see the same page limited to their own courses and students.

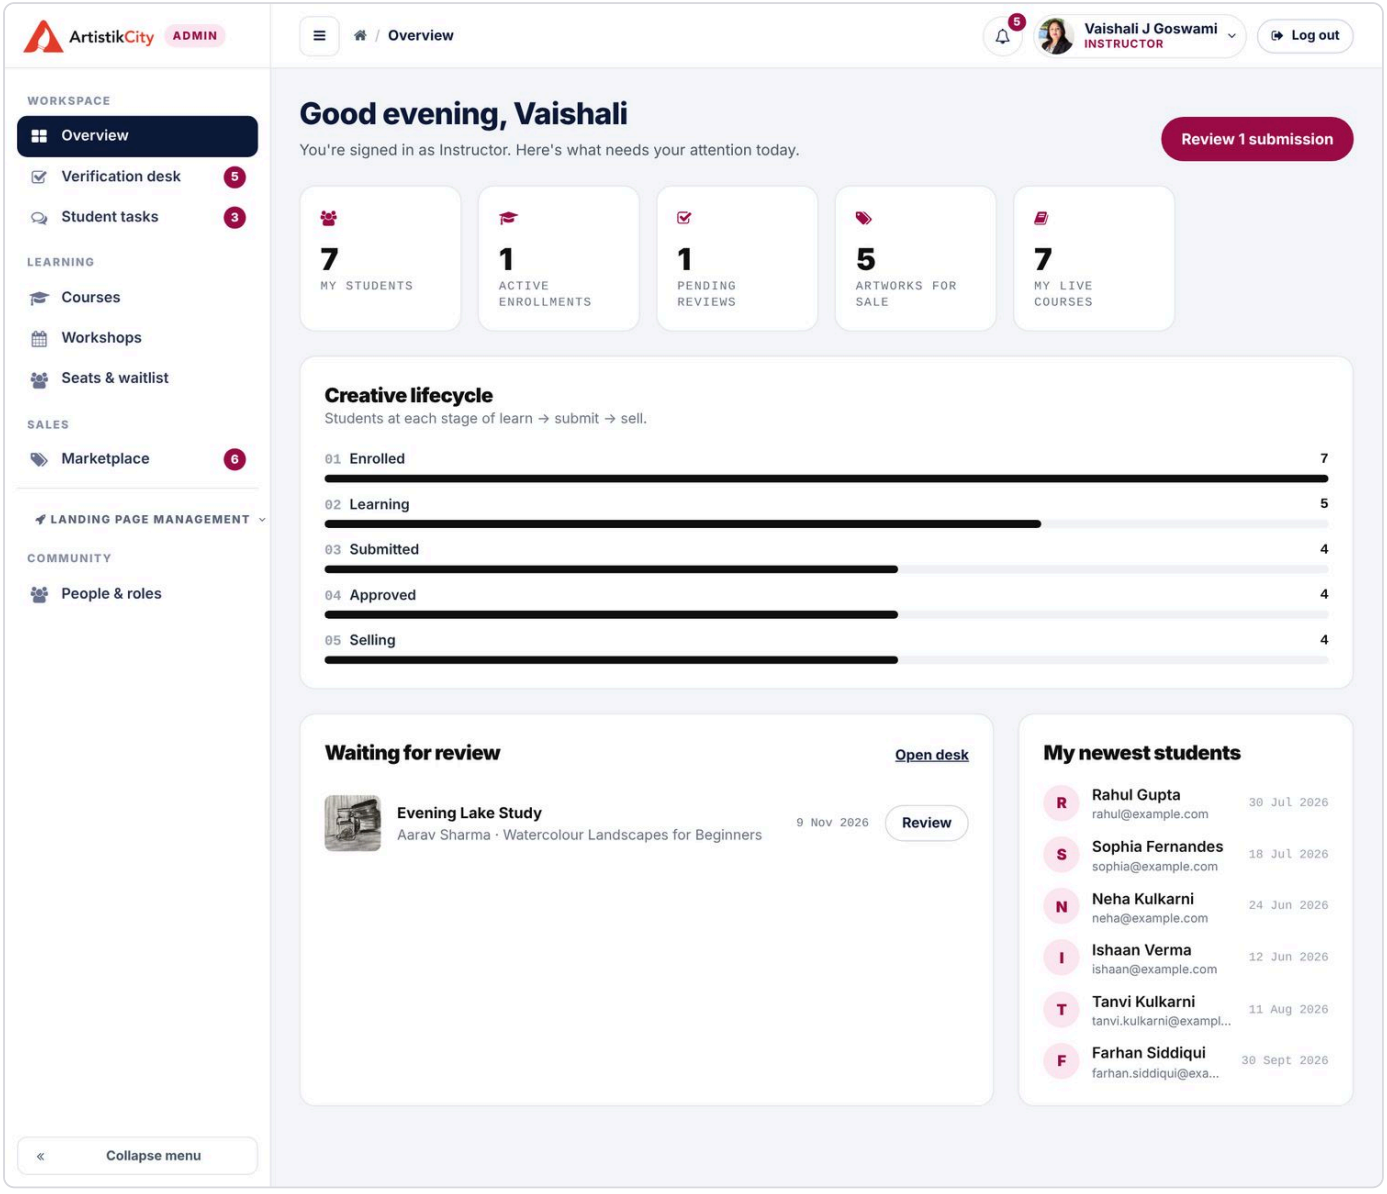

Figure 6. The Overview as an instructor sees it.

2.2 Verification desk

Students' assignment submissions. Approved work counts towards the course certificate and can later be sold.

1. Open Workspace › **Verification desk**. Tabs: Pending review, Approved, Changes requested, All.
2. Pick a submission on the left. The photo opens large (zoom, full size) with the student, course, date and the student's note.
3. Write review notes: what works, what to improve. Quick phrases are offered under the box.
4. Click **Approve** or **Request changes**. The student is e-mailed and sees your note in Submissions.

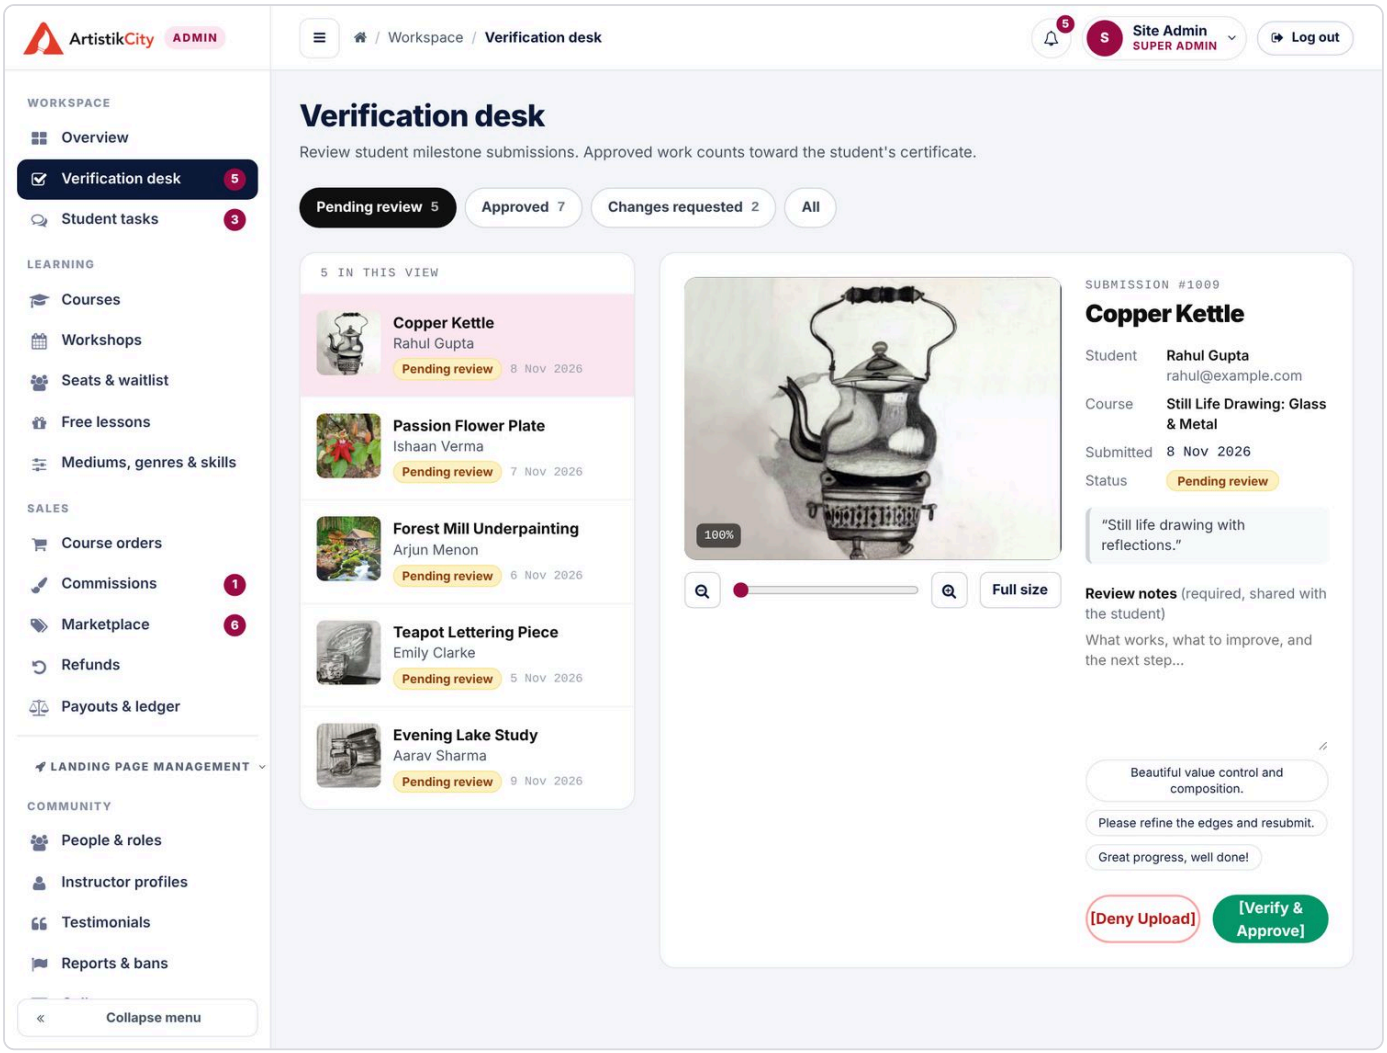

Figure 7. Verification desk.

> **TIP** Be specific in the notes: they are printed in the student's portfolio PDF under the artwork.

2.3 Student tasks

Answers to the practice tasks inside lessons. Filter by Needs reply, Under review, Feedback, Reviewed and Completed, or by course. Open a row to read the conversation, reply with feedback (text and photos) and set where the task stands.

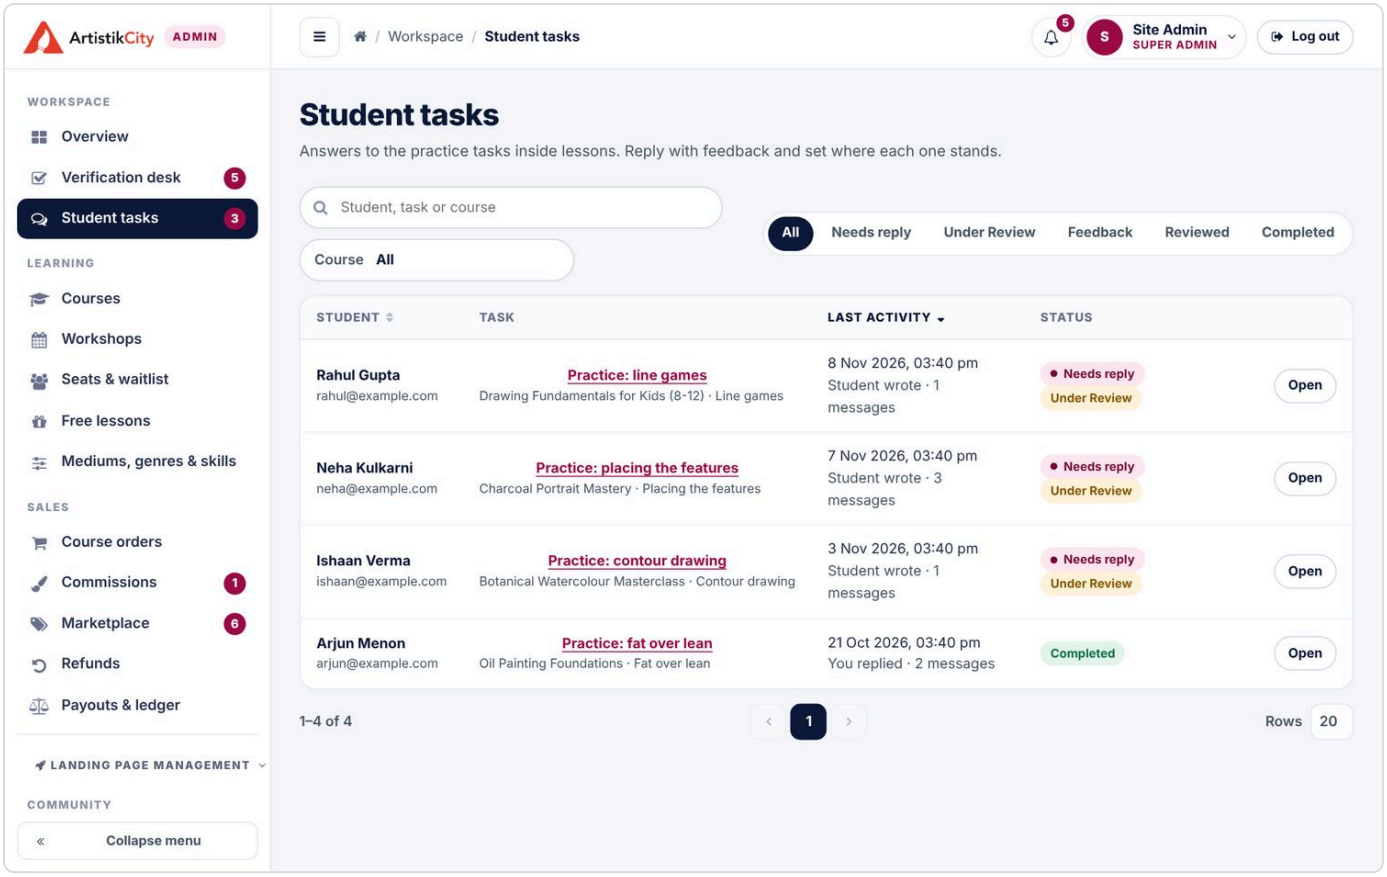

Figure 8. Student tasks.

CHAPTER 3

Learning: courses and catalogue

Courses run over weeks; workshops are short. They share one editor.

3.1 The course list

Learning › **Courses** lists every course with status, start date, enrolments and price. Search, filter by status or medium, and open a course to edit. **New course** starts the editor; the row menu offers view, duplicate, hide and delete.

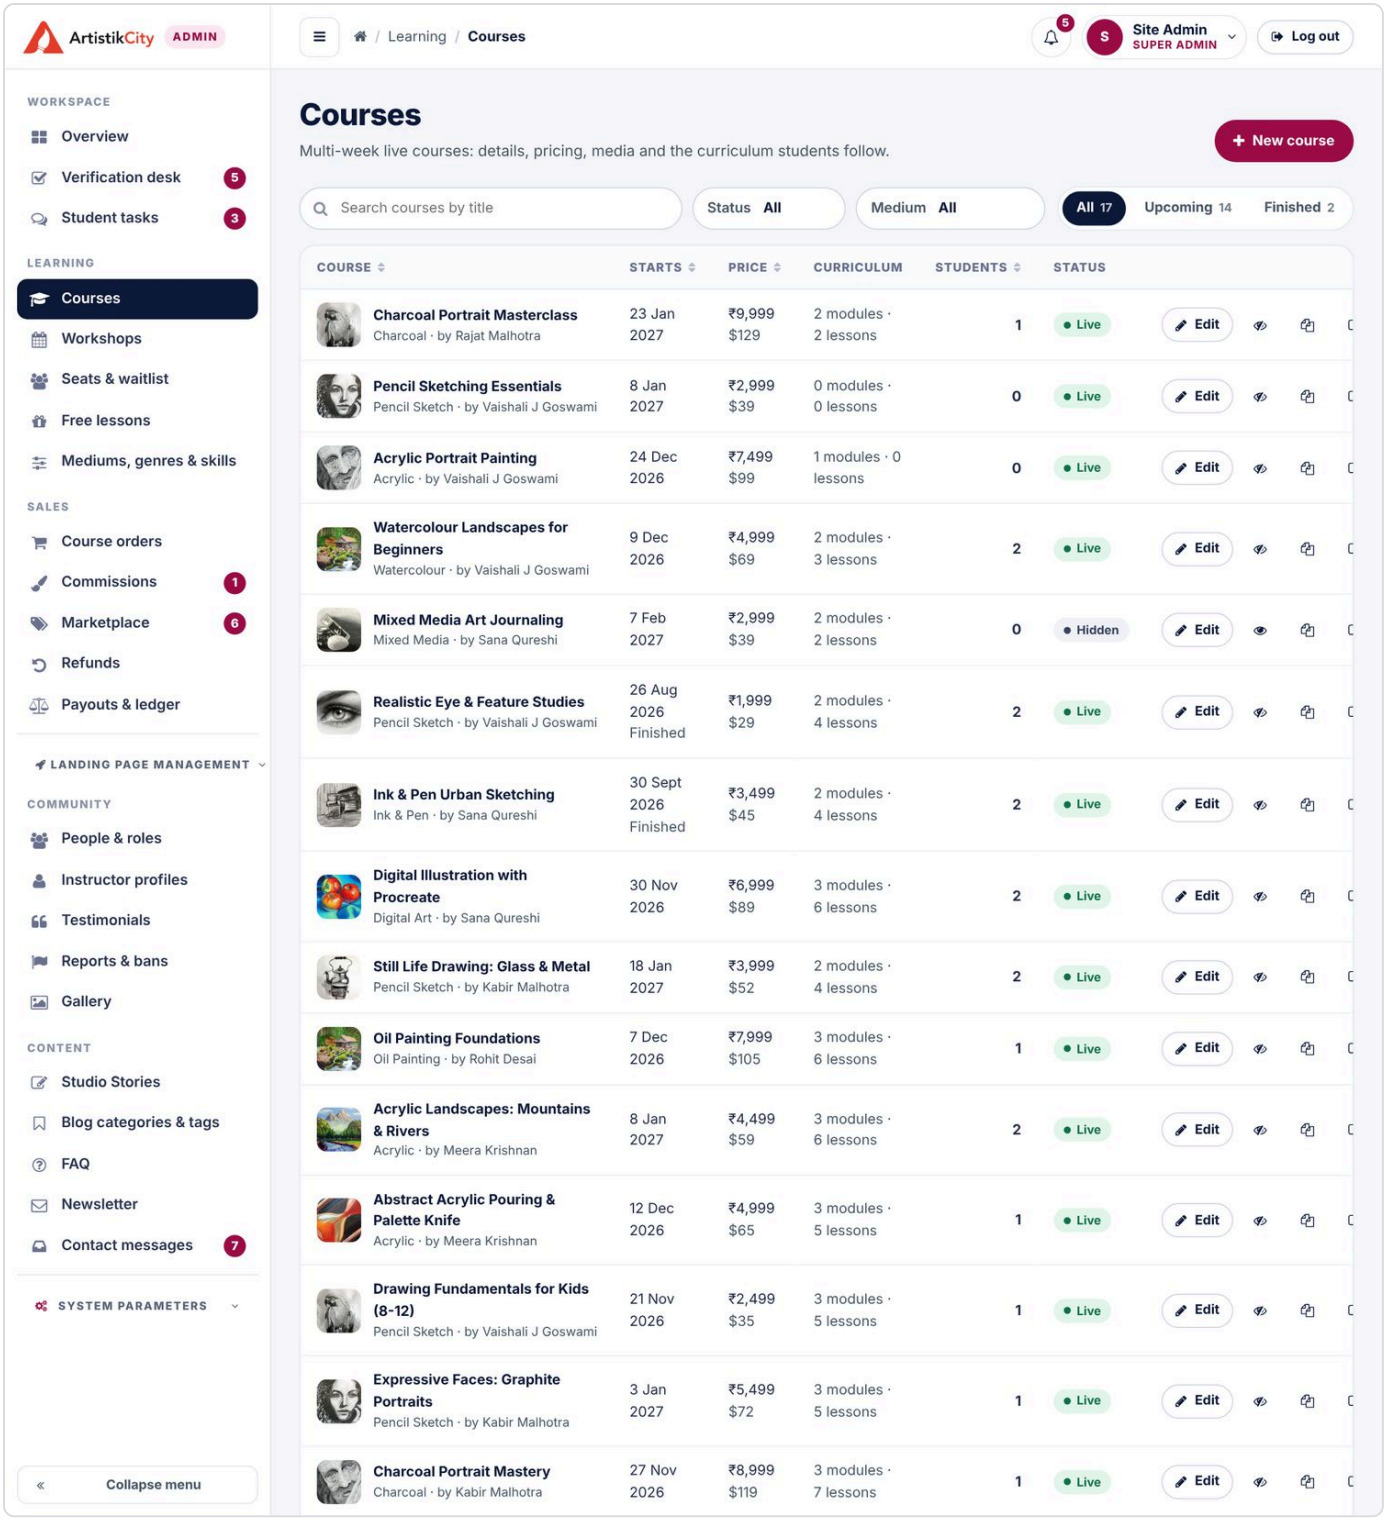

Figure 9. Courses.

> **IMPORTANT** A course that has any order, enrolment, submission or certificate cannot be deleted (you will see "hide it instead"). Switch off Visible on the site to take it off sale.

3.2 Create or edit a course: Details

The editor has three tabs: Details, Curriculum and Students. Details is one long form in sections:

SECTION	WHAT TO FILL IN
Basics	Title, URL slug (changing it breaks shared links), subtitle, type (course or workshop), instructor, Visible on the site.
Category	Medium, skill level, genres (type to find), age group. These feed the catalogue filters.
Schedule & format	Free course switch, first session date, duration (weeks), live sessions, time needed per week, mini projects, modules shown, format, schedule summary and details, schedule PDF.
Pricing	Price in India (₹, Razorpay) and elsewhere (US$, PayPal); what is included: certificate, study material, and whether to show the medium, age group and level.
Page content	Short and full introduction, what students learn, who it is for, requirements, FAQ.
Highlights & lists	The bullet lists on the course page (what you learn, who it is for, what is included).
Photos & intro video	Course photos and the trailer video (a link, or an upload of up to 500 MB).

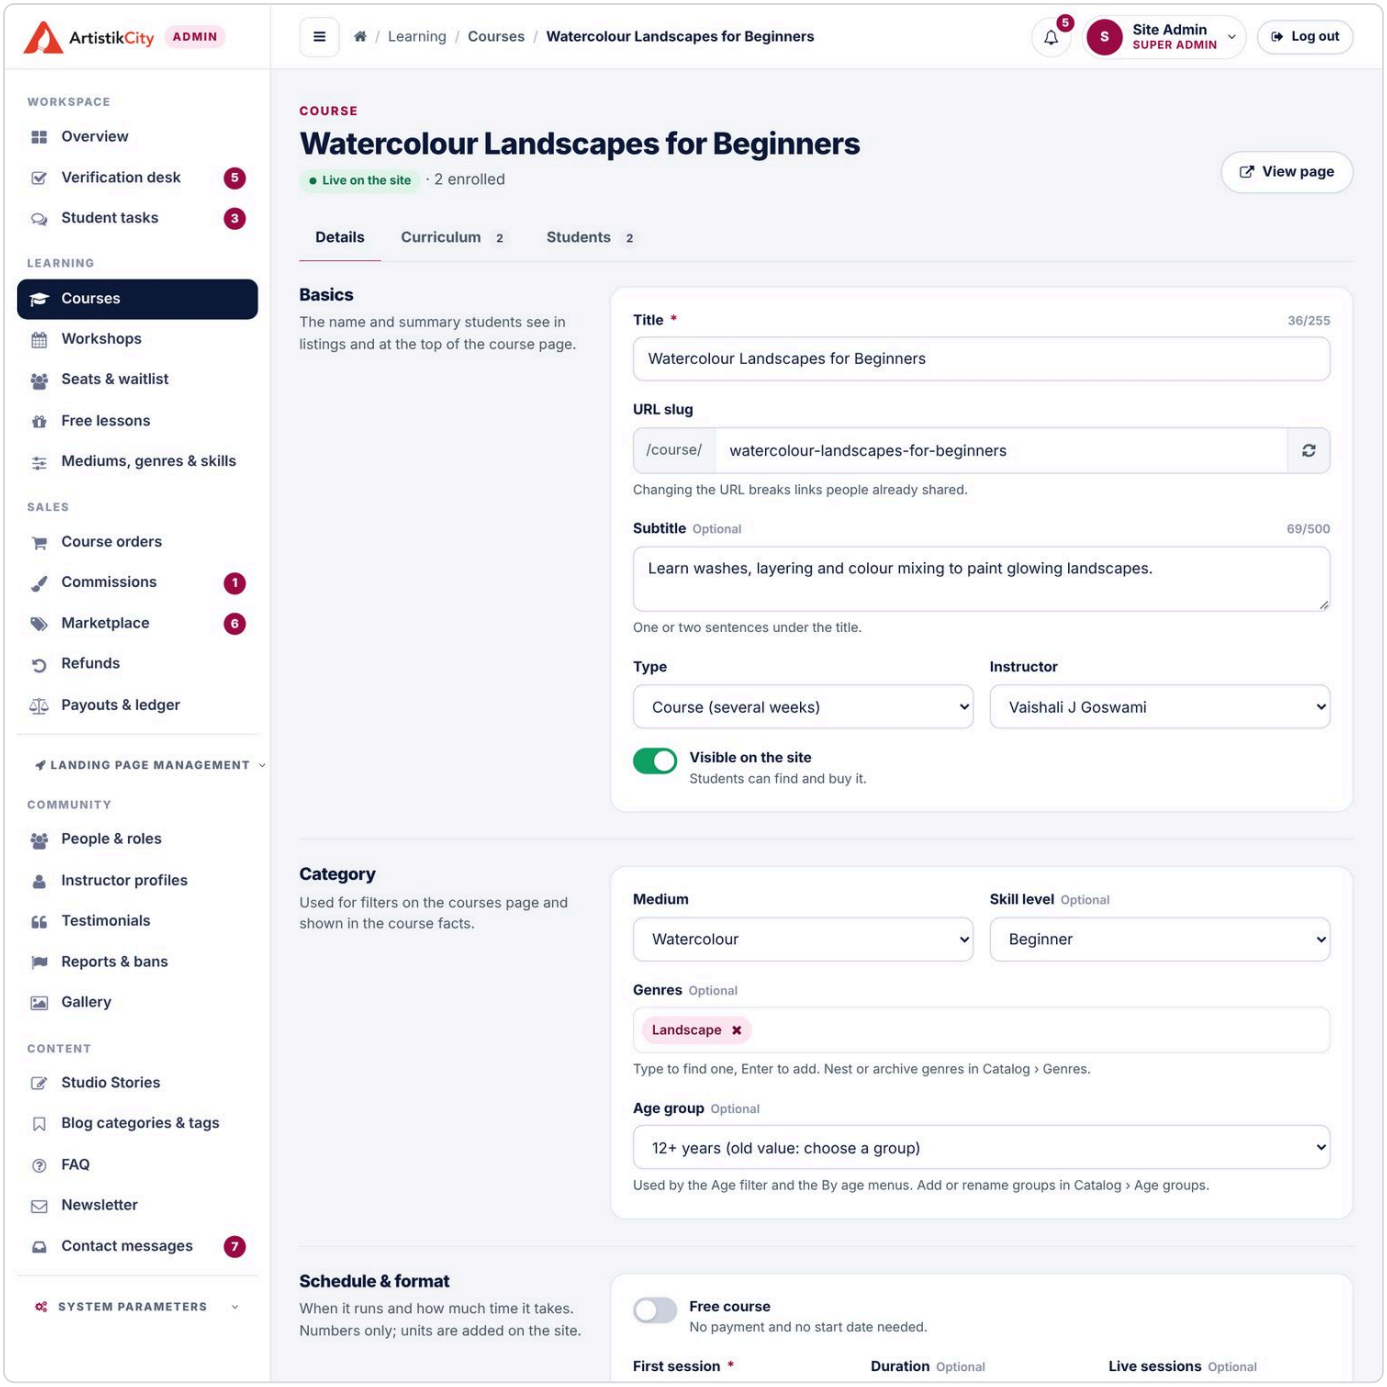

Figure 10. The course editor, Details tab.

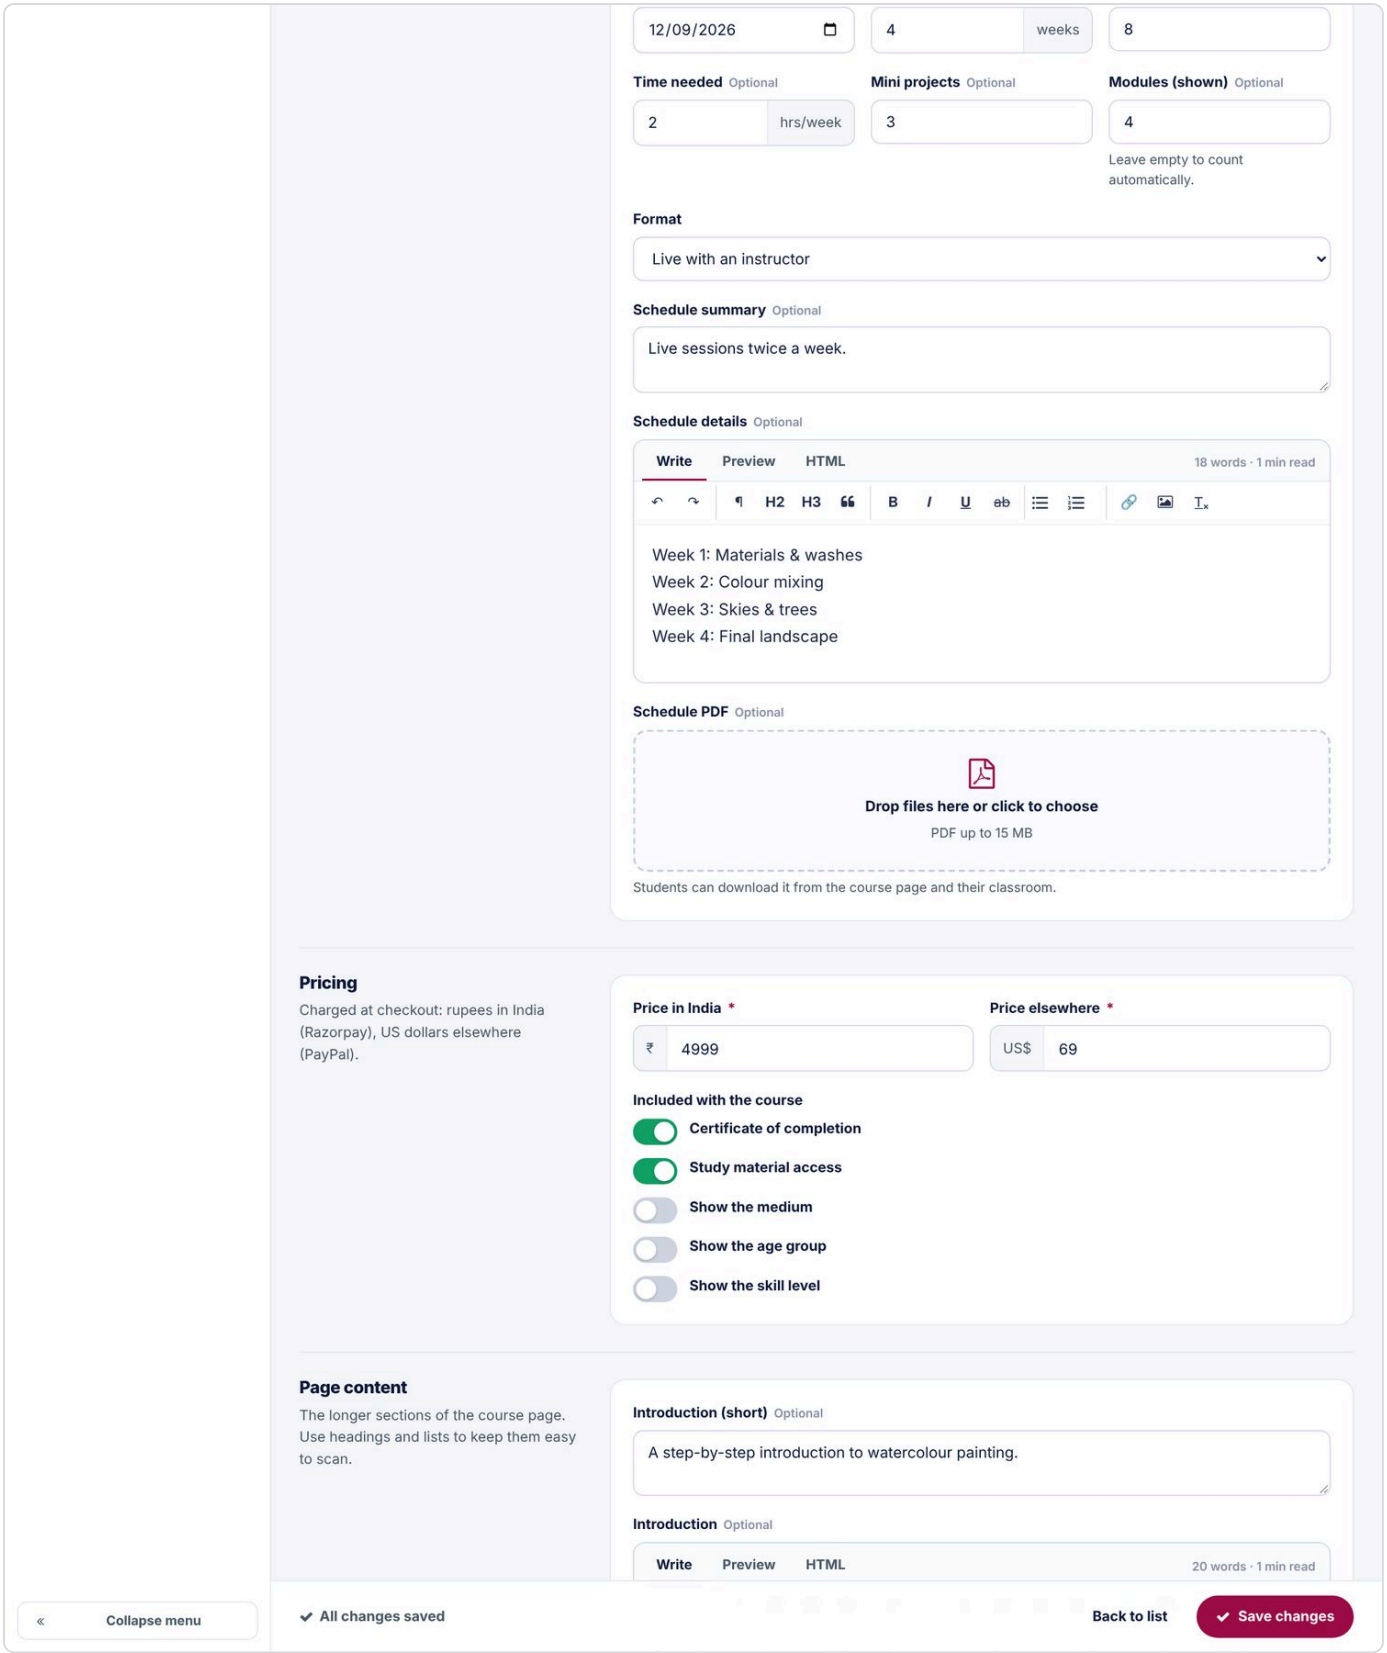

Figure 10. The course editor, Details tab. (continued, part 2 of 2)

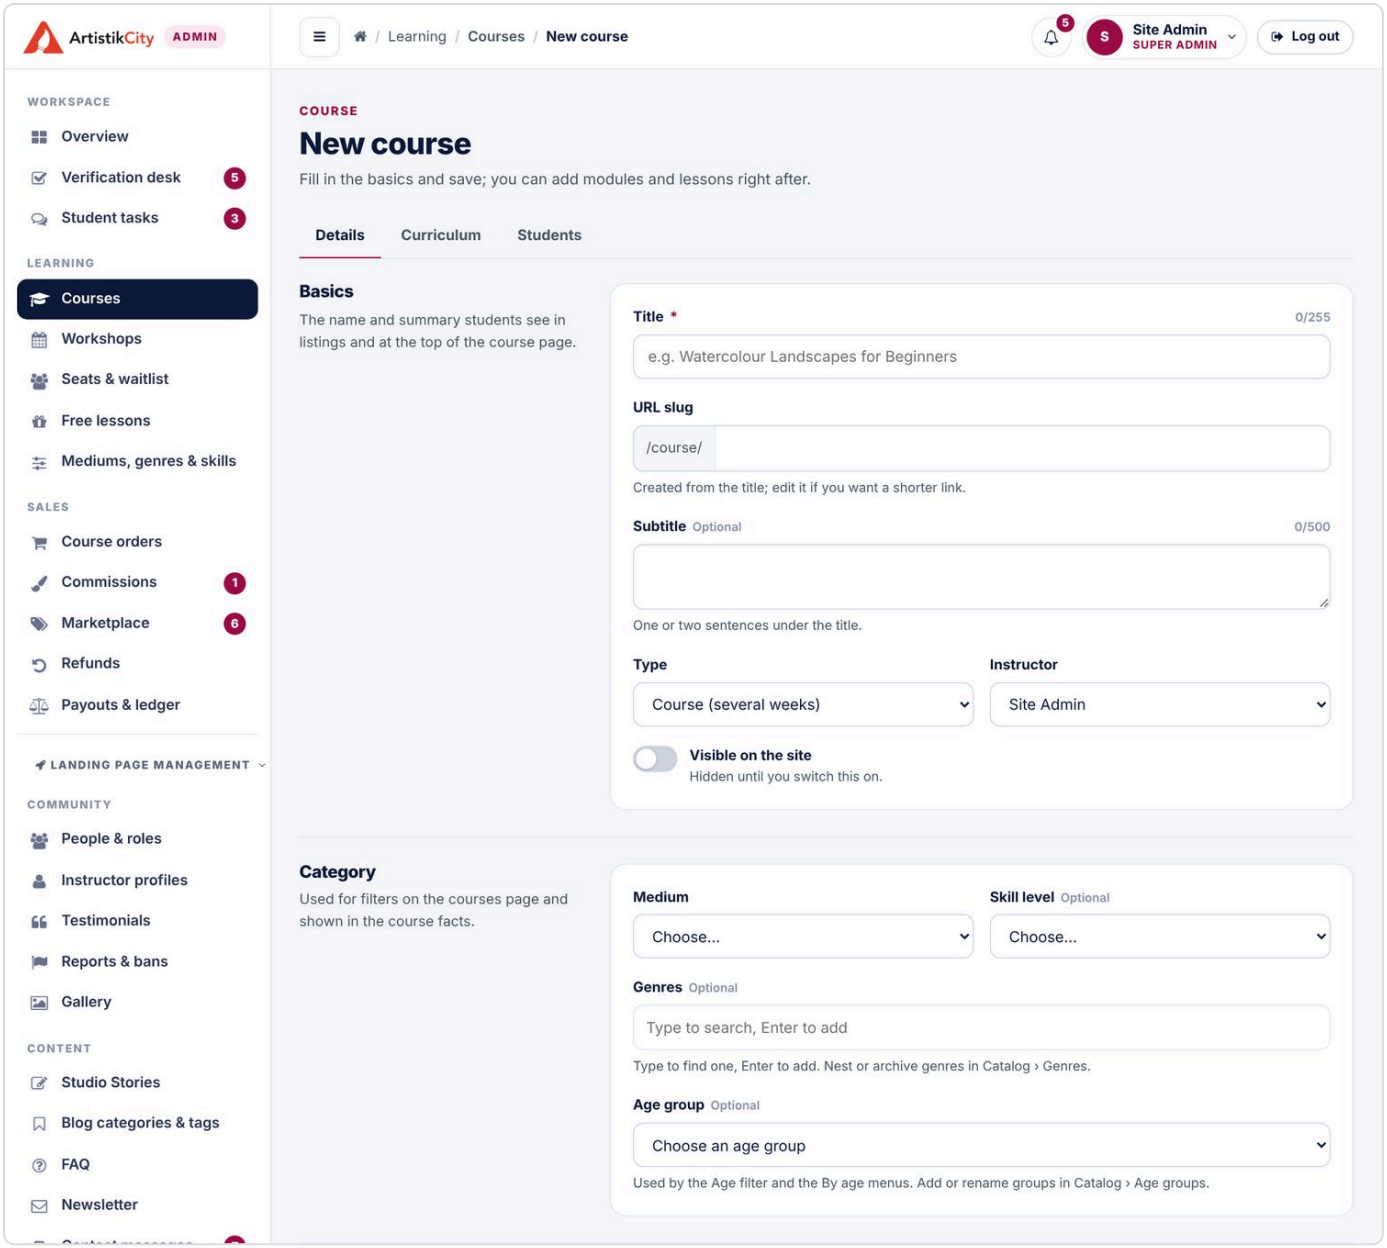

Figure 11. A new course: Curriculum and Students unlock after the first save.

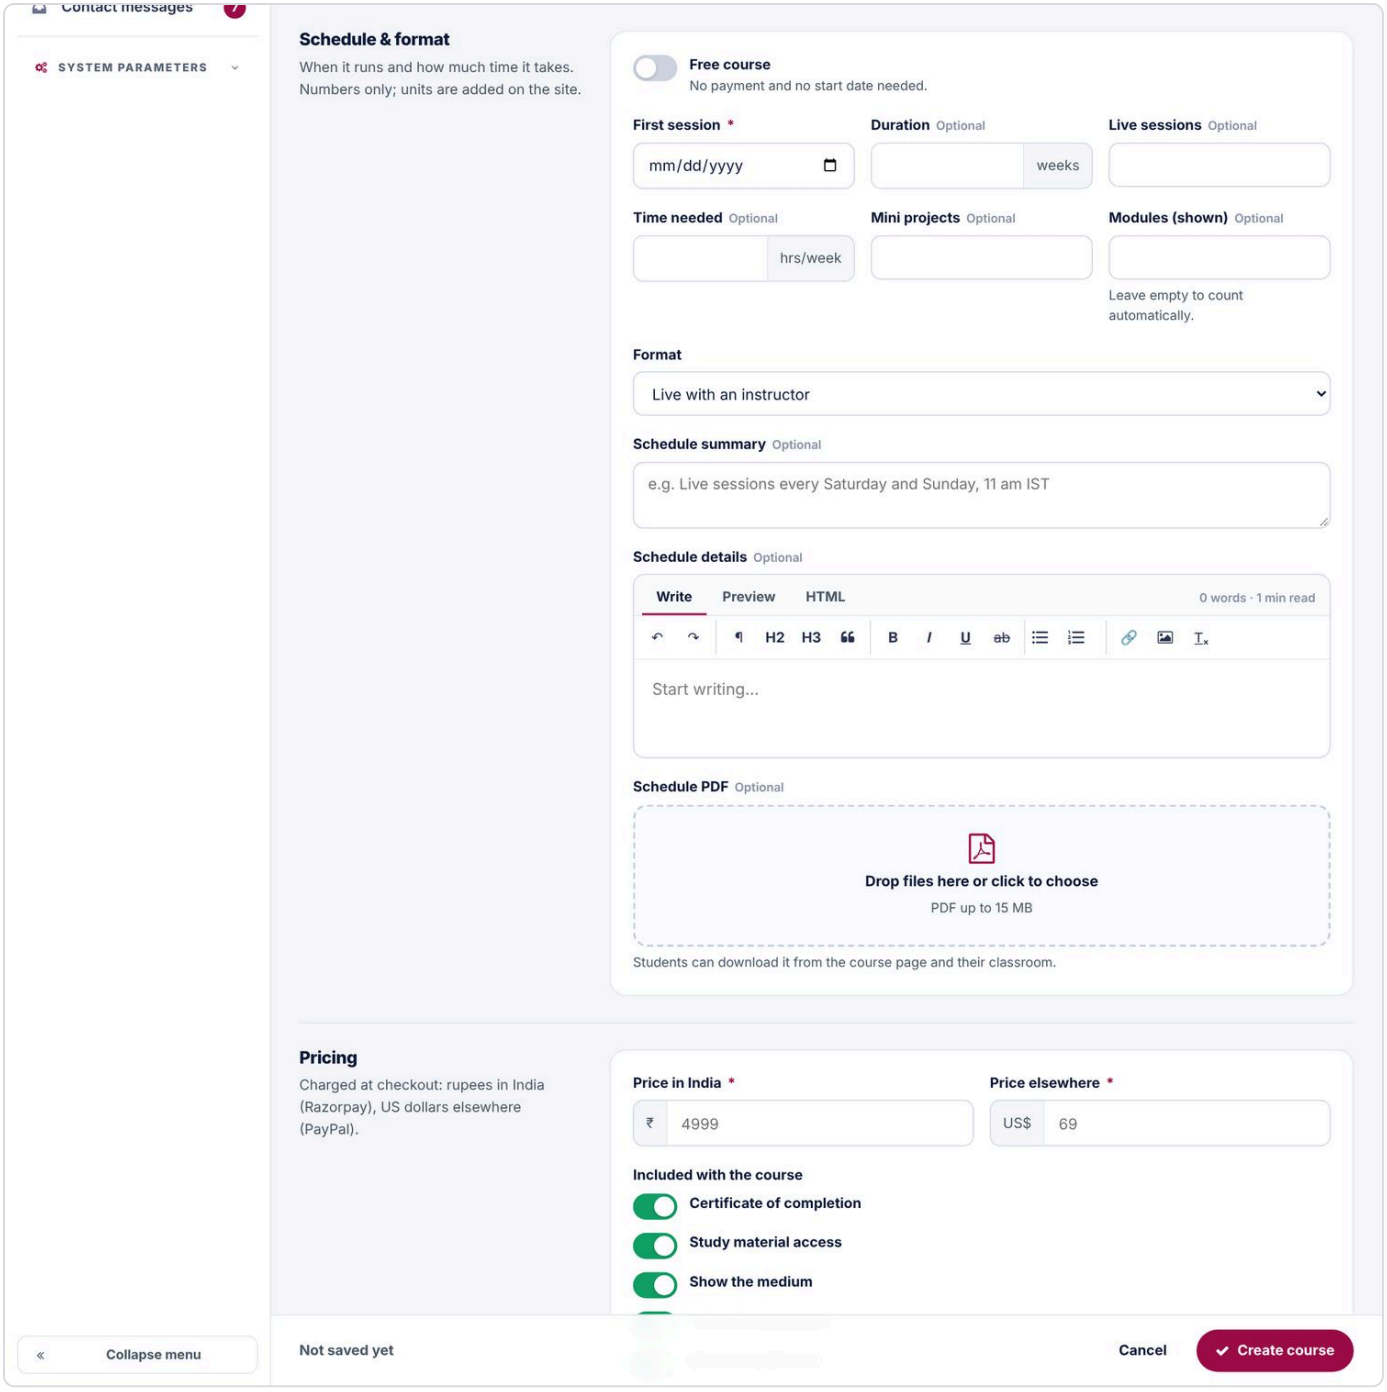

Figure 11. A new course: Curriculum and Students unlock after the first save. (continued, part 2 of 2)

> **TIP** Numbers only in the schedule fields: the site adds the units (“4 weeks”, “2 hrs/week”).

3.3 Curriculum: modules, lessons and tasks

1. Open the **Curriculum** tab. Modules are listed in order; drag to reorder.
2. **Add a module**, then **Add a lesson** inside it.
3. In the lesson drawer: title, module, lesson video (paste a YouTube/Vimeo link or upload a file), lesson notes (rich text), and a notes PDF.
4. Add a practice task to a lesson if students should try something and get feedback.
5. Add the course projects (final assignments) at the bottom.

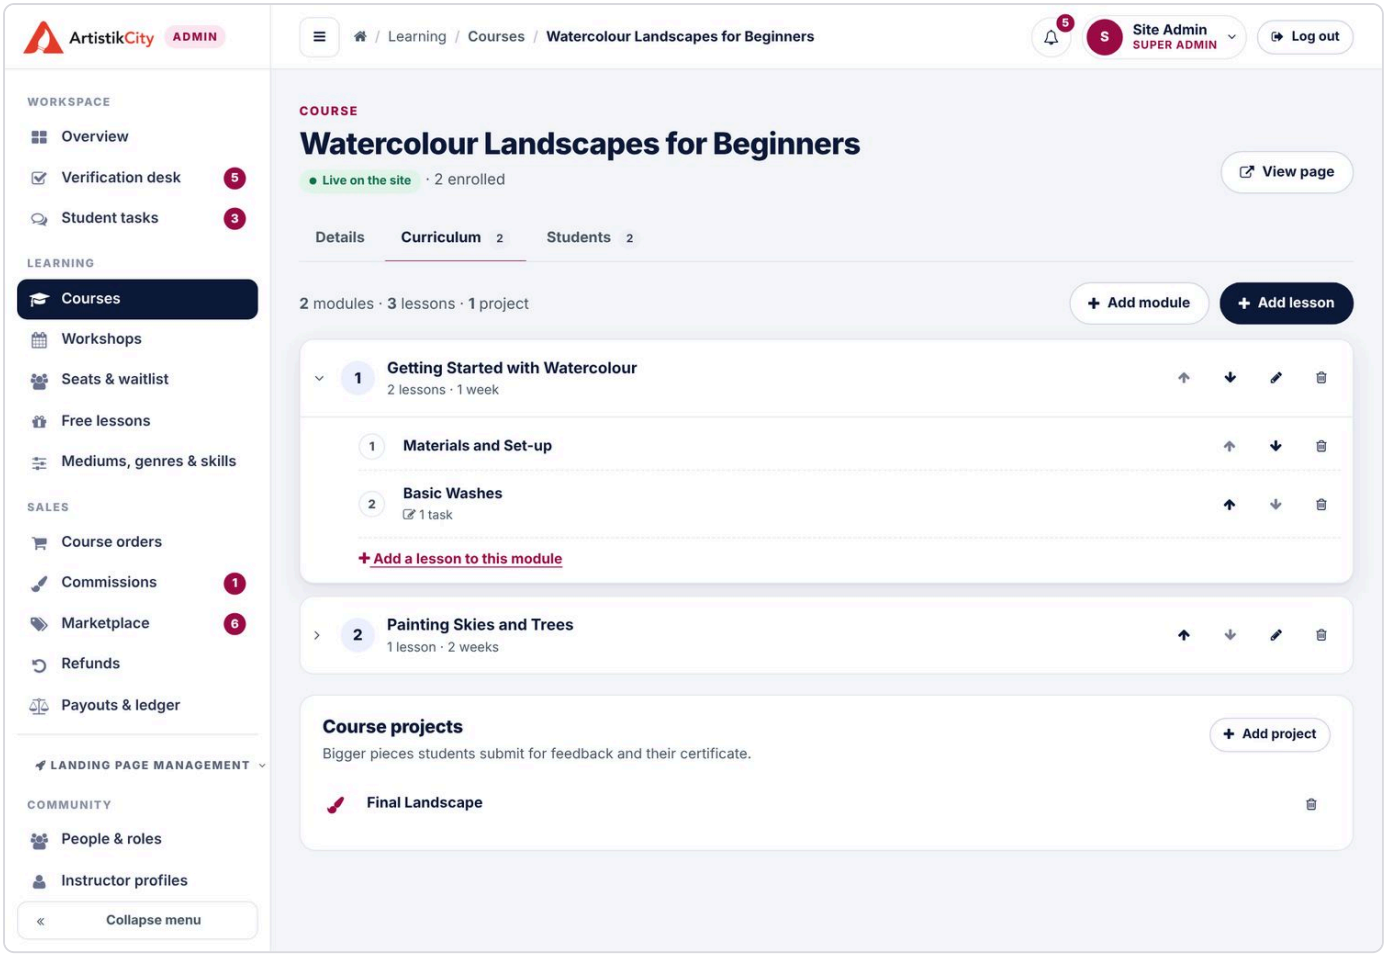

Figure 12. Curriculum.

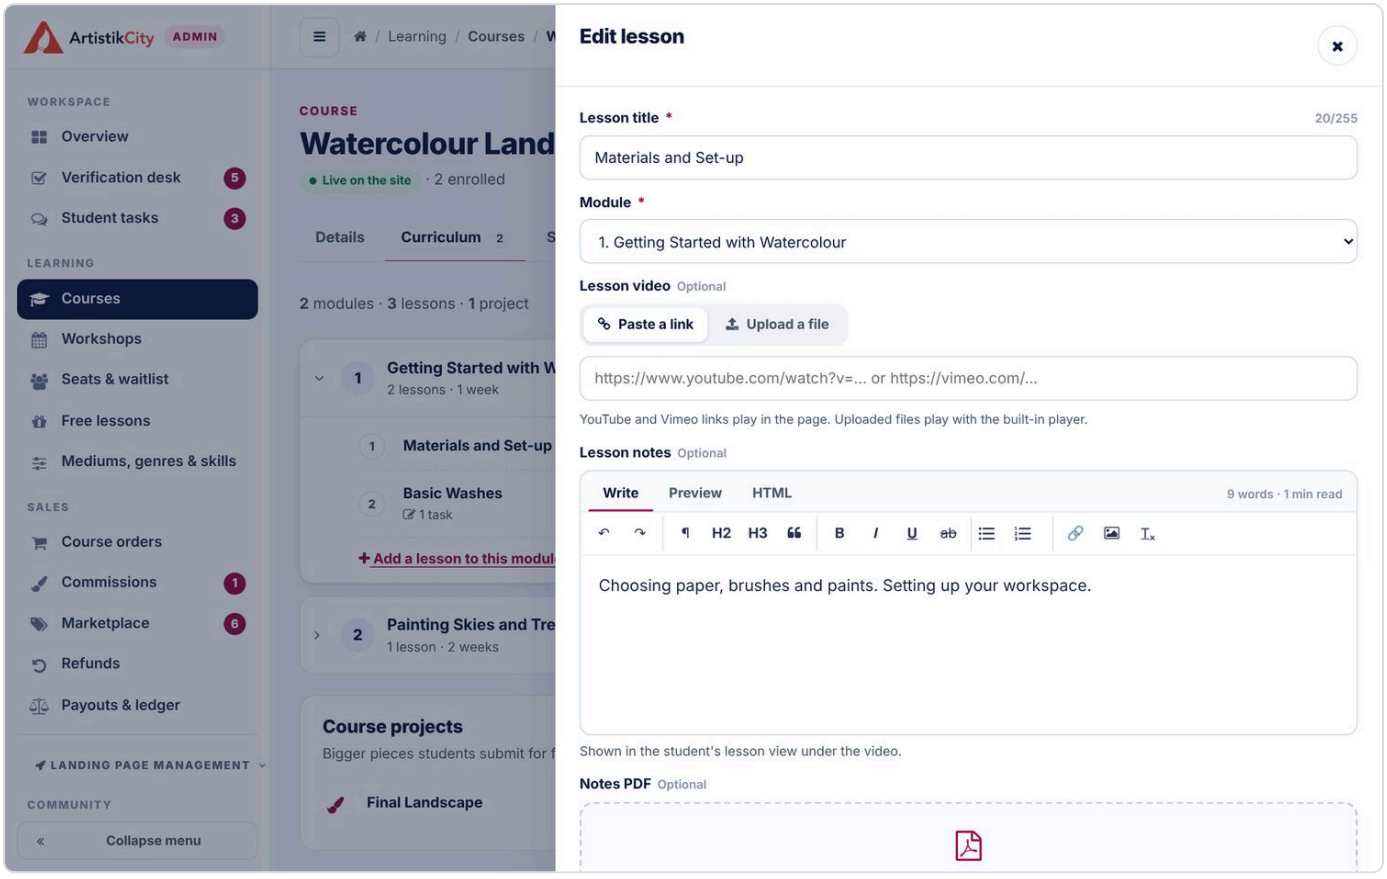

Figure 13. Editing a lesson.

Each lesson shows its own video only. The course trailer (Details › Photos & intro video) is for the public course page.

3.4 Students tab: notices, dates and cancellation

- The enrolled students with progress and status.
- **Message students**: a notice in their studio plus an e-mail, with a delivery log.
- **Move the start date**: students are told.
- **Cancel the run**: refunds are queued in Sales › Refunds for you to confirm and the waitlist is closed.

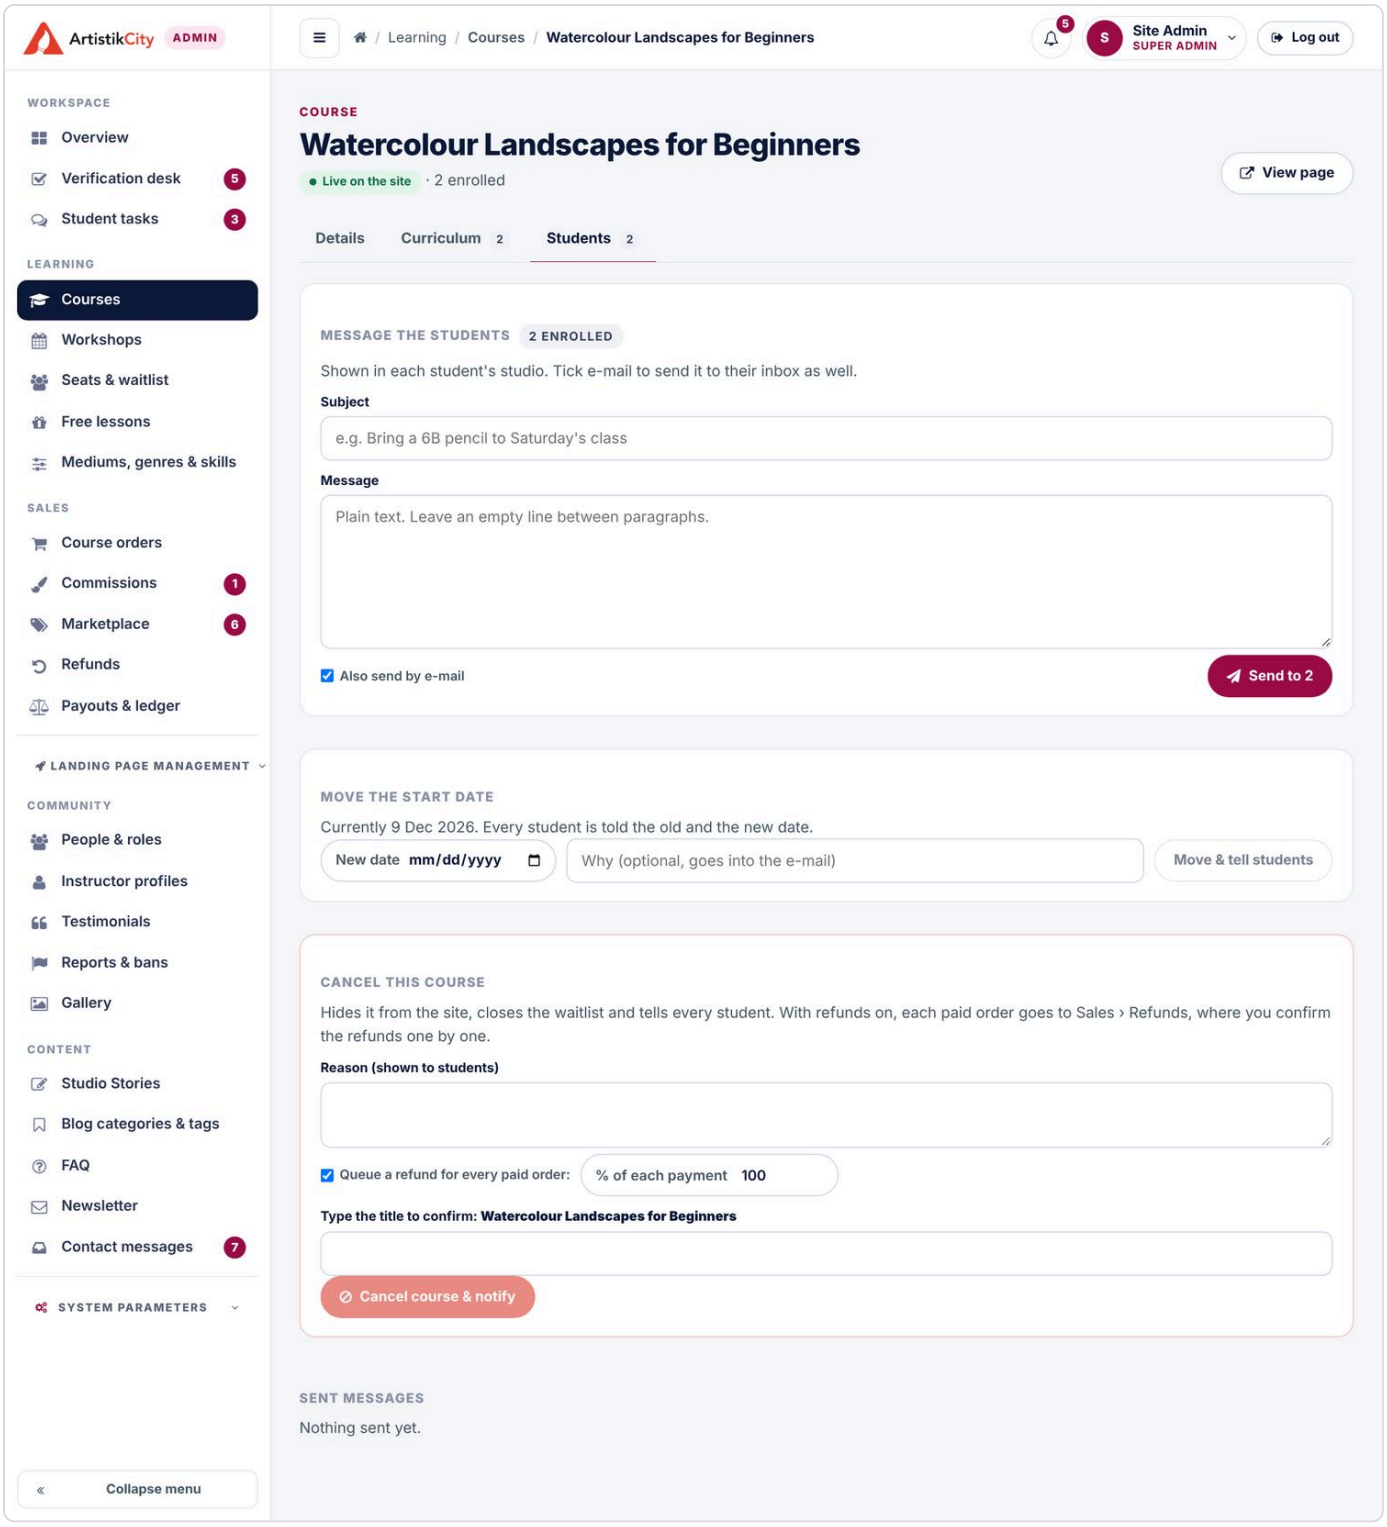

Figure 14. Students tab.

3.5 Workshops

The same list and editor as courses, filtered to workshops.

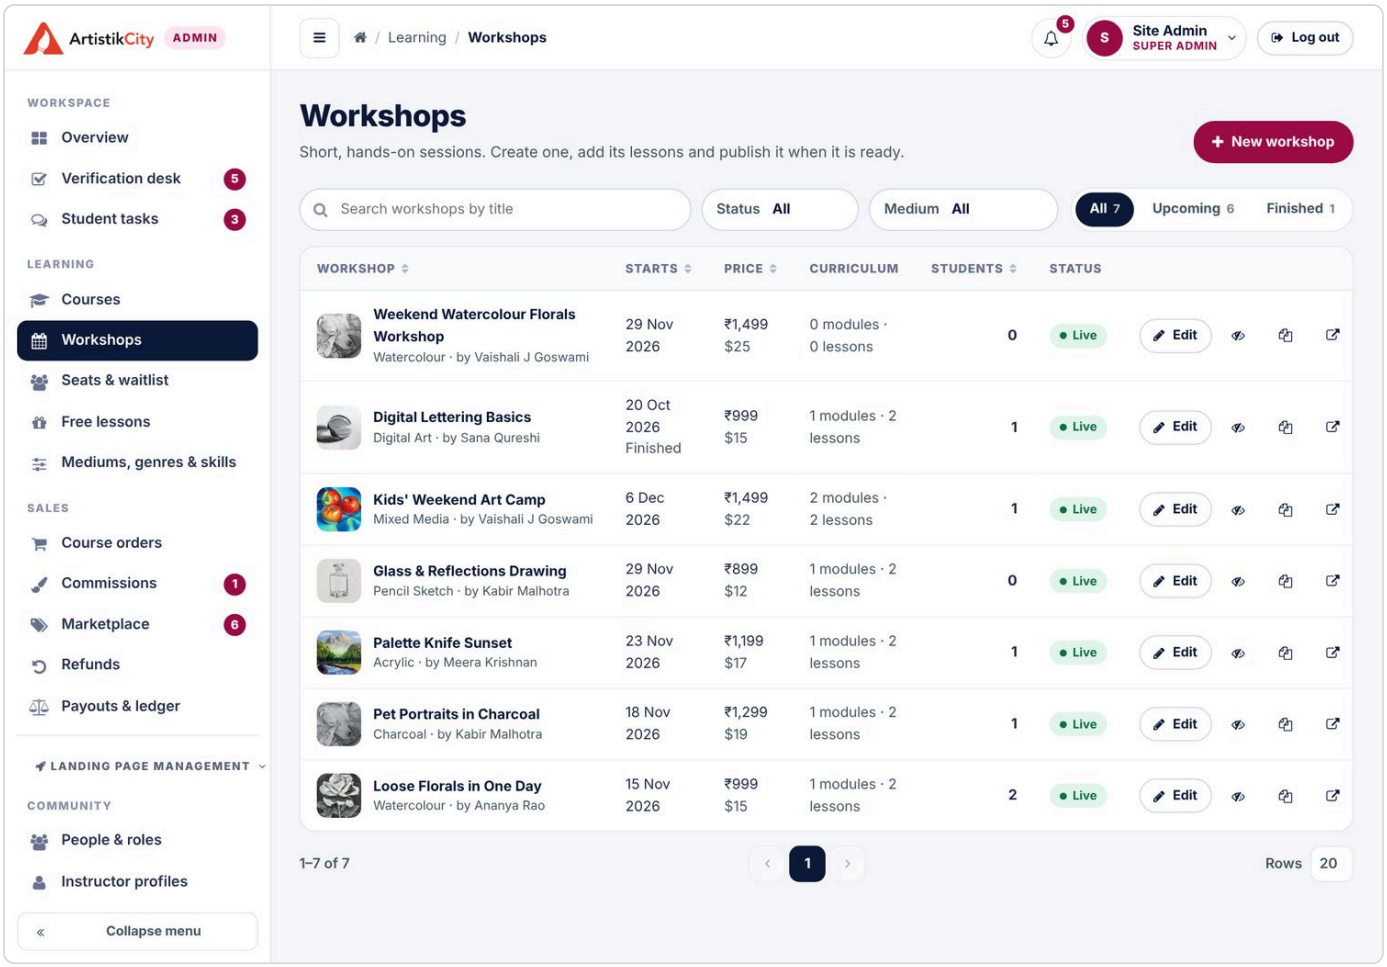

Figure 15. Workshops.

3.6 Seats & waitlist

Set a seat limit for live courses here (empty = no limit). Checkout holds a seat for 15 minutes; when a course is full students can join the waitlist. Here you see each course's seats and waitlist, invite the next person when a seat frees up, or create a priority link for someone you want to let in. Invitation links are single-use.

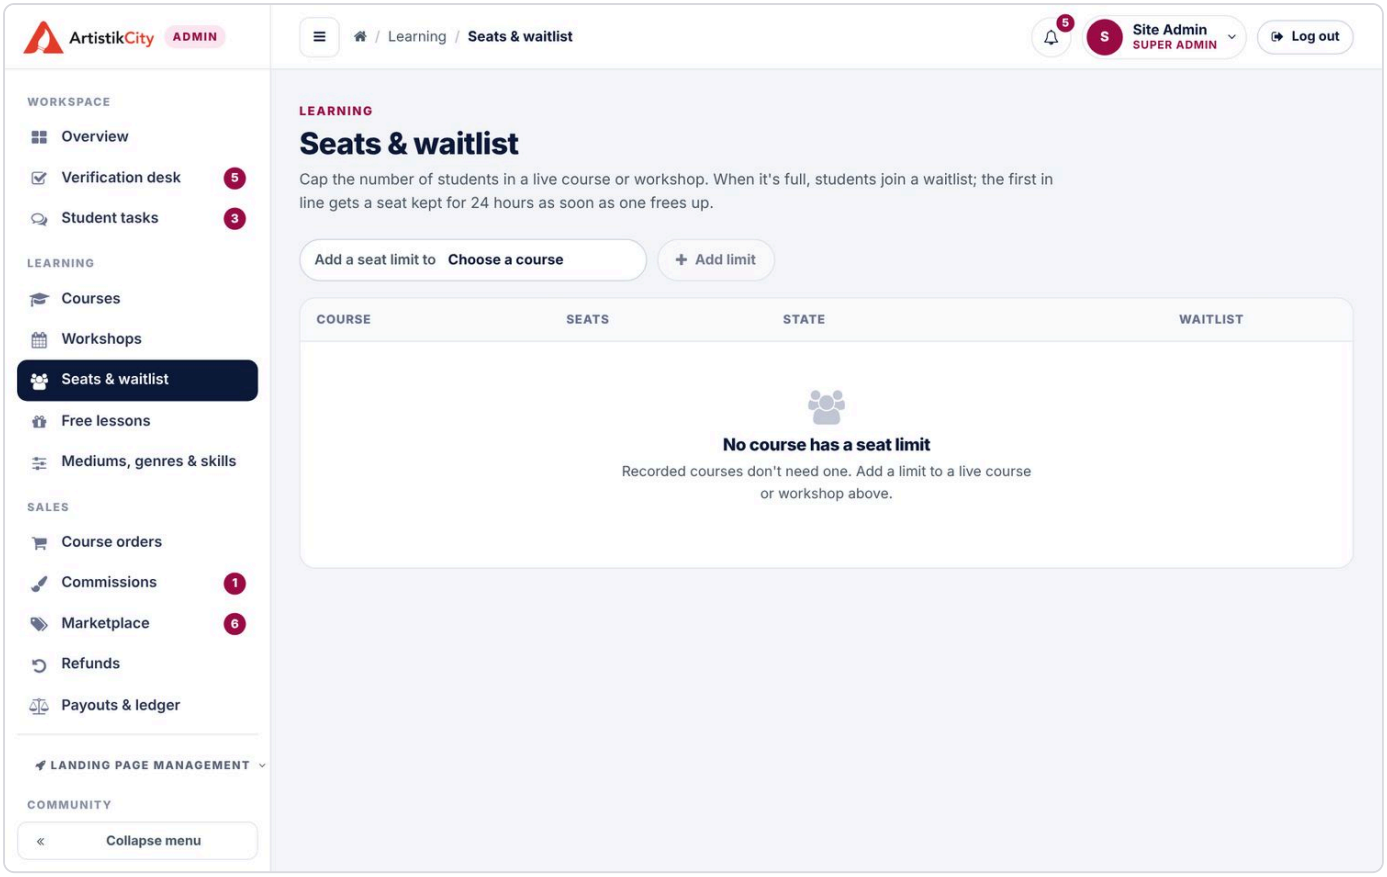

Figure 16. Seats & waitlist (no full courses here).

3.7 Free lessons

Short taster lessons students can open for free from their studio. Create, edit, order and hide them here.

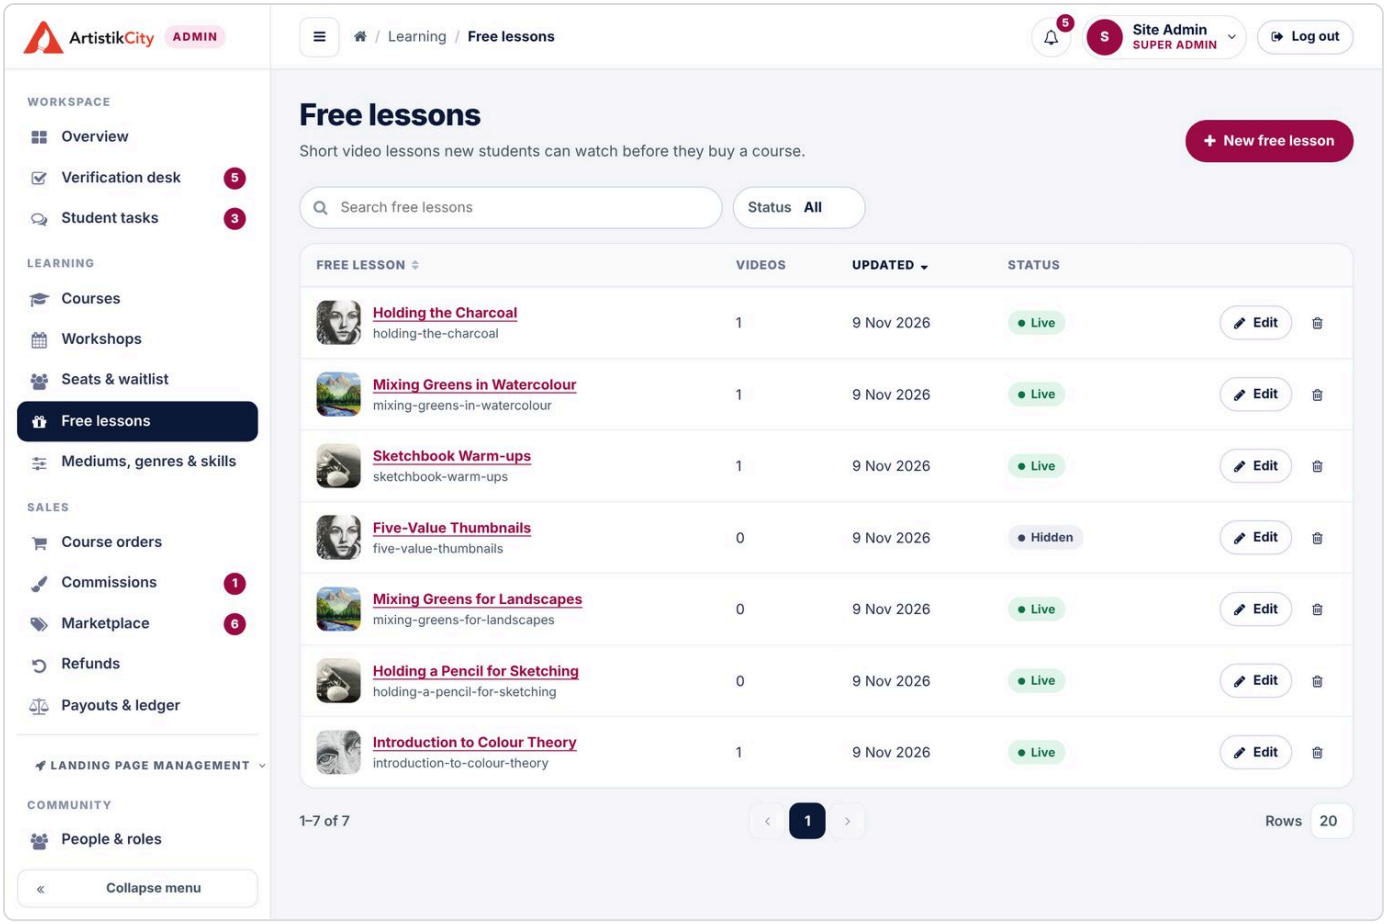

Figure 17. Free lessons.

3.8 Mediums, genres & skills

The lists behind the filters and course fields: mediums, genres, skill levels, course types, categories and age groups. Items can be nested under a parent and archived. Renaming an age group renames it on every course; a group in use cannot be deleted.

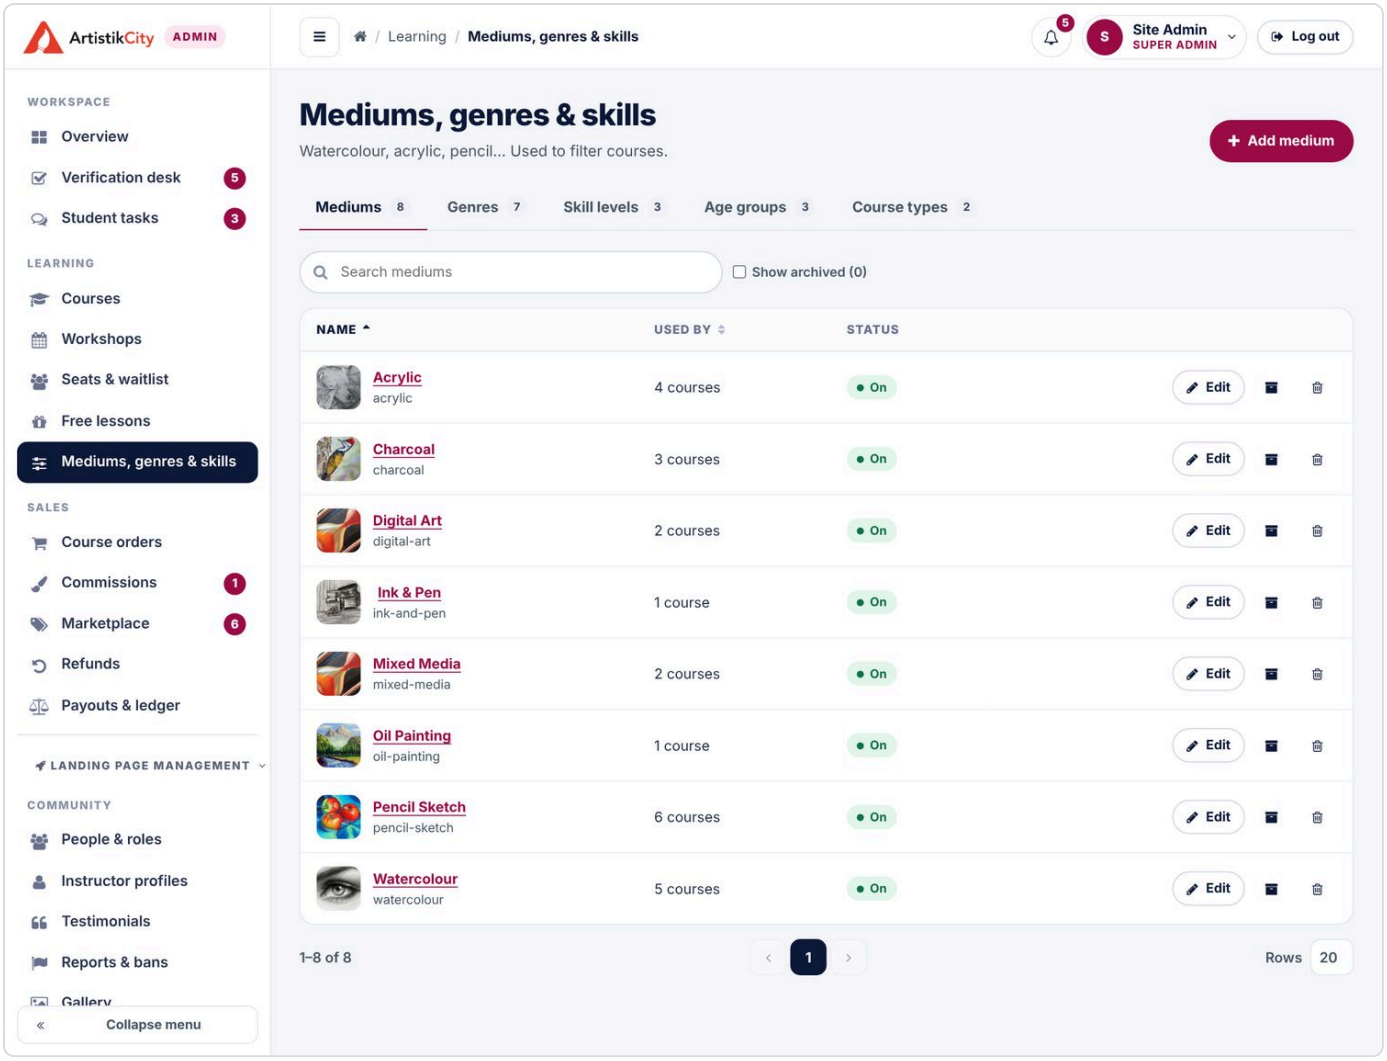

Figure 18. Mediums, genres & skills.

CHAPTER 4

Sales

Money in, goods out, money back and money paid to artists.

4.1 Course orders

Every course and workshop order with totals at the top, filters, search and Export CSV. Test orders carry a TEST label. Click an order for the detail drawer: student, course, billing, payment and gateway response, history, enrolment progress, Change status and Issue certificate.

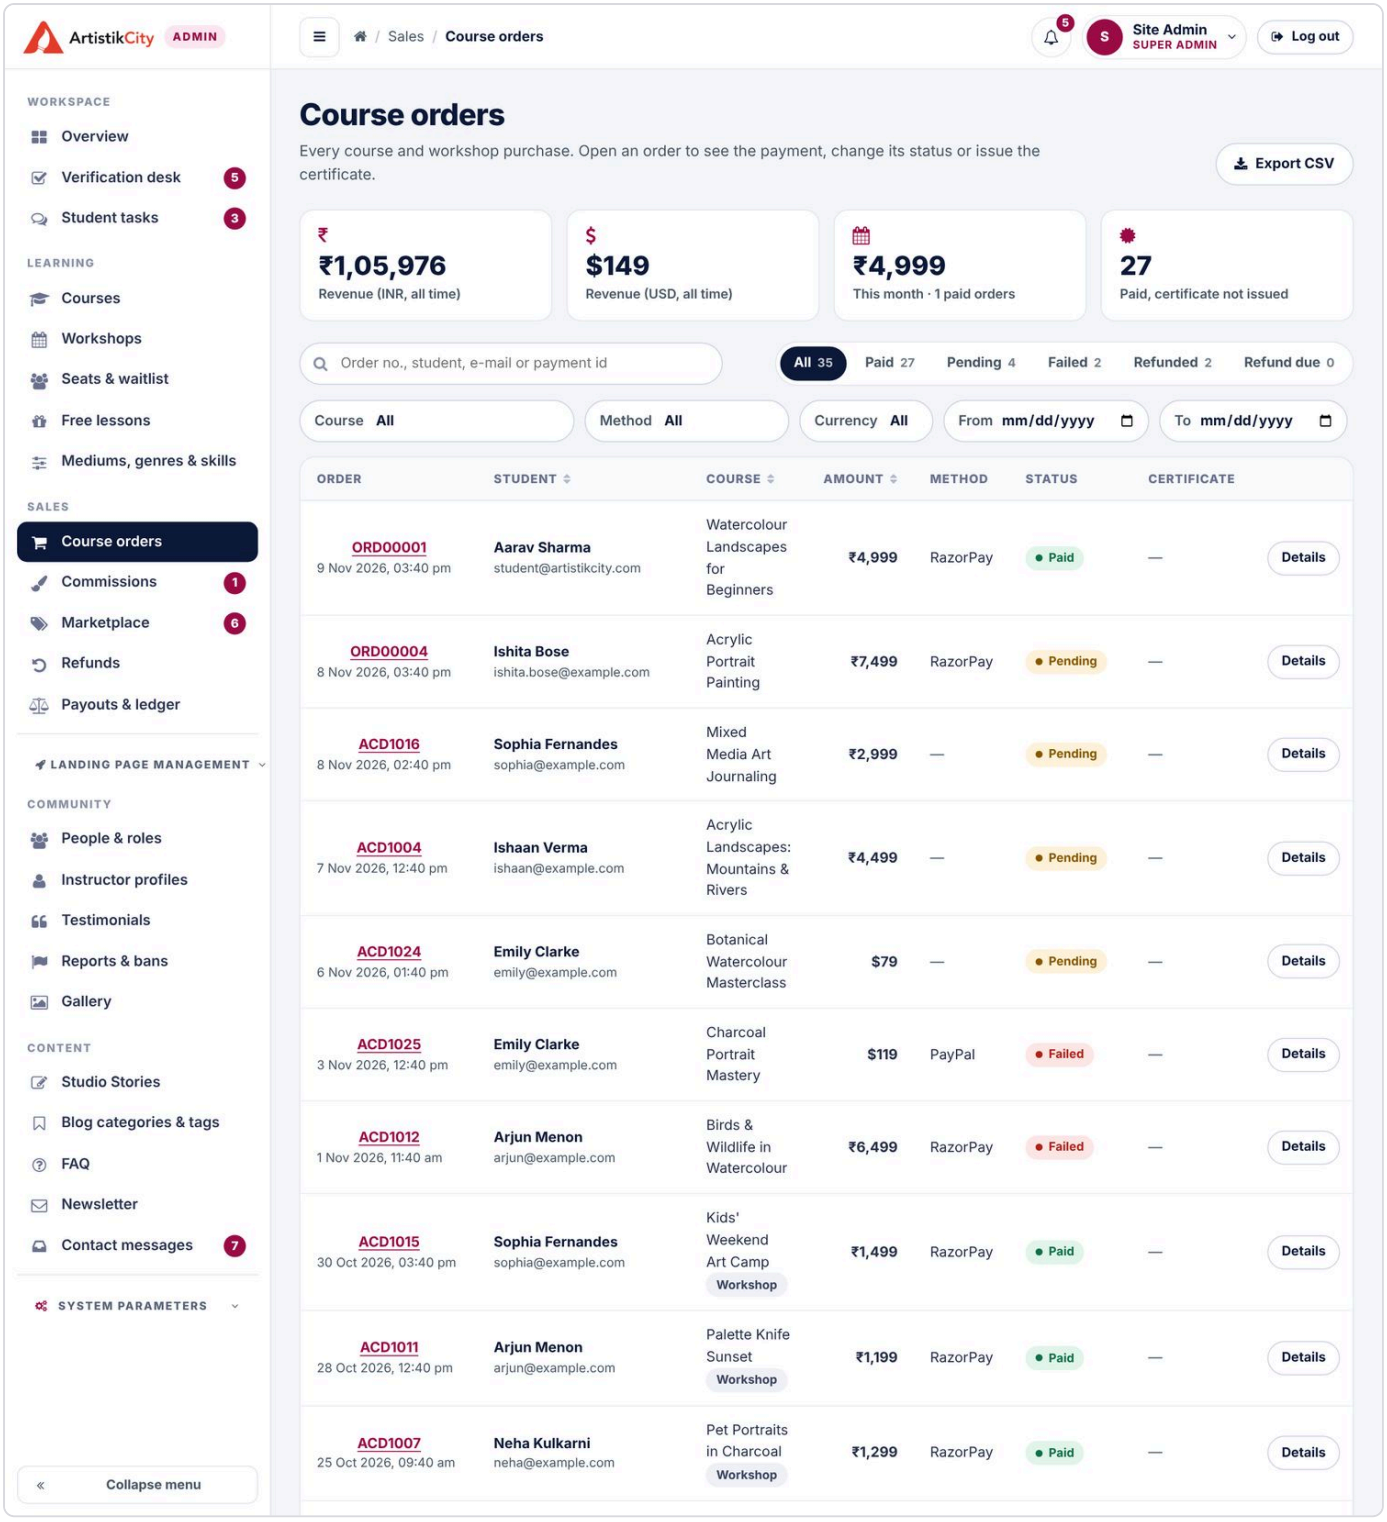

Figure 19. Course orders.

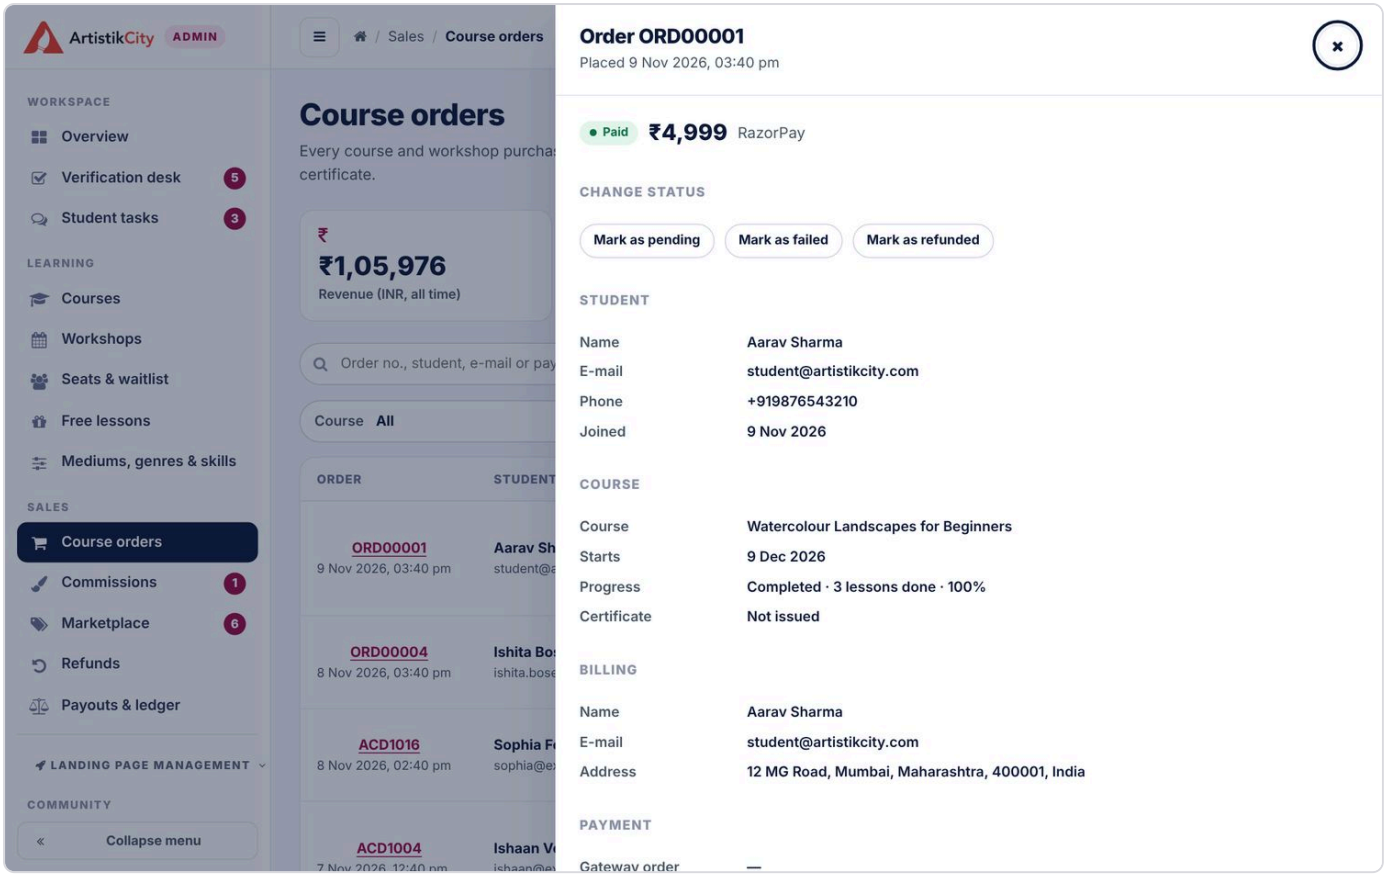

Figure 20. The order detail drawer.

4.2 Commissions

Commission orders on a board by stage: Awaiting payment, Queued, Proof sent, In production, Shipped, Completed. Move an order to the next stage with the button on its card, or choose a stage from the list on the order.

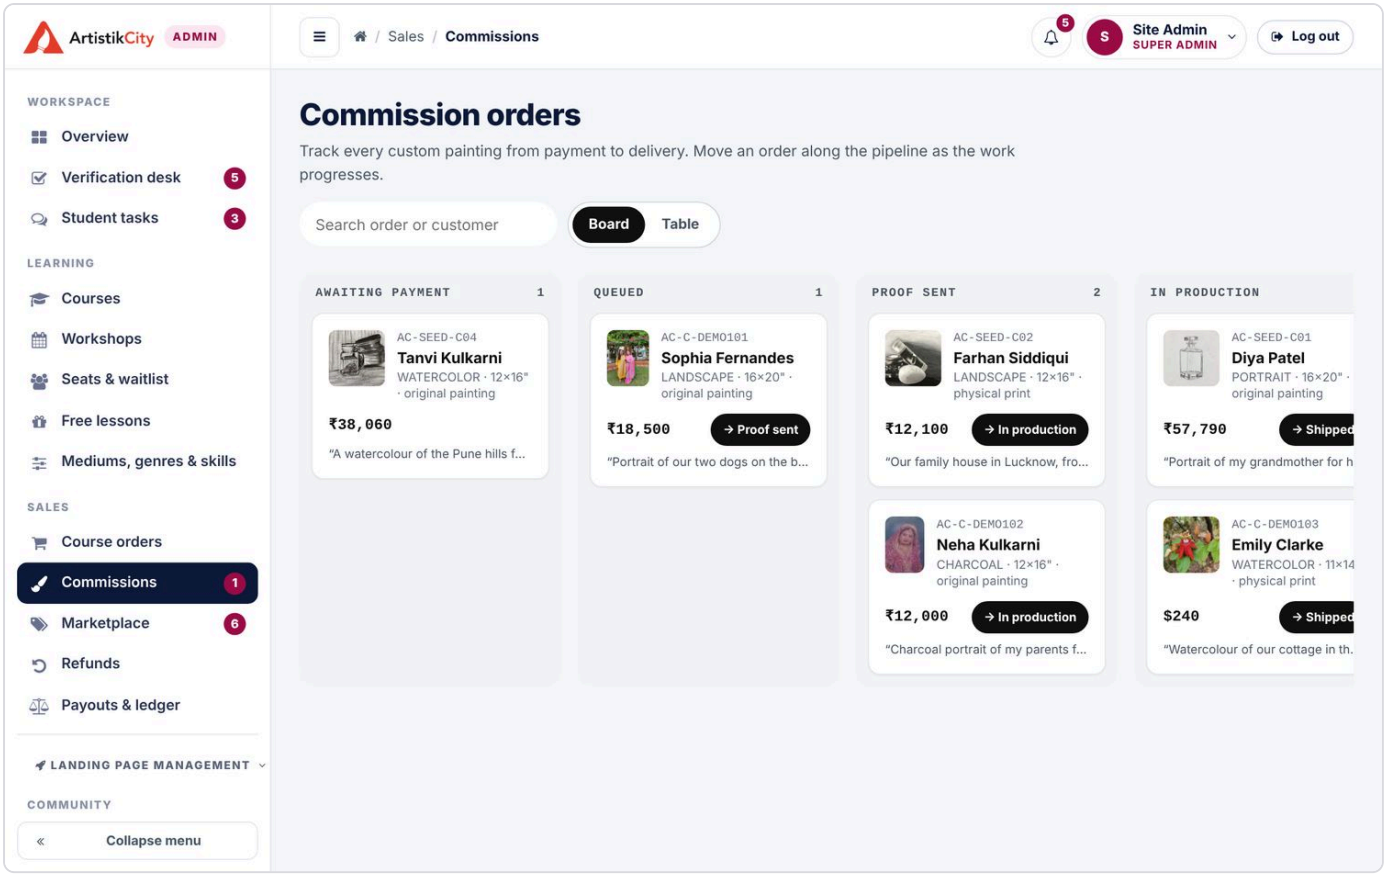

Figure 21. Commissions board.

4.3 Marketplace

One console for everything sold in the marketplace, in tabs:

TAB	USE IT TO
Paintings	List, edit, publish, archive and feature paintings; Prints sets the formats sold, edition size and high-resolution file.
Review queue	Approve new or edited listings (including students'), or send them back with notes.
Live holds	See who is holding which original (15-minute holds and offer holds) and release one if needed.
Orders	Cart orders: mark packed, shipped (courier and tracking number) and delivered, or refund; earlier single-original orders below.
Messages	Collectors' questions to the artist; reply, close or reopen.
Prices	Print sizes and prices, stretching and frame rates, shipping, custom-size limits and test payment mode.
Offers	All offers with their rounds; the offer rules (lowest offer %, answer and payment windows, rounds, limits) and per-painting overrides.
Coupons	Create, edit and switch off marketplace coupons (used codes are switched off rather than deleted).

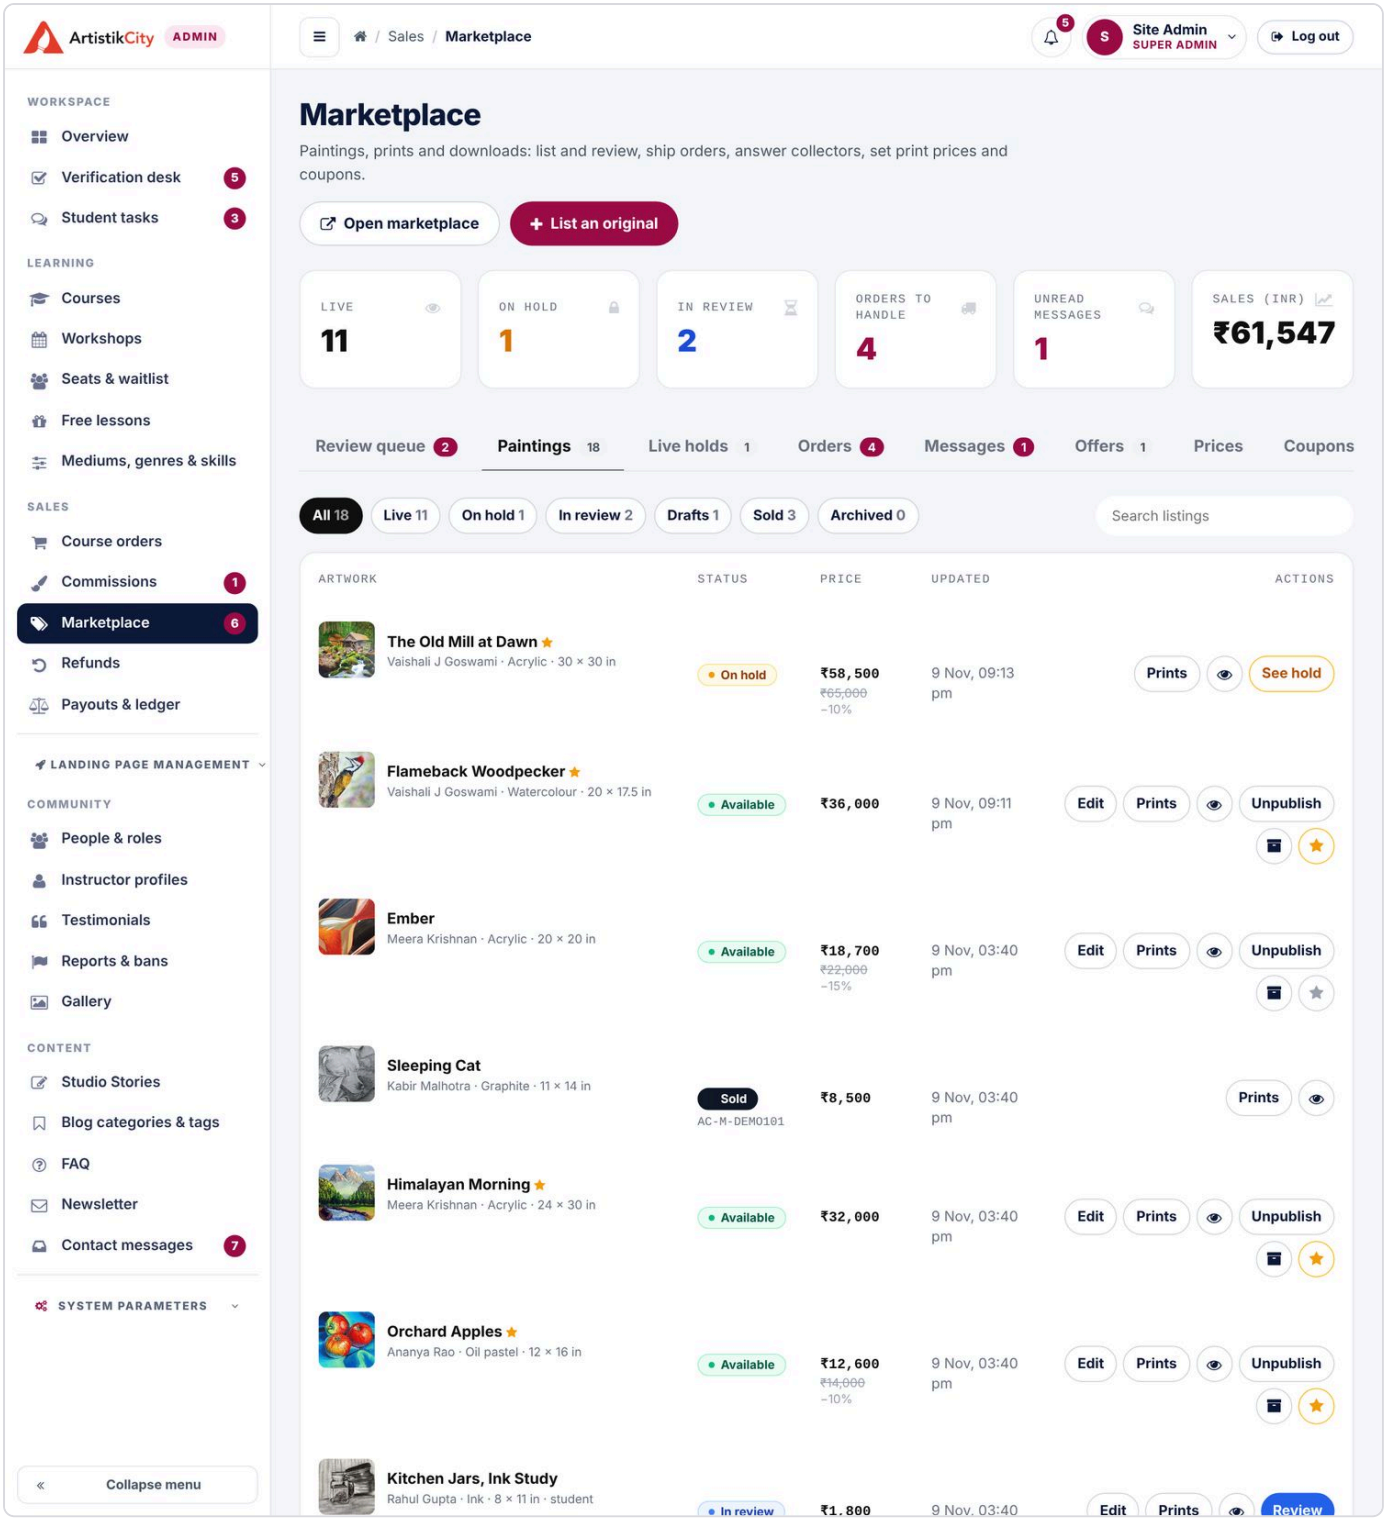

Figure 22. Paintings.

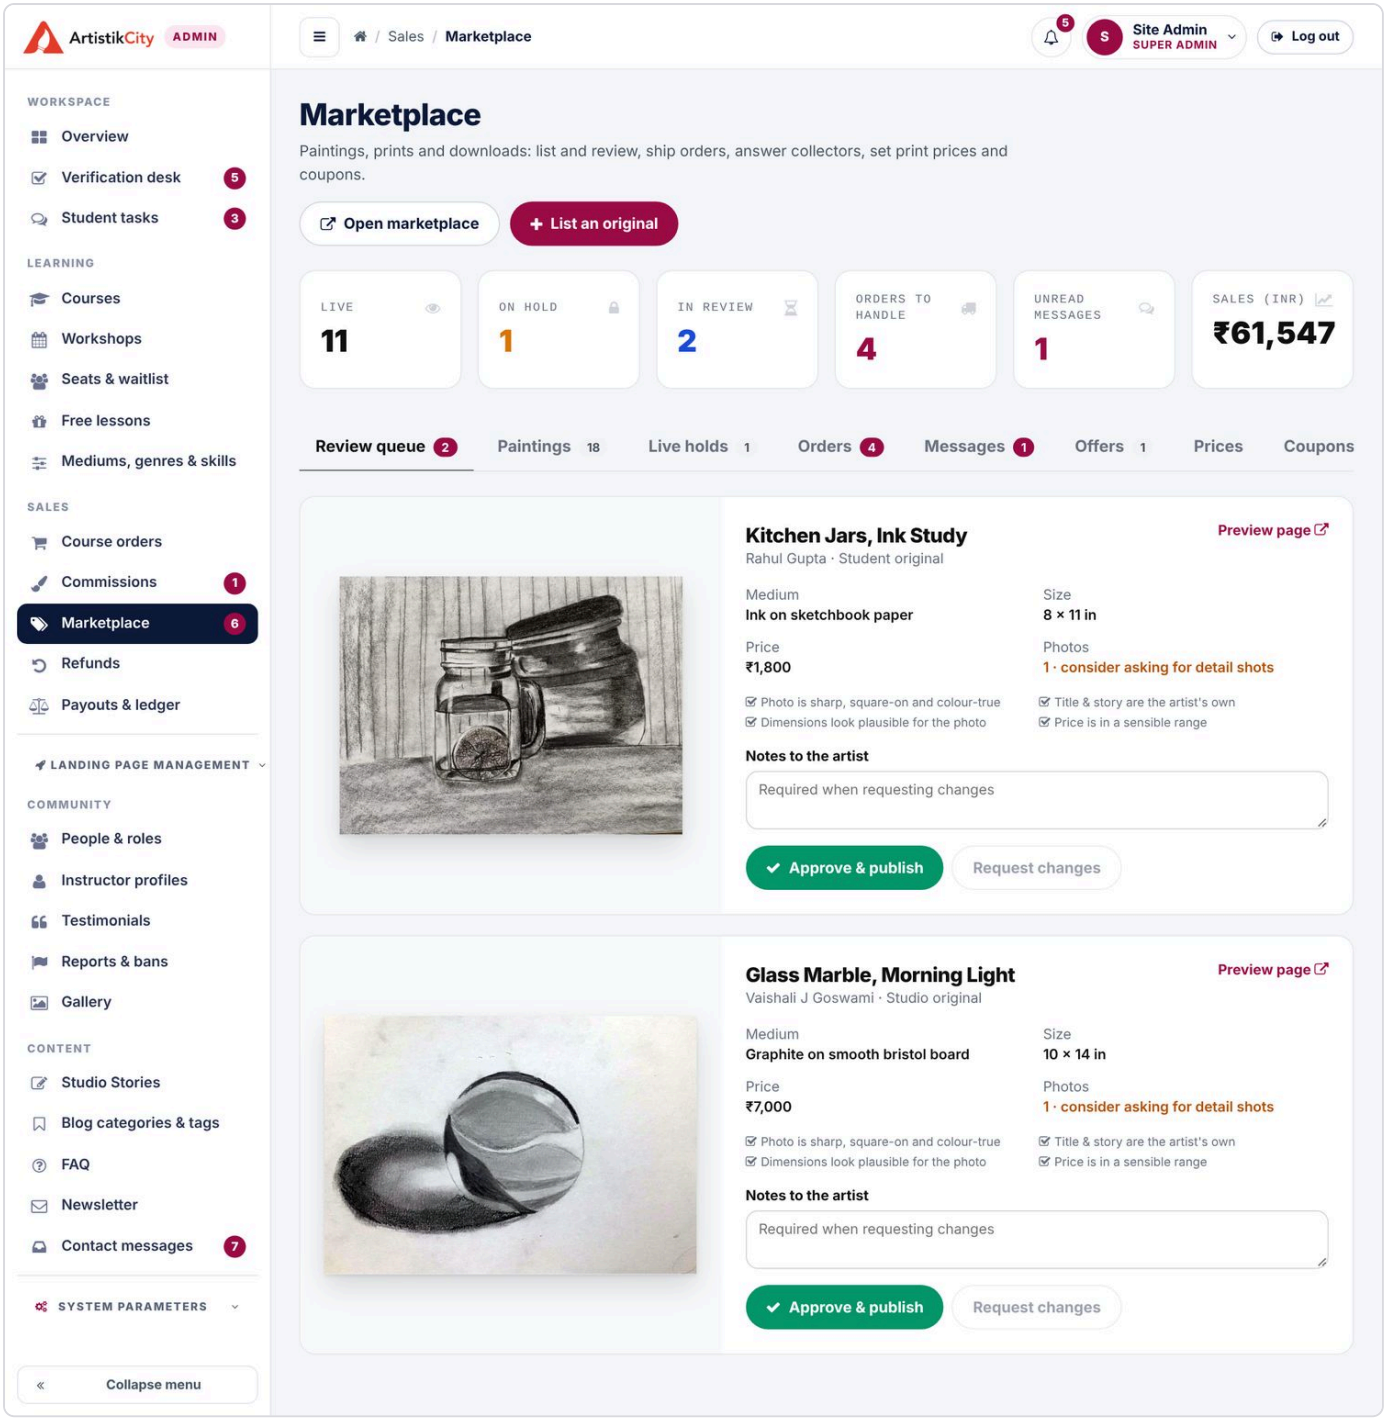

Figure 23. Review queue.

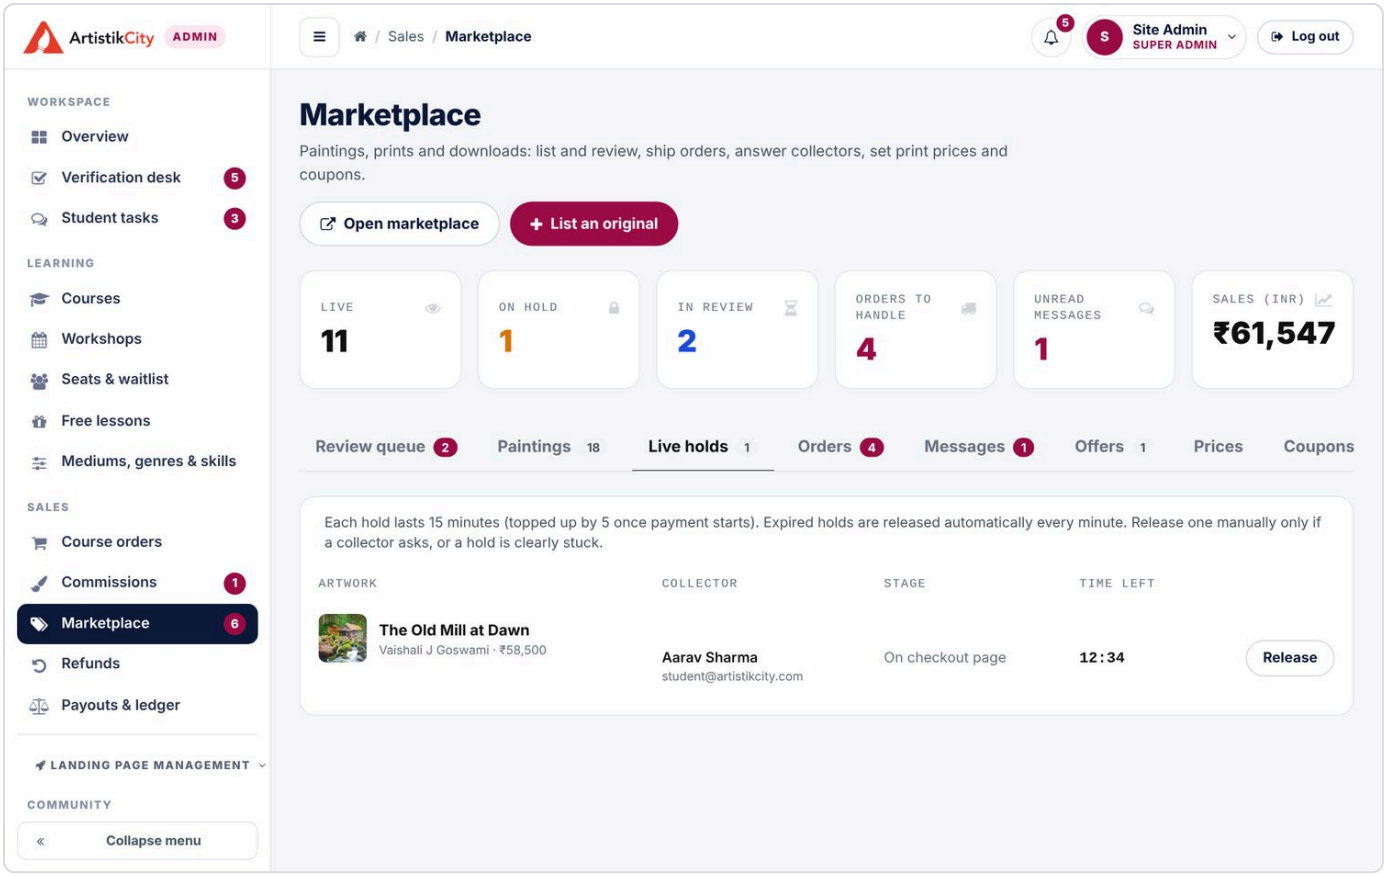

Figure 24. Live holds.

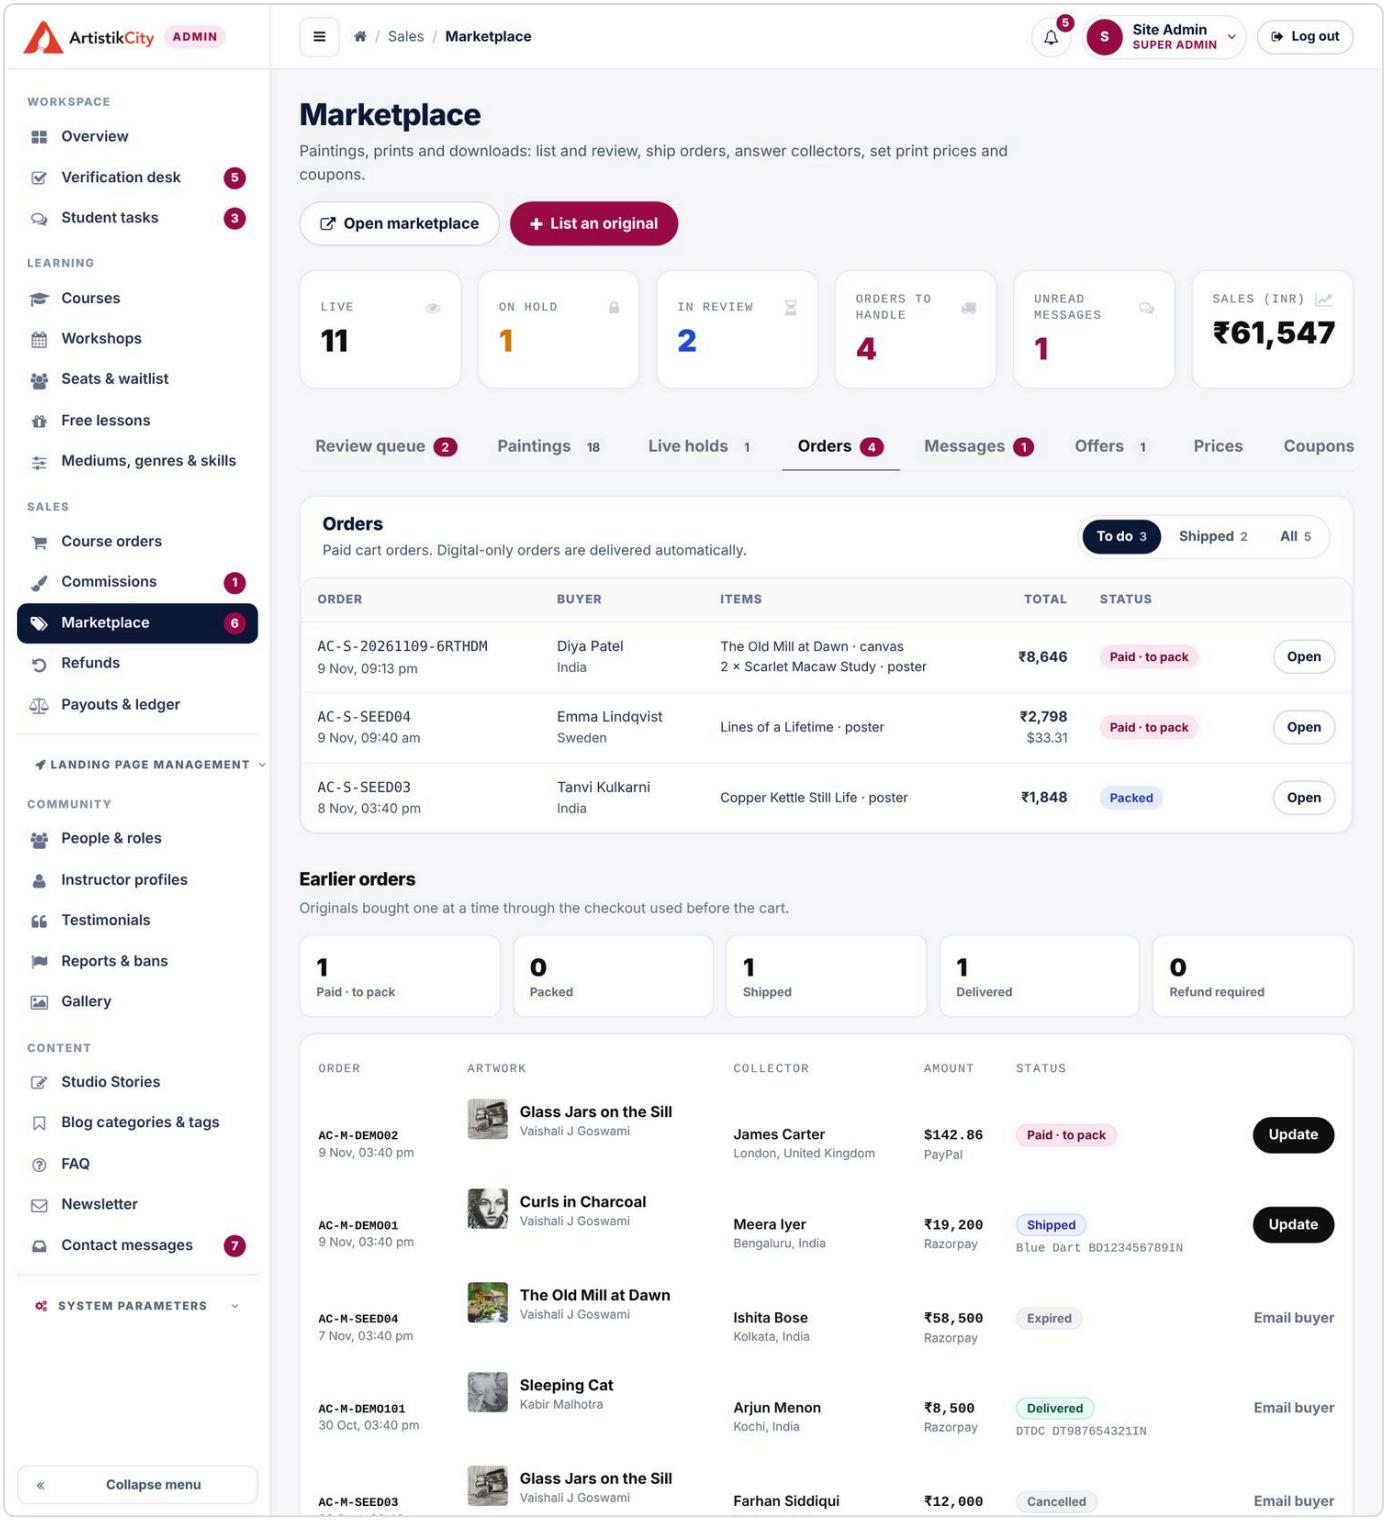

Figure 25. Orders.

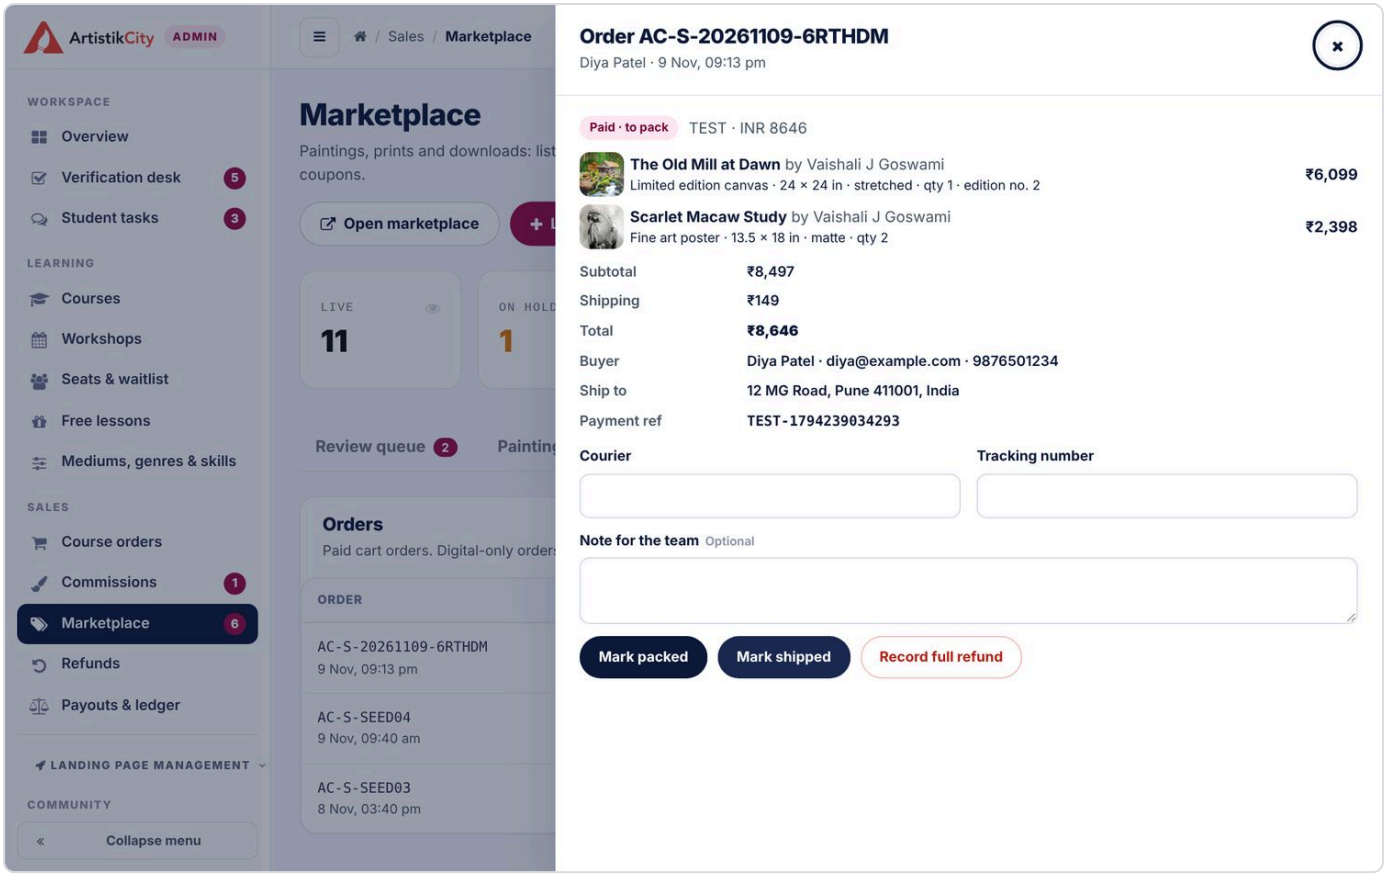

Figure 26. A shop order opened for fulfilment.

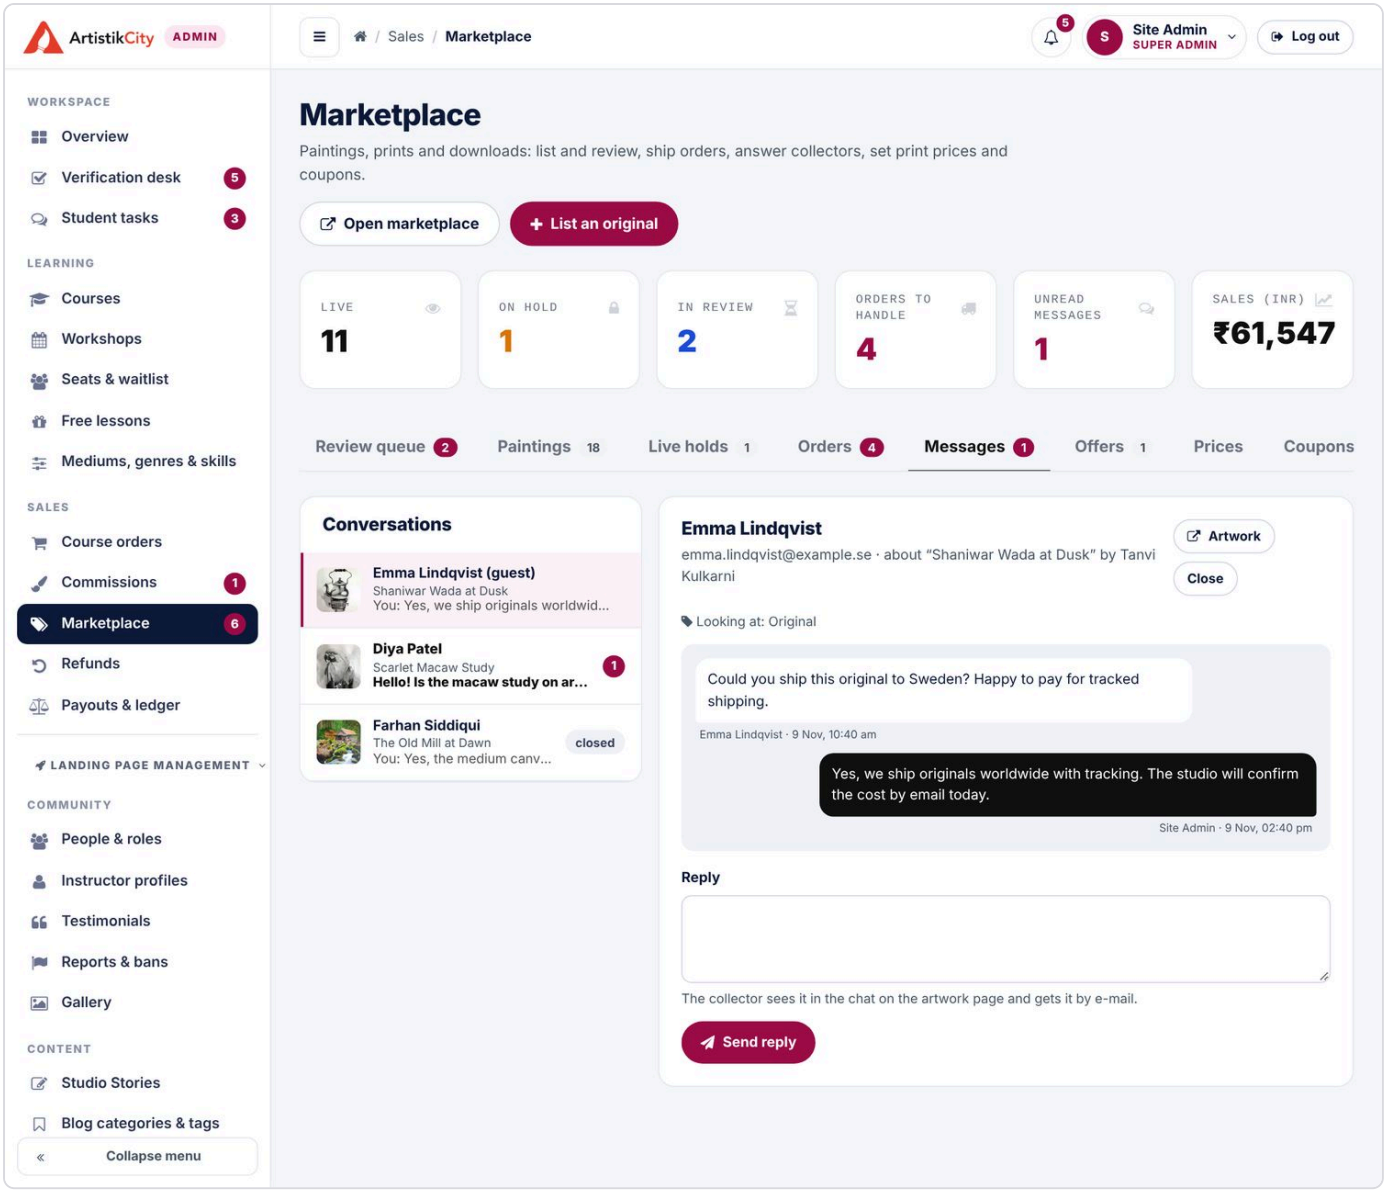

Figure 27. Messages.

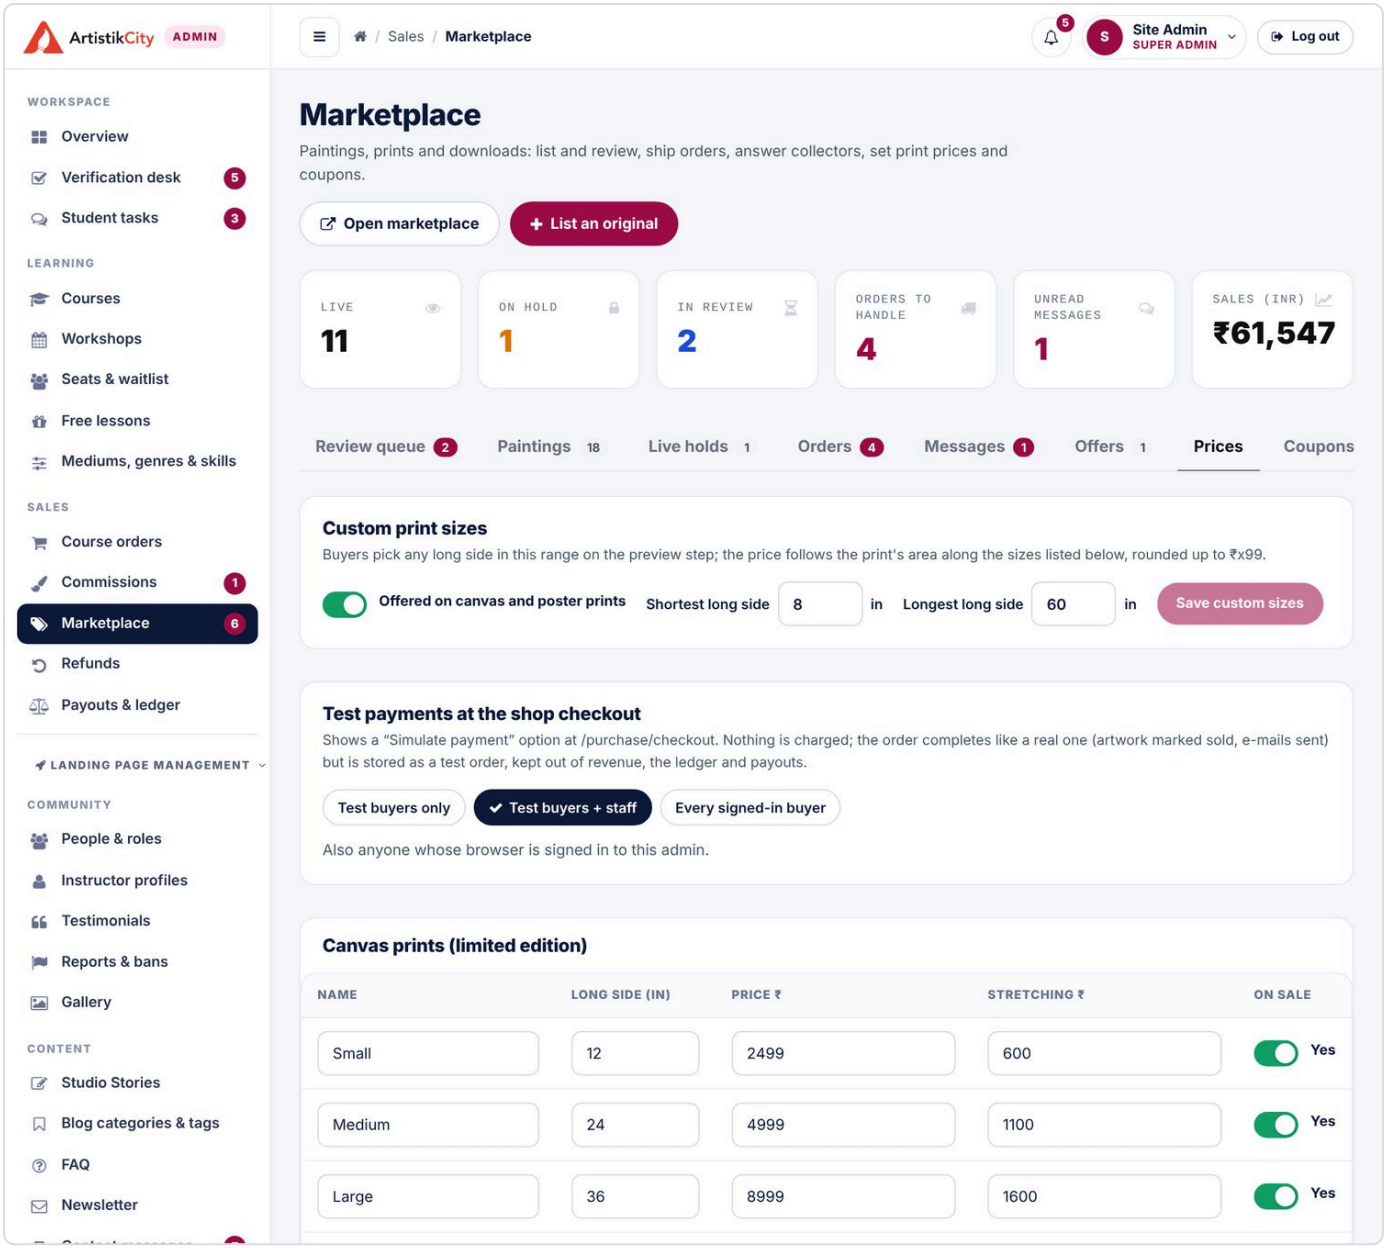

Figure 28. Prices.

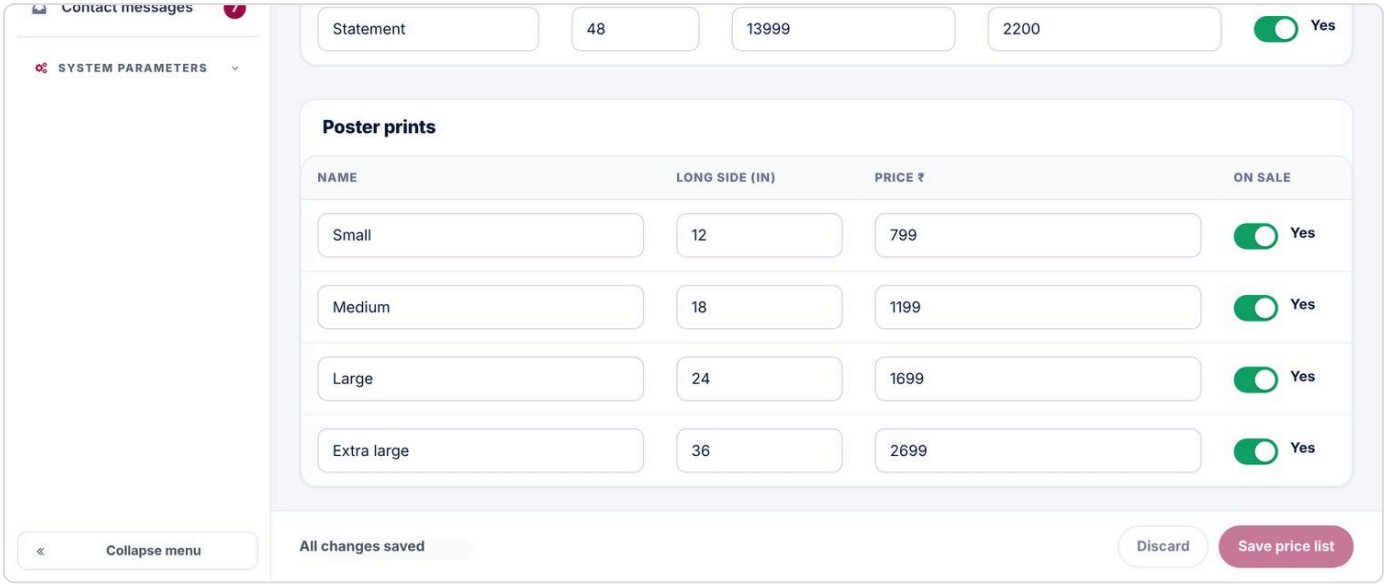

Figure 28. Prices. (continued, part 2 of 2)

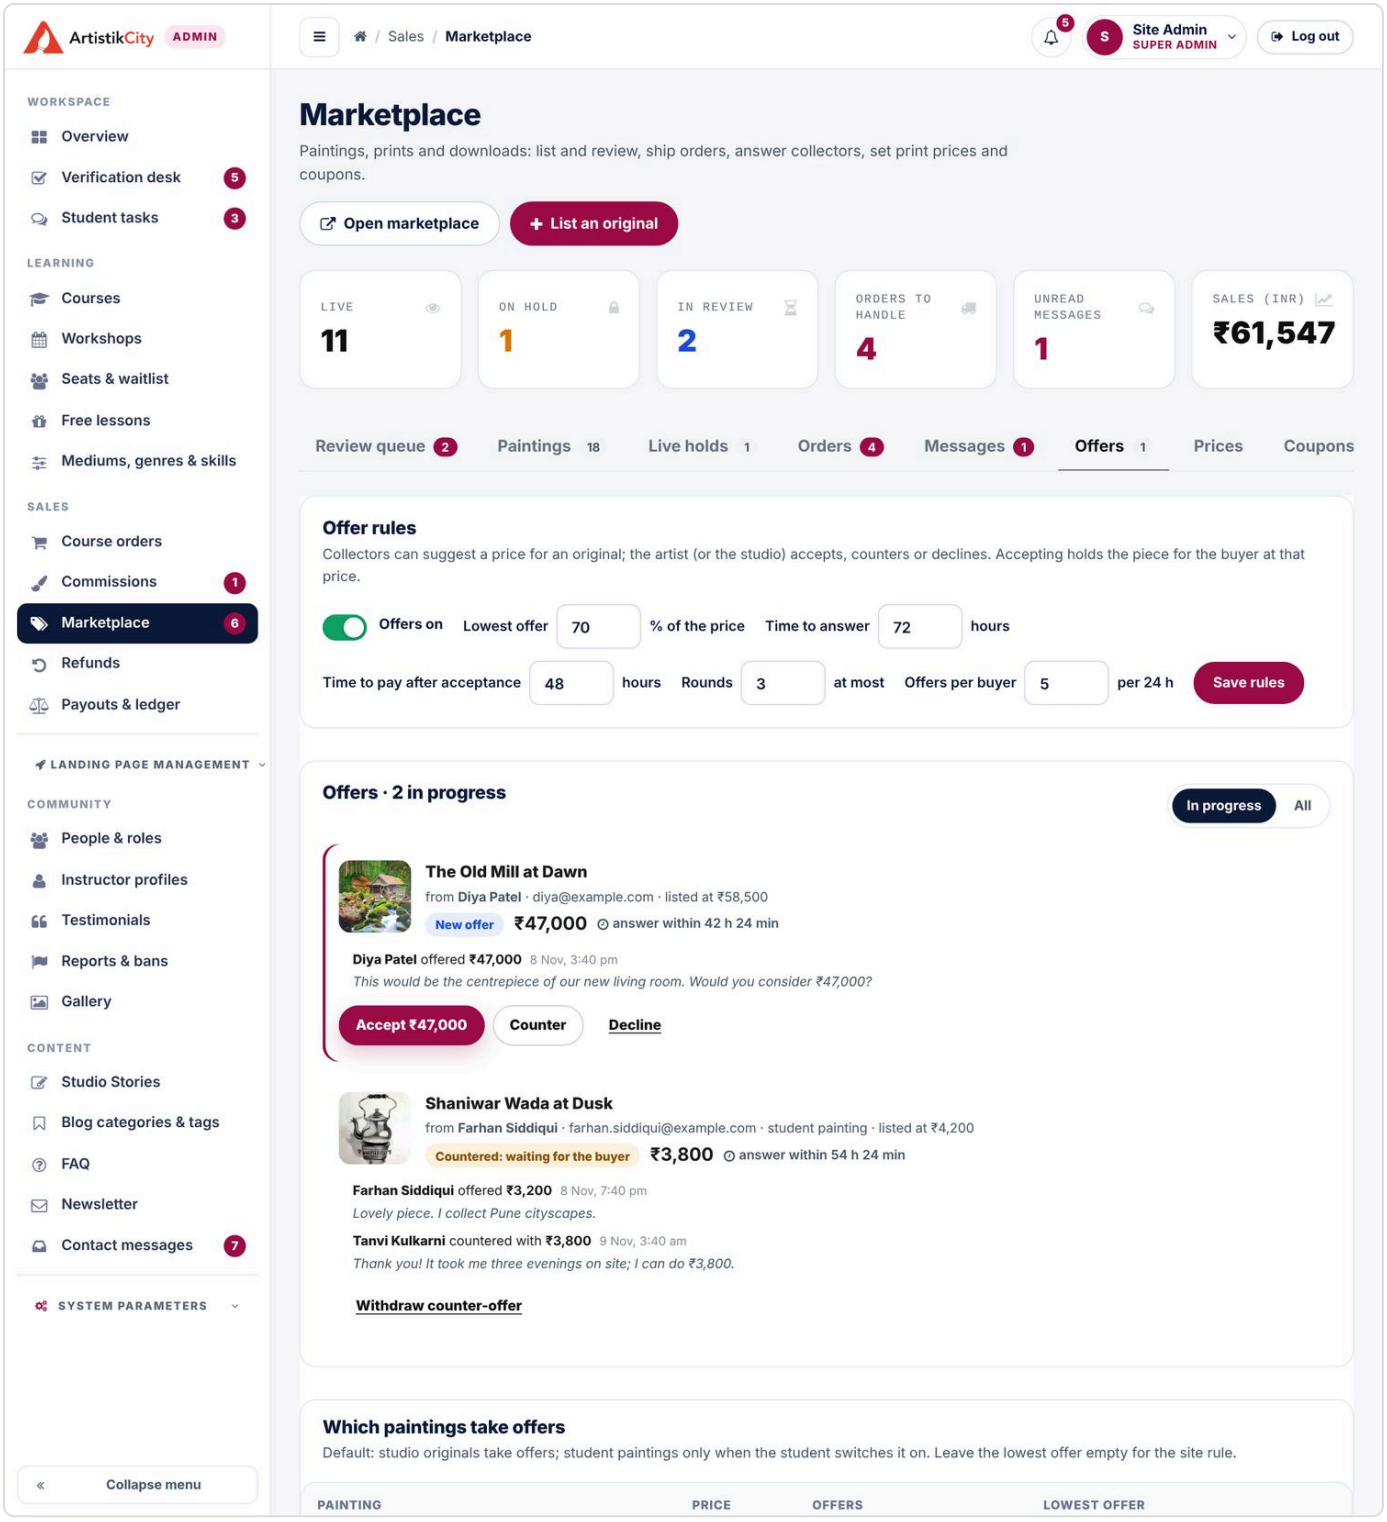

Figure 29. Offers.

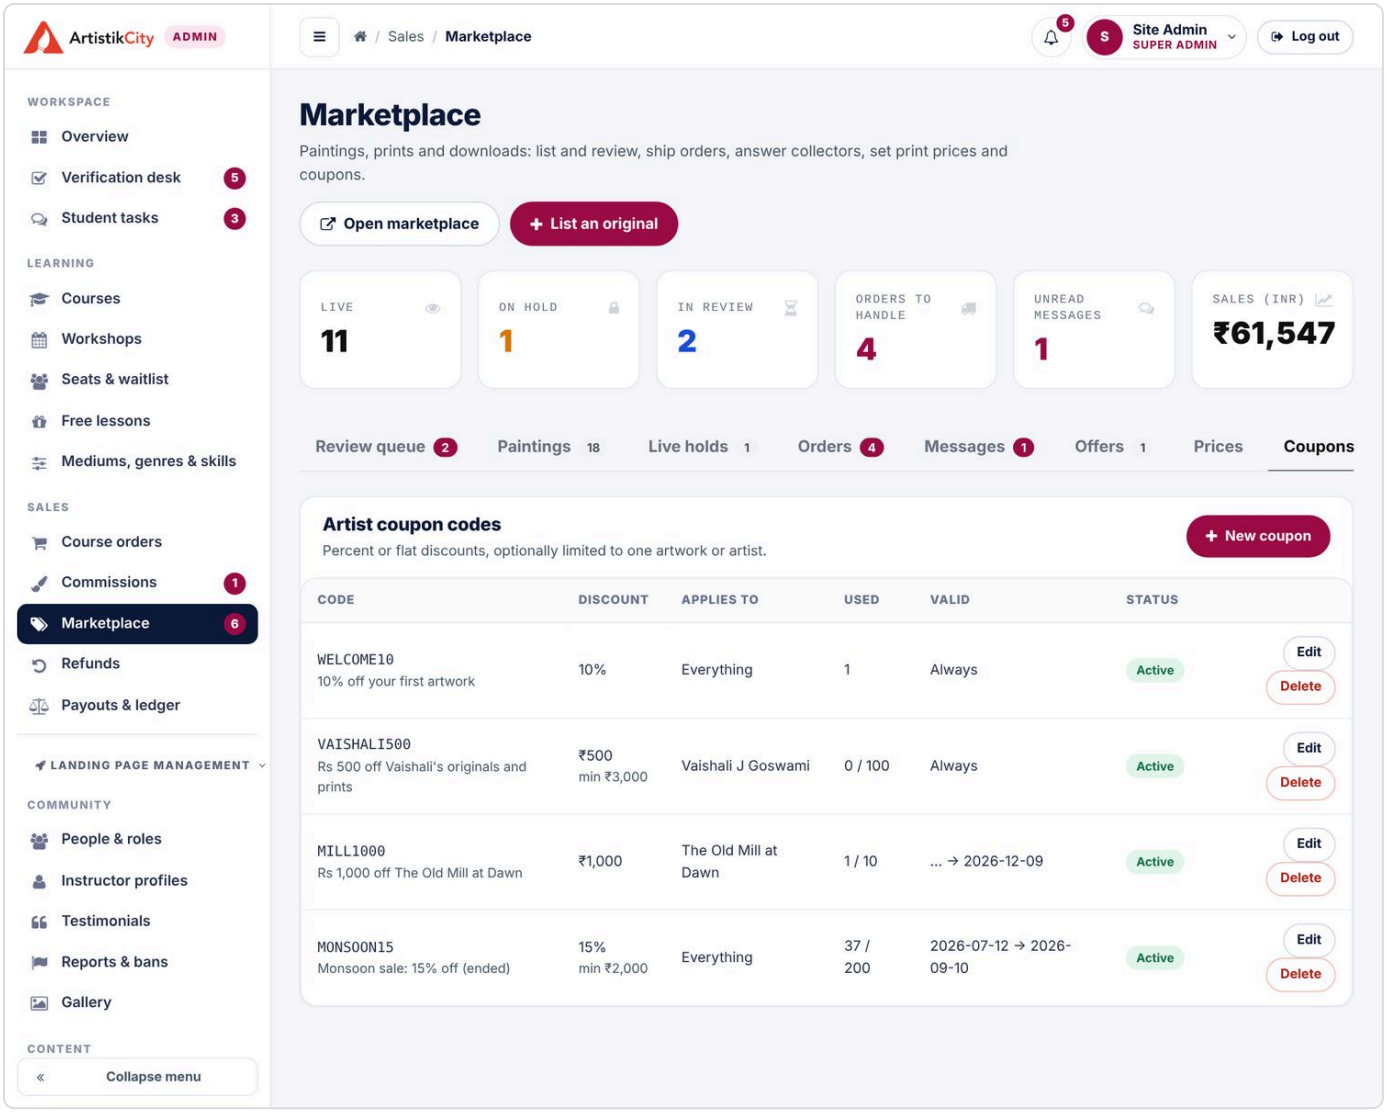

Figure 30. Coupons.

Add or edit a painting

List an original (or Edit on a row) opens the painting editor: photos (drag to order; the first is the cover), title, story, artist notes, medium, surface, subject, size in inches and weight, year, framed / signed / certificate of authenticity, price and discount, stock status and the formats offered. Save as draft or publish.

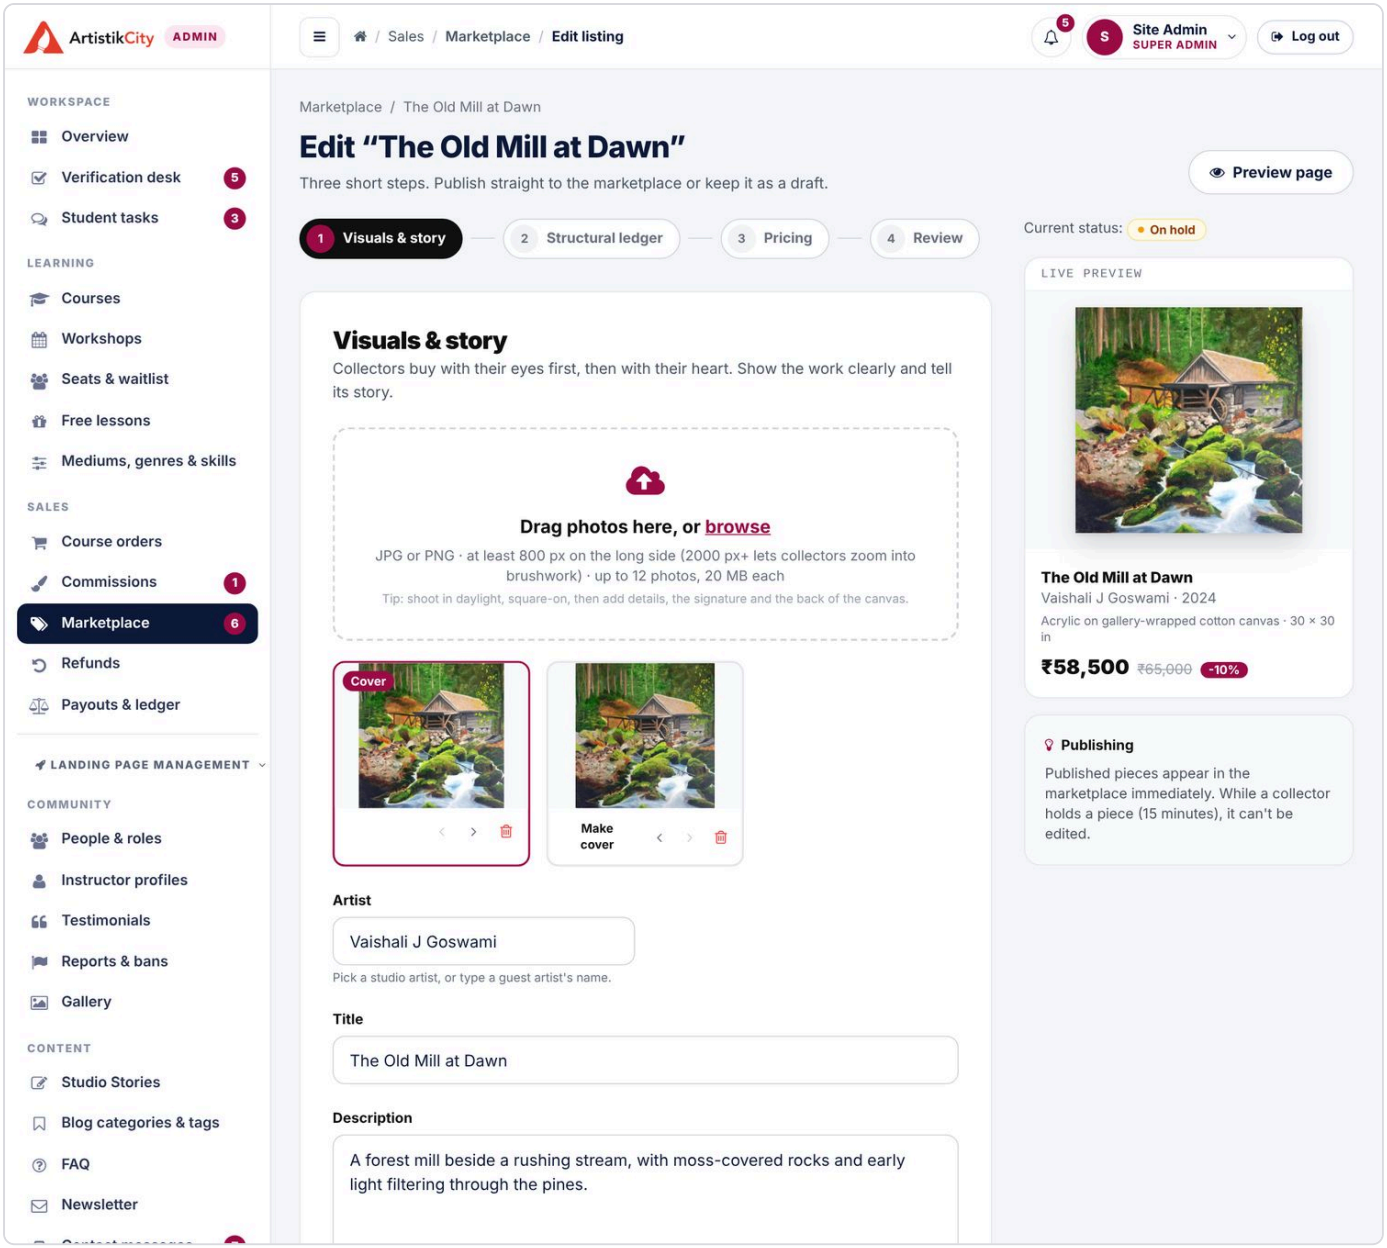

Figure 31. The painting editor.

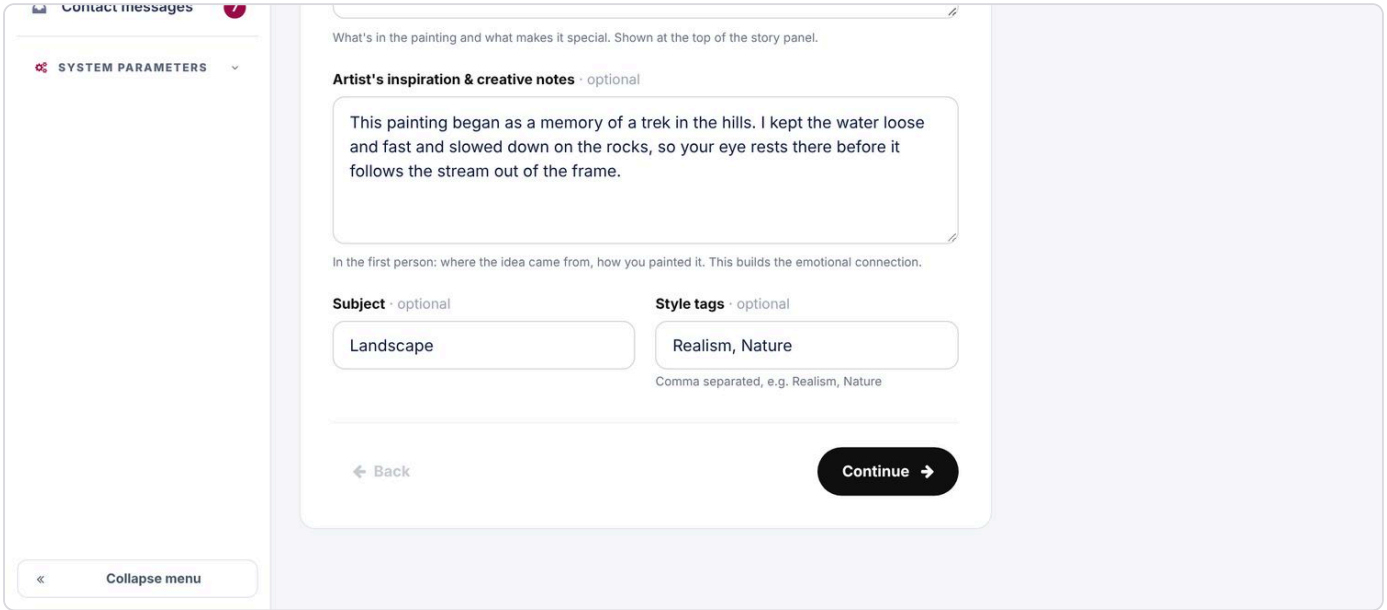

Figure 31. The painting editor. (continued, part 2 of 2)

4.4 Refunds

Every refund waits here: a course paid twice, a sold-out seat, a cancelled course run, marketplace lines that could not be supplied, and refunds you raise yourself. Open one (Decide) to check the reason, order and amount, then Refund now: the site asks Razorpay or PayPal to send the money back and records the refund id. Or dismiss it if no refund is due. Filter by Flagged, Refunded, Failed and Dismissed.

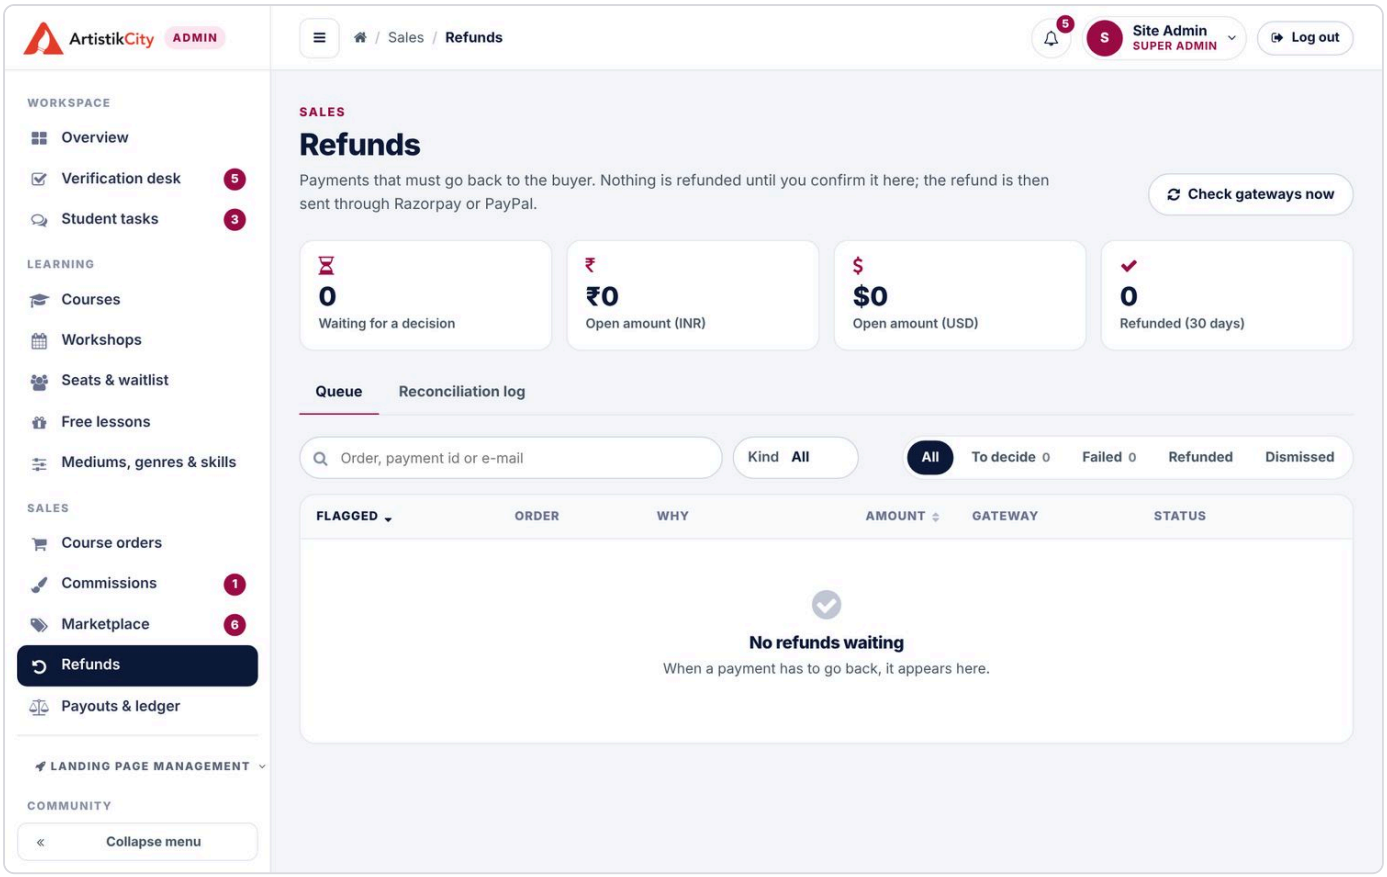

Figure 32. Refunds.

4.5 Payouts & ledger

Every sale is split in an append-only ledger into the studio commission and the artist share. The artist share becomes payable after the holding period.

- **Report**: gross sales, refunds, commission, artist share and payouts by month; Export.
- **Artists**: each artist's earned, refunded, paid, in holding, on hold and balance; Payout details (masked bank/UPI/PayPal details; each look is recorded).
- **Payouts**: weekly draft batches; check the lines and mark the batch paid once the money has been sent.
- **Disputes**: chargebacks from Razorpay or added by hand; an open dispute holds the artist's share.
- **Ledger**: every entry, searchable.

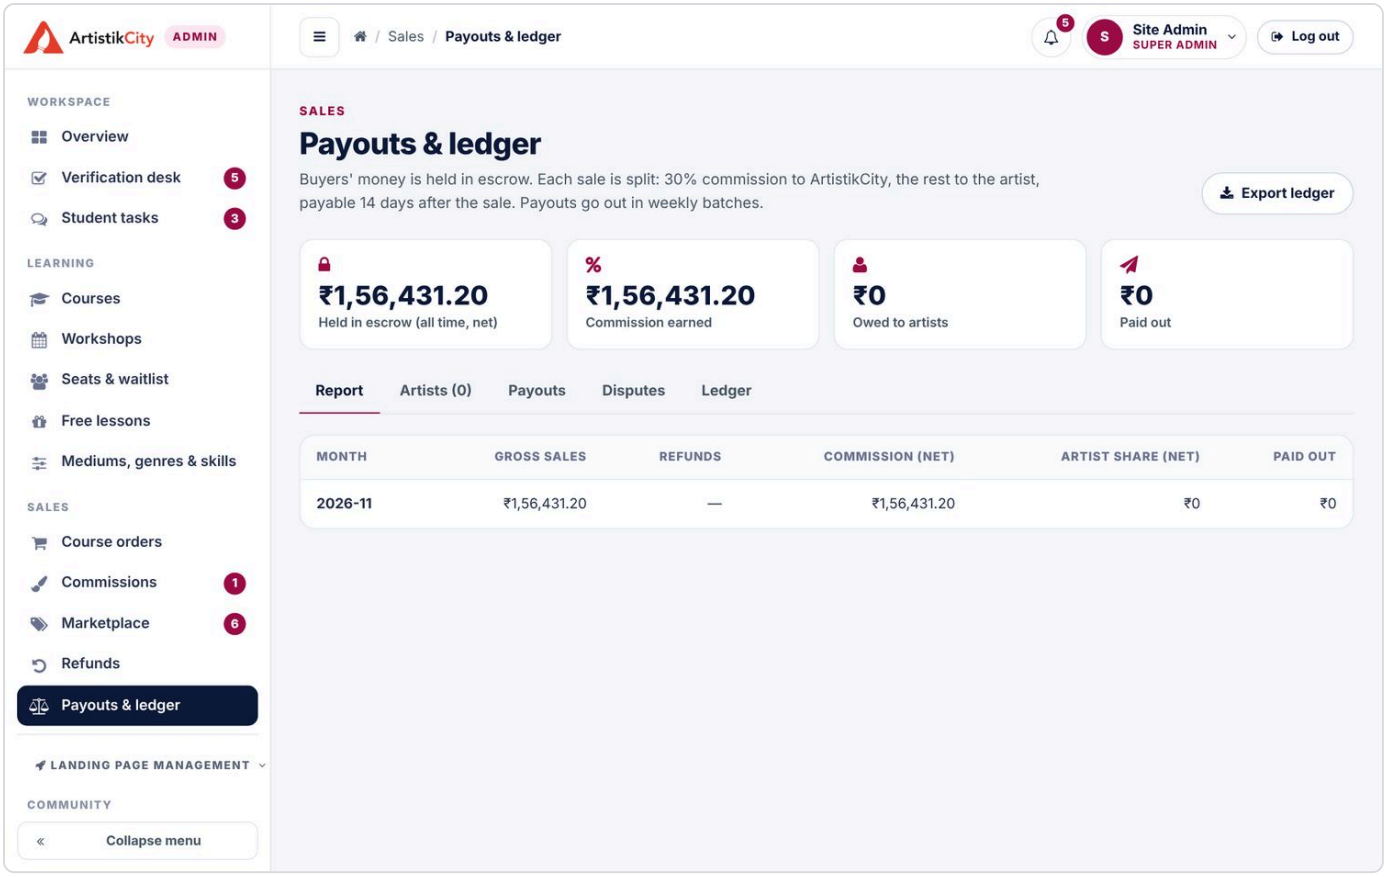

Figure 33. Report.

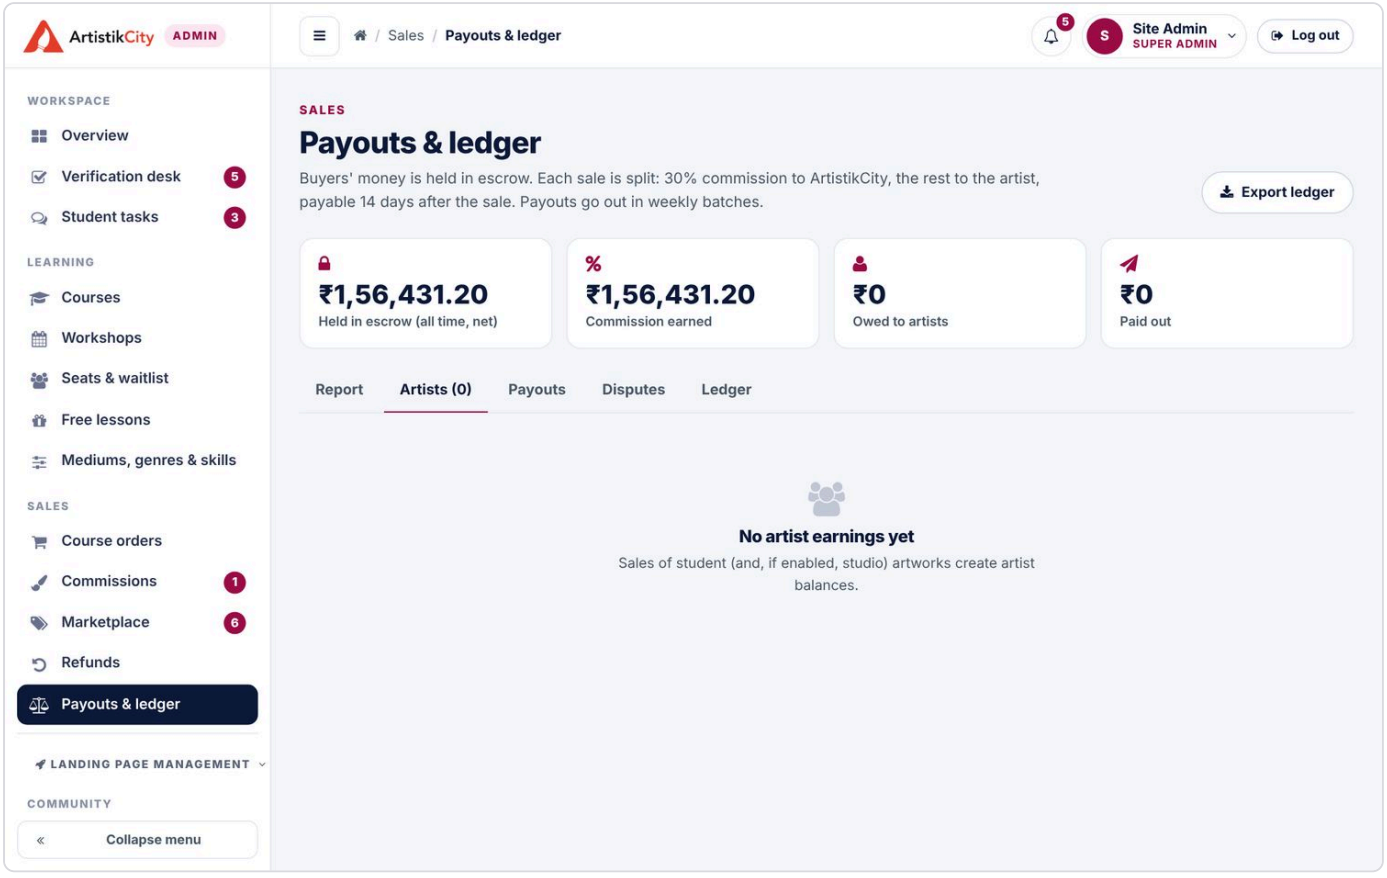

Figure 34. Artists.

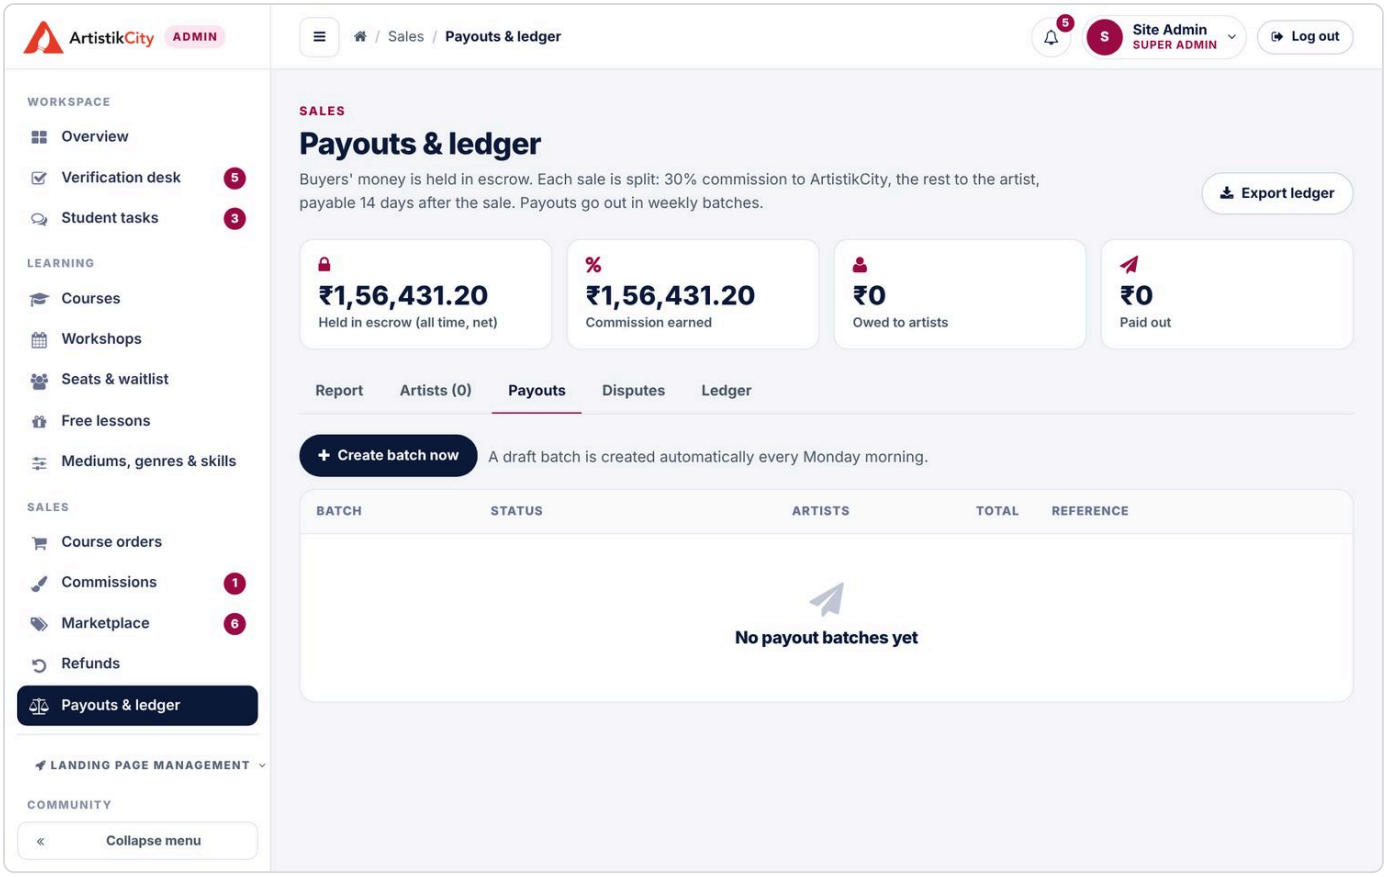

Figure 35. Payouts.

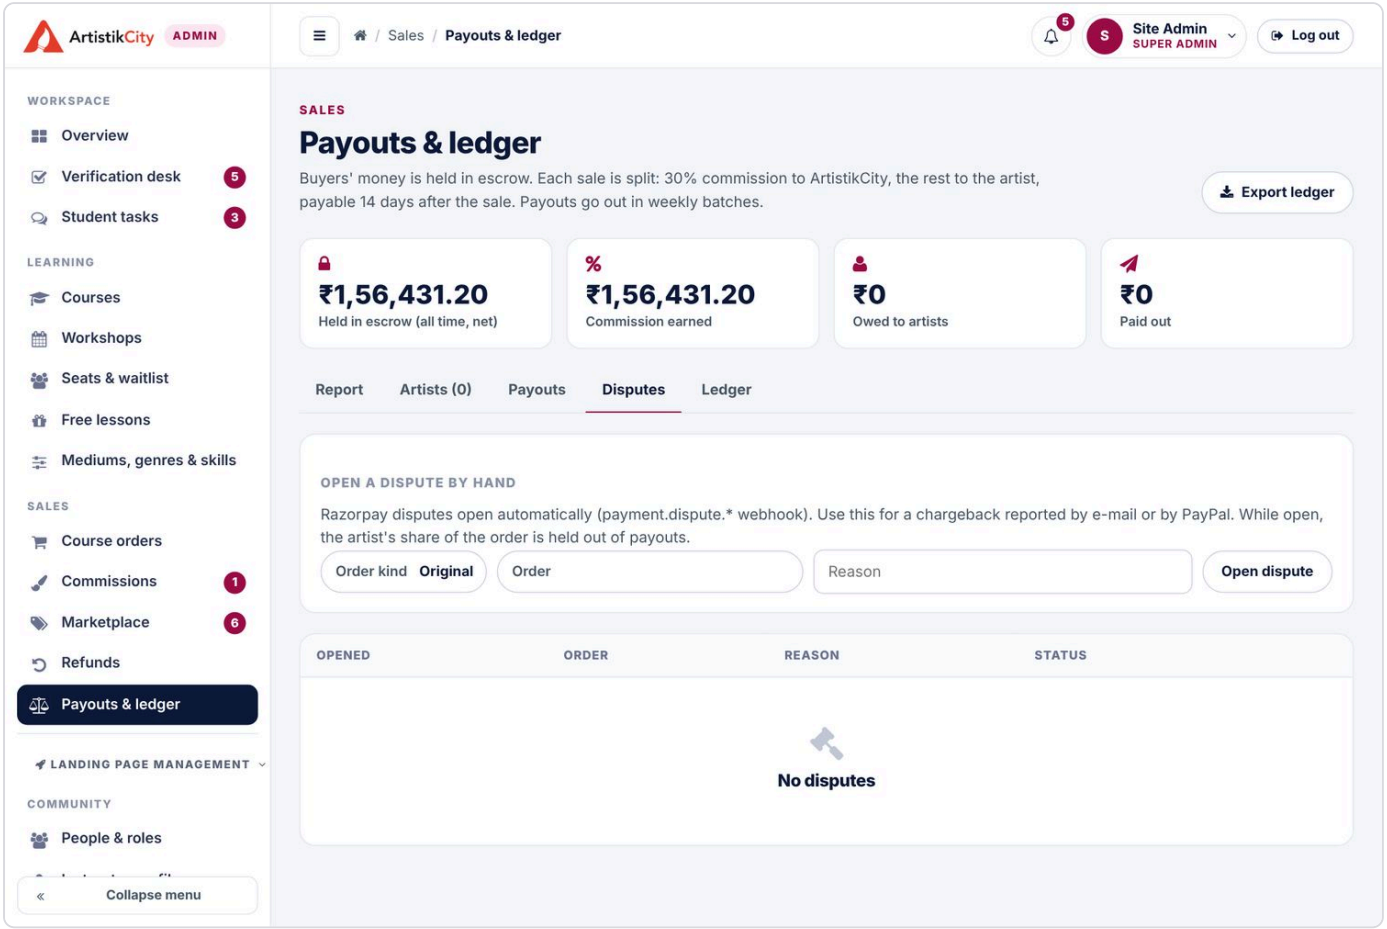

Figure 36. Disputes.

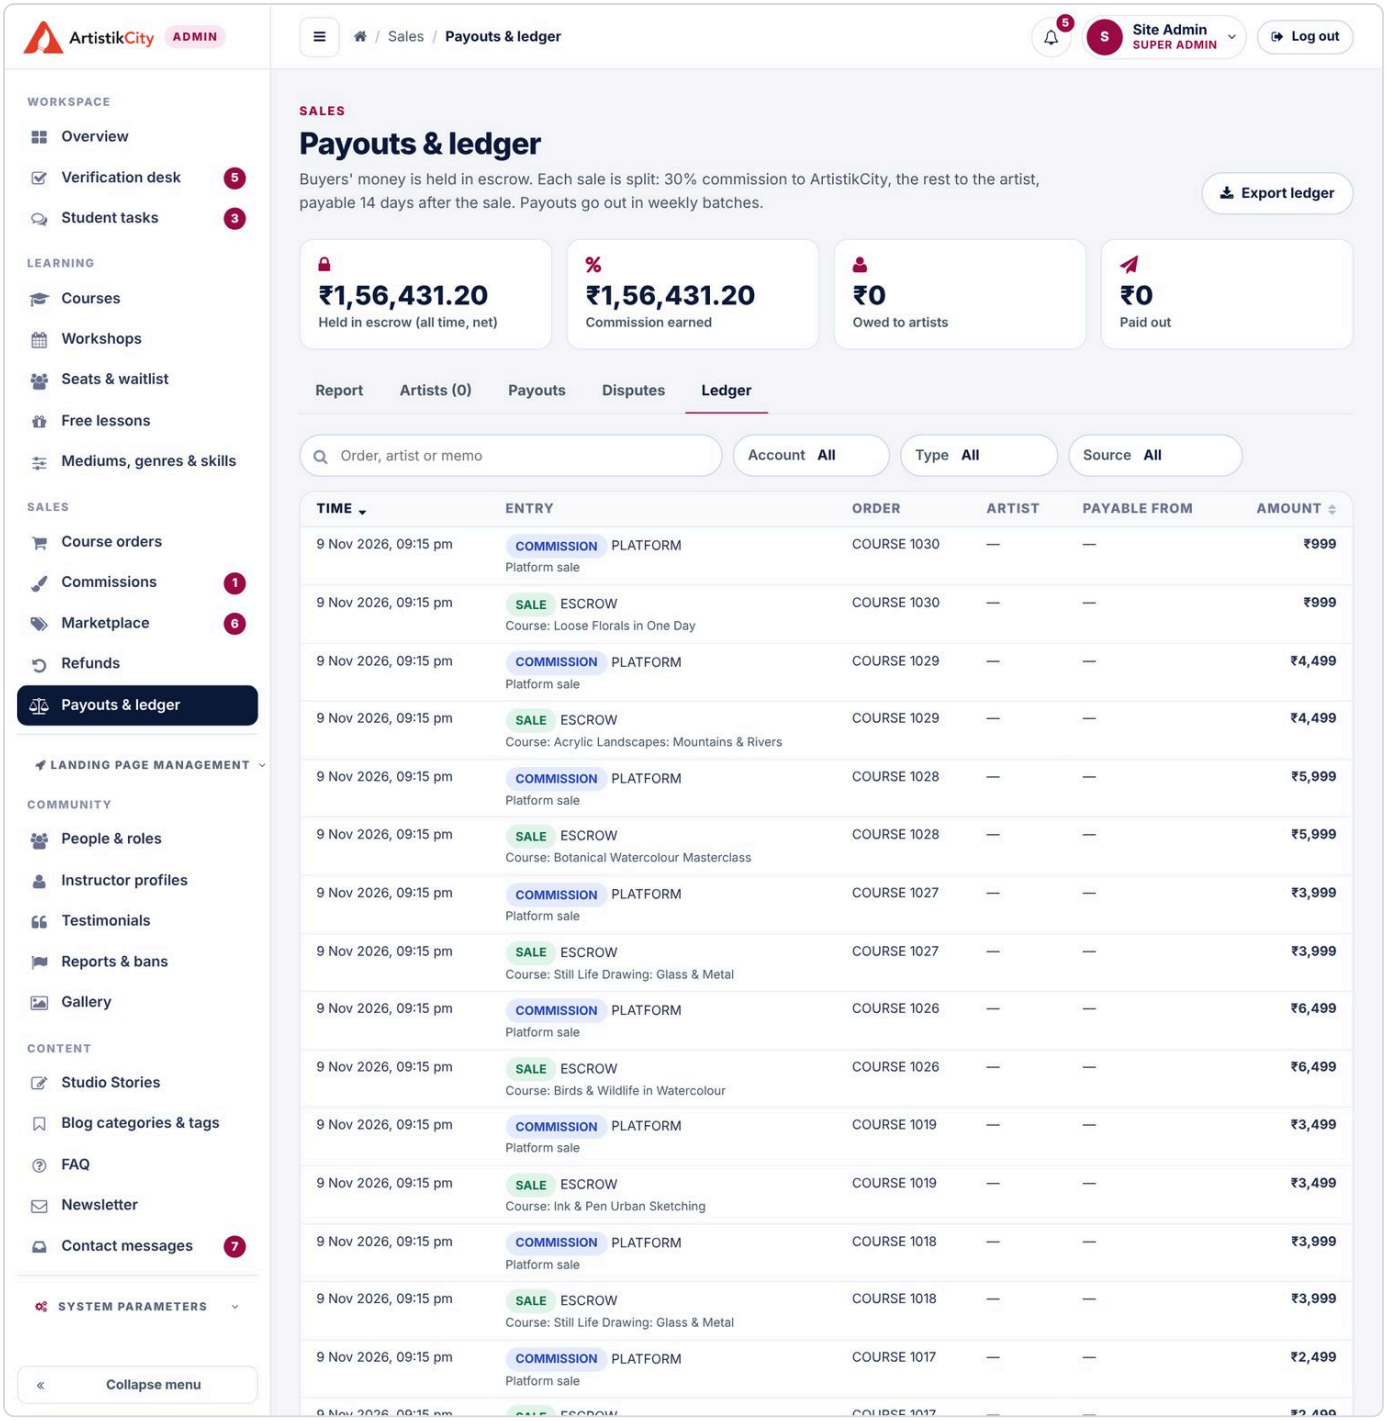

Figure 37. Ledger.

CHAPTER 5

Landing Page Management

Campaign pages for courses (and information pages for the site) at their own address /landing/..., each with its own pricing, payment methods, checkout and coupons.

5.1 Overview and the page list

Overview: pages by status, visitors, enrolments, conversion, revenue and payments, with charts and the best pages and campaigns. Filter by date, page, course, artist or campaign. Test payments are left out.

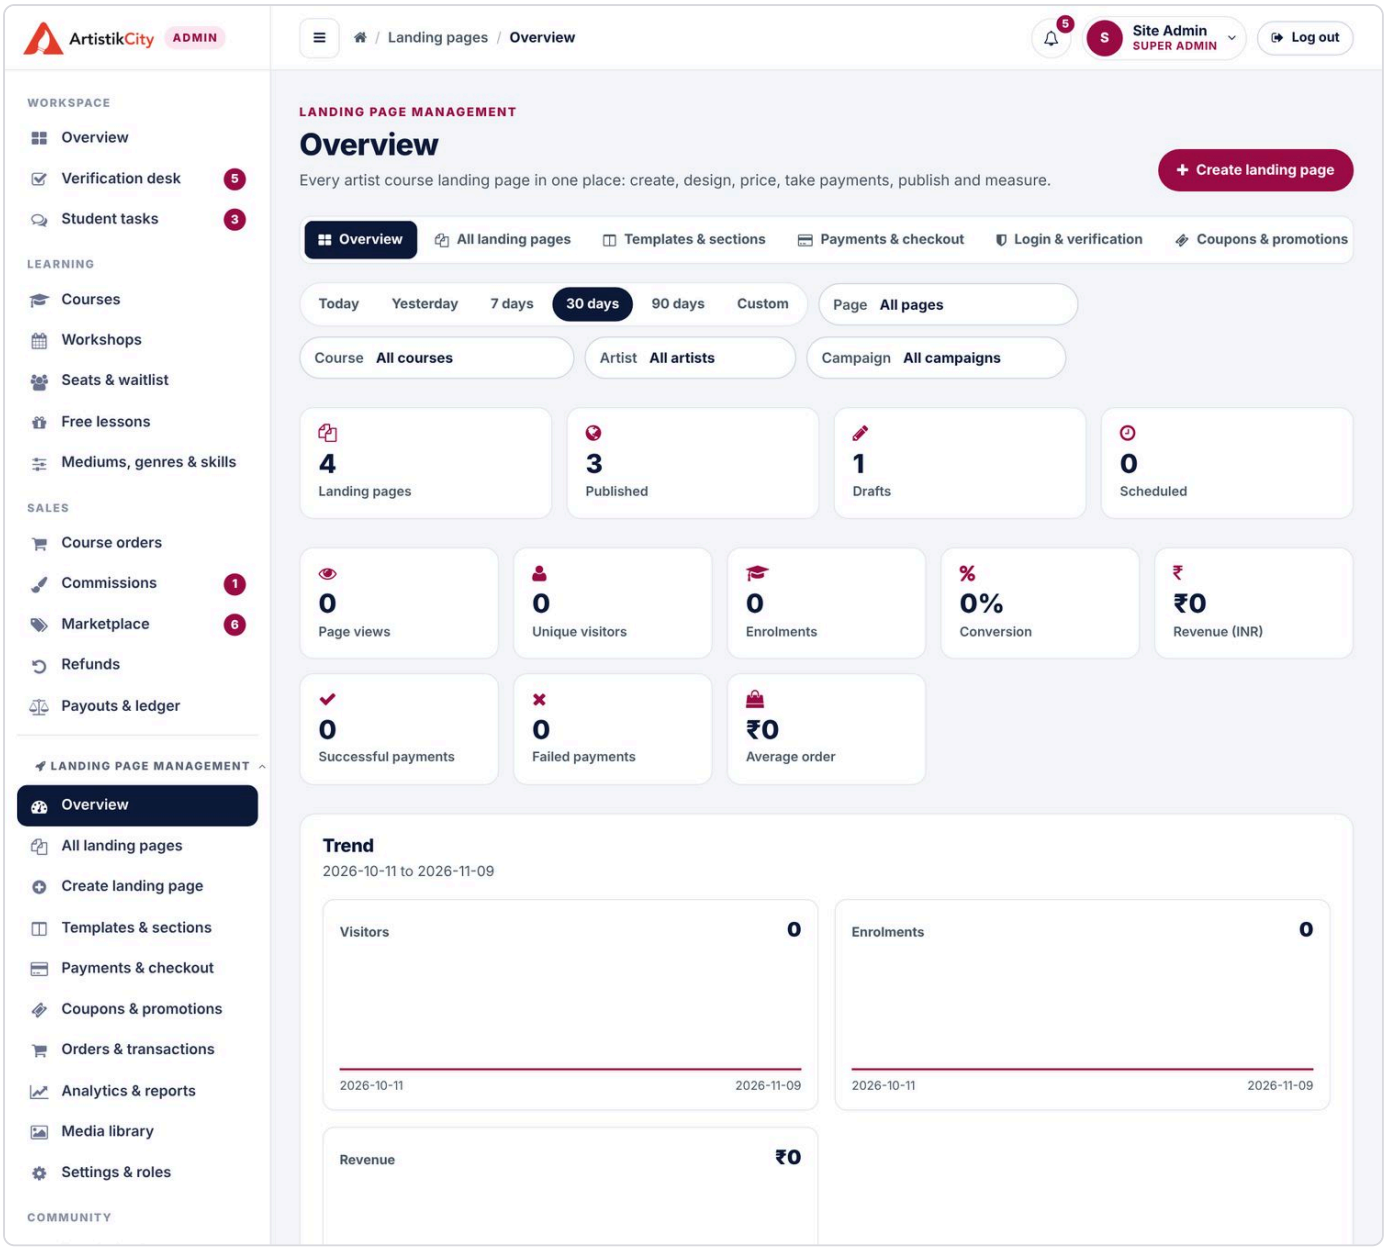

Figure 38. Landing pages overview.

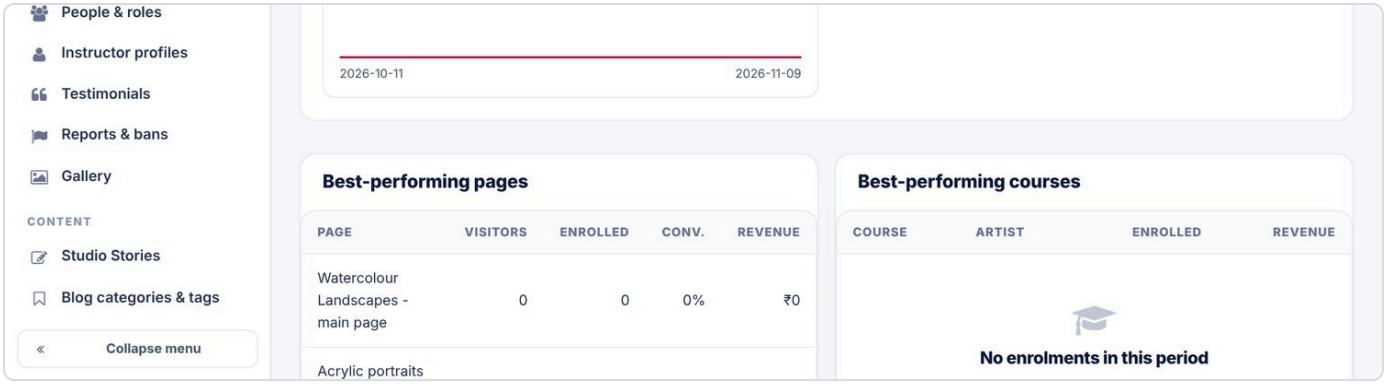

Figure 38. Landing pages overview. (continued, part 2 of 2)

All landing pages: search, filter by status, sort; preview, duplicate, publish, unpublish, schedule, archive or delete. The full public address of each page is shown.

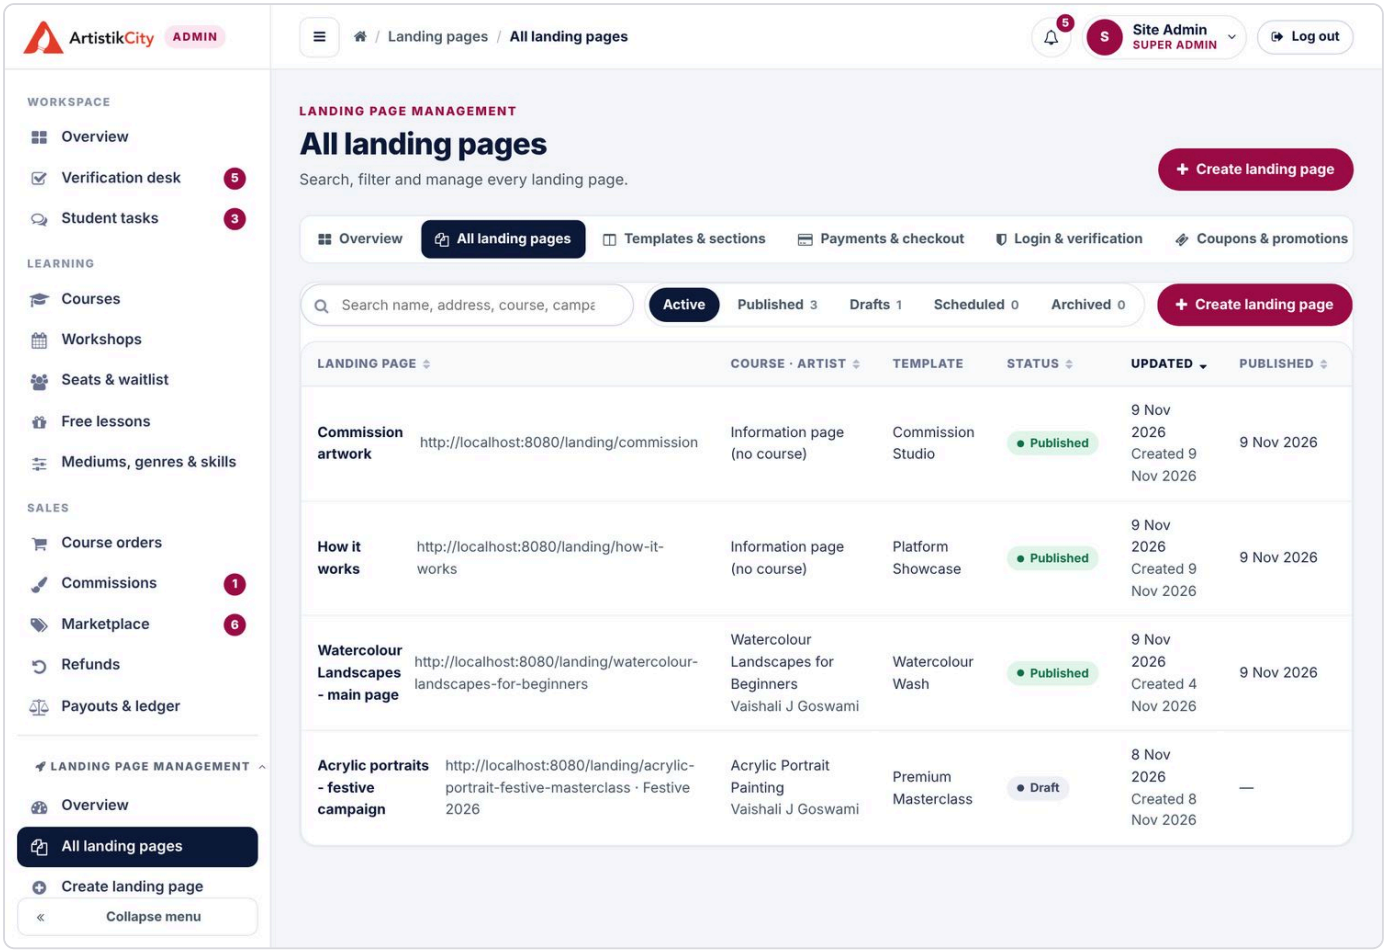

Figure 39. All landing pages.

5.2 Create a landing page

1. Click **Create landing page**.
2. Choose a course page or an information page, the course, the page name, its address (made from the name if you leave it empty), campaign and description.
3. Pick a template. The editor opens on the new draft.

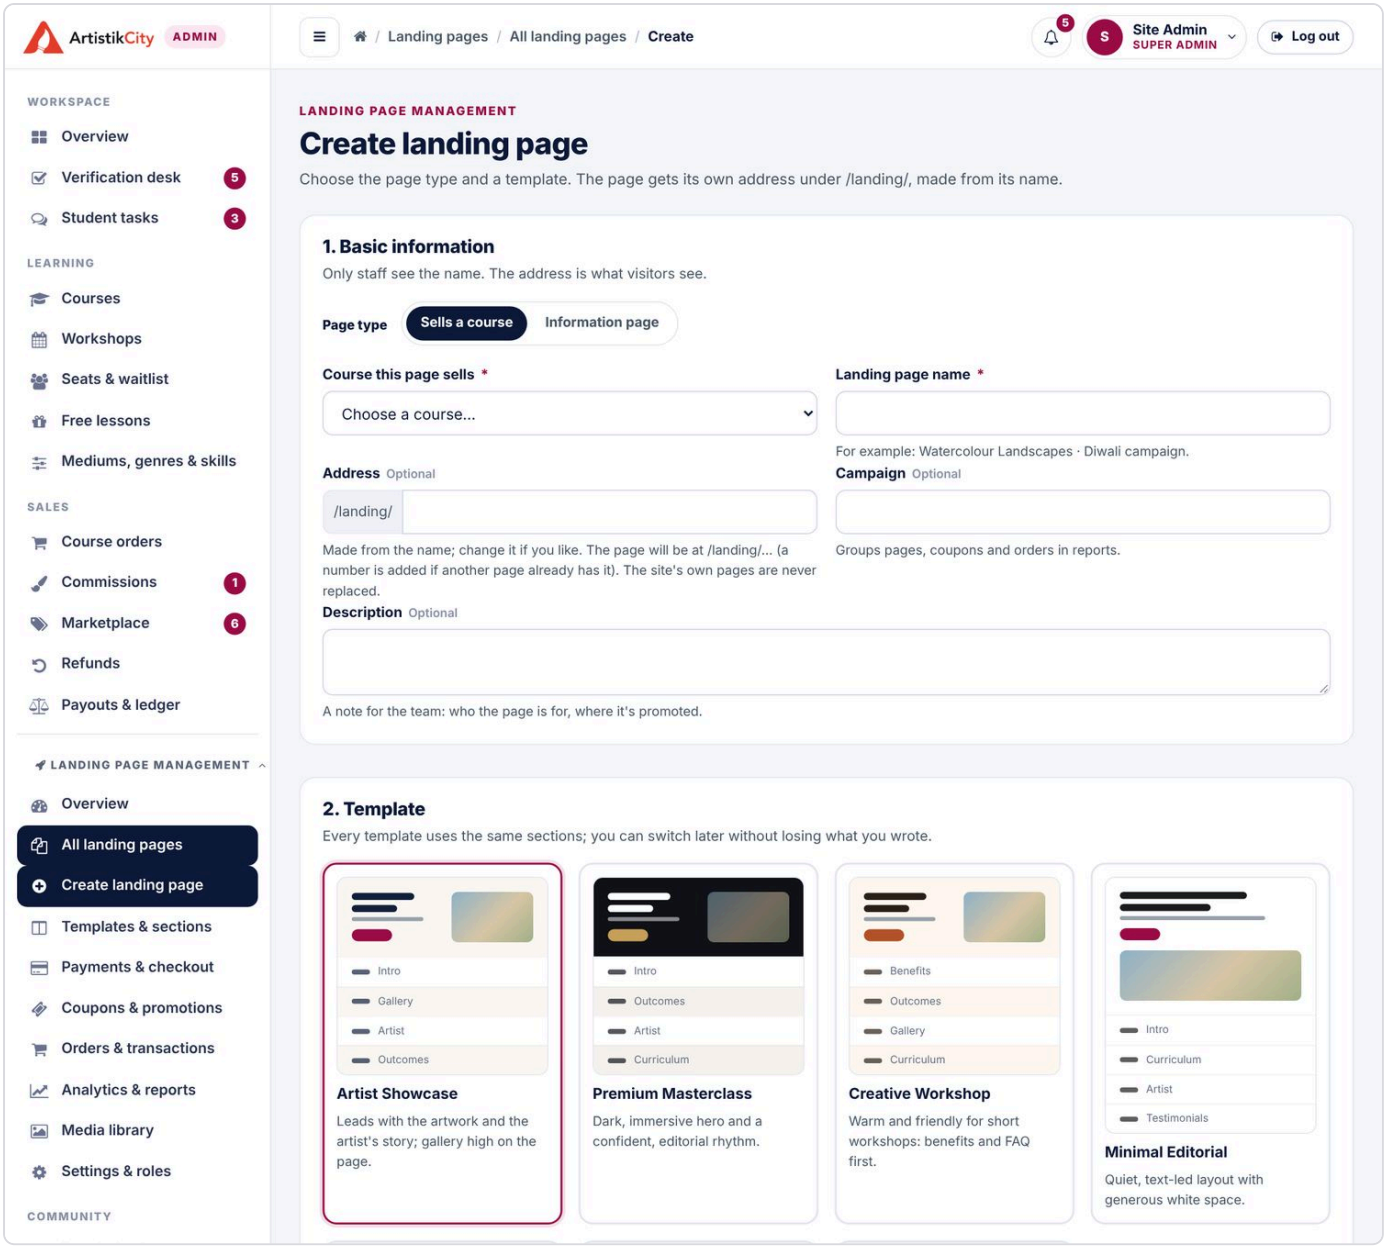

Figure 40. Create landing page.

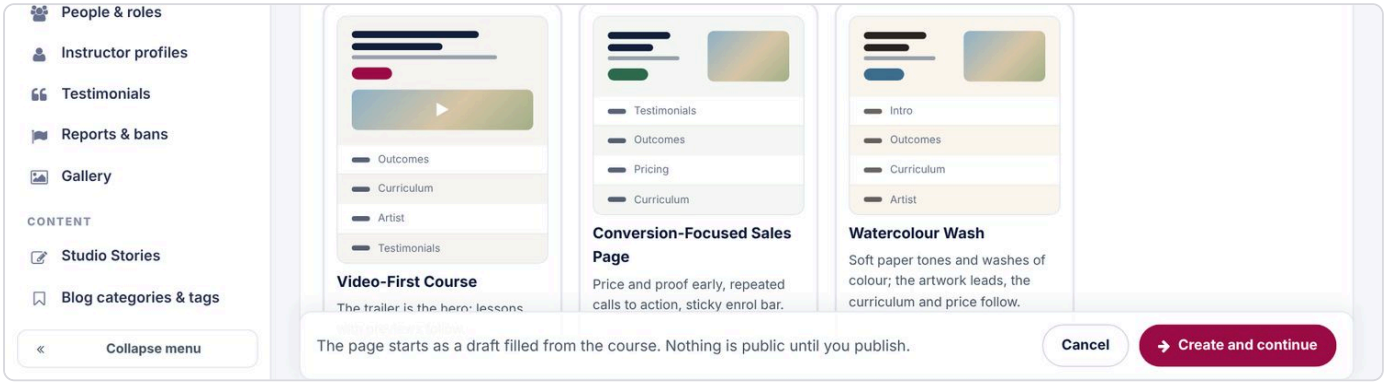

Figure 40. Create landing page. (continued, part 2 of 2)

5.3 The editor, step by step

Nine steps along the top. Changes are saved as a draft; the live page only changes when you publish.

STEP	WHAT YOU SET
1 Basics	Name, address, course, campaign, description.
2 Template	The starting layout.
3 Sections & content	Order sections by drag and drop, show/hide them (also only on phones), choose layout and background, edit every text, image (from the media library), list item and button; the sticky enrol bar.
4 Design	Colour palette or custom colours, heading font, corner style.
5 Pricing & offers	The price on this page, an early-bird price, and what is included.
6 Payment settings	Use the site defaults or choose which methods this page offers (UPI, cards, net banking, PayPal ...).
7 Checkout	Fields asked at checkout, sign-in at Pay, coupon box, thank-you page.
8 SEO & marketing	Search title and description, share image, tracking and lead capture.
9 Preview & publish	Checklist, desktop and phone preview, publish or schedule, versions with rollback, A/B test, activity.

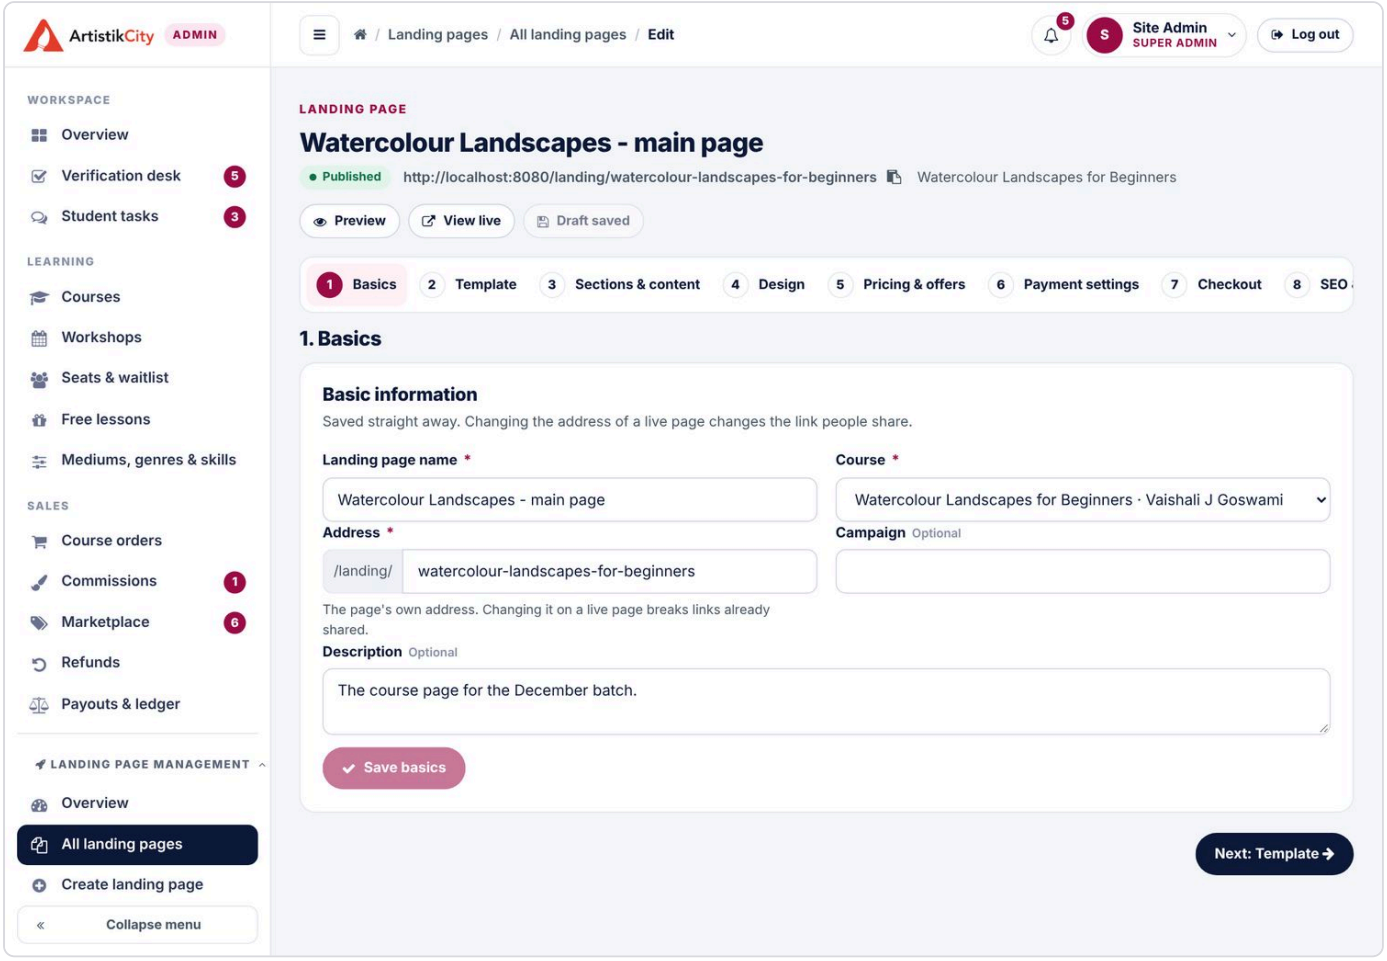

Figure 41. Step 1, Basics.

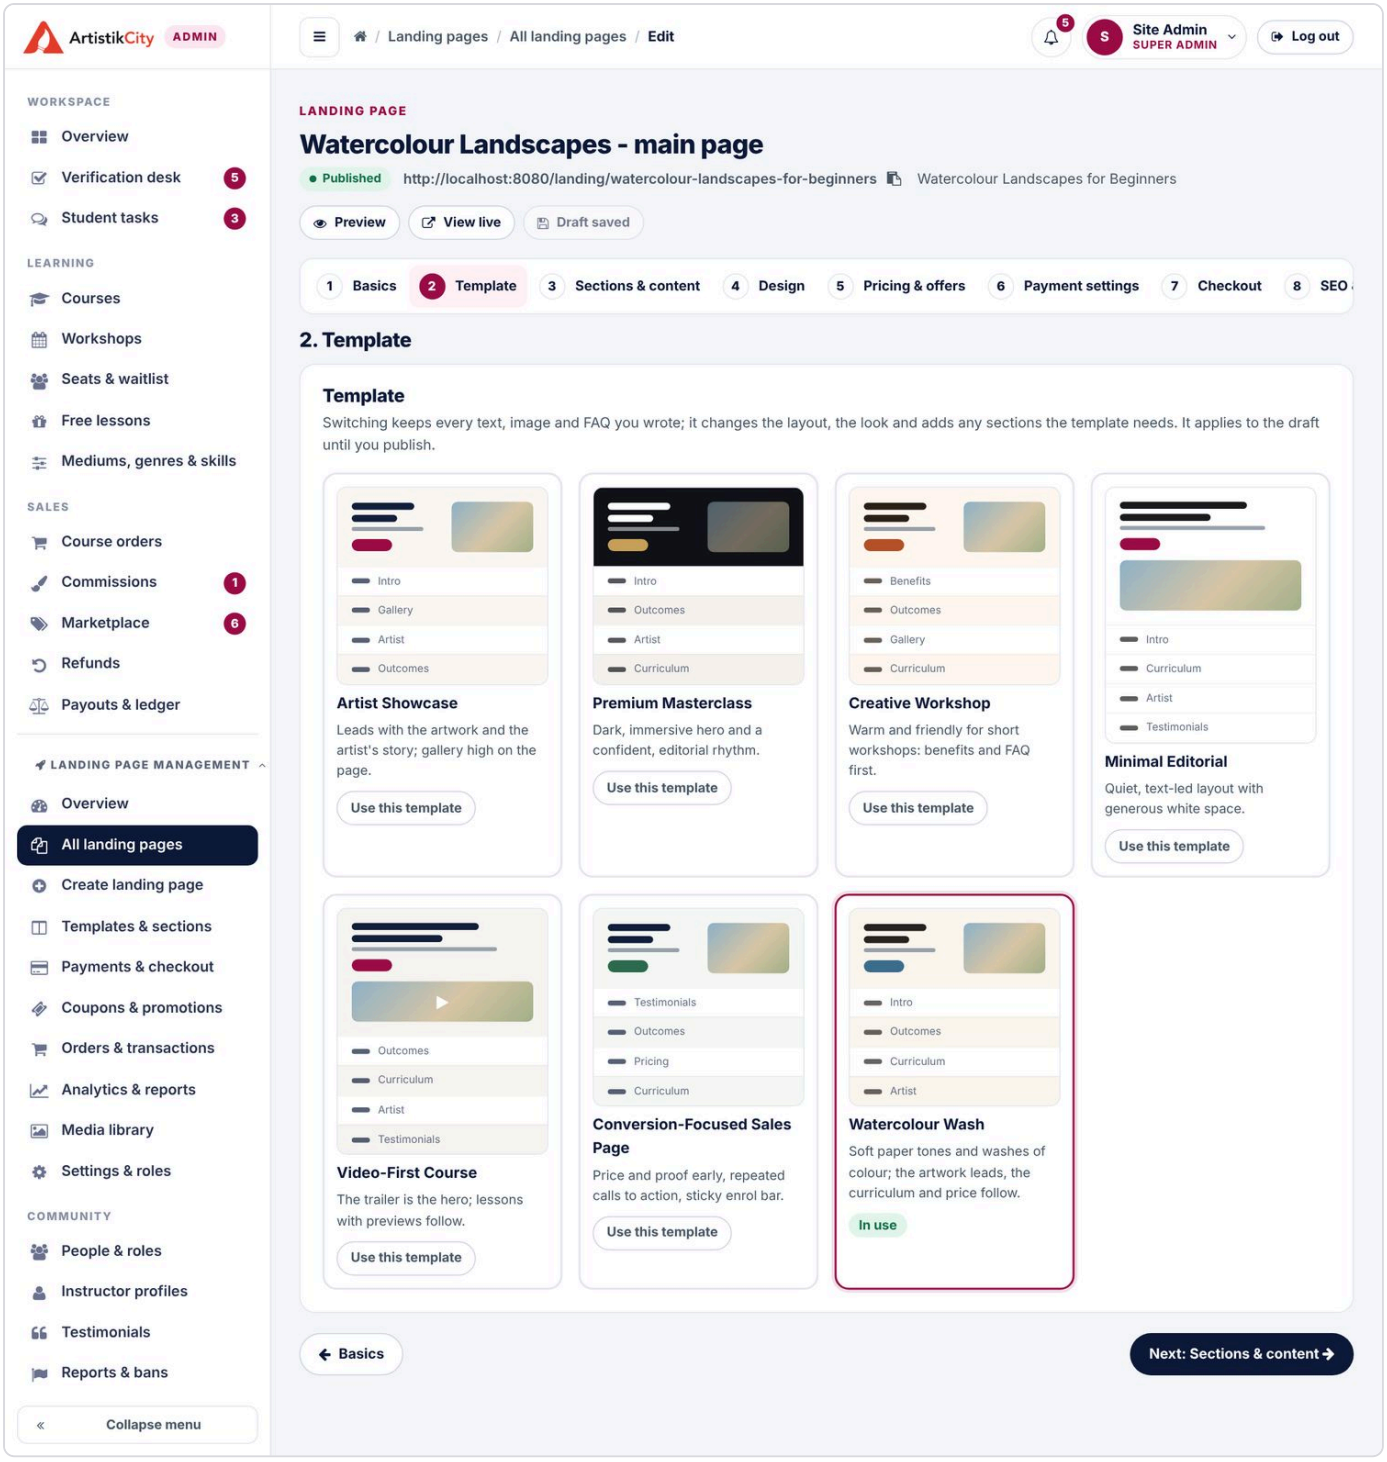

Figure 42. Step 2, Template.

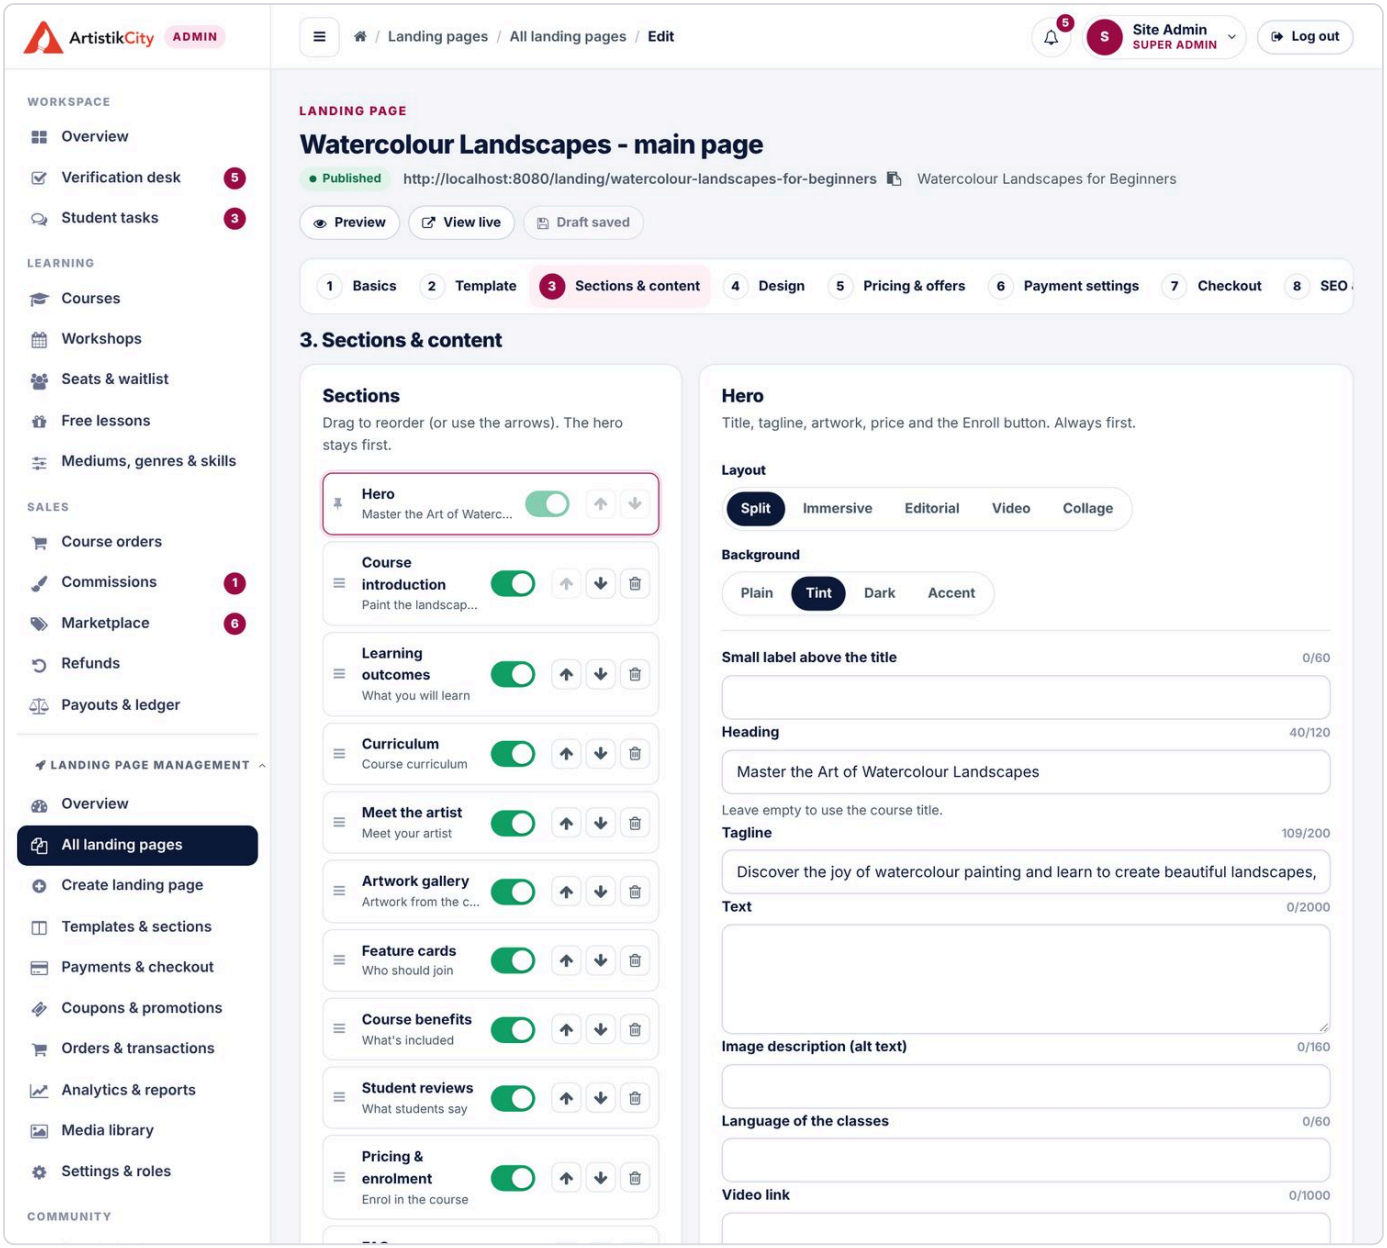

Figure 43. Step 3, Sections & content.

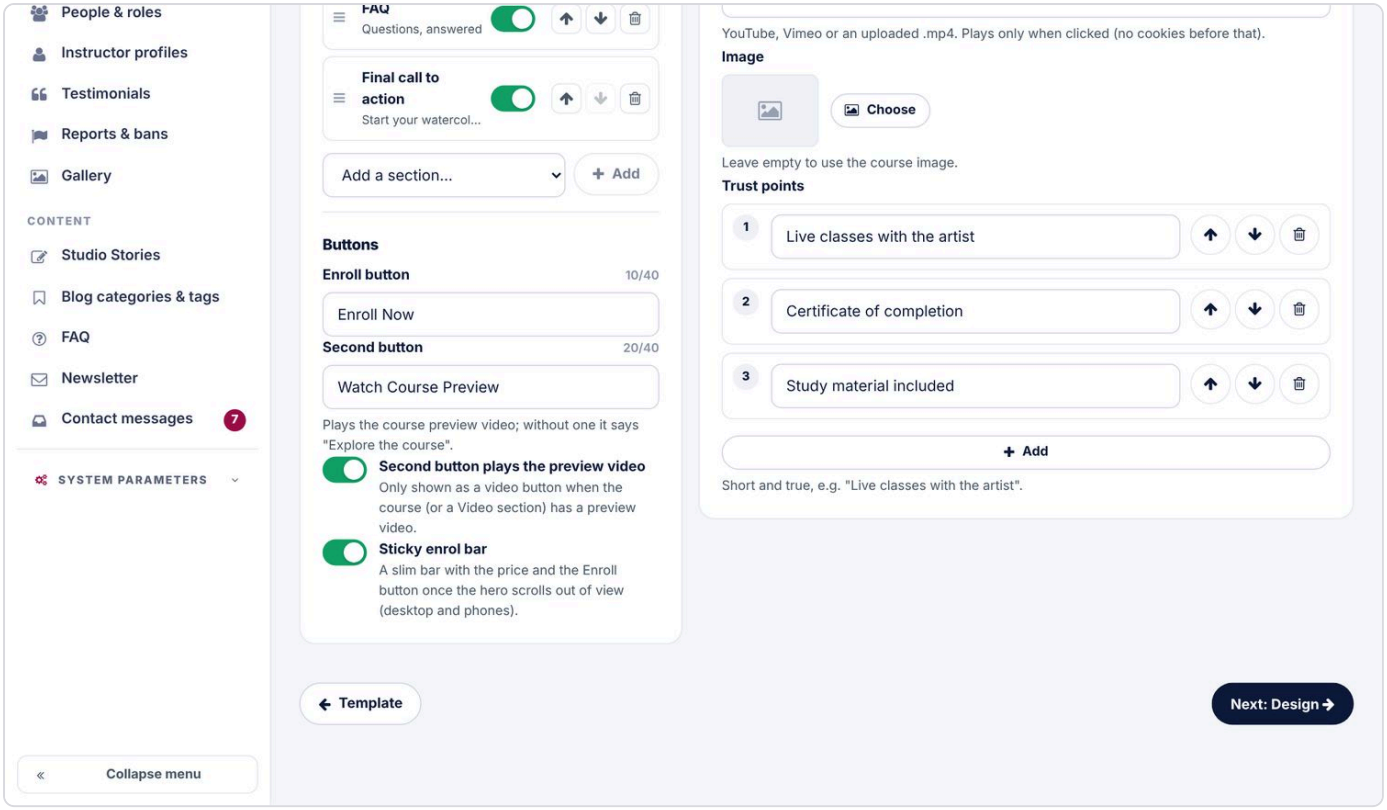

Figure 43. Step 3, Sections & content. (continued, part 2 of 2)

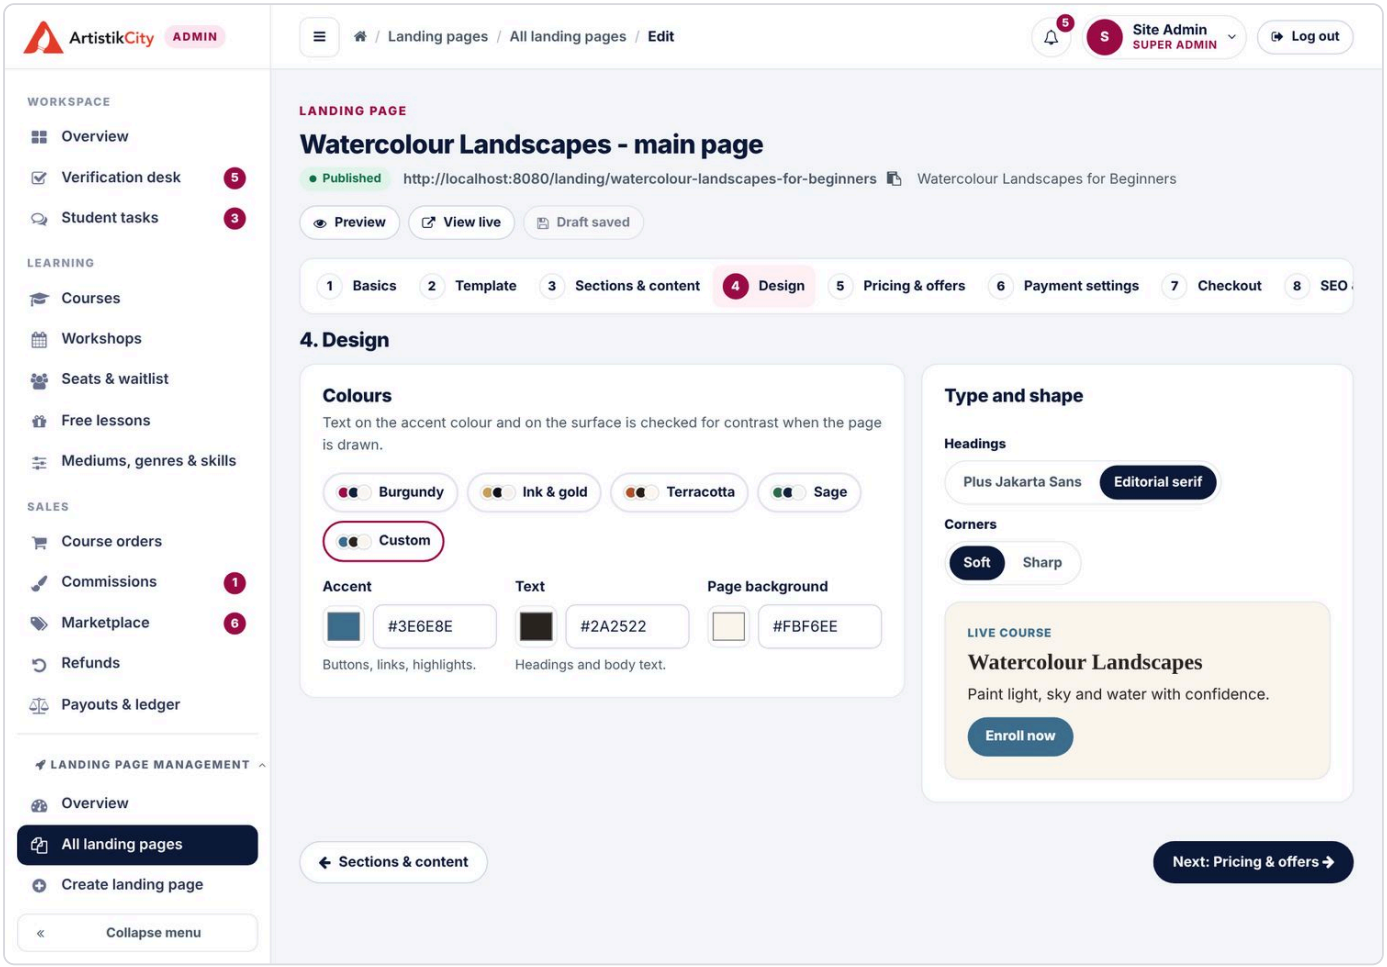

Figure 44. Step 4, Design.

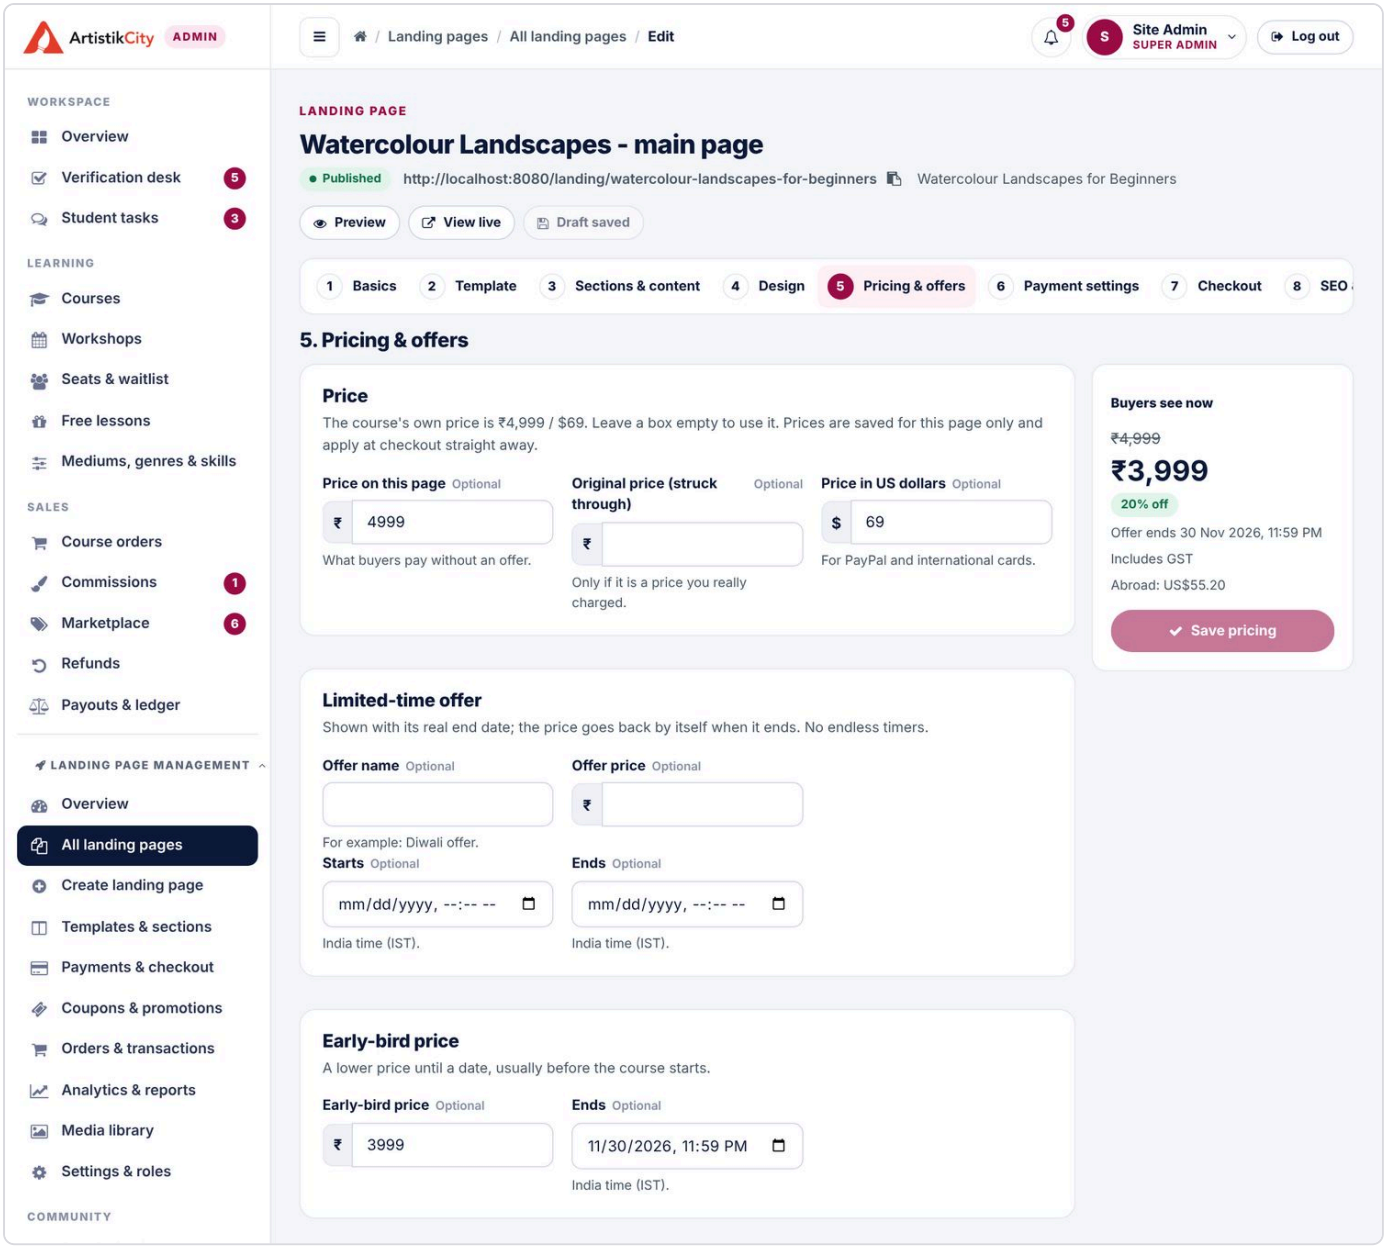

Figure 45. Step 5, Pricing & offers.

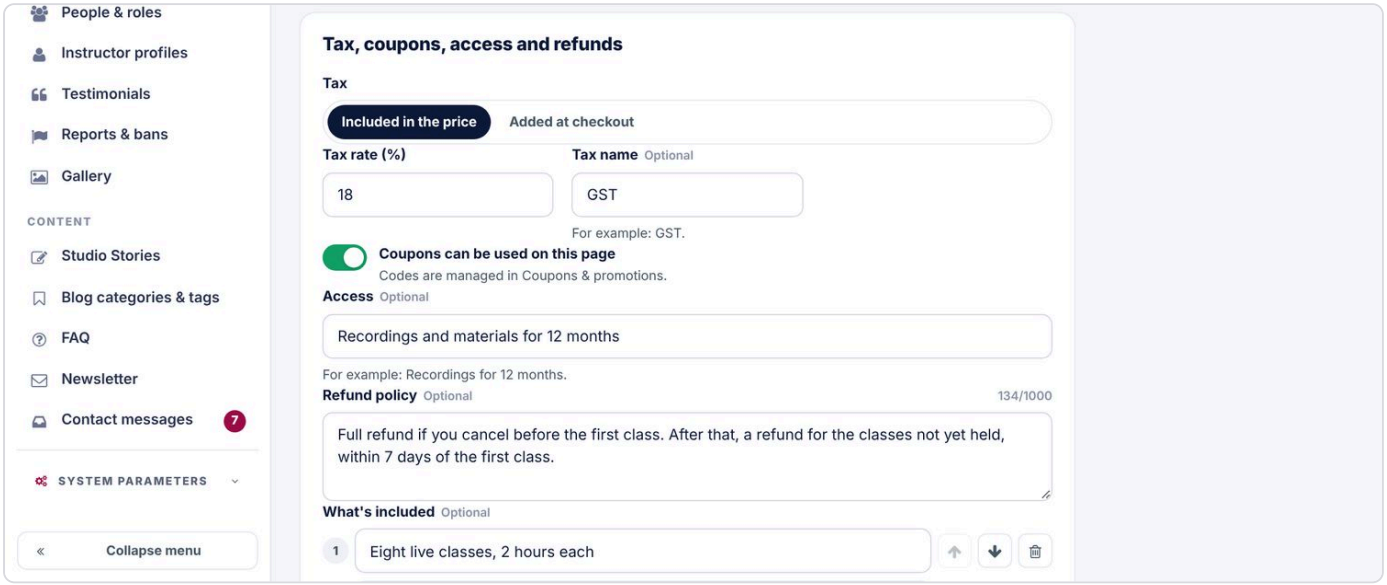

Figure 45. Step 5, Pricing & offers. (continued, part 2 of 2)

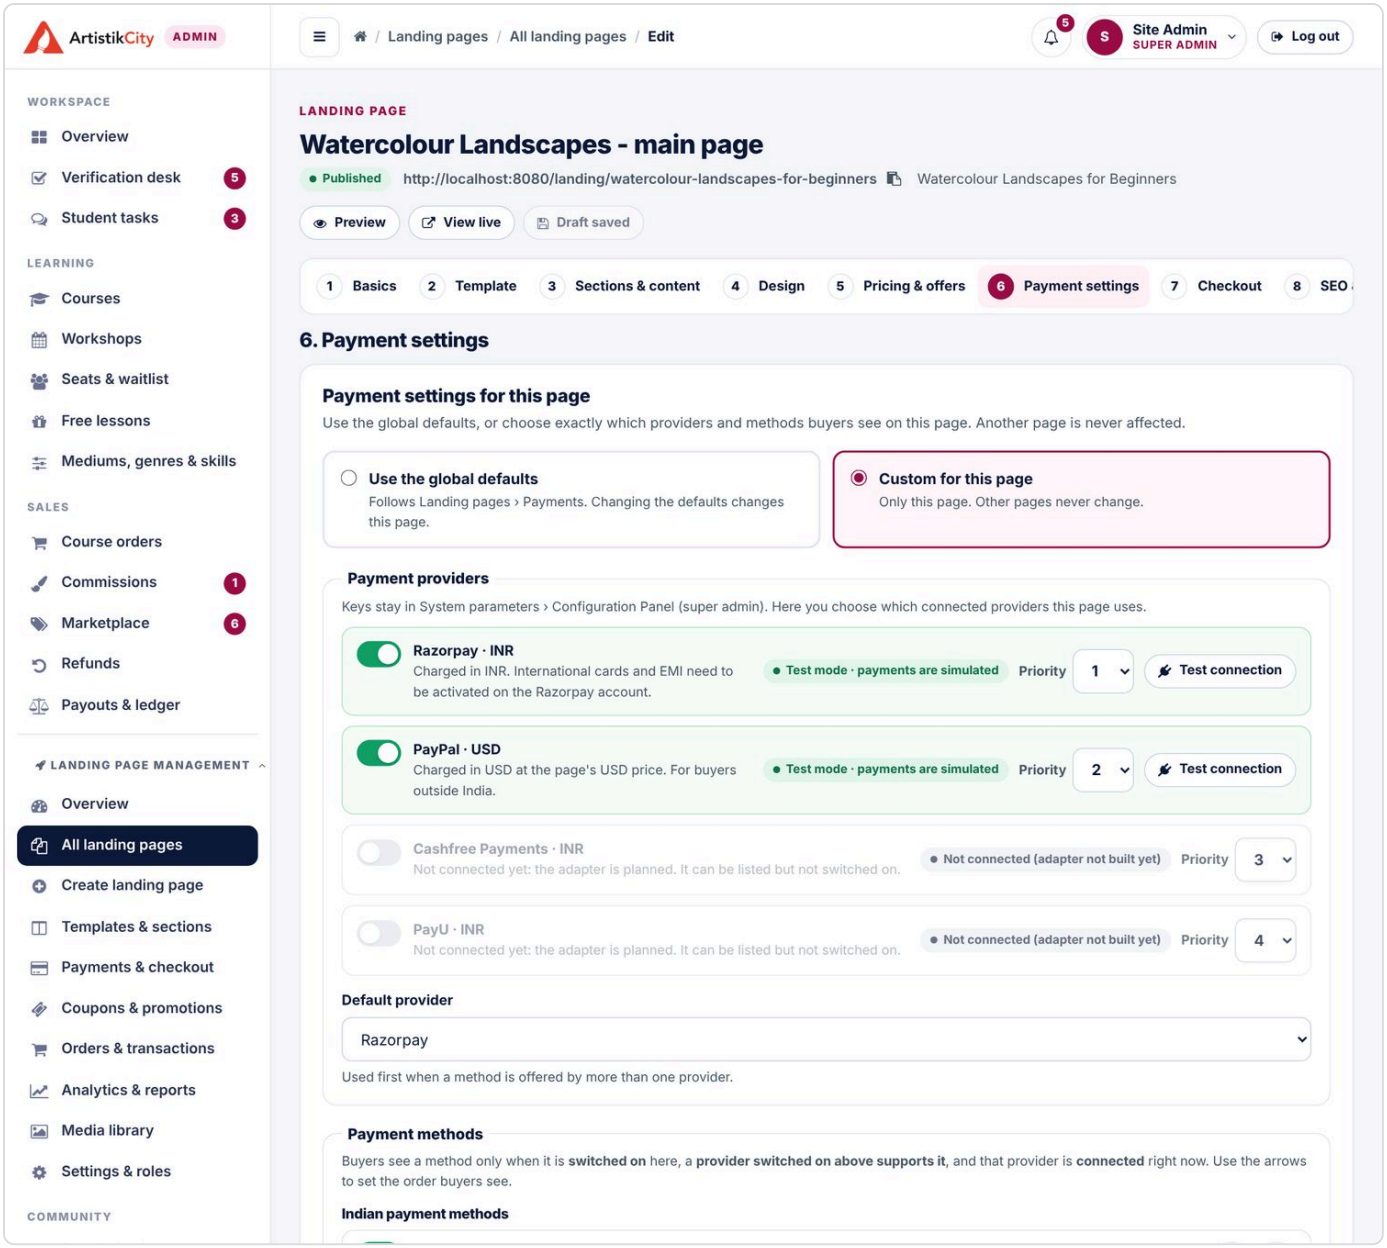

Figure 46. Step 6, Payment settings.

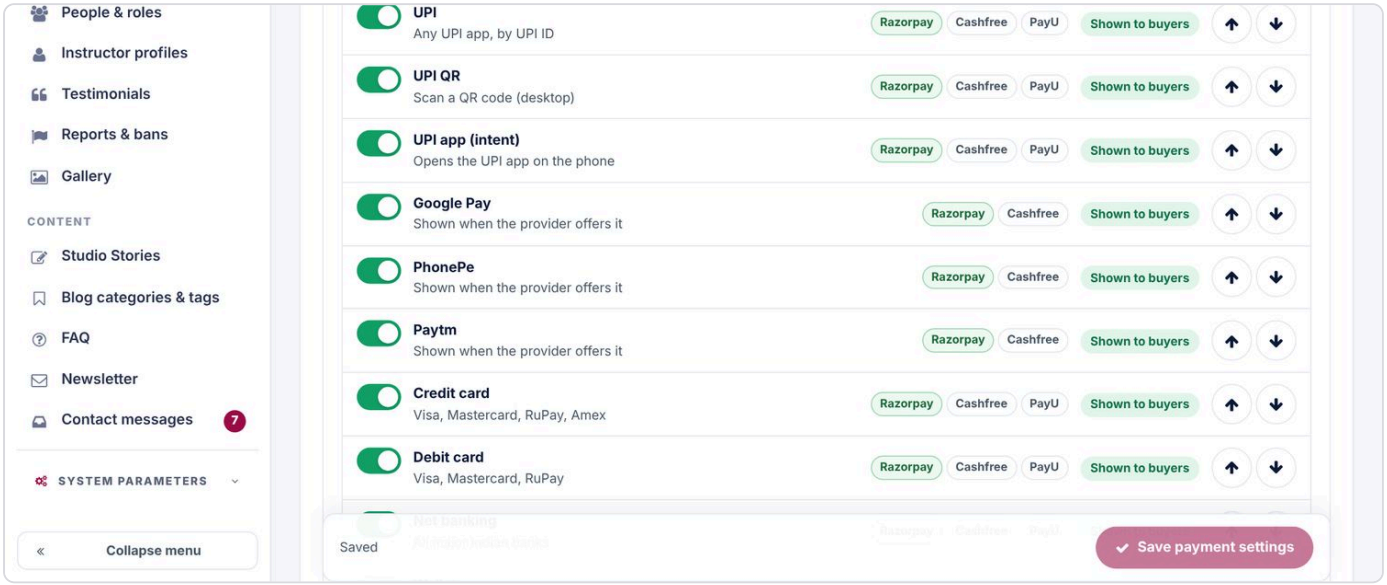

Figure 46. Step 6, Payment settings. (continued, part 2 of 2)

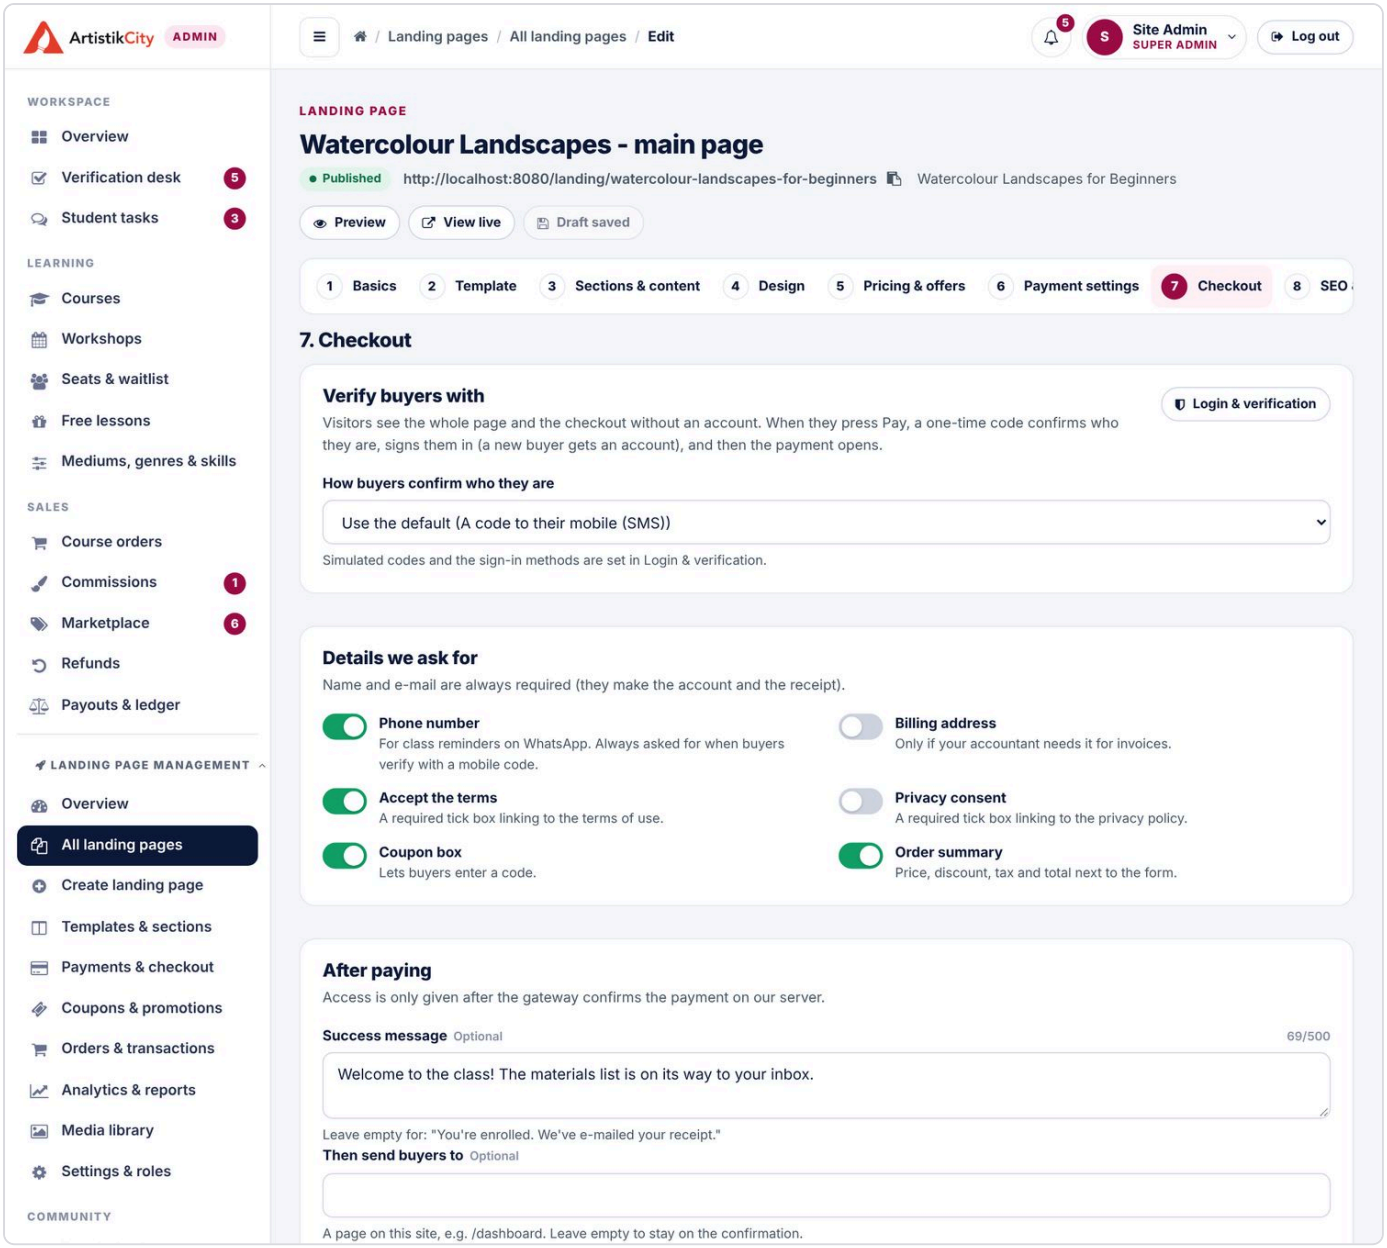

Figure 47. Step 7, Checkout.

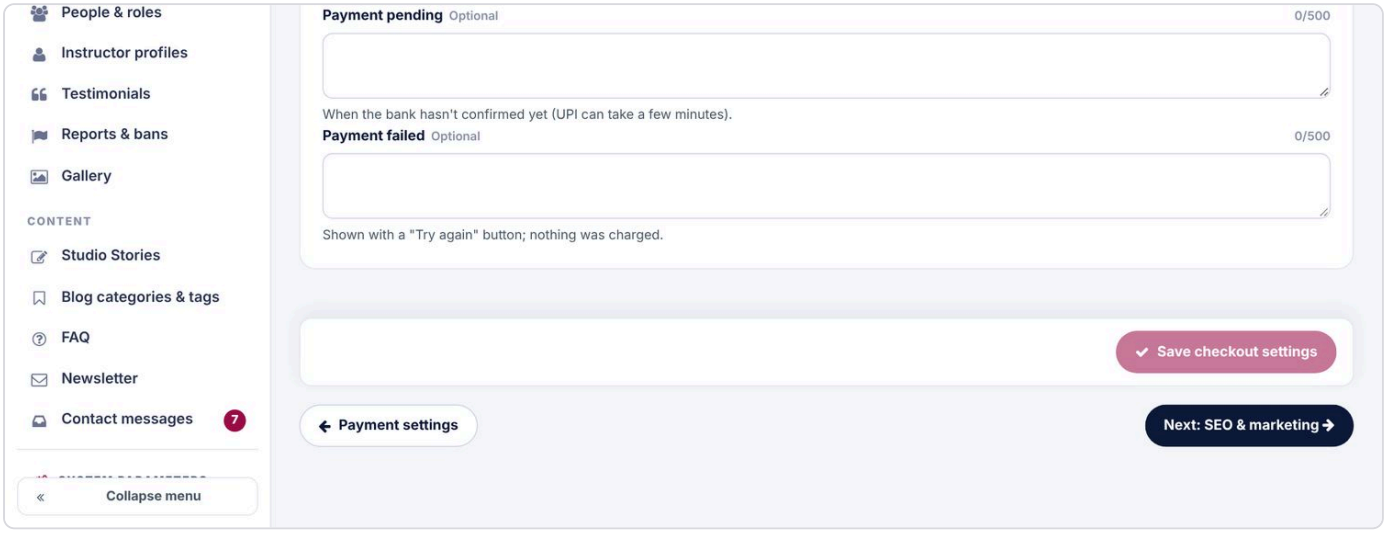

Figure 47. Step 7, Checkout. (continued, part 2 of 2)

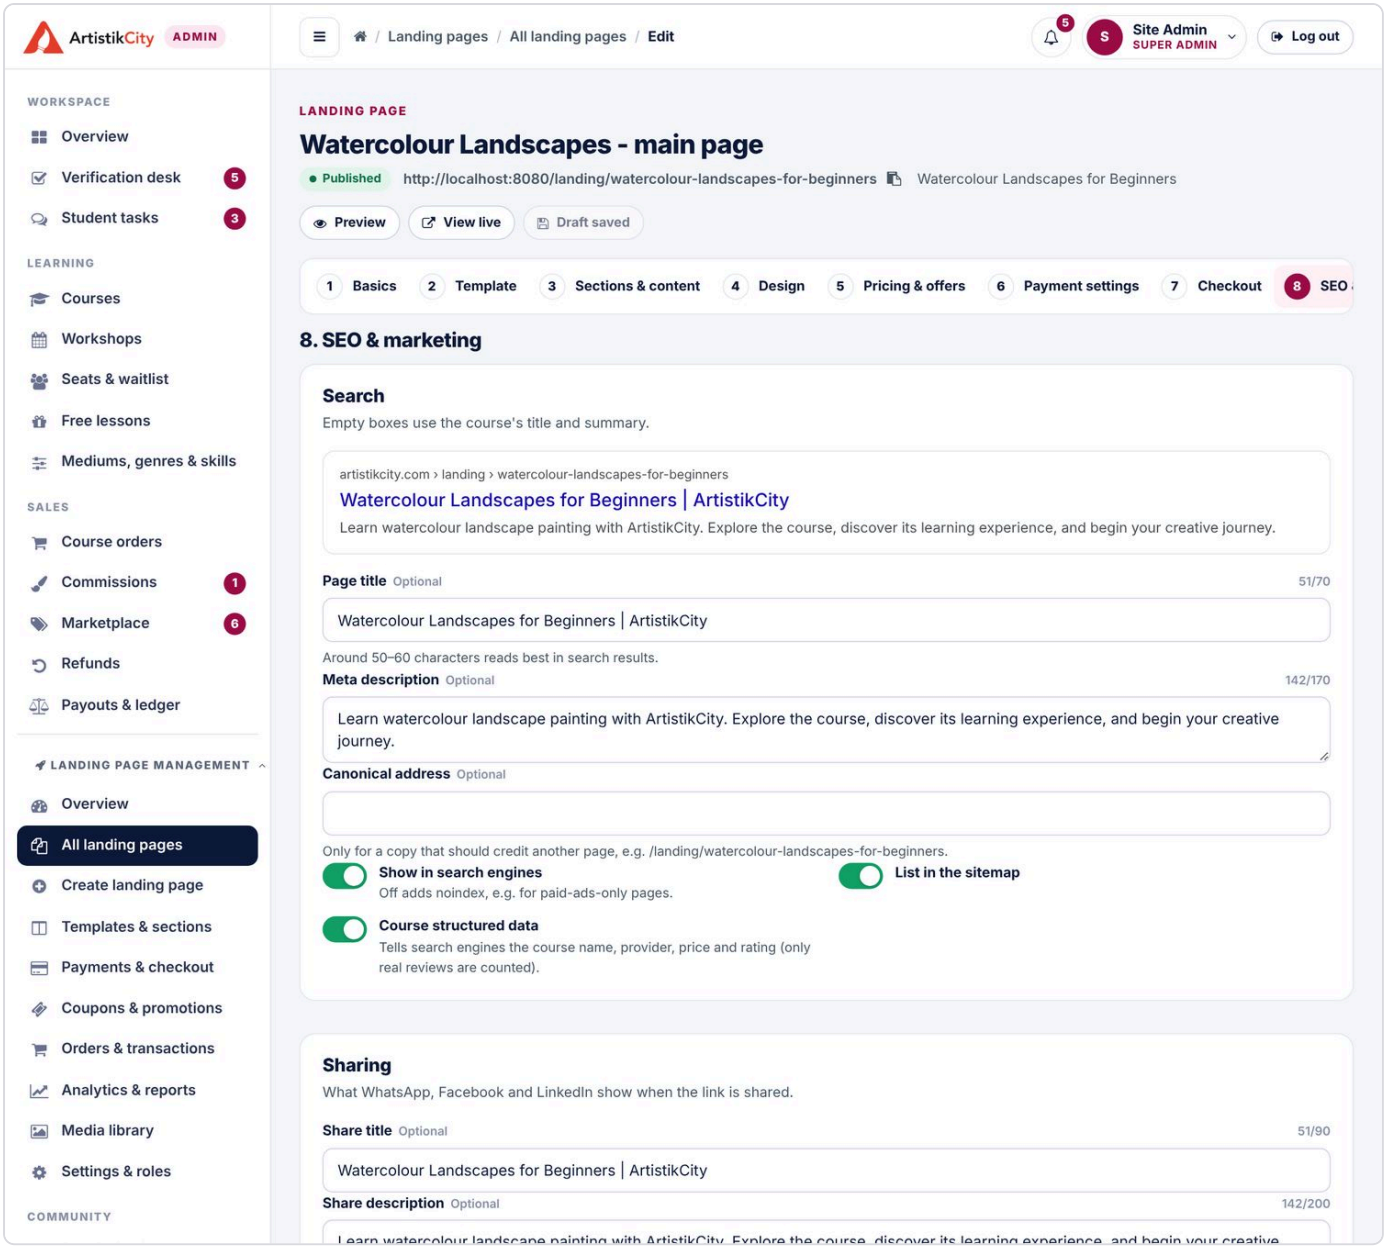

Figure 48. Step 8, SEO & marketing.

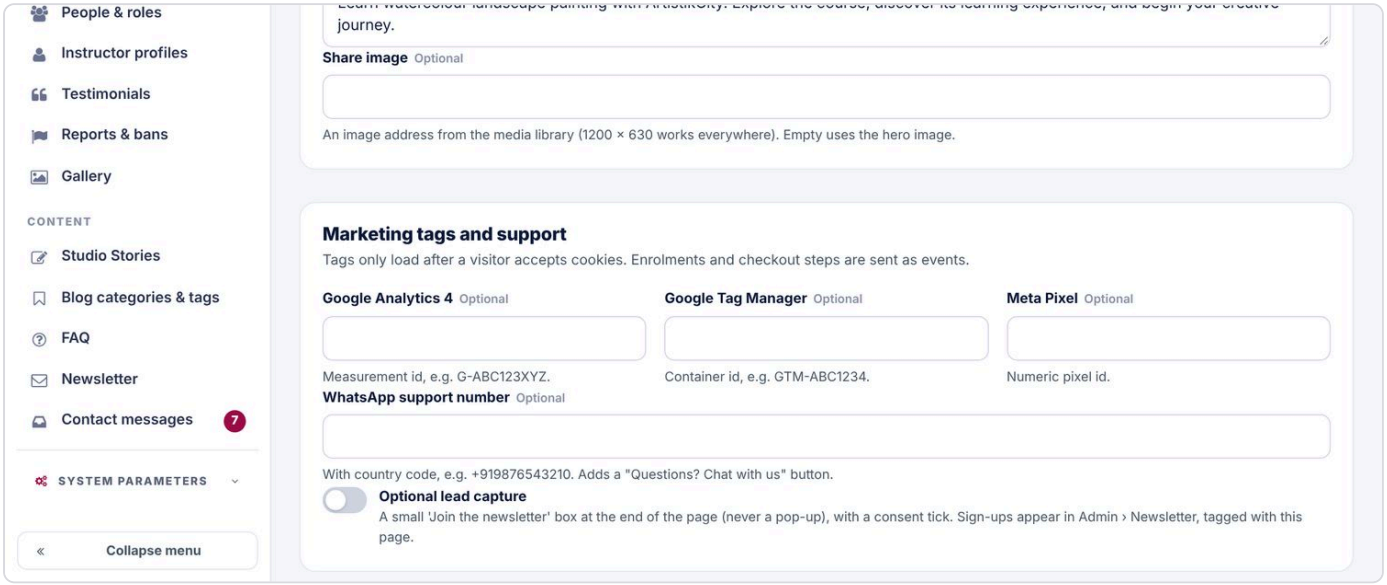

Figure 48. Step 8, SEO & marketing. (continued, part 2 of 2)

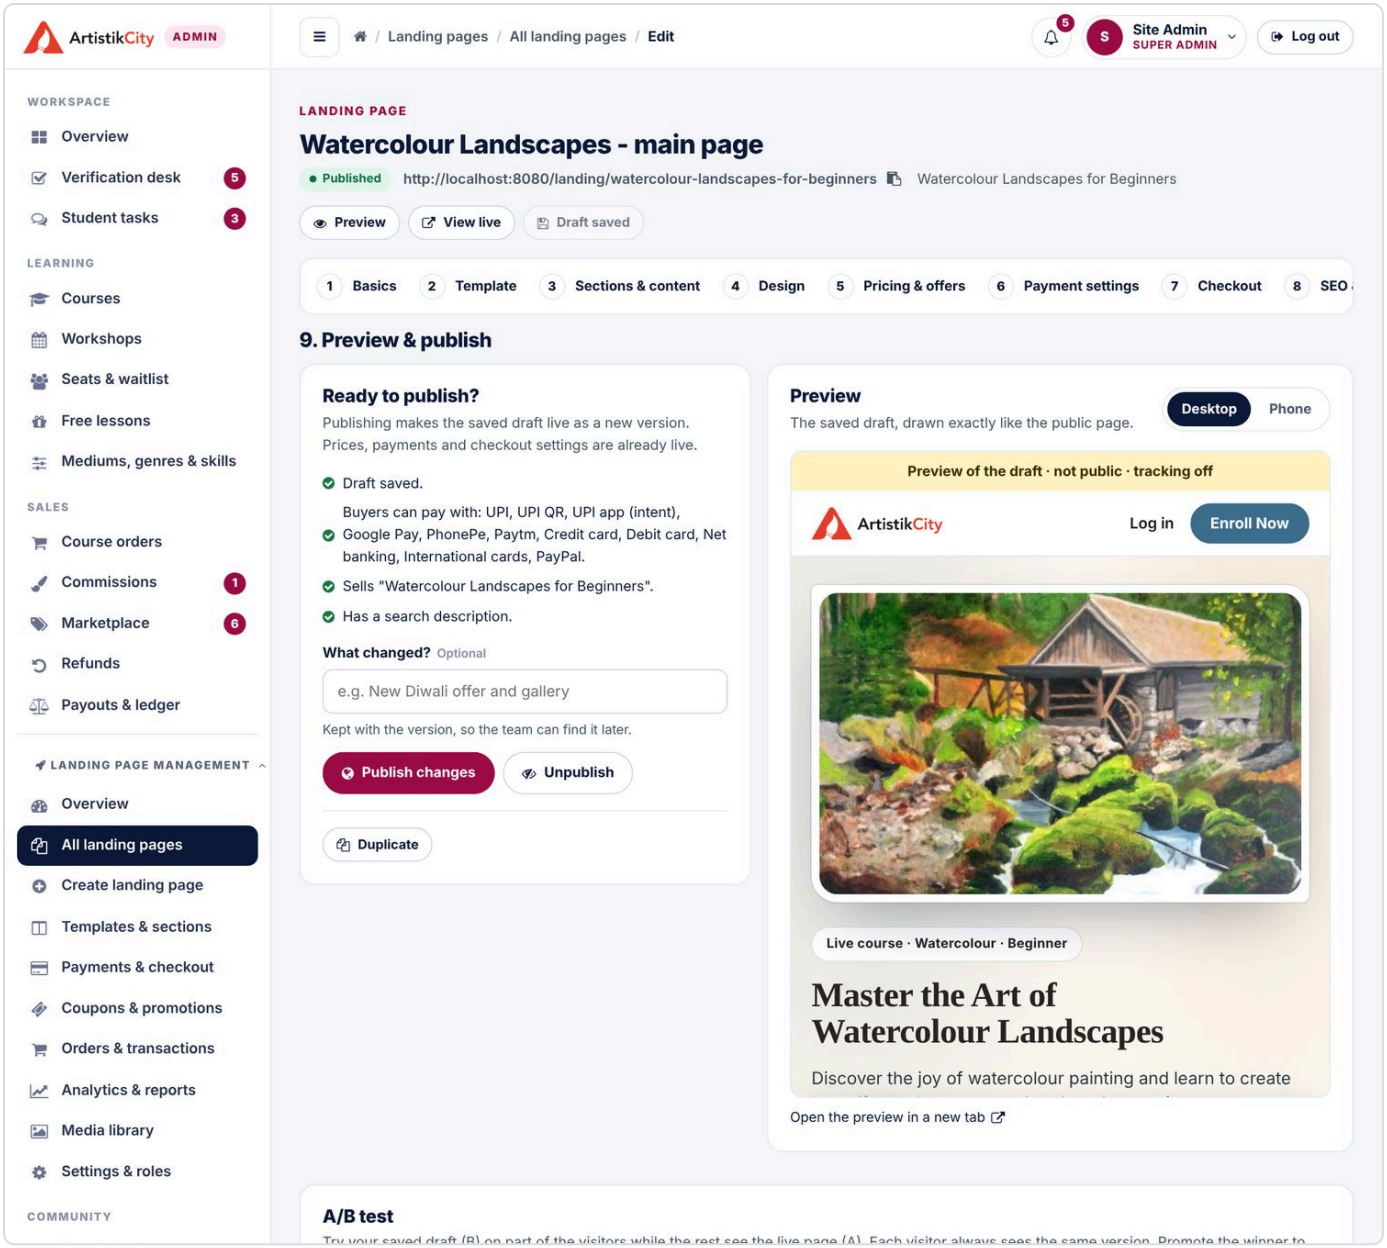

Figure 49. Step 9, Preview & publish.

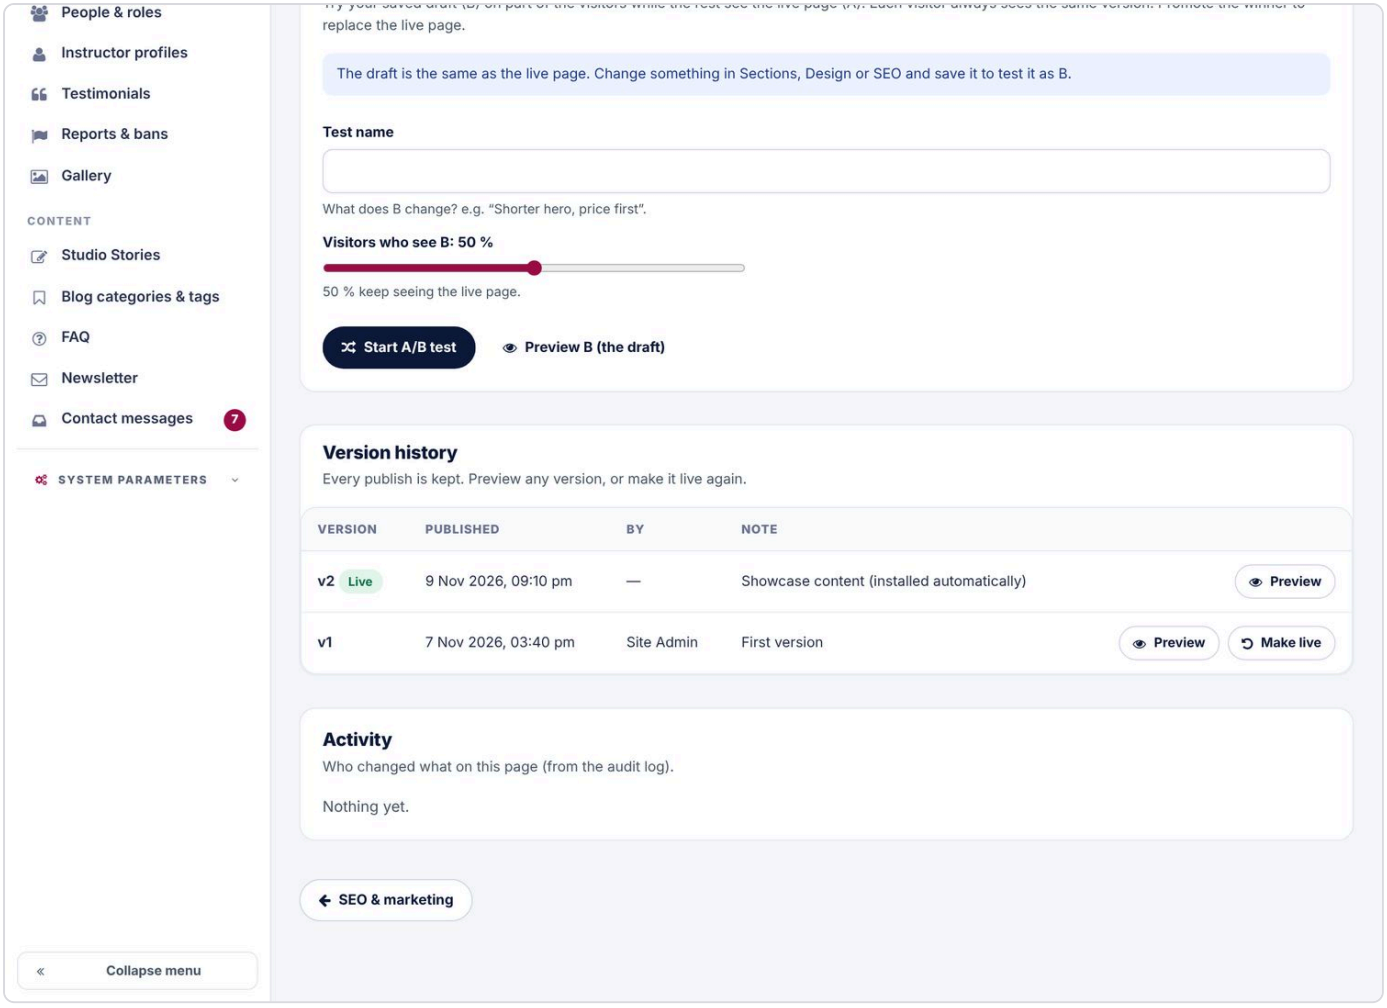

Figure 49. Step 9, Preview & publish. (continued, part 2 of 2)

> **IMPORTANT** A page cannot be published or scheduled while nobody could pay on it (no payment method both allowed by the page and connected in the Configuration Panel). The checklist says what is missing.

5.4 A/B testing a page

Test a change on part of your visitors before it replaces the live page. Version A is the live page; version B is your saved draft.

1. Change the draft (for example a new headline) and save it.
2. In Preview & publish › A/B test give the test a name and choose how many visitors see B (10–90 %).
3. **Start A/B test**. Each visitor is assigned A or B and always sees the same version.
4. Watch visitors, enrolments and conversion for A and B, with how confident the result is.
5. End the test: **Promote B** publishes B as the new live version (A stays in the version history), **Keep A** discards B, or stop without a winner.

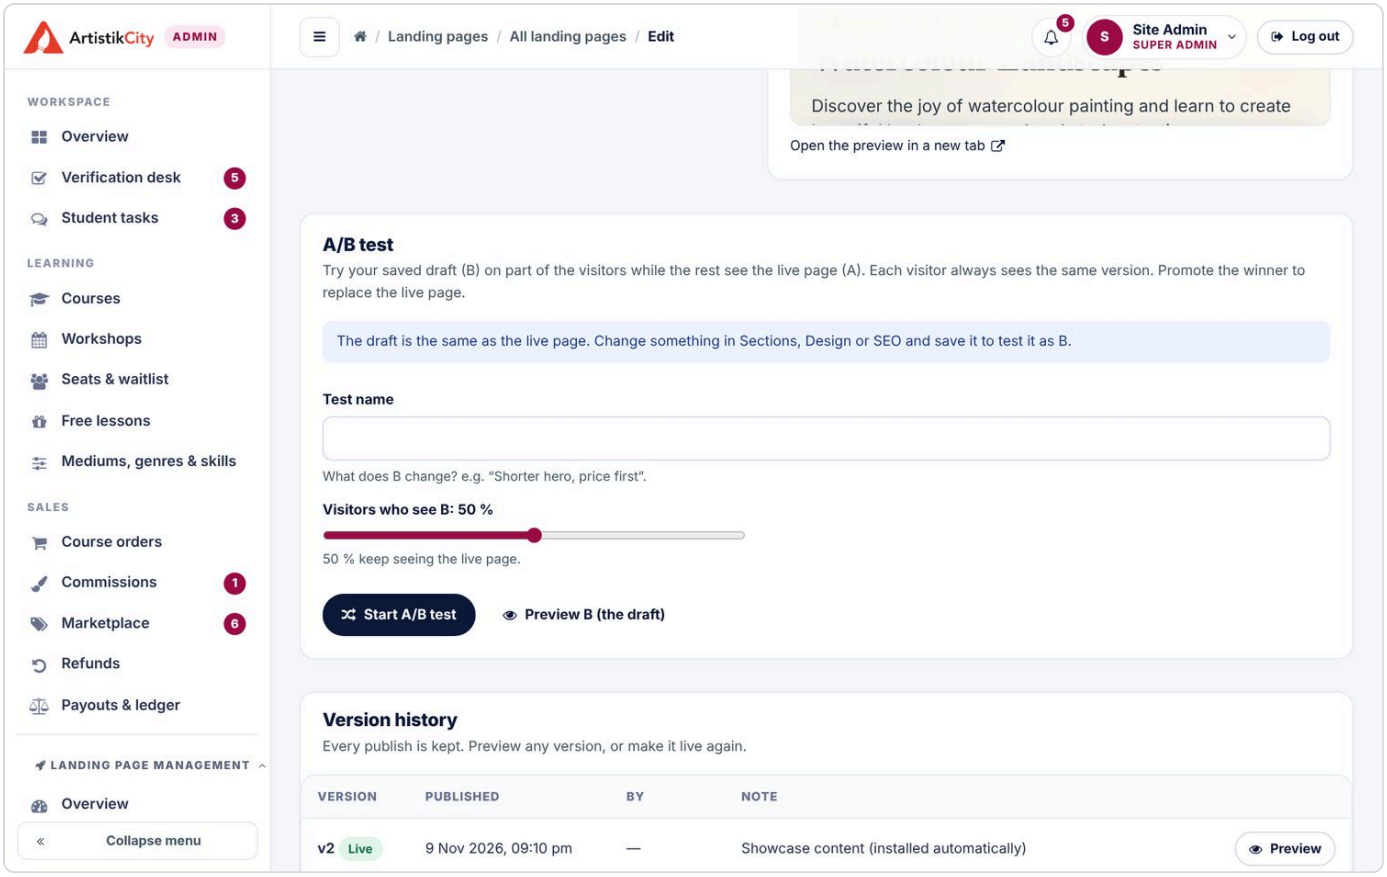

Figure 50. The A/B test card.

> **TIP** While a test runs, publishing and rollback are paused for that page, so the two versions stay comparable. Staff can preview either version with ?ab=A or ?ab=B after the page address.

5.5 Templates, payments and login

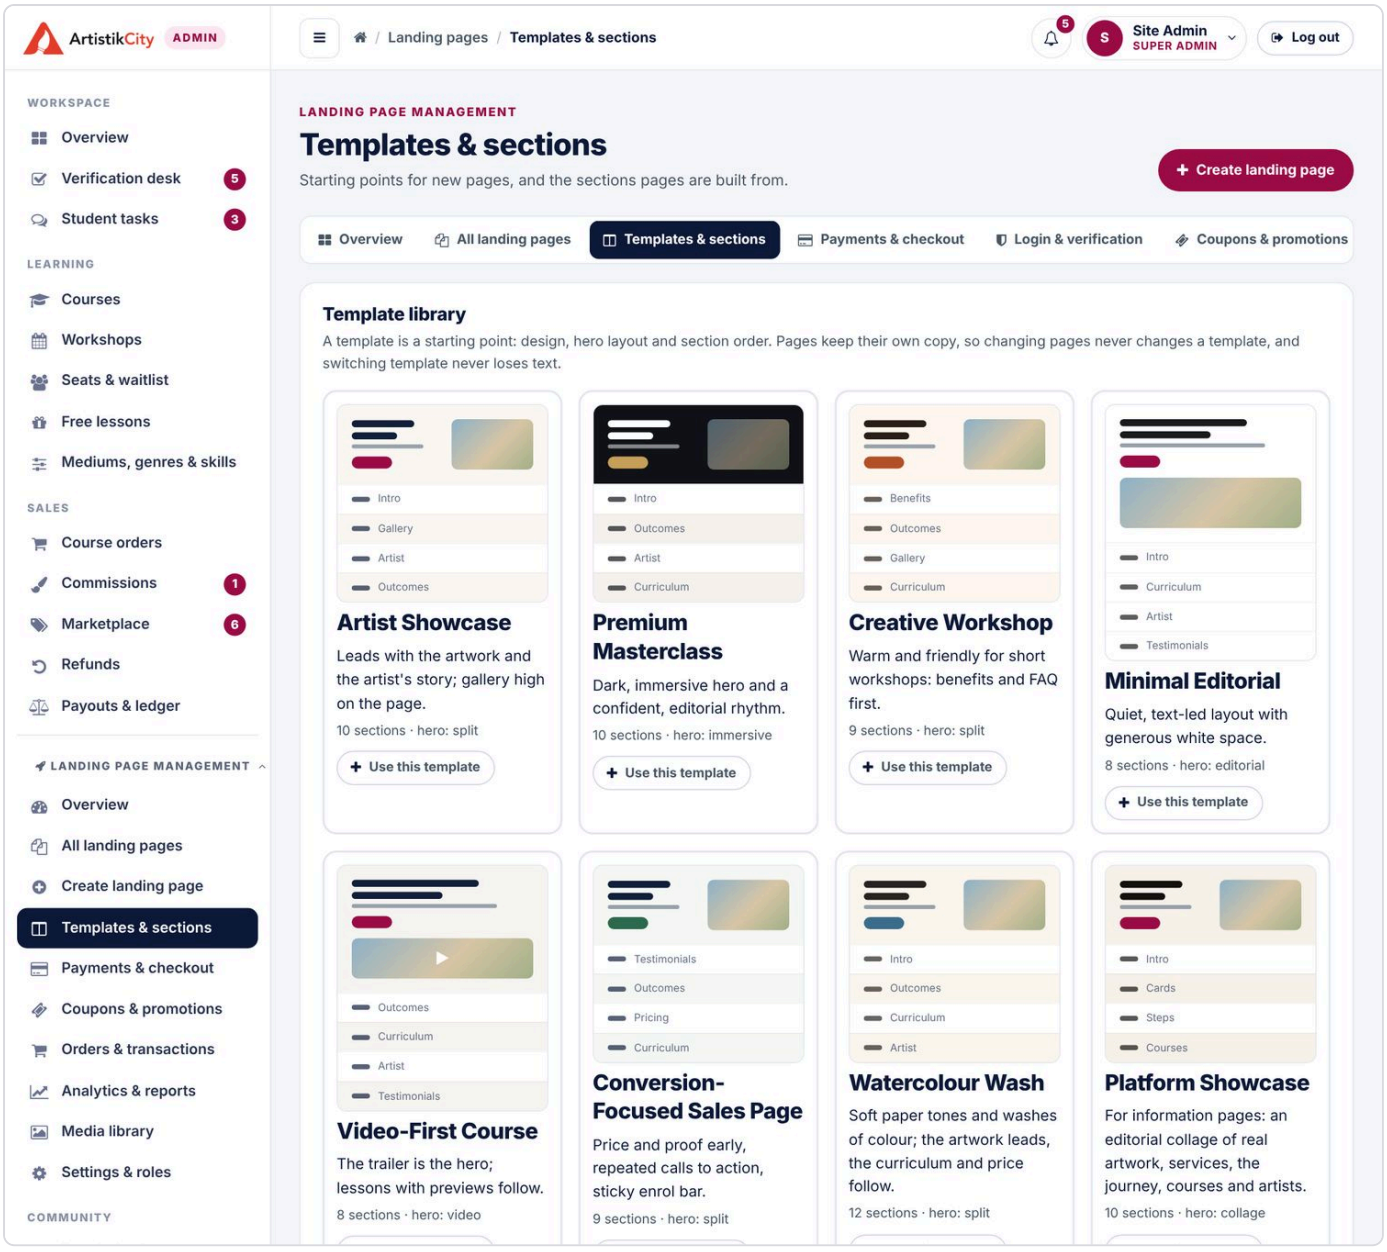

Figure 51. Templates & sections: the catalogue with previews.

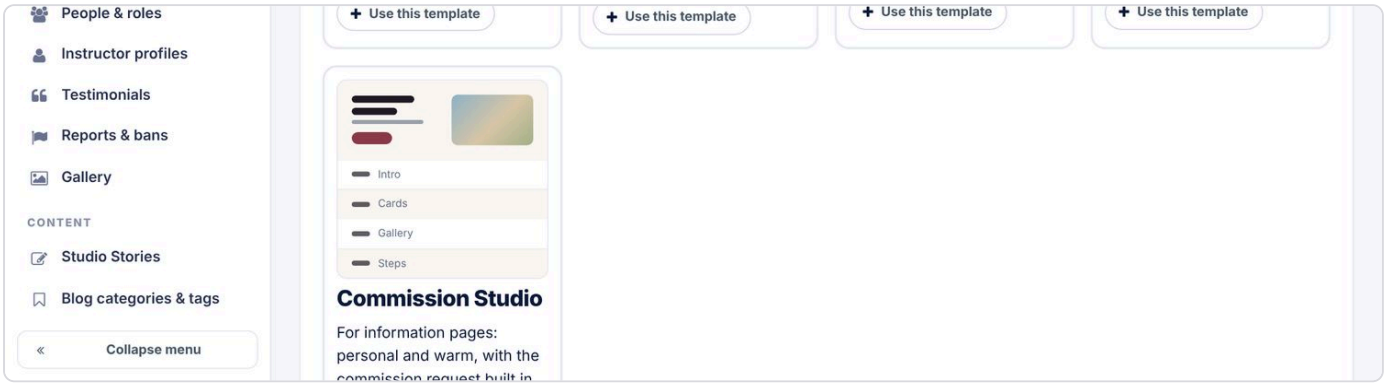

Figure 51. Templates & sections: the catalogue with previews. (continued, part 2 of 2)

Payments & checkout: the default payment methods for all pages, each page's mode at a glance, the status of each provider with Test connection, and test payments (test buyers, simulator, recent test orders with undo).

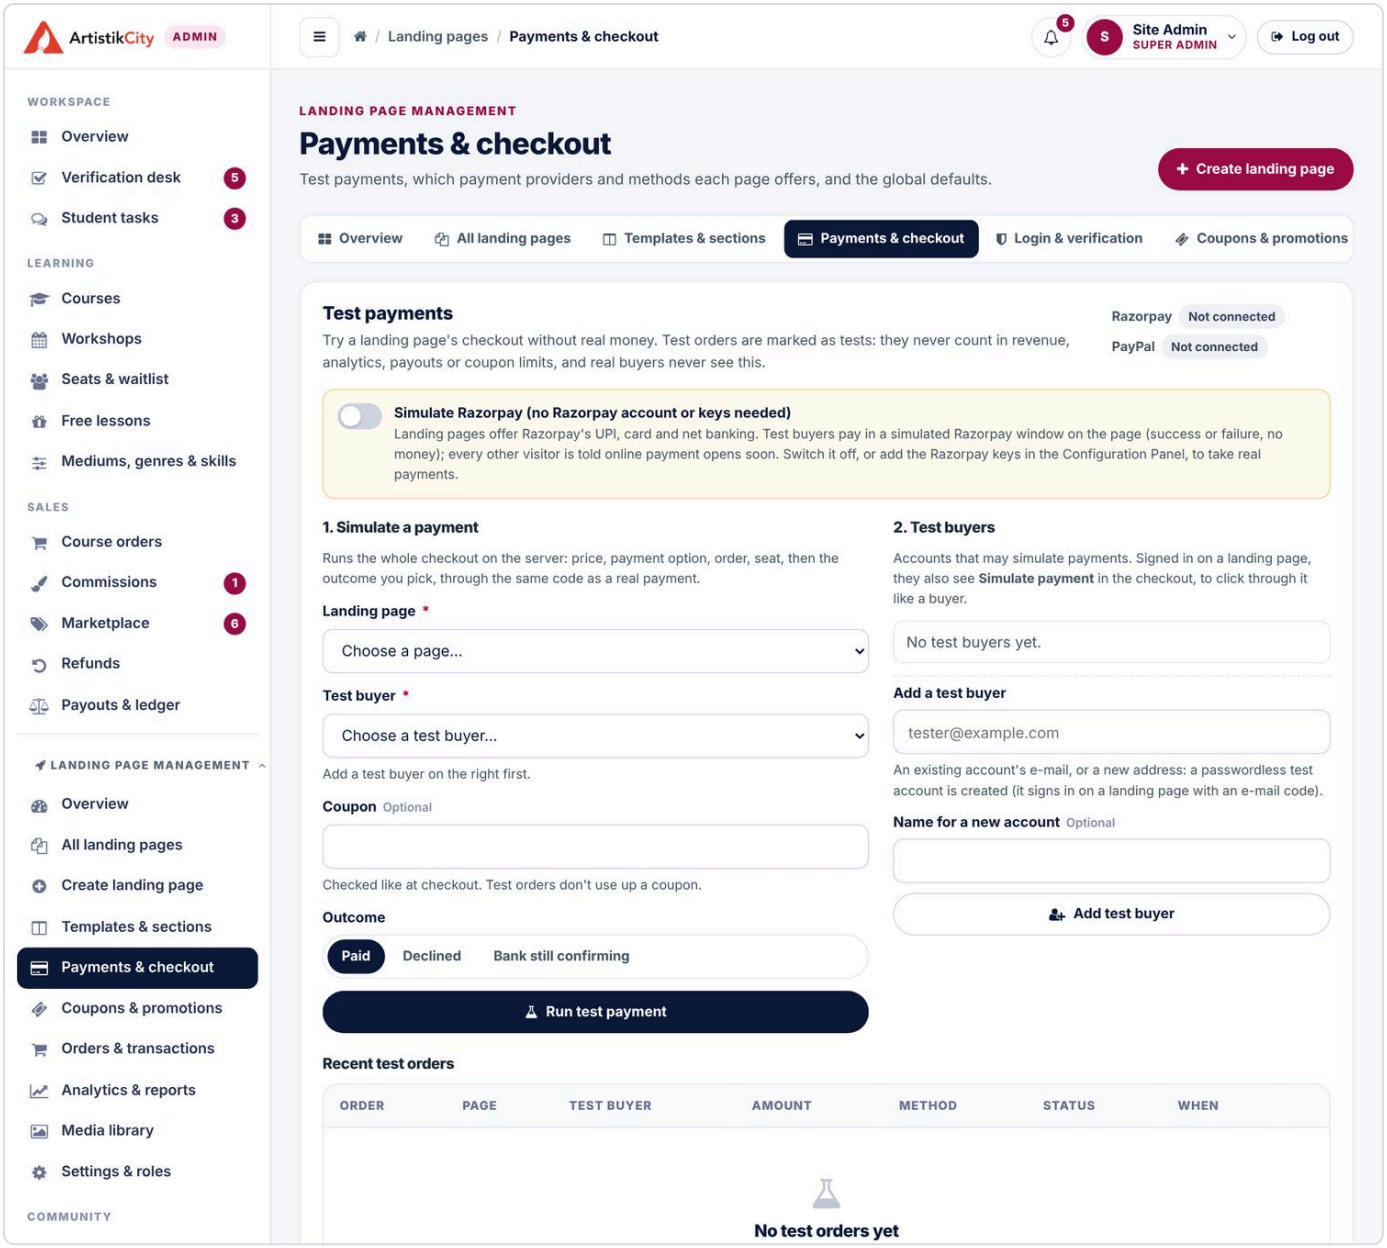

Figure 52. Payments & checkout.

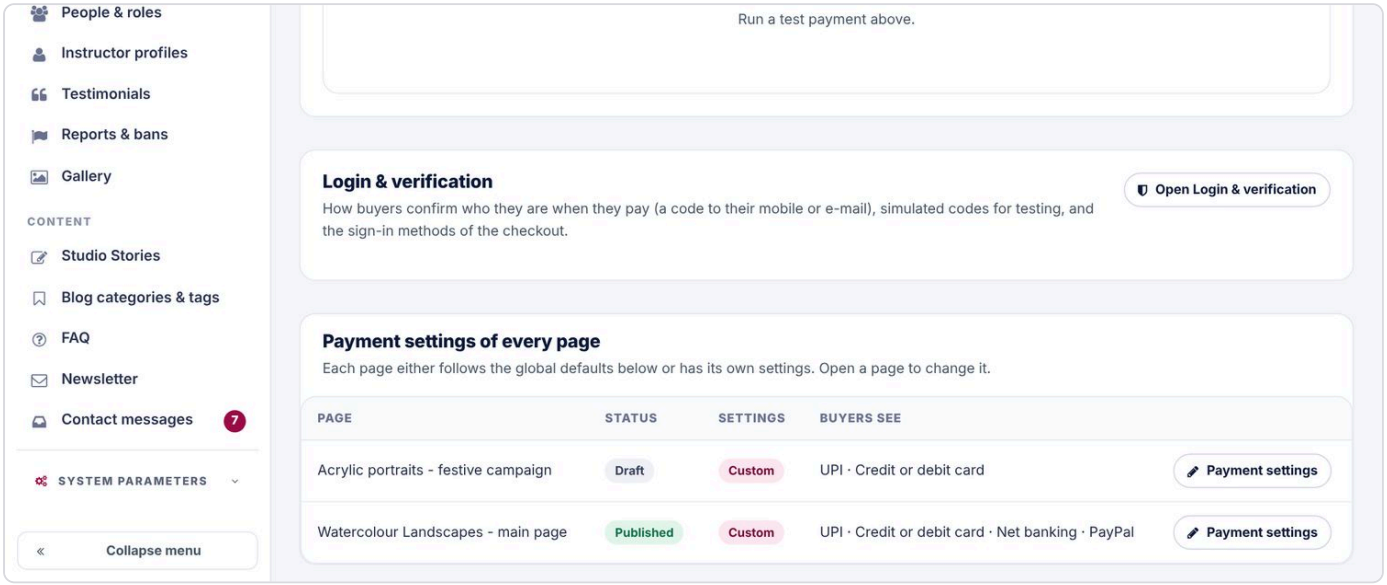

Figure 52. Payments & checkout. (continued, part 2 of 2)

Login & verification: how buyers sign in or verify at Pay on landing pages (e-mail code, phone code, Google).

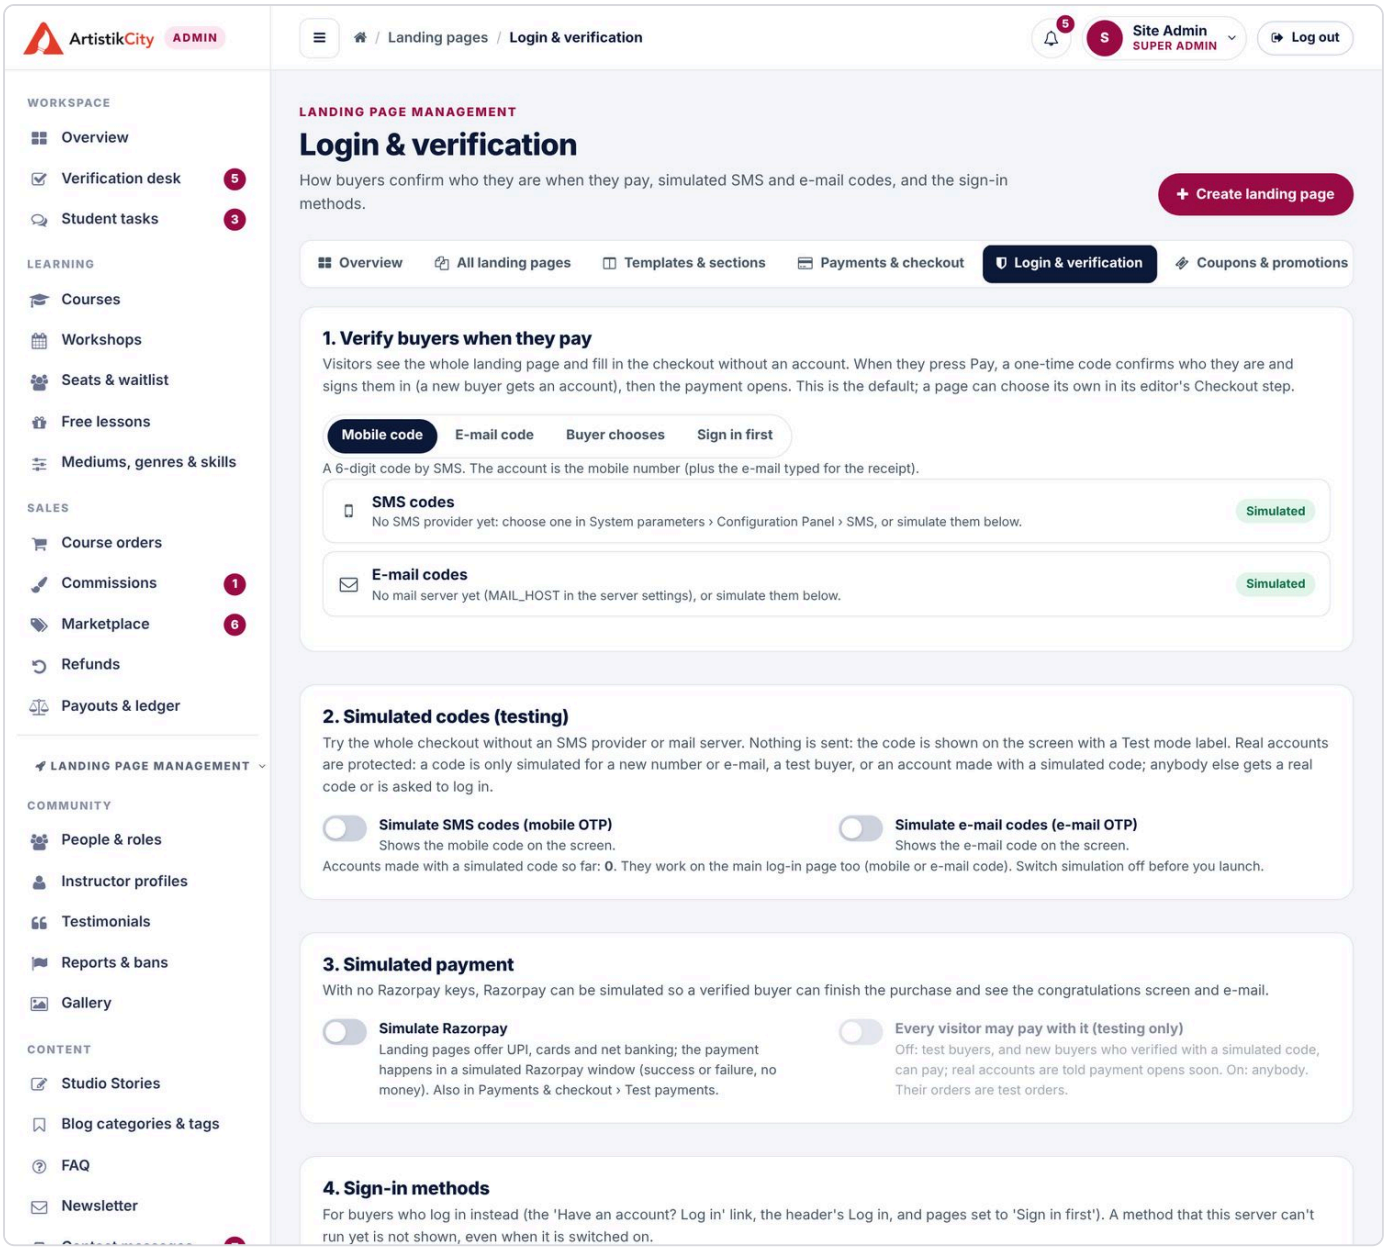

Figure 53. Login & verification.

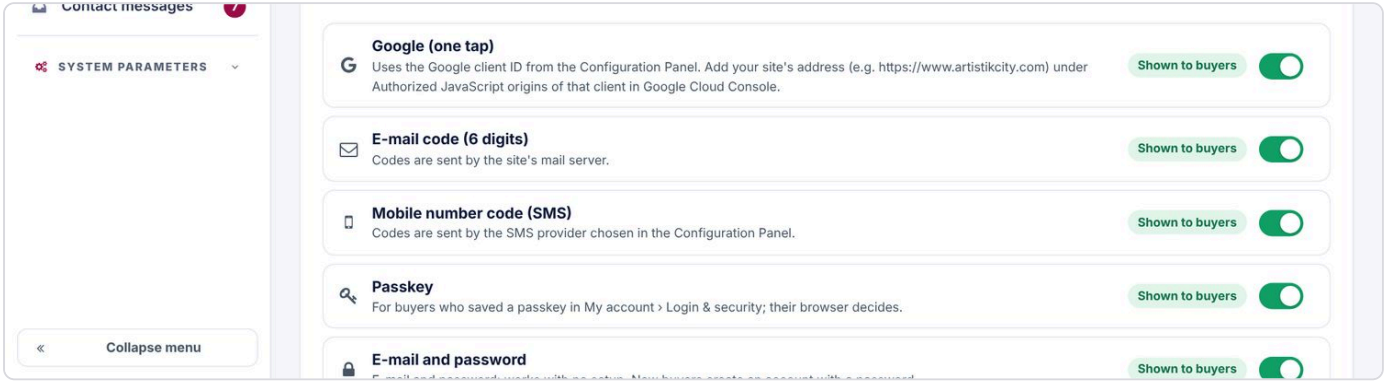

Figure 53. Login & verification. (continued, part 2 of 2)

5.6 Coupons, orders, analytics, media and settings

Coupons & promotions: percentage or fixed amount, campaign, which pages and/or courses, minimum amount, total and per-person limits, first-time buyers only, start and end dates. Checked on the server every time.

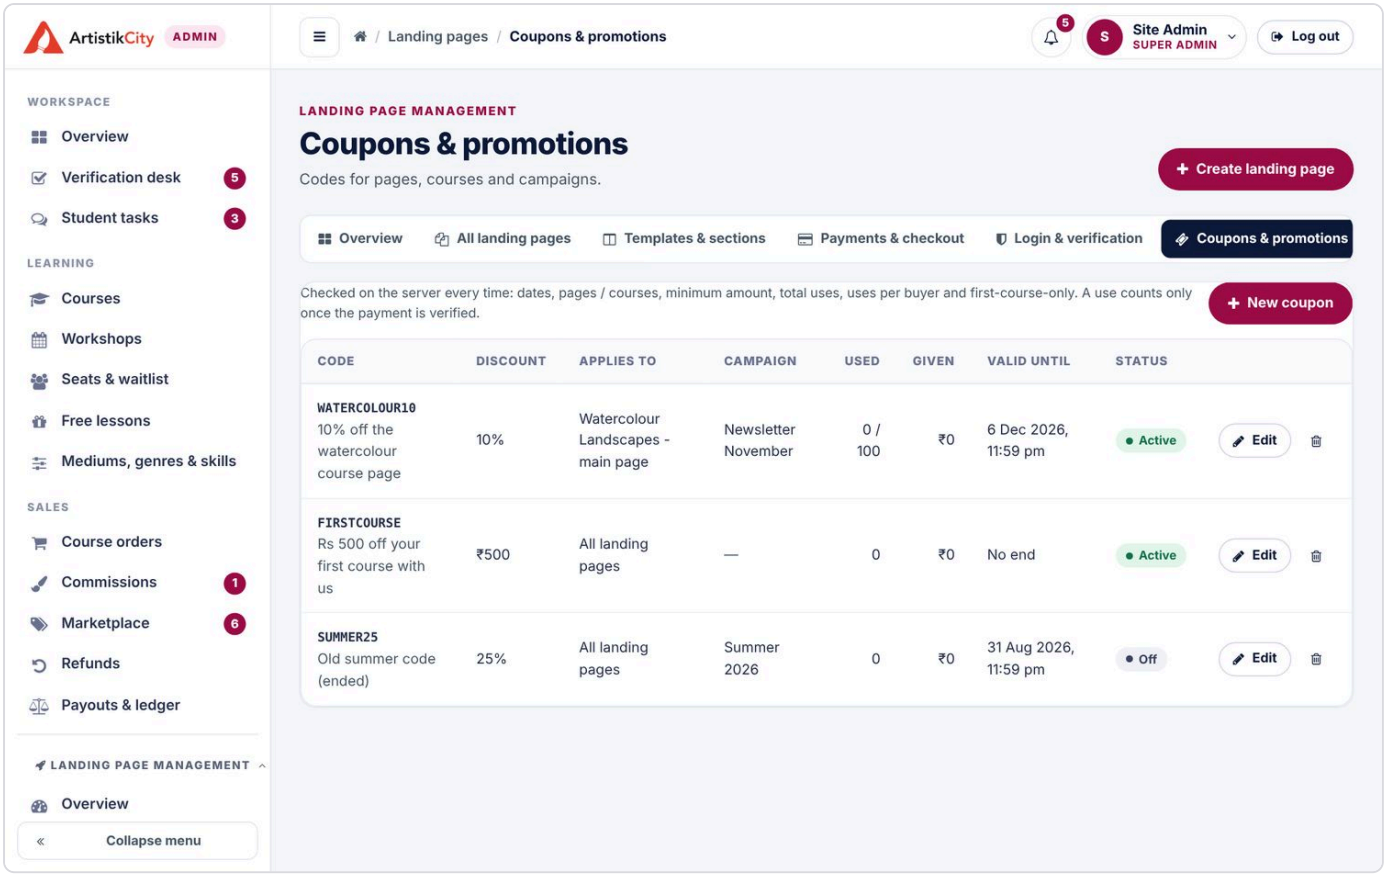

Figure 54. Coupons & promotions.

Orders & transactions: landing-page orders with method, provider, reference and status; the detail drawer has the payment log and a full refund (reason required).

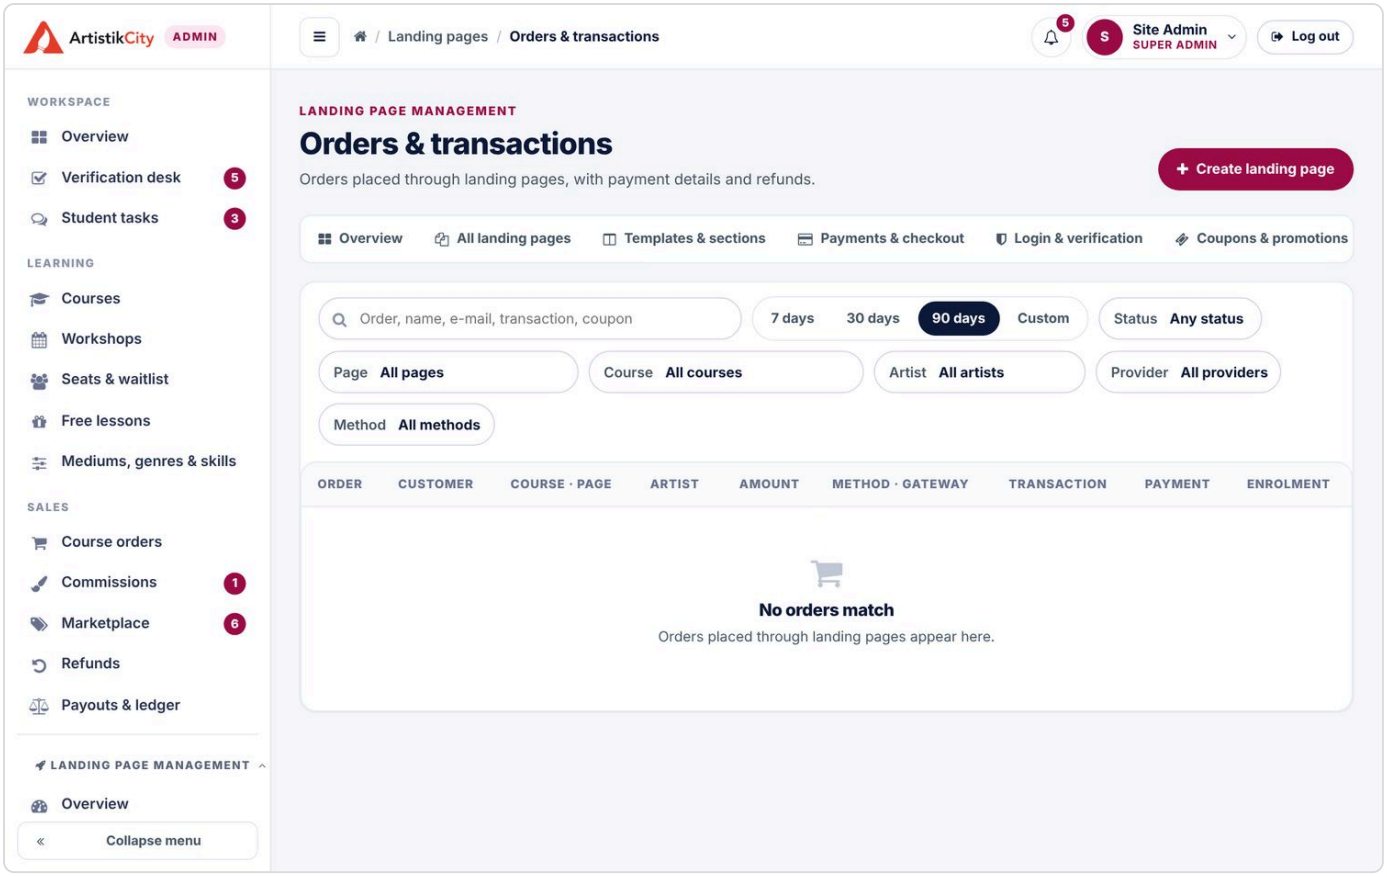

Figure 55. Orders & transactions.

Analytics & reports: the funnel from view to purchase, payment methods and providers, devices and campaigns.

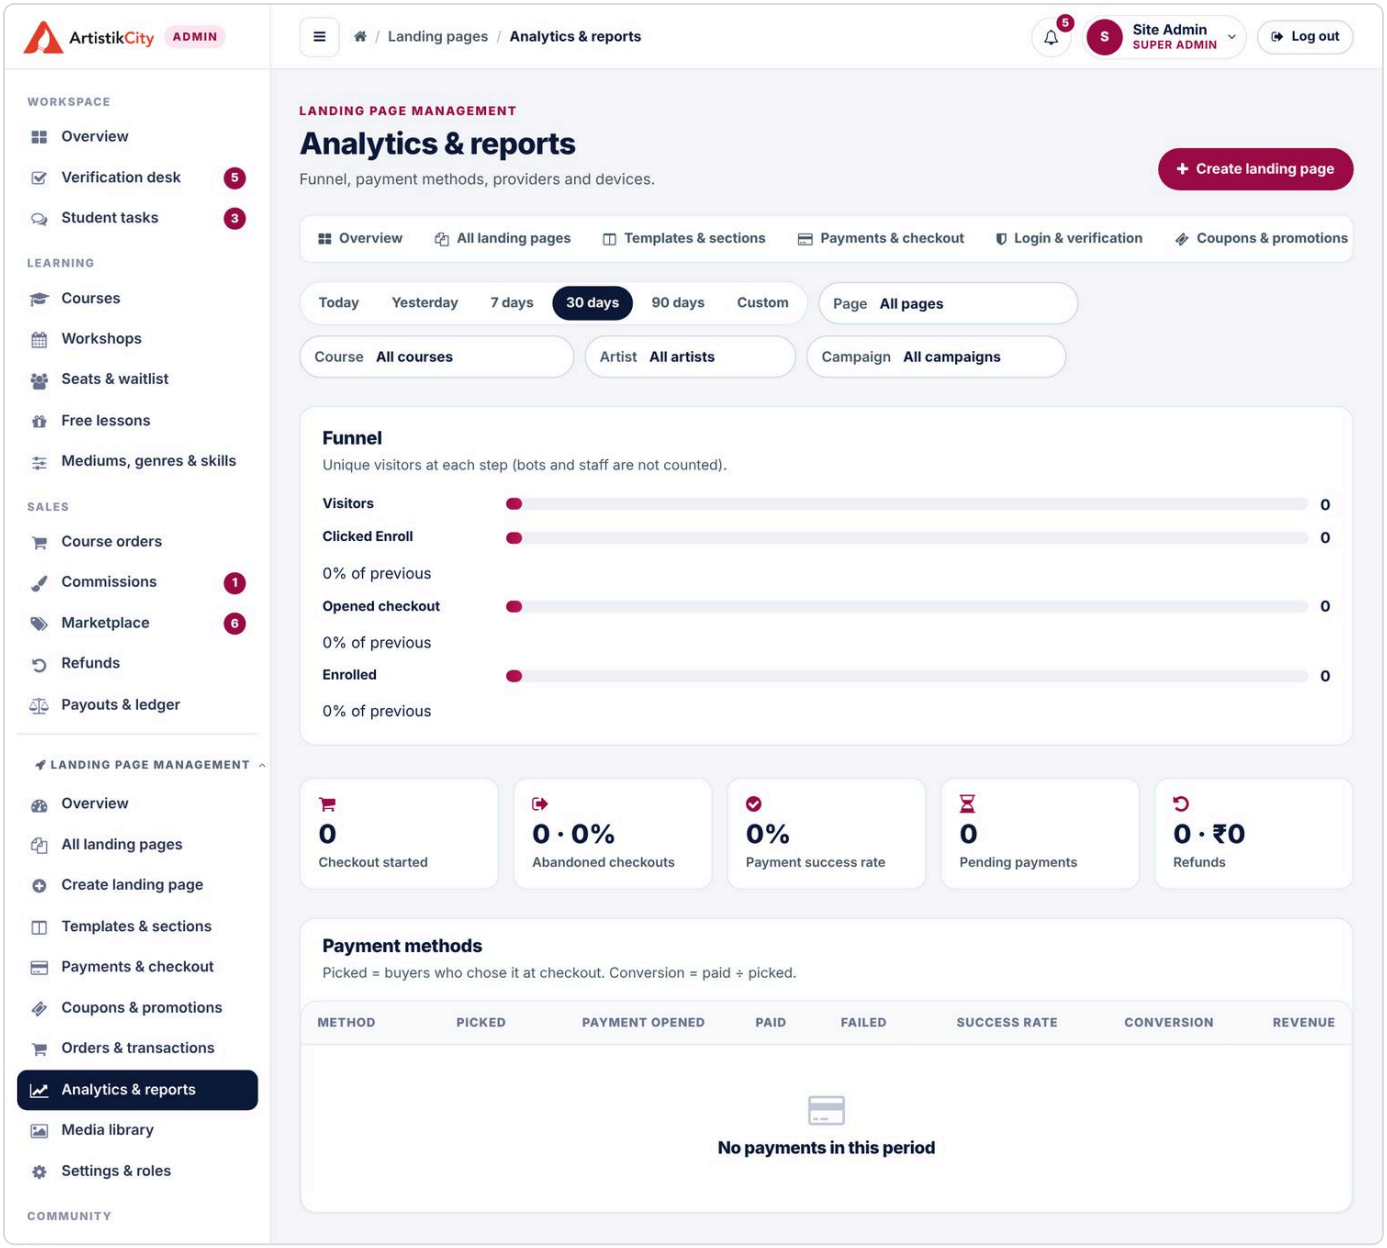

Figure 56. Analytics & reports.

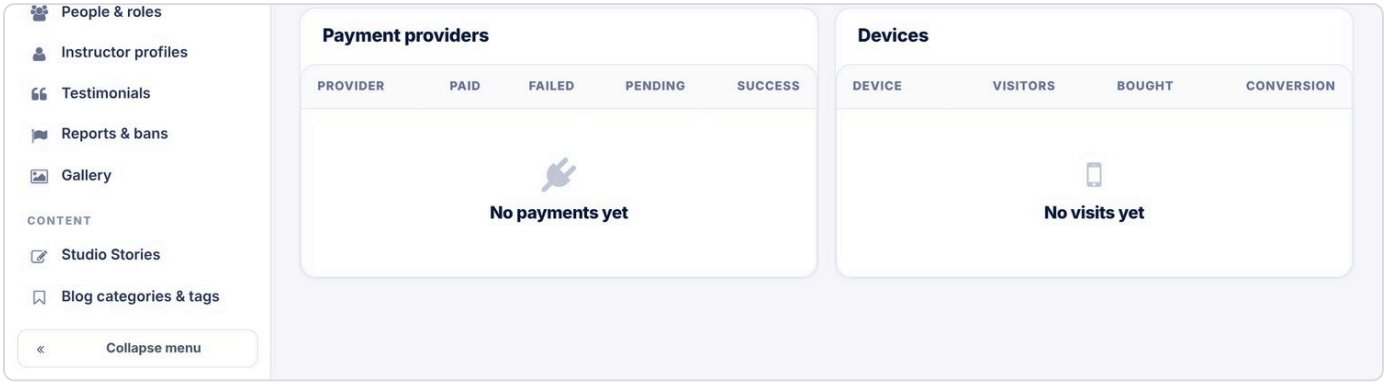

Figure 56. Analytics & reports. (continued, part 2 of 2)

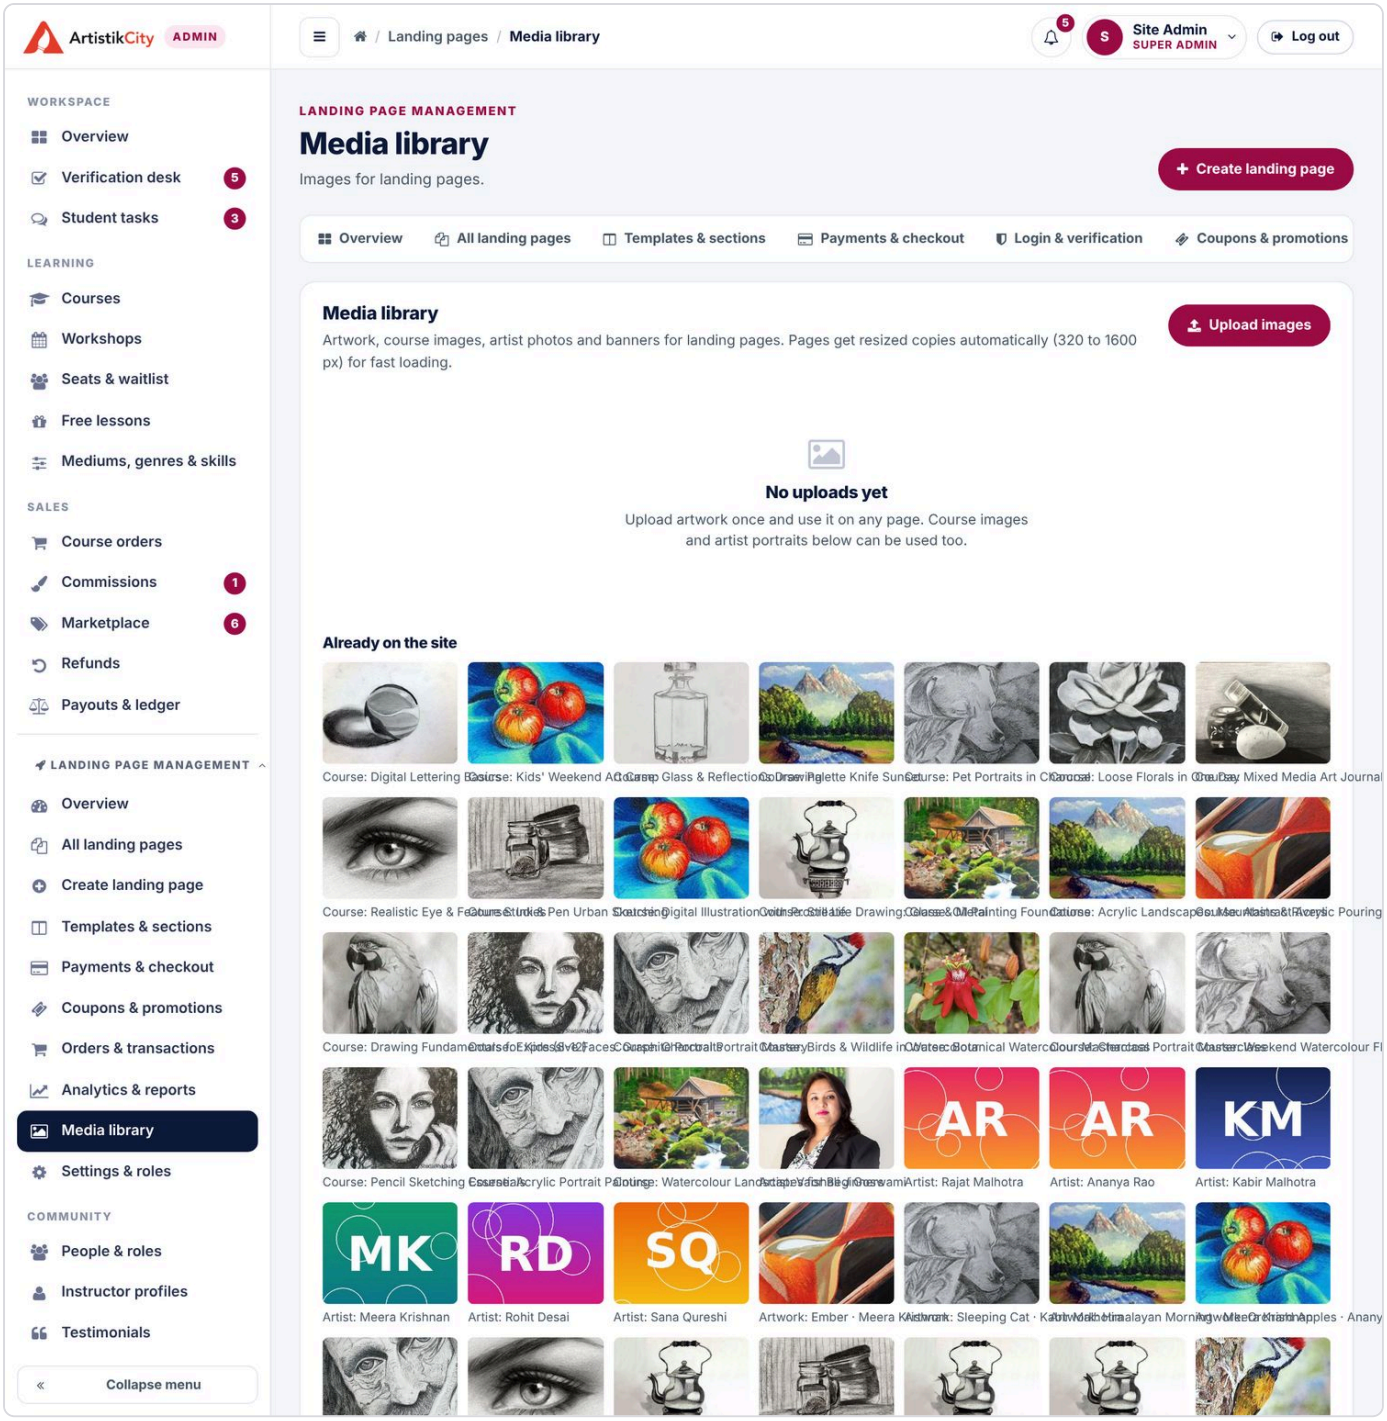

Figure 57. Media library: upload images (at least 600 px wide) with alt text; images in use cannot be removed.

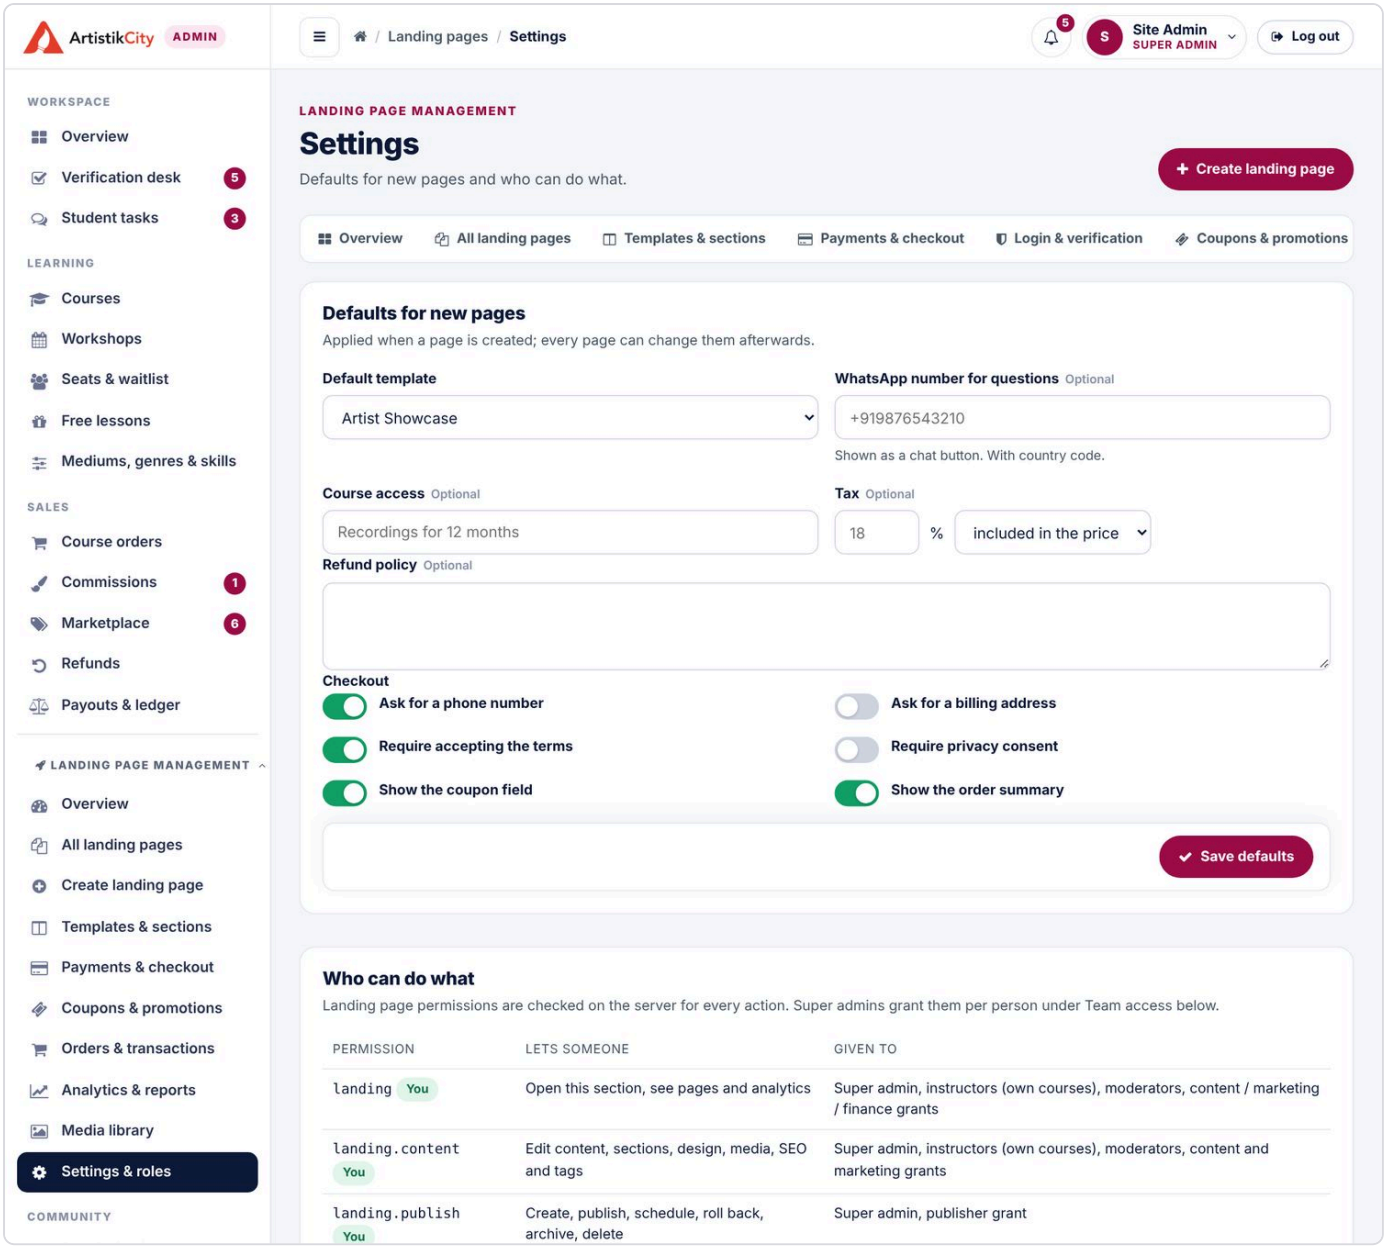

Figure 58. Settings & roles: defaults for new pages and Team access.

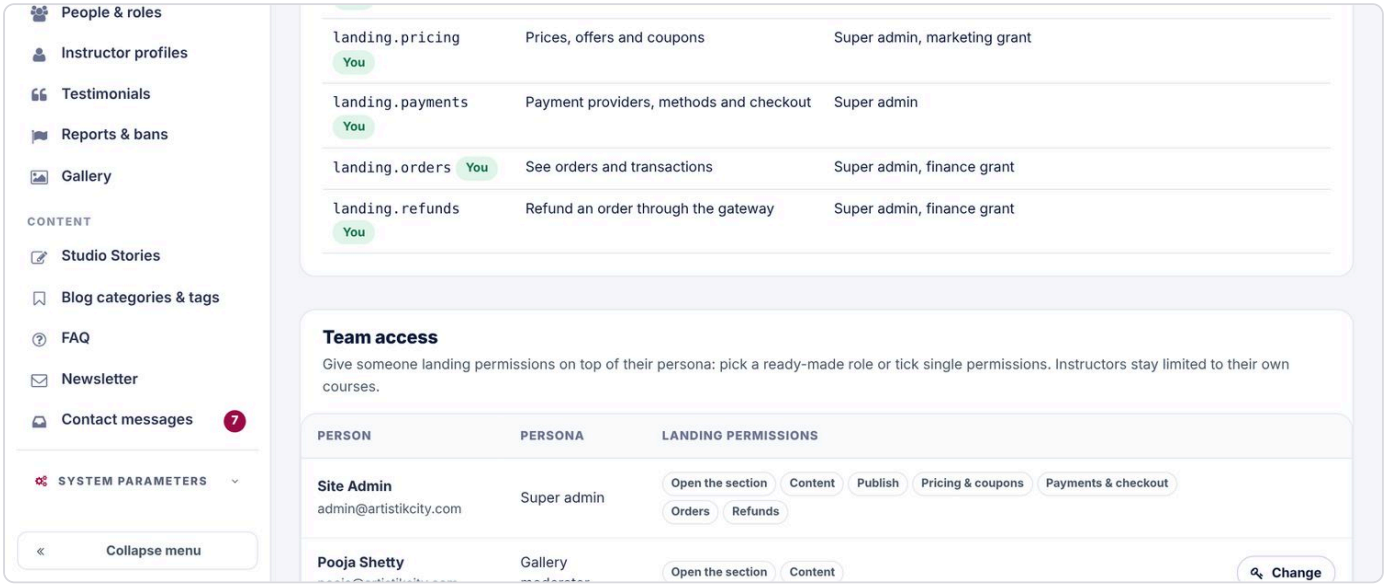

Figure 58. Settings & roles: defaults for new pages and Team access. (continued, part 2 of 2)

CHAPTER 6

Community

6.1 People & roles

- **Students** tab with filters: Everyone, Learning, Submitted work, Selling, Deactivated, Test buyers. Details opens a student's profile, courses, submissions and orders.
- **Test buyer** tick box (super admin): that account's checkouts on the live site can use Simulate payment, and its orders are marked as tests and left out of revenue.
- **Deactivate** blocks sign-in without deleting anything.
- **Staff** tab: roles; Invite staff sends an invitation.
- Export CSV.

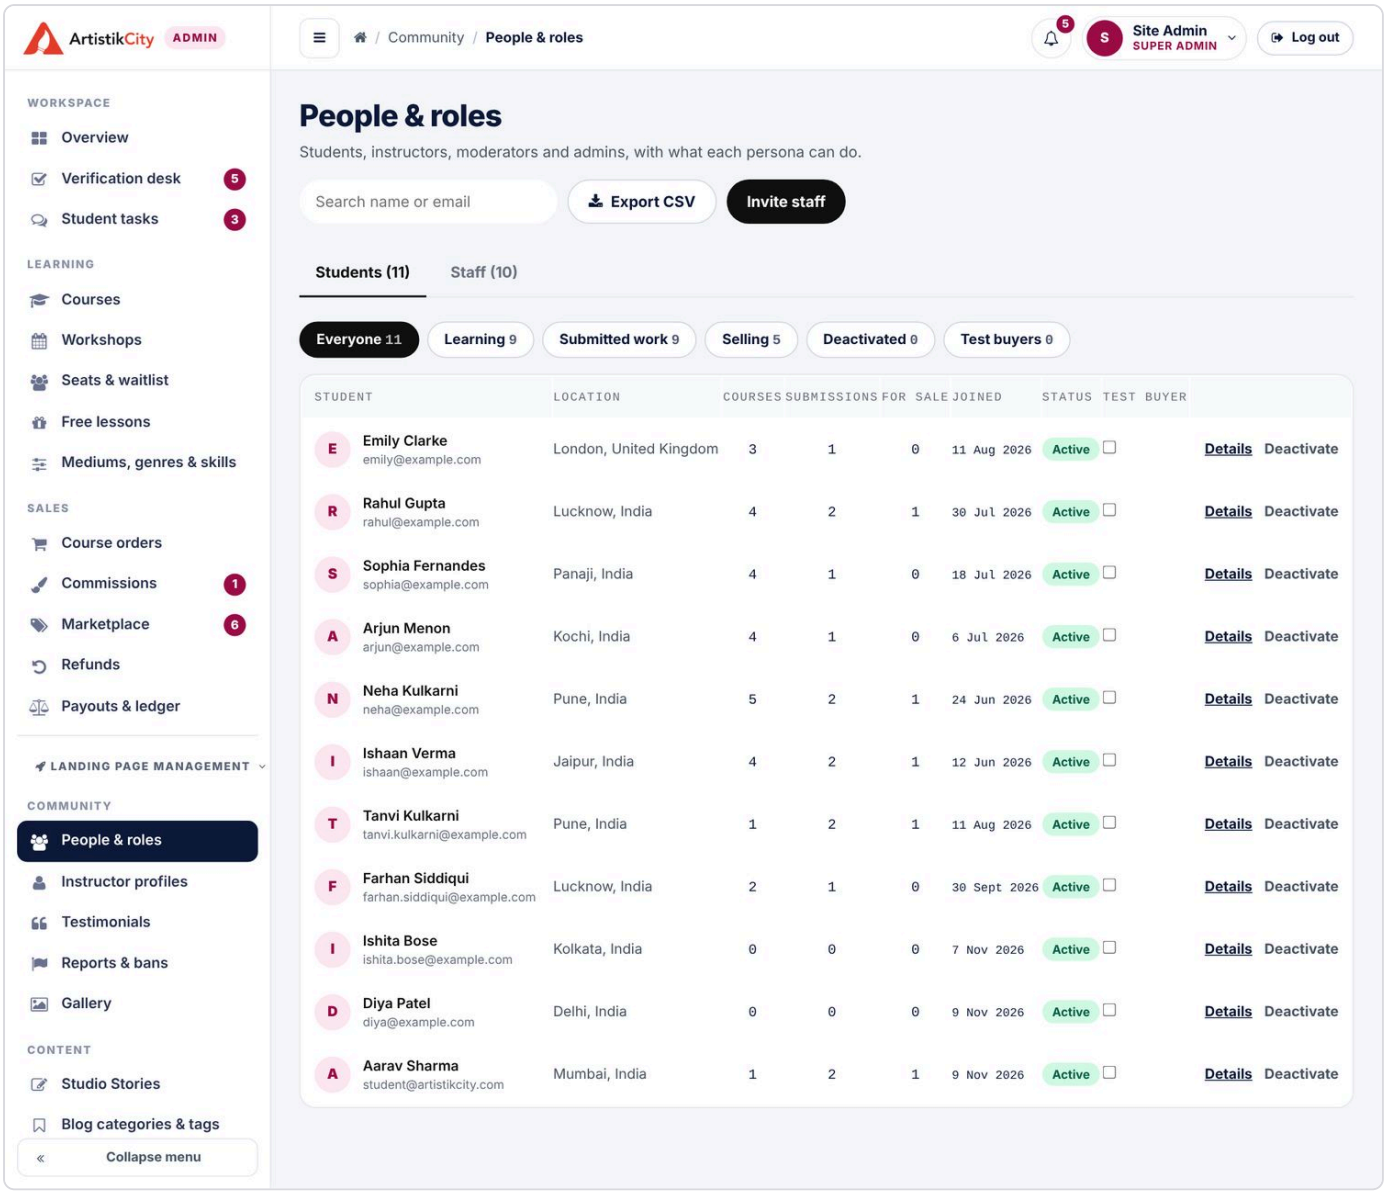

Figure 59. People & roles.

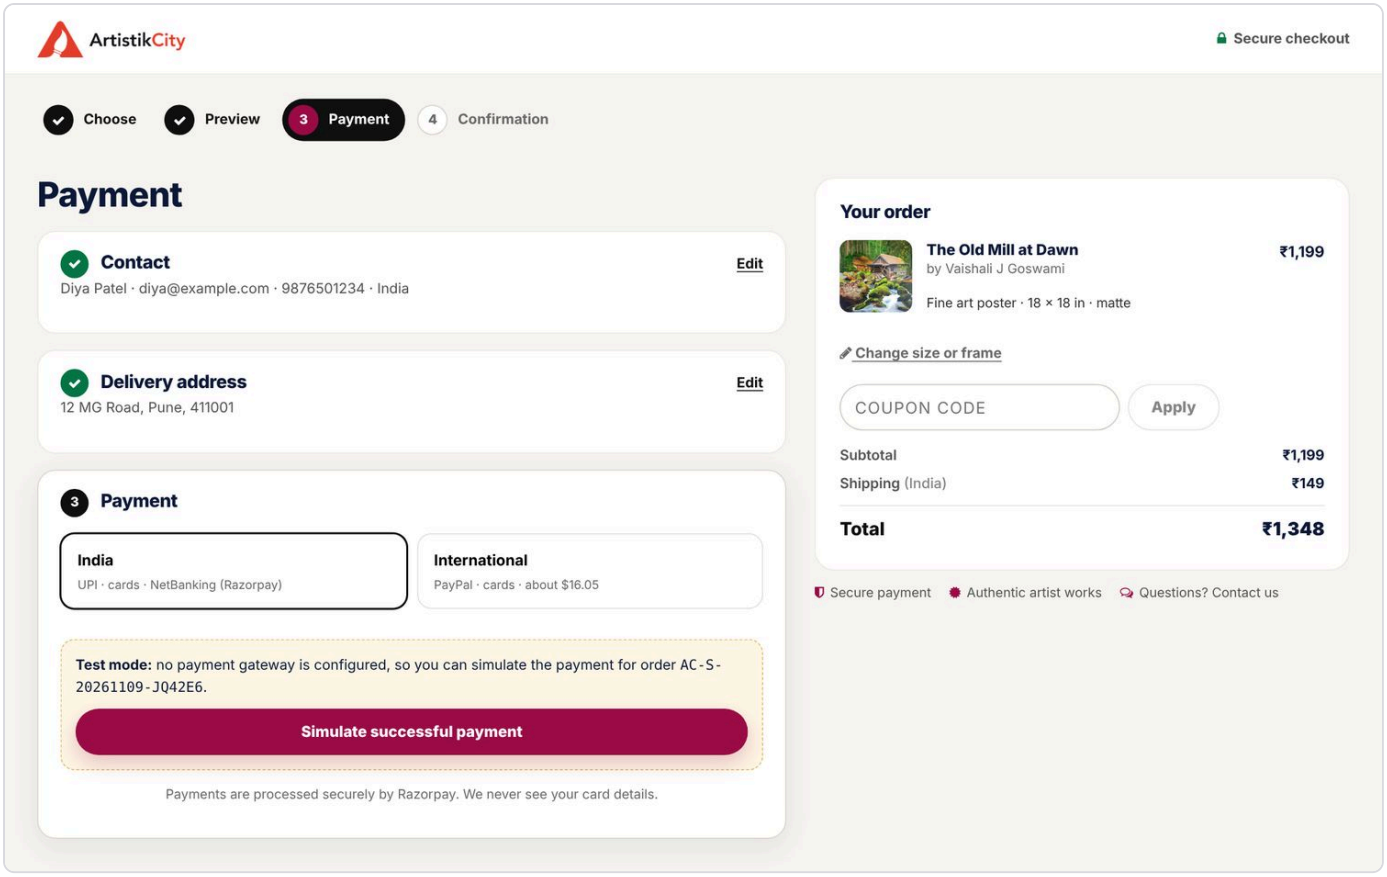

Figure 60. What a test buyer sees at payment: a test-mode note and Simulate successful payment instead of the real payment window.

6.2 Instructor profiles

The public profiles of the teachers: photo, title, bio, social links and their courses.

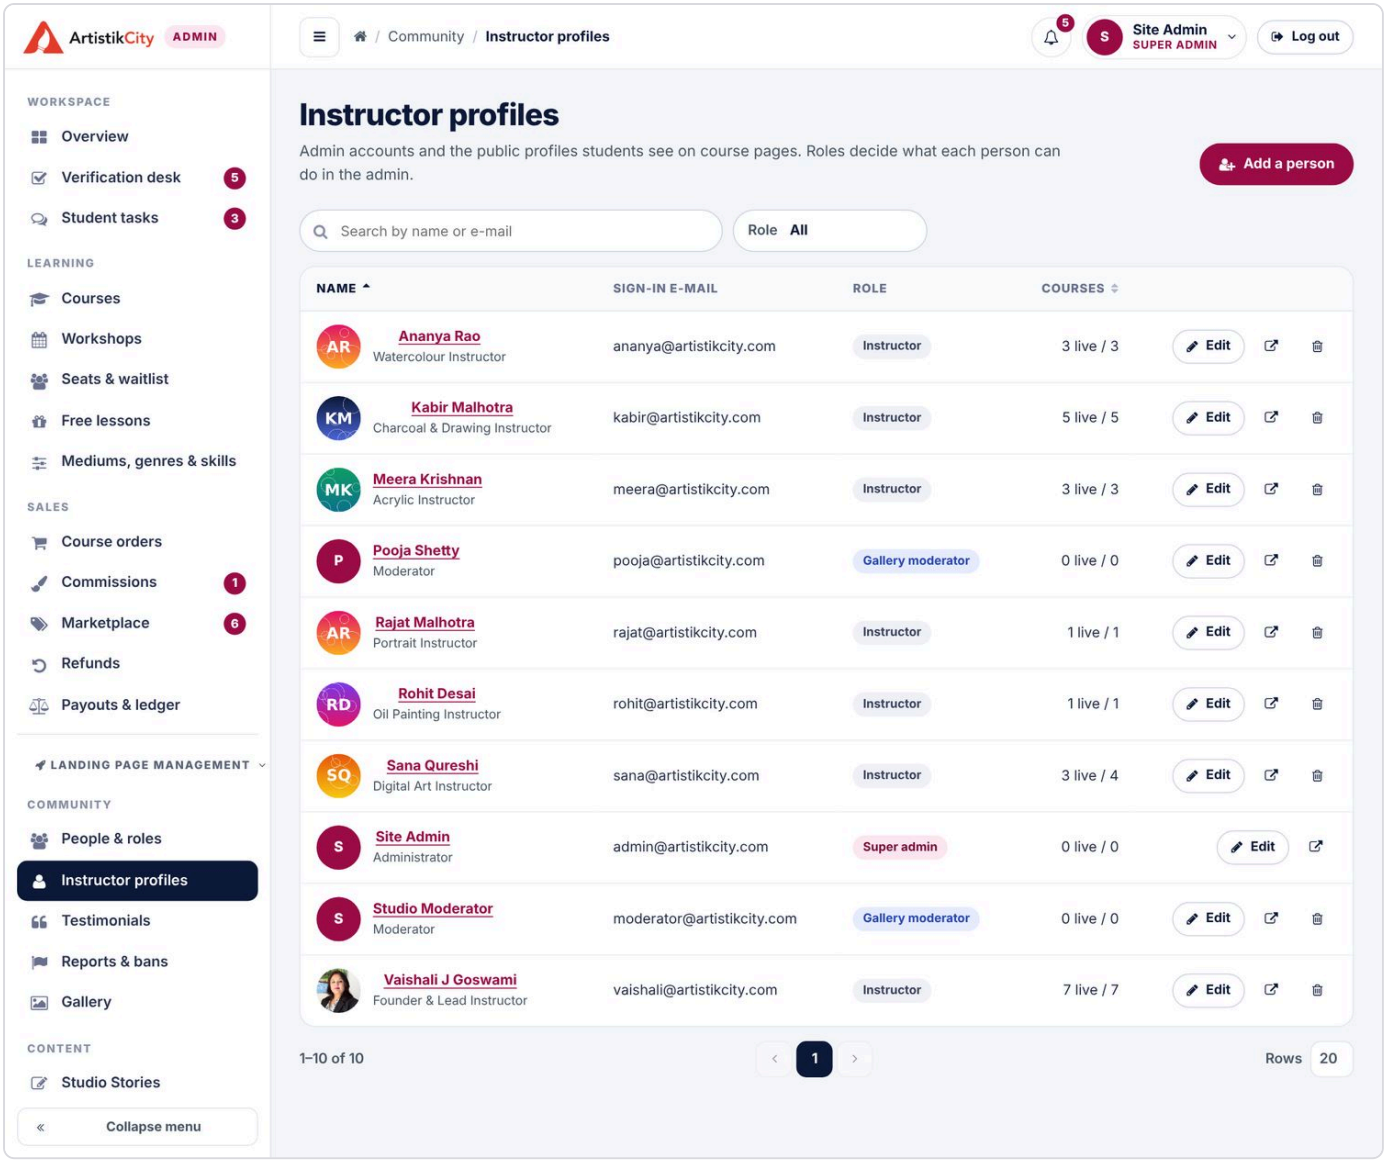

Figure 61. Instructor profiles.

6.3 Testimonials

Student testimonials shown on the site. Add, edit, publish or hide them. Only publish real testimonials from real students, with their consent.

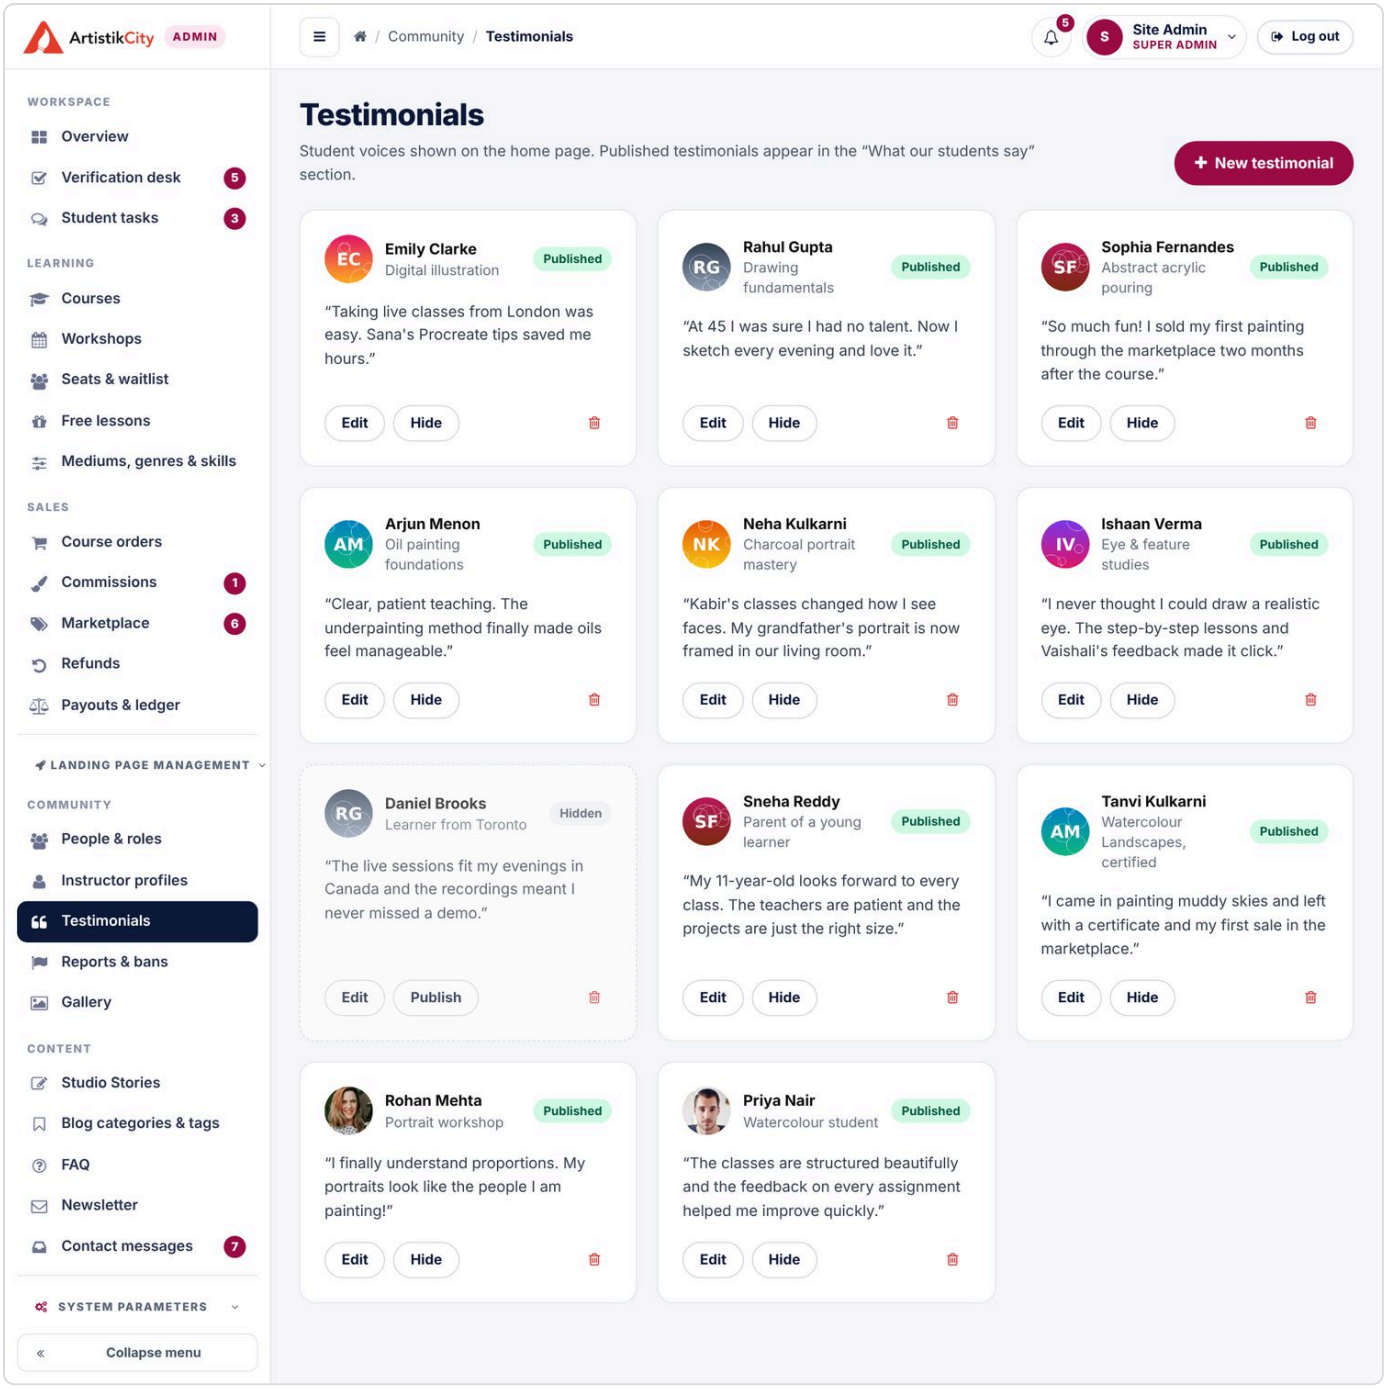

Figure 62. Testimonials.

6.4 Reports & bans

Items visitors have reported (with reasons) and account restrictions. A restriction can stop a student posting, selling, or signing in at all (ban), for a set time or indefinitely, with a reason.

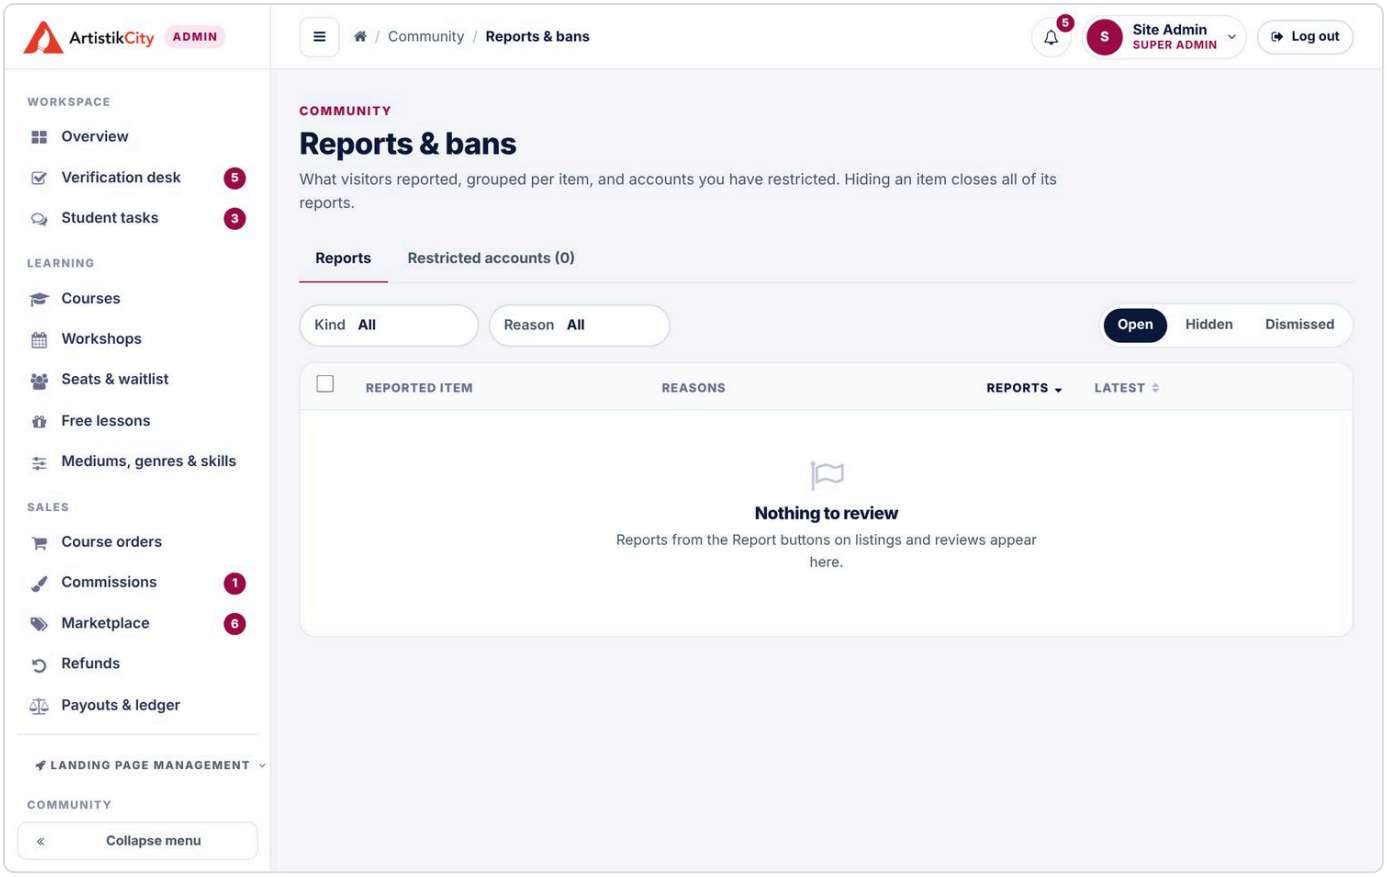

Figure 63. Reports & bans.

6.5 Gallery

Artwork shown in the home page gallery: upload, caption, order, show or hide.

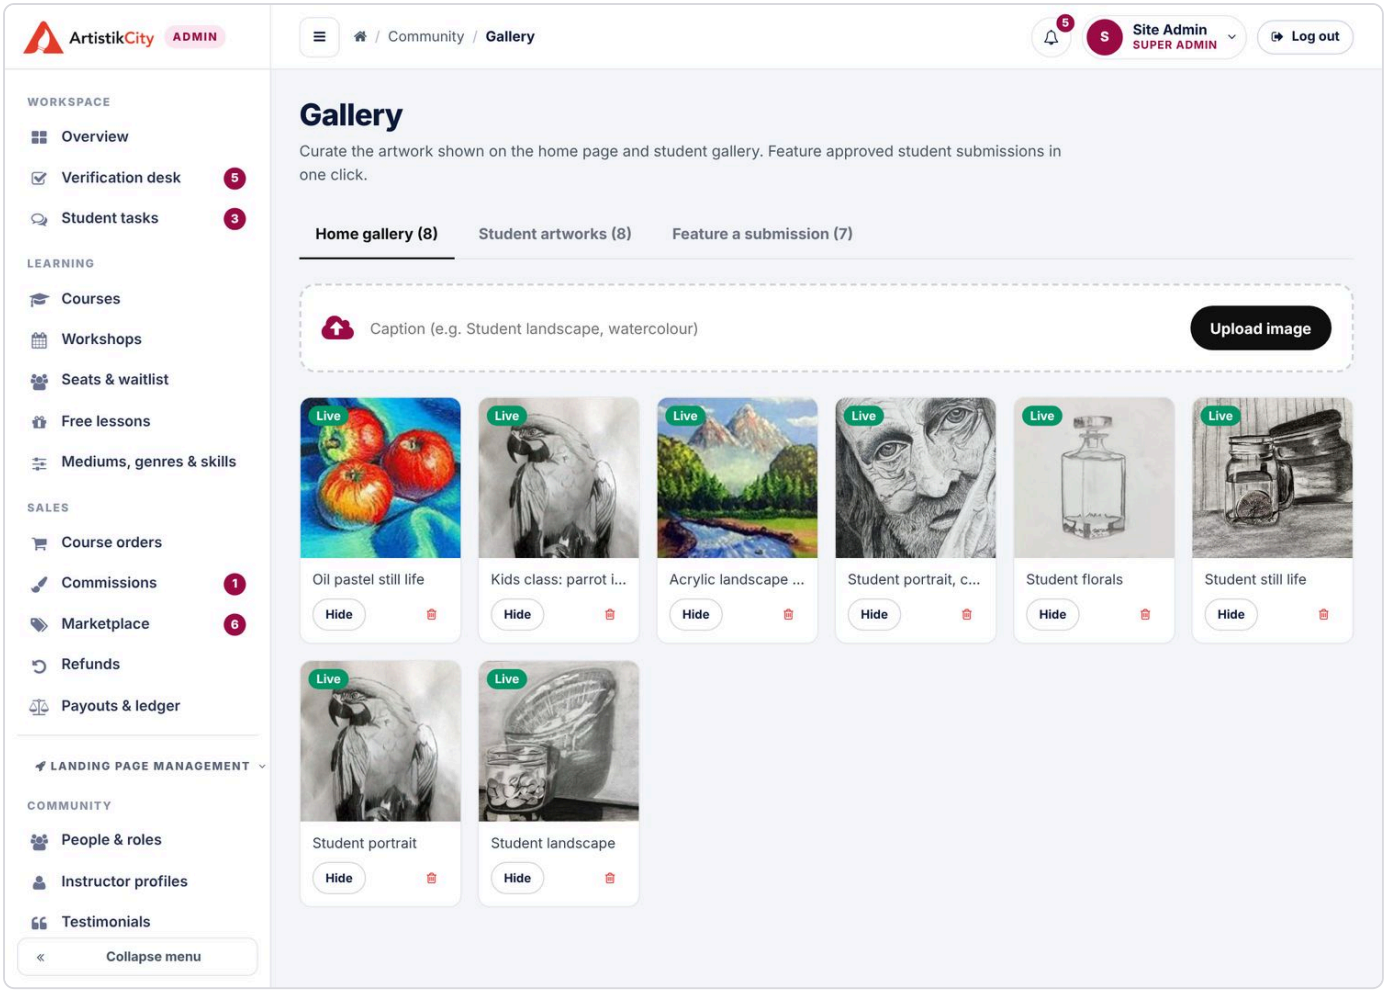

Figure 64. Gallery.

CHAPTER 7

Content

7.1 Studio Stories

The journal. The dashboard lists stories by status with views; the editor has the title, subtitle, address, cover image, body (rich text), category, tags, author, featured, SEO and the workflow.

STATUS	MEANING
Draft	Only staff can see it.
In review	Ready for an editor to check.
Scheduled	Publishes by itself at the chosen time.
Published	Live at /studio-stories/...
Archived	Taken down, kept.

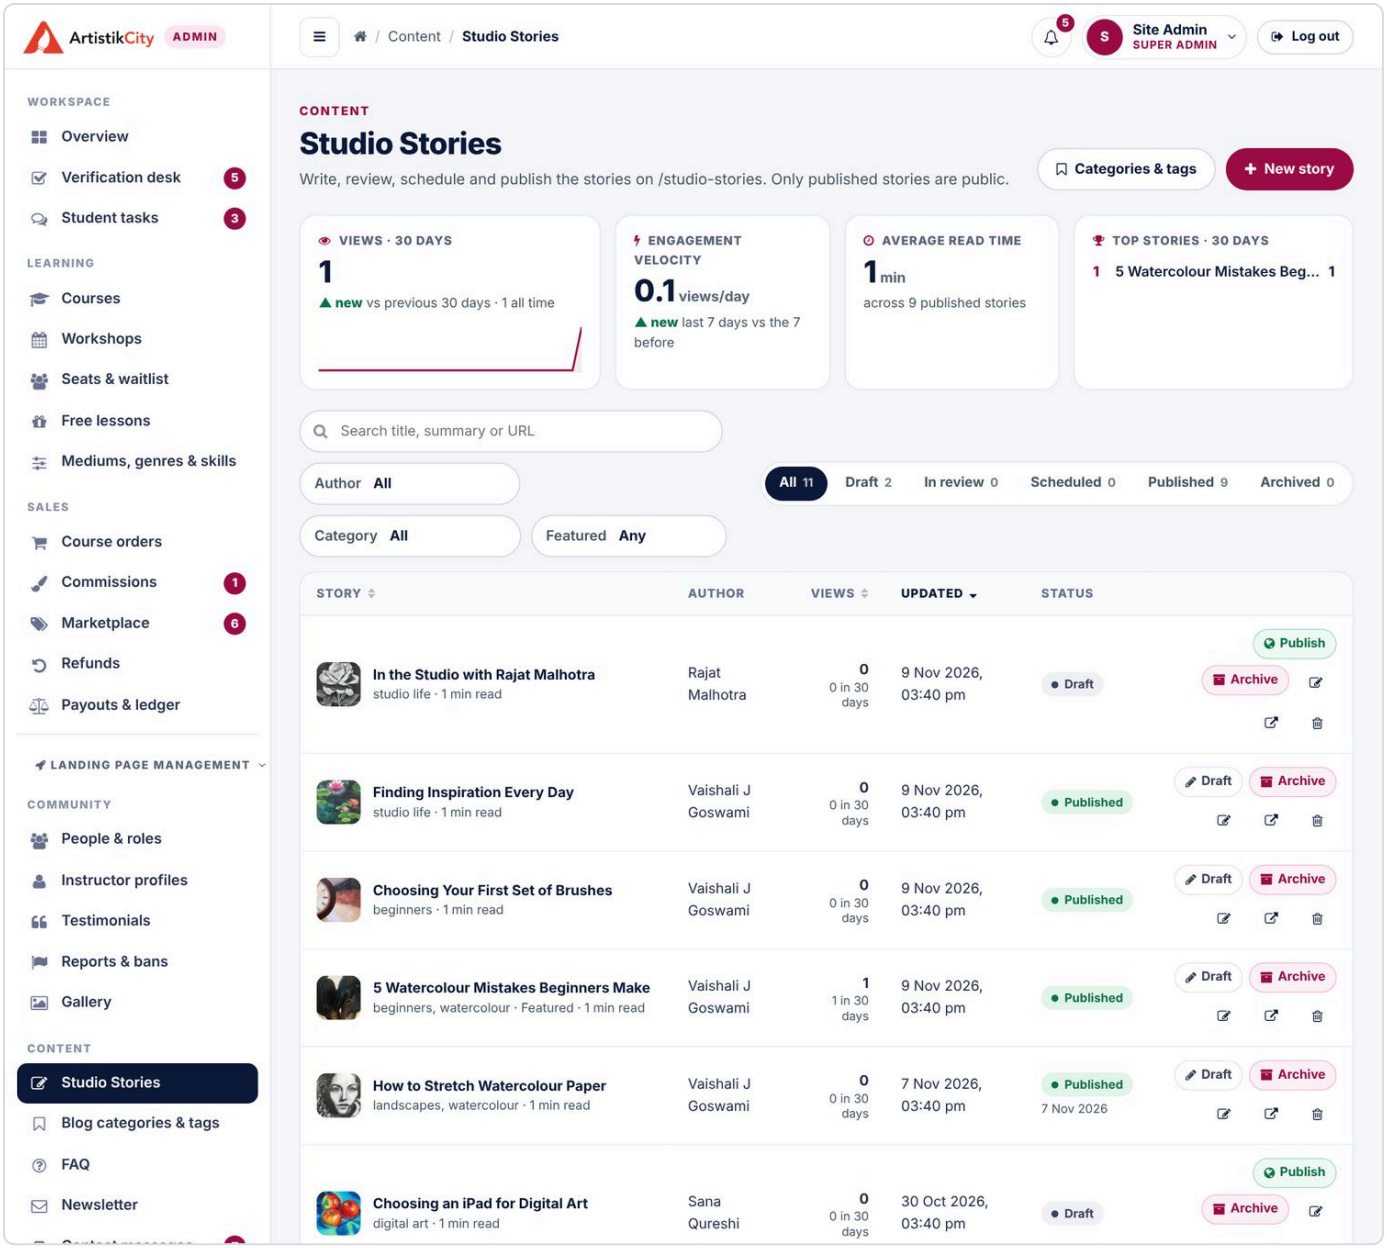

Figure 65. Studio Stories dashboard.

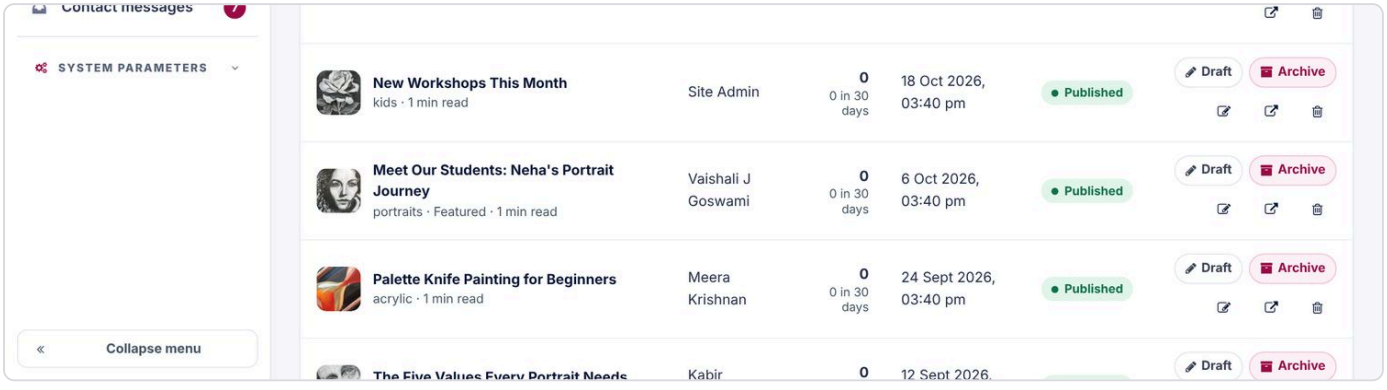

Figure 65. Studio Stories dashboard. (continued, part 2 of 2)

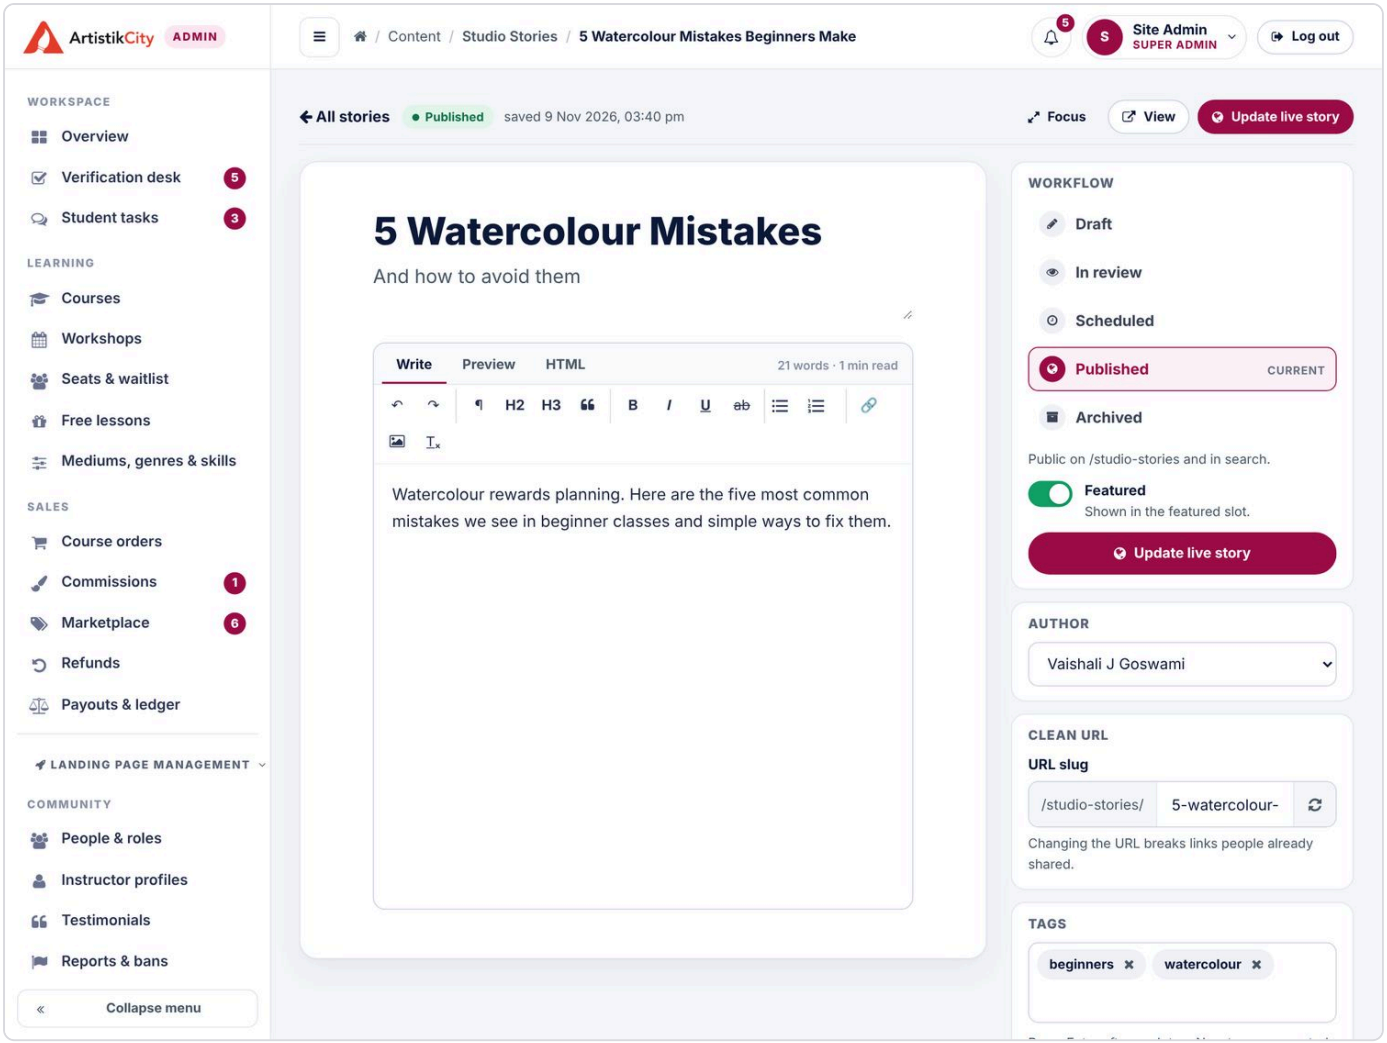

Figure 66. The story editor.

7.2 Blog categories & tags

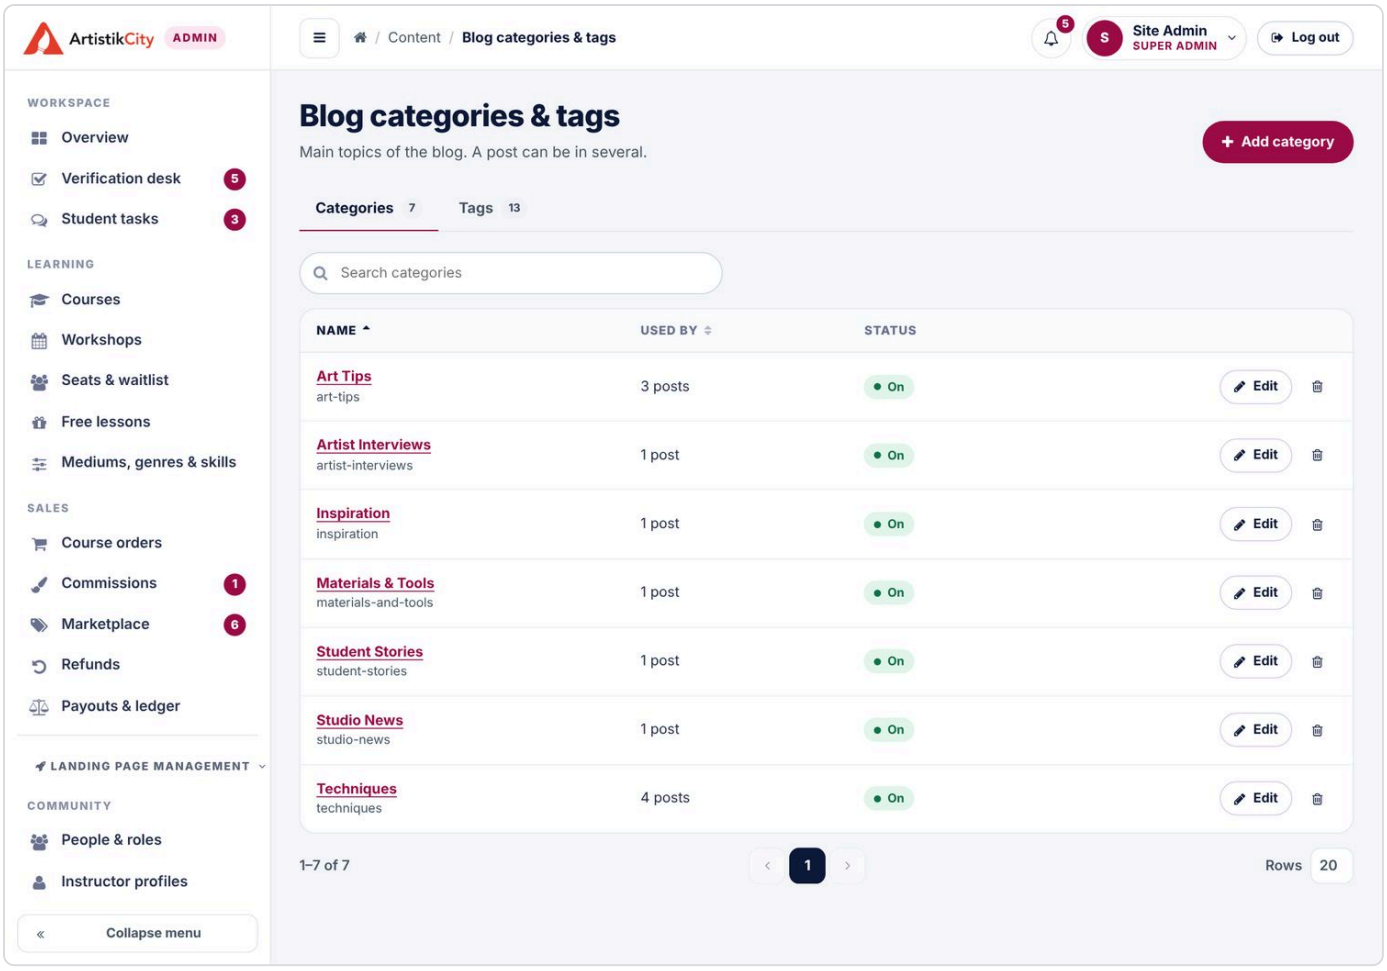

Figure 67. Categories become the topic tabs on the journal; tags group related stories.

7.3 Newsletter

Subscribers (with source and status; export) and Campaigns: write a campaign, send a test to yourself, then send it. Every e-mail has an unsubscribe link.

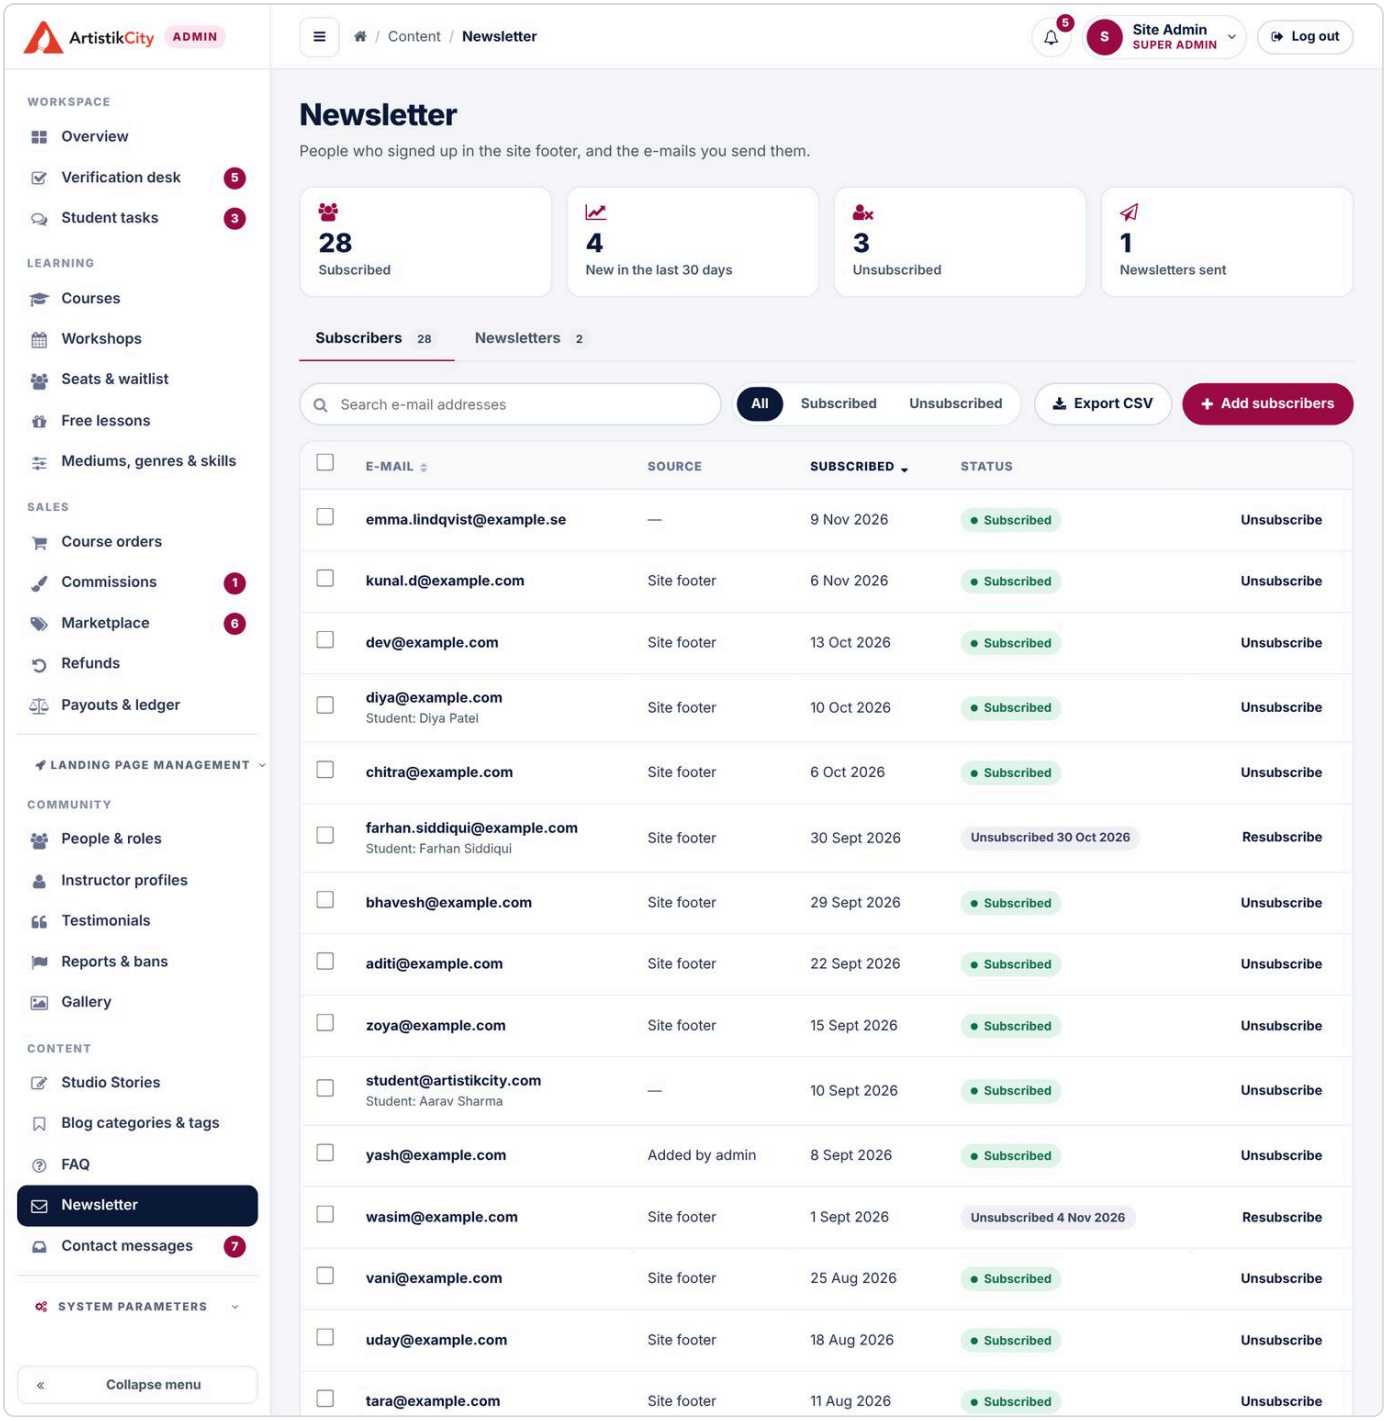

Figure 68. Subscribers.

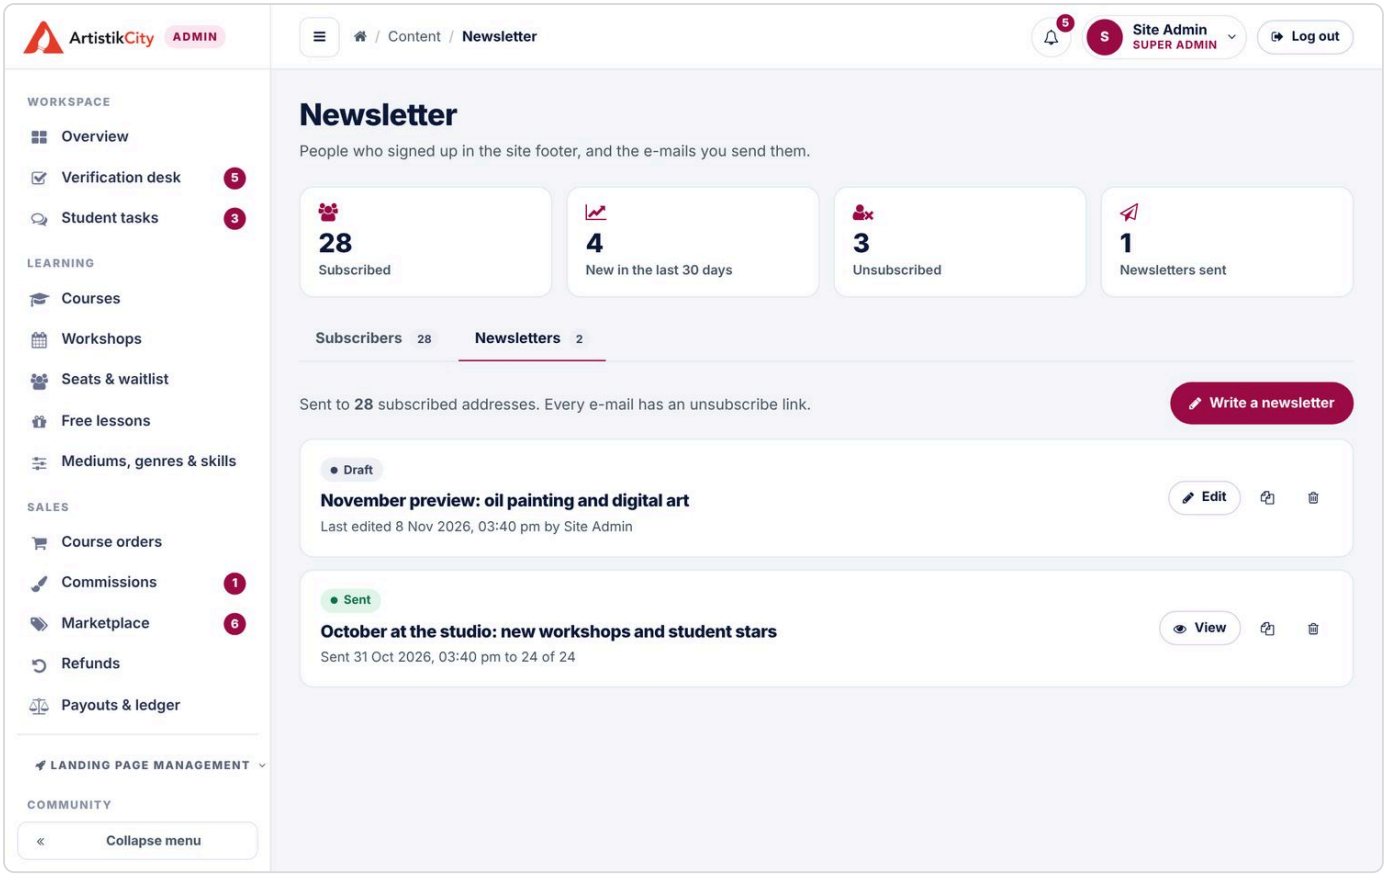

Figure 69. Campaigns.

7.4 Contact messages

Messages sent through the Contact page. Read them, use Reply by e-mail, archive handled ones (Move to inbox brings one back), delete, or export CSV. The badge counts new ones.

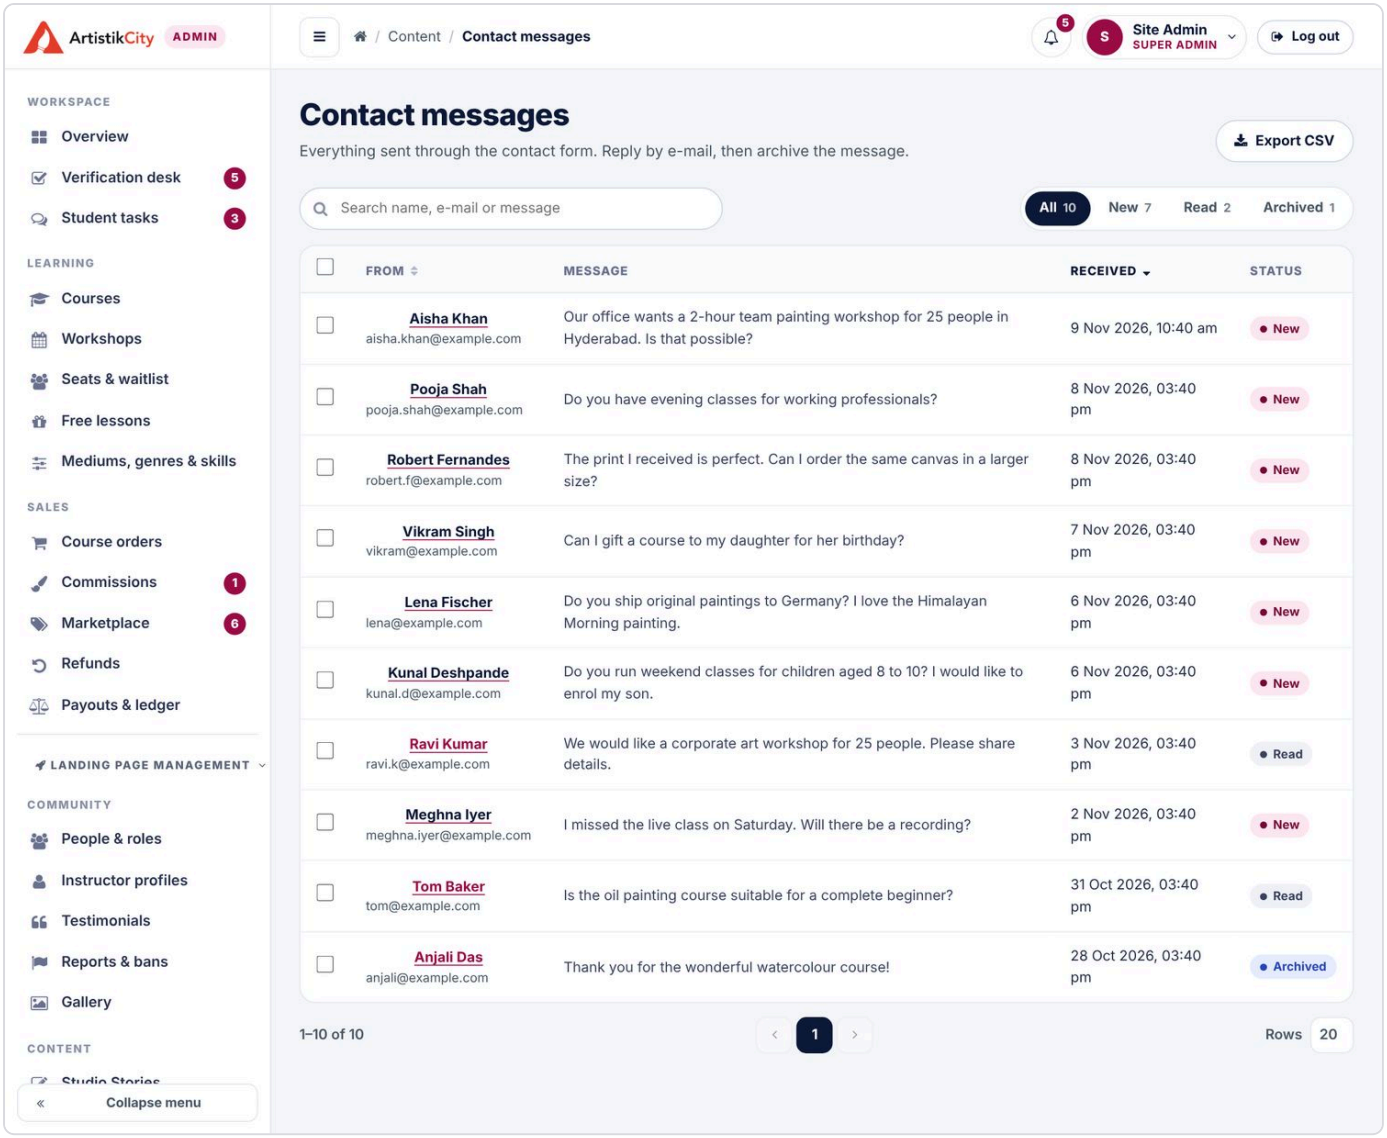

Figure 70. Contact messages.

7.5 FAQ

The FAQ is edited in System Parameters › SEO & Layout Controls › FAQ (Chapter 8).

CHAPTER 8

System Parameters

Super admin only. These settings affect the whole site.

8.1 Configuration Panel

Payment, SMS and Google sign-in settings, each with its status (Connected, Incomplete, Not set up, Switched off).

- **Razorpay**: key id, key secret and webhook secret (India).
- **PayPal**: client id and secret, live or sandbox.
- **SMS**: provider for phone codes (Twilio, Amazon SNS, Infobip) with Send a test message.
- **Google sign-in**: client id.

Secrets are stored encrypted and never shown again: the box shows dots. Leaving the dots (or an empty box) keeps the saved value; Reset returns a key to the server’s own value. Changes work immediately, without a restart.

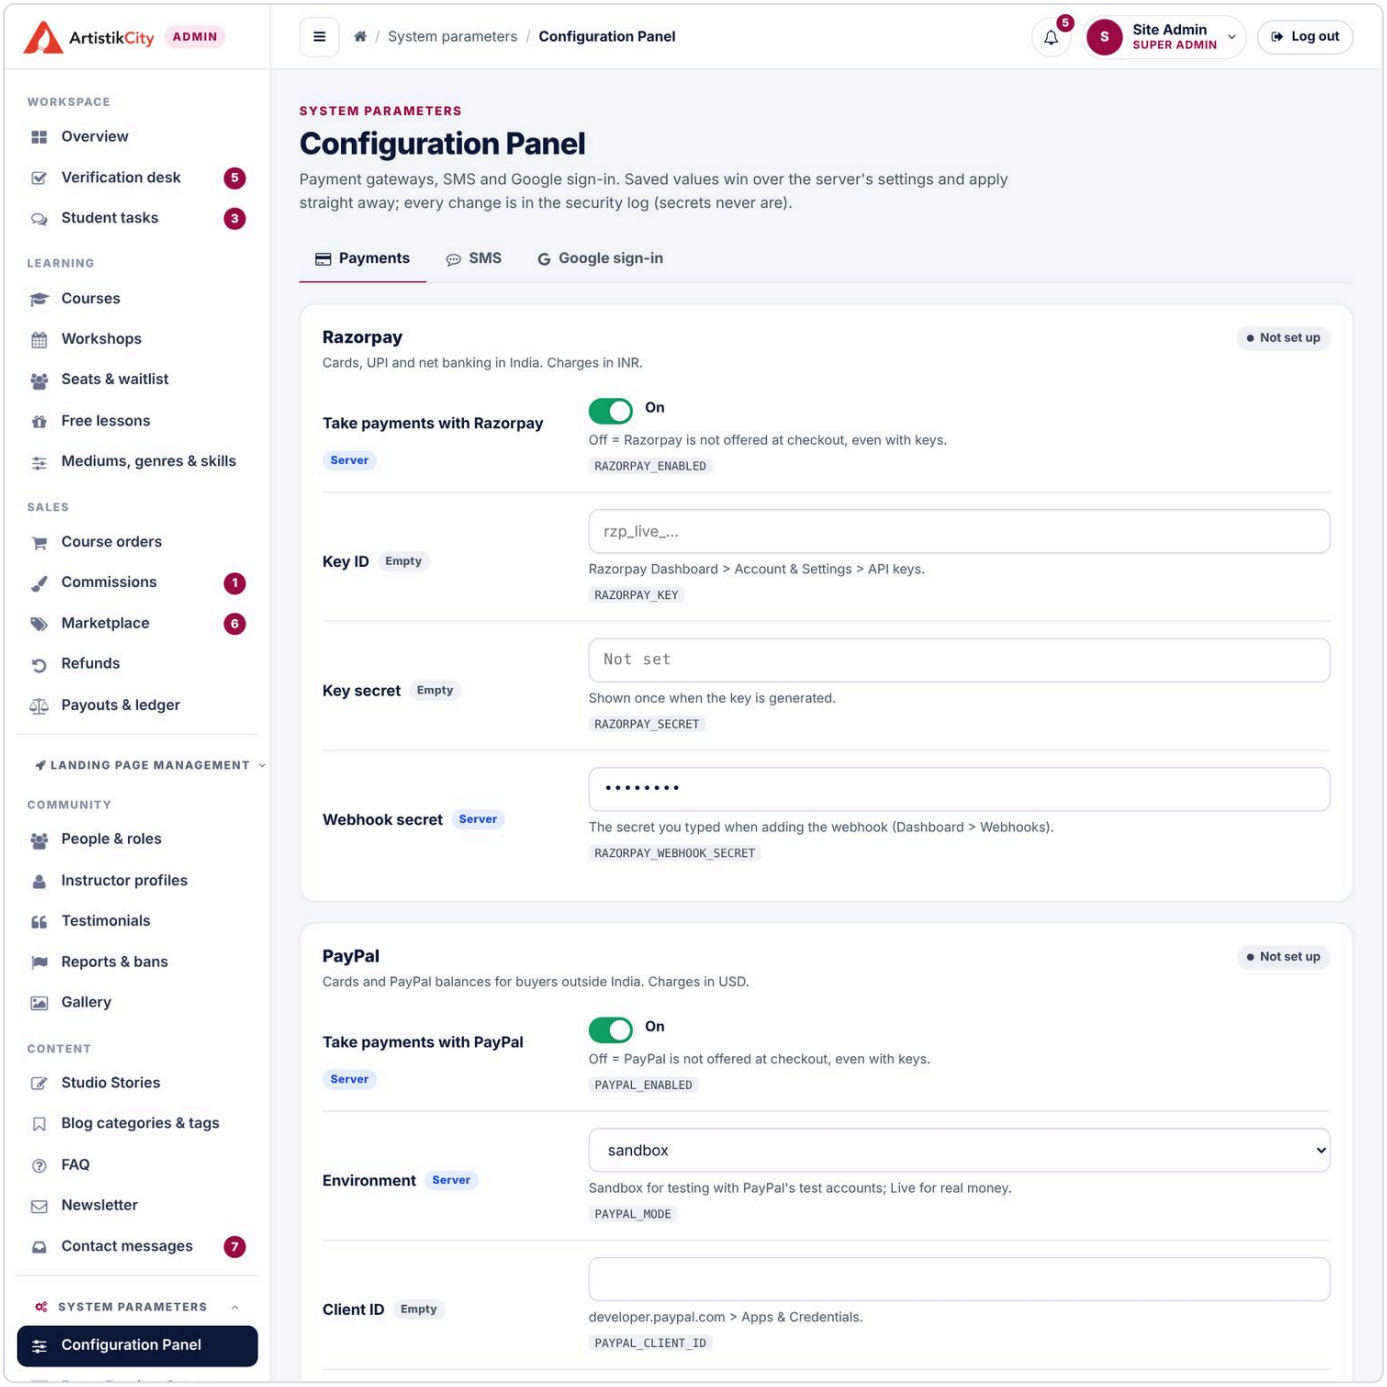

Figure 71. Configuration Panel.

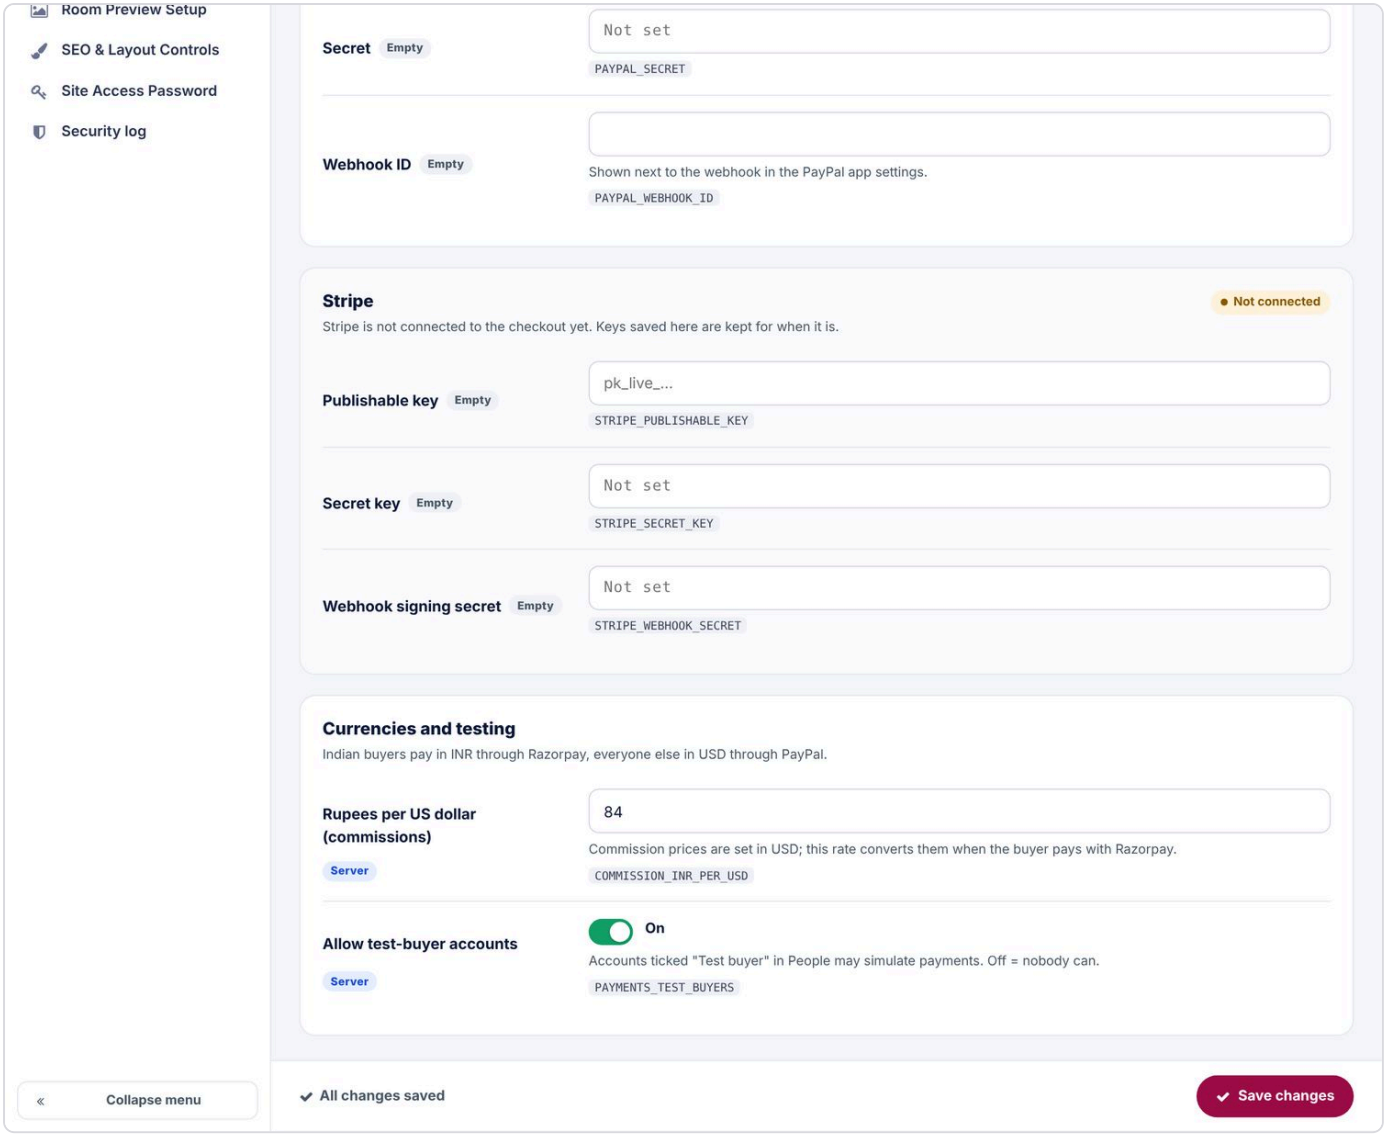

Figure 71. Configuration Panel. (continued, part 2 of 2)

8.2 Room Preview Setup

1. **Add room**: upload a photo of a room at least 1000 px wide.
2. Drag the hanging area on the wall.
3. Optionally type the real width of that area in inches: paintings are then drawn to scale and buyers can show a person for scale.
4. Order rooms, hide them, or switch the room step off entirely.

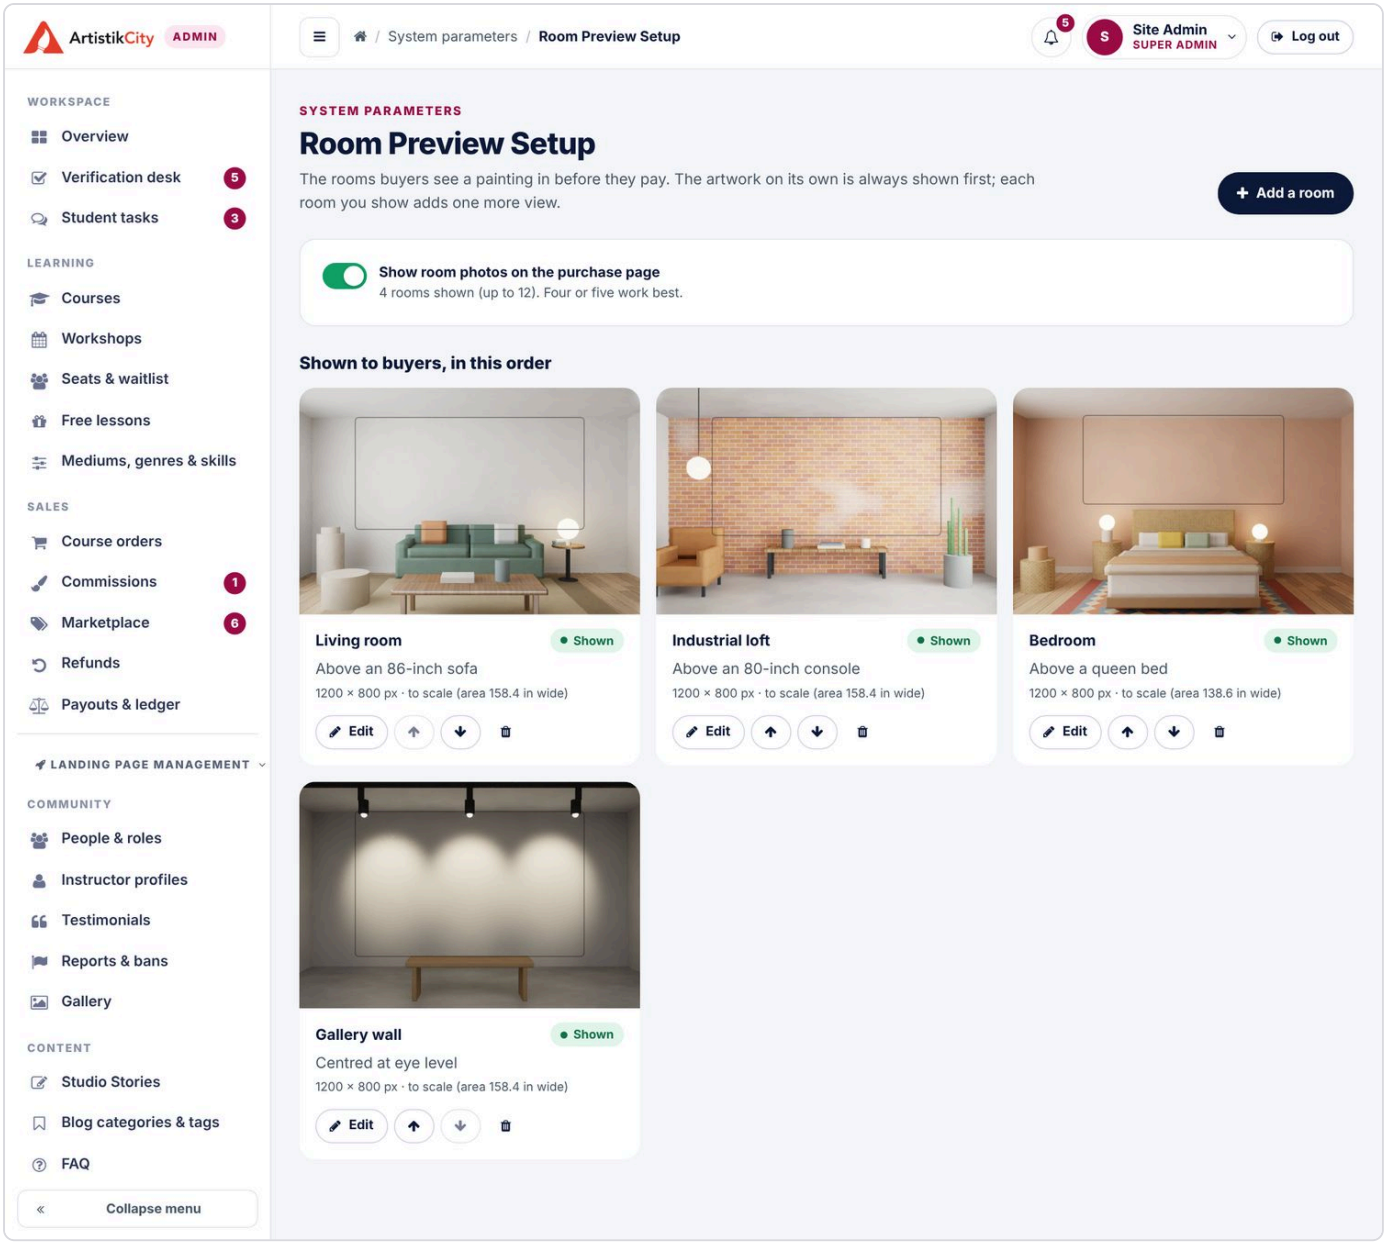

Figure 72. Room Preview Setup.

8.3 SEO & Layout Controls

Five tabs, each with a live desktop/phone preview:

TAB	CONTROLS
Layout & SEO	Search title and description, share image, contact details, social links (and which to hide), the home page banner, the header menu (labels, links, order, visibility, accent) and the cookie banner text.
Our vision	The Our vision page.
Instructor	Which instructor the Our instructor page shows, and its text.
Customer support	The support page's topics and questions.
FAQ	Questions and answers by group, in order.

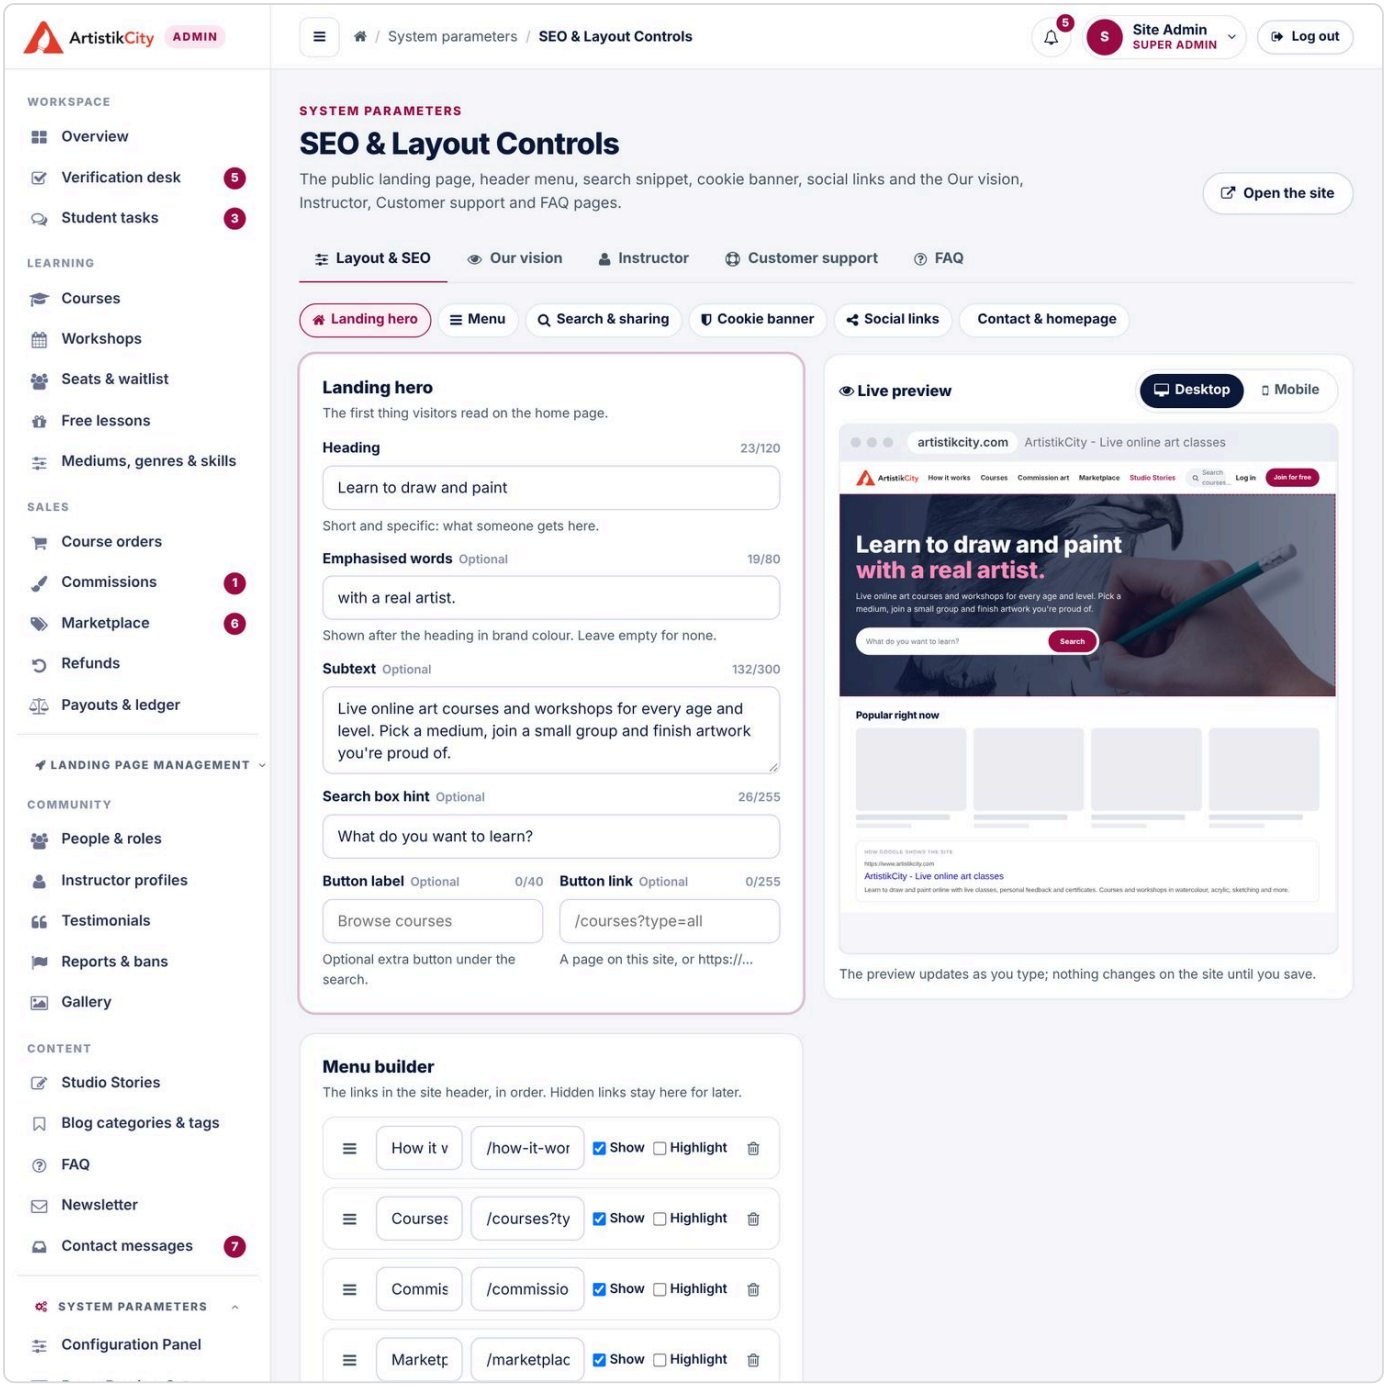

Figure 73. Layout & SEO.

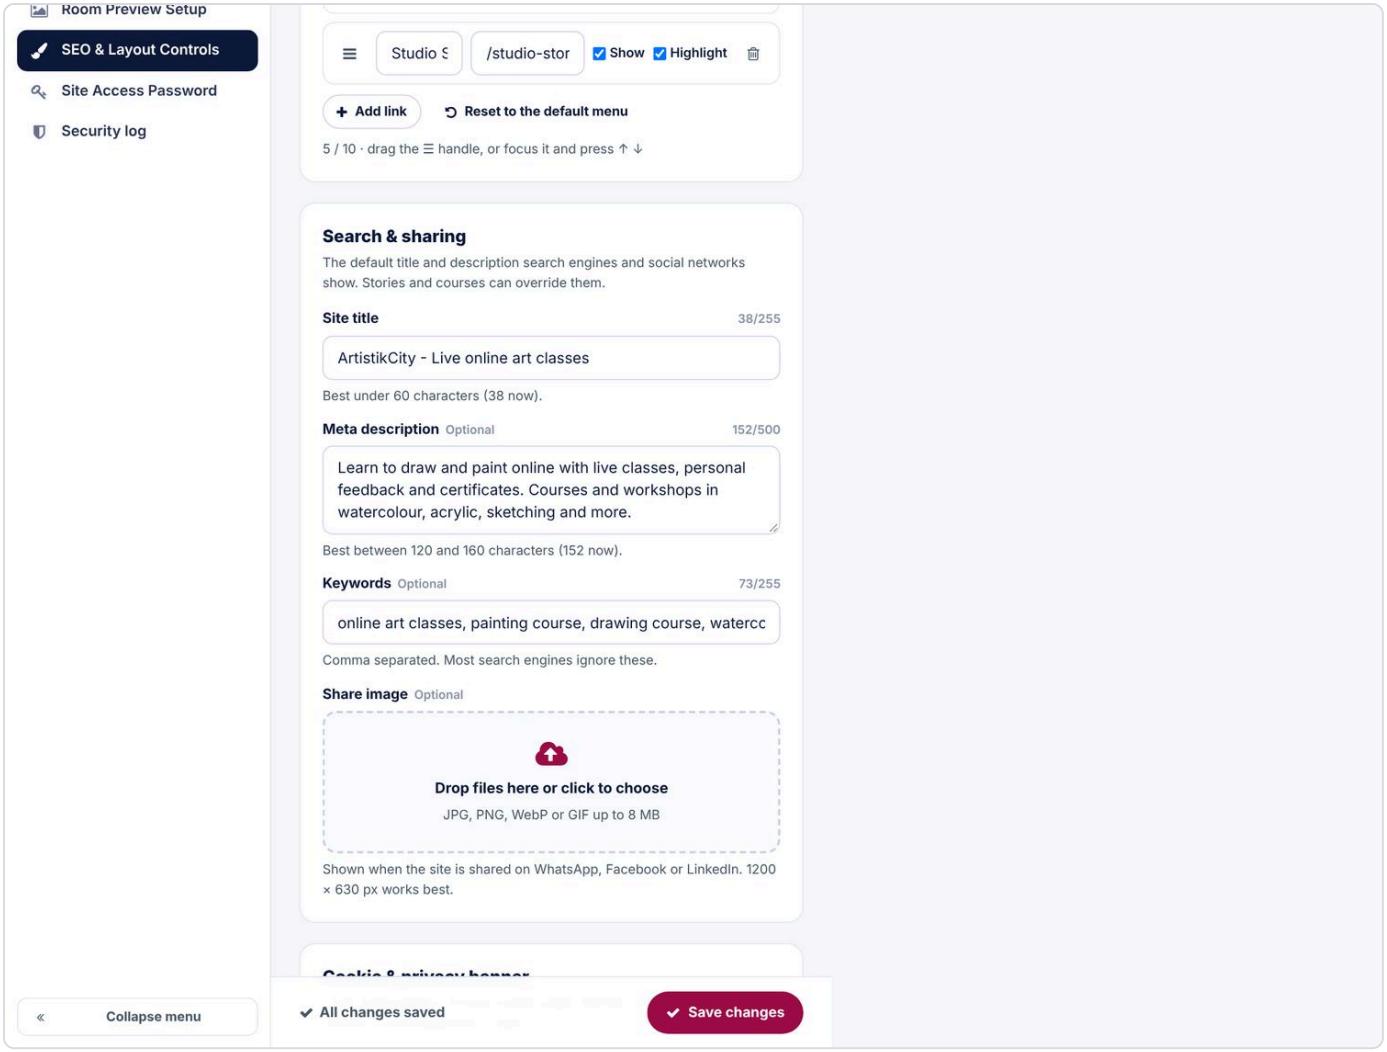

Figure 73. Layout & SEO. (continued, part 2 of 2)

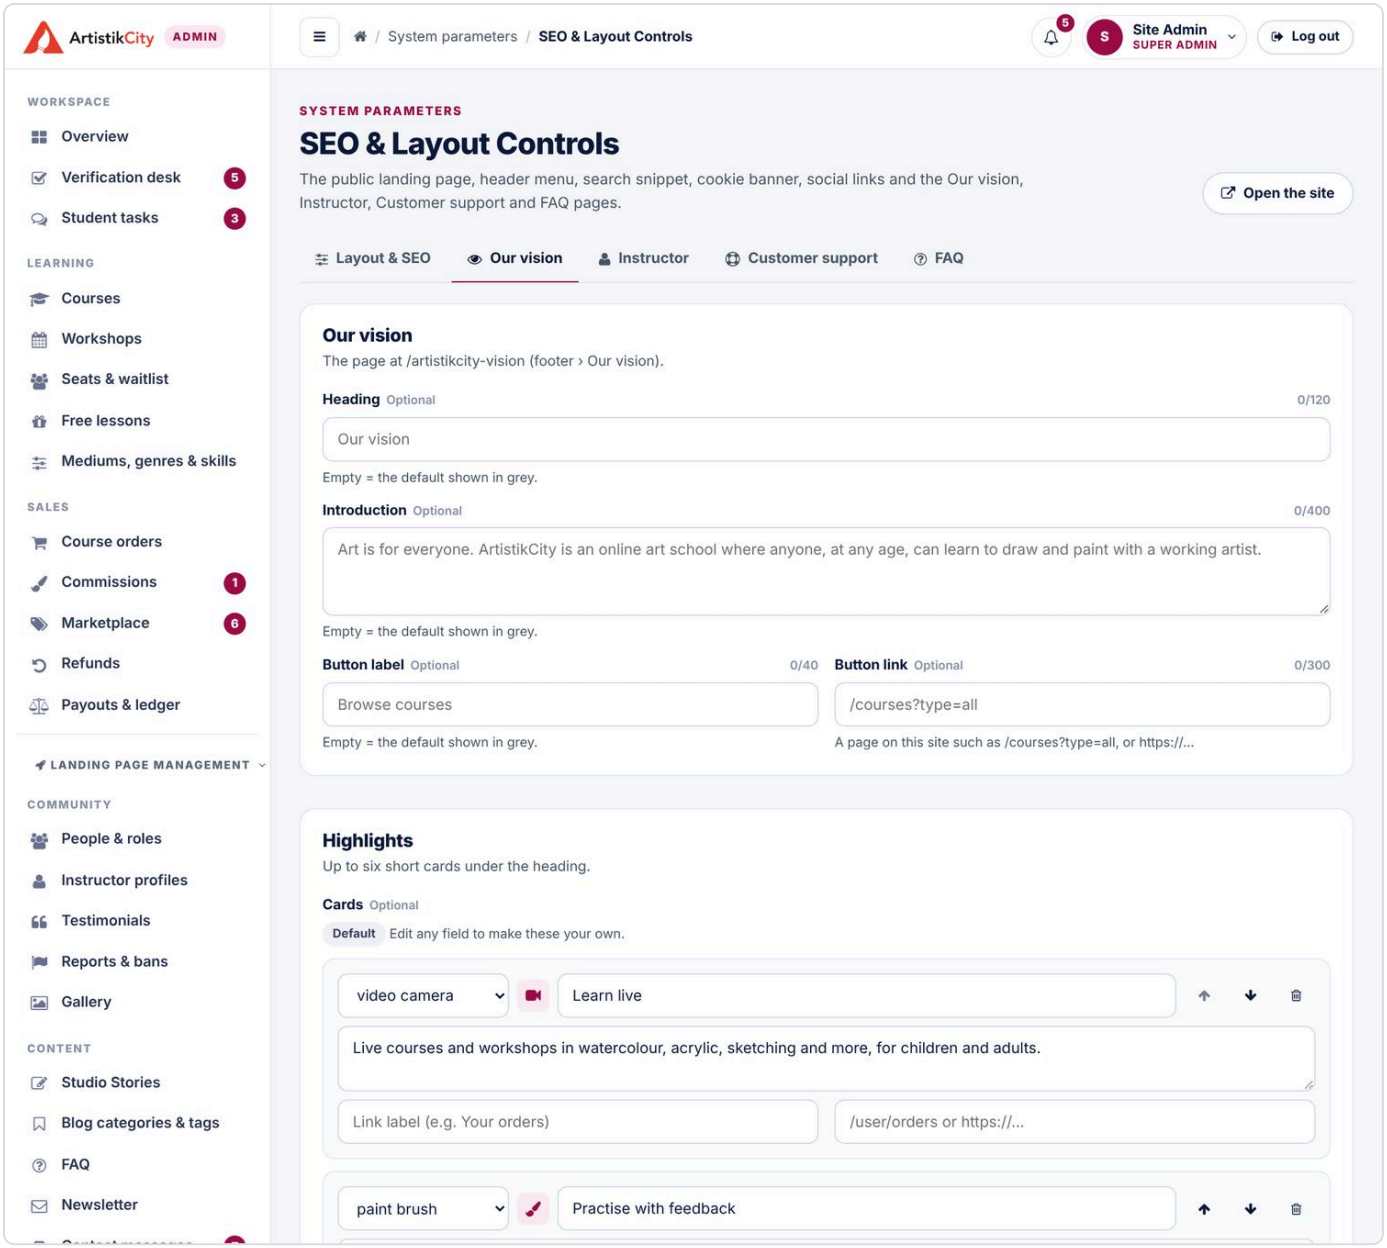

Figure 74. Our vision.

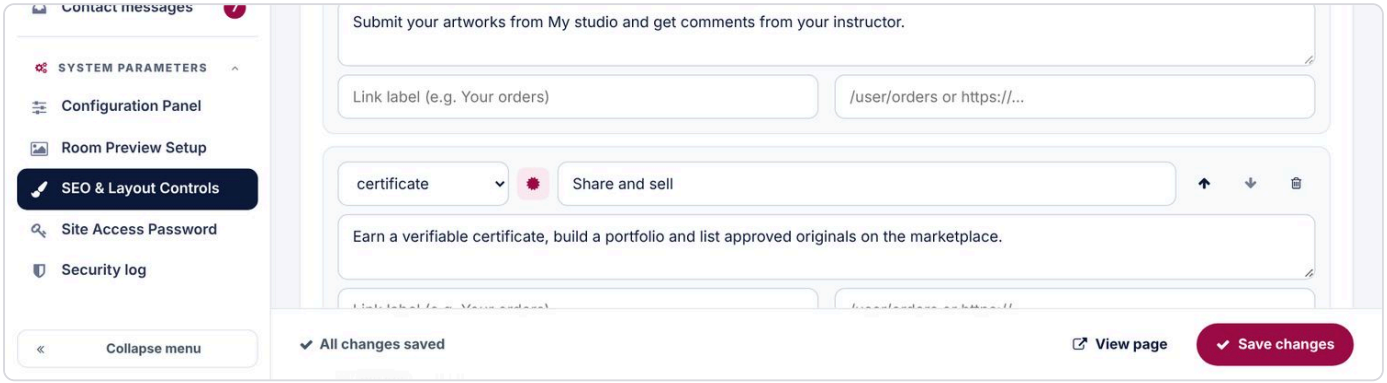

Figure 74. Our vision. (continued, part 2 of 2)

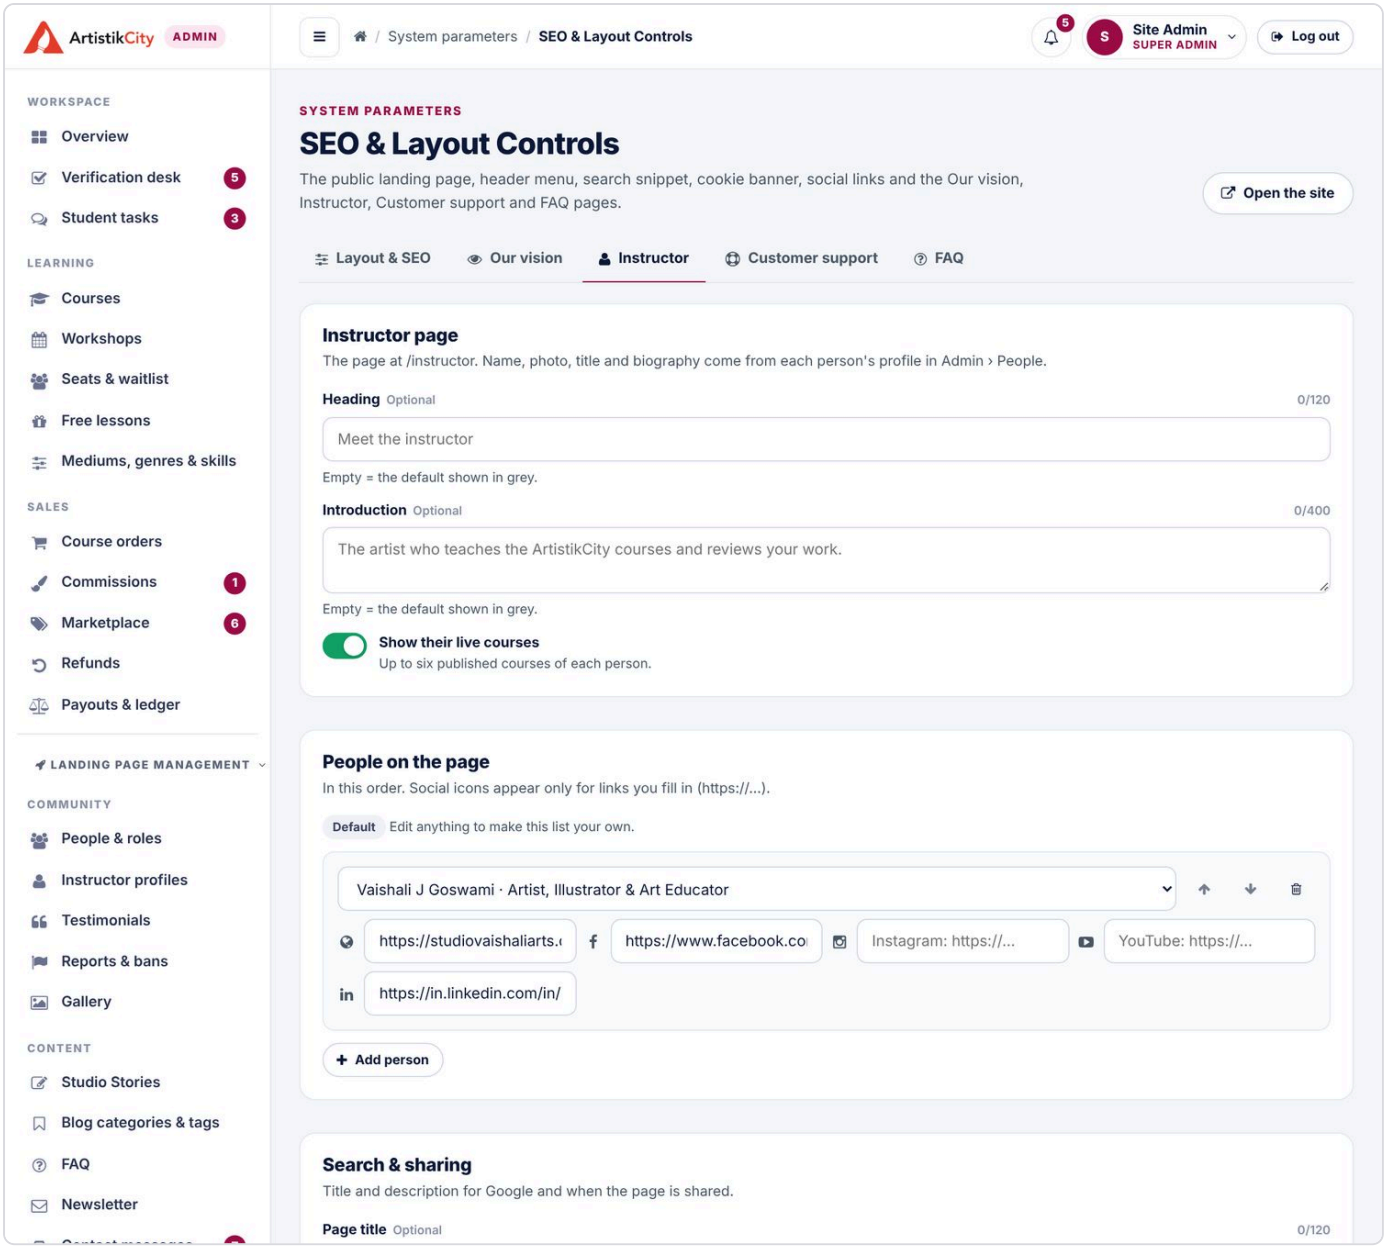

Figure 75. Instructor.

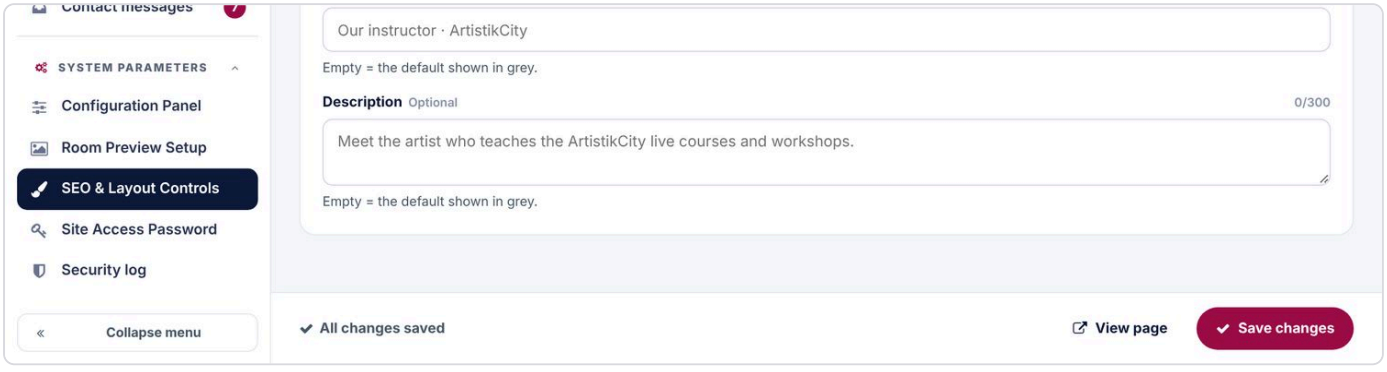

Figure 75. Instructor. (continued, part 2 of 2)

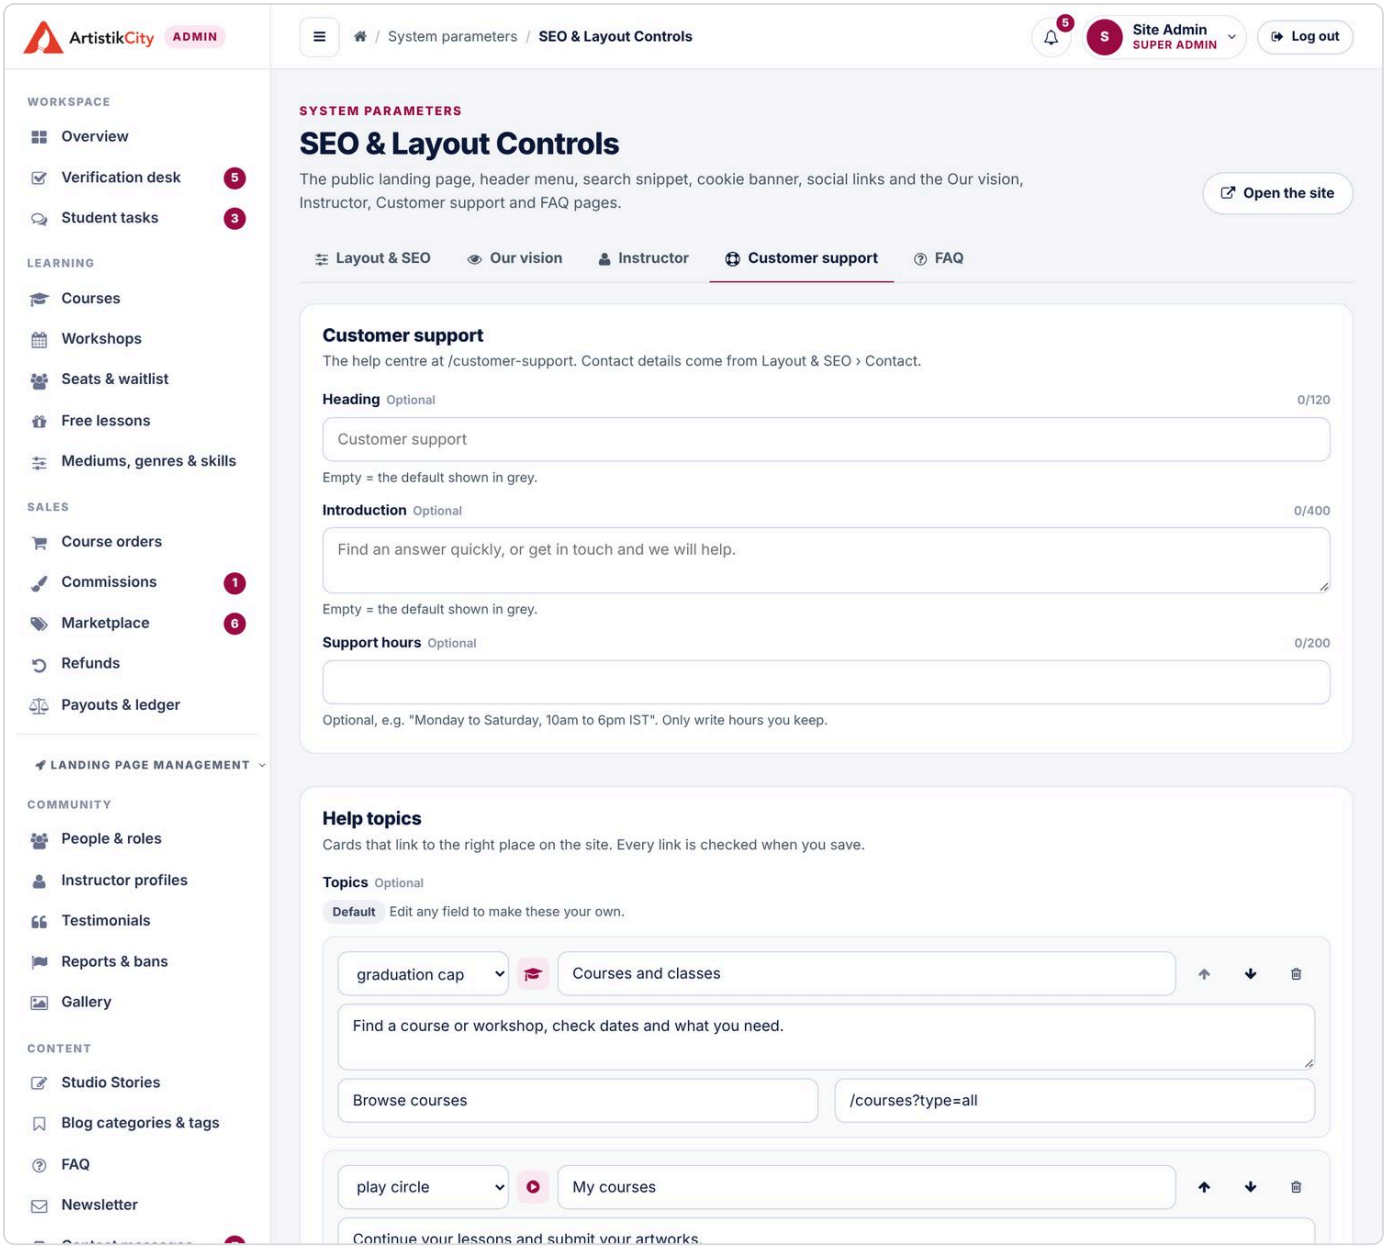

Figure 76. Customer support.

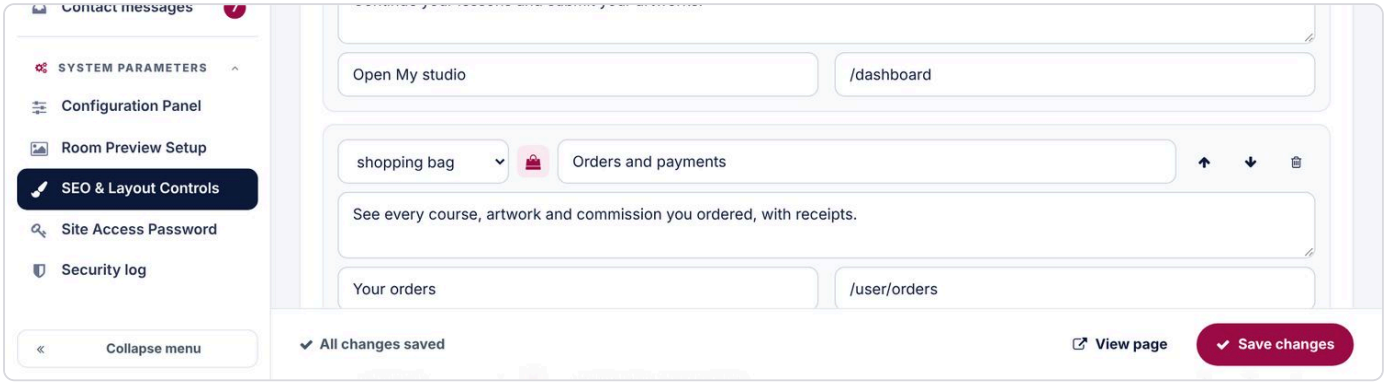

Figure 76. Customer support. (continued, part 2 of 2)

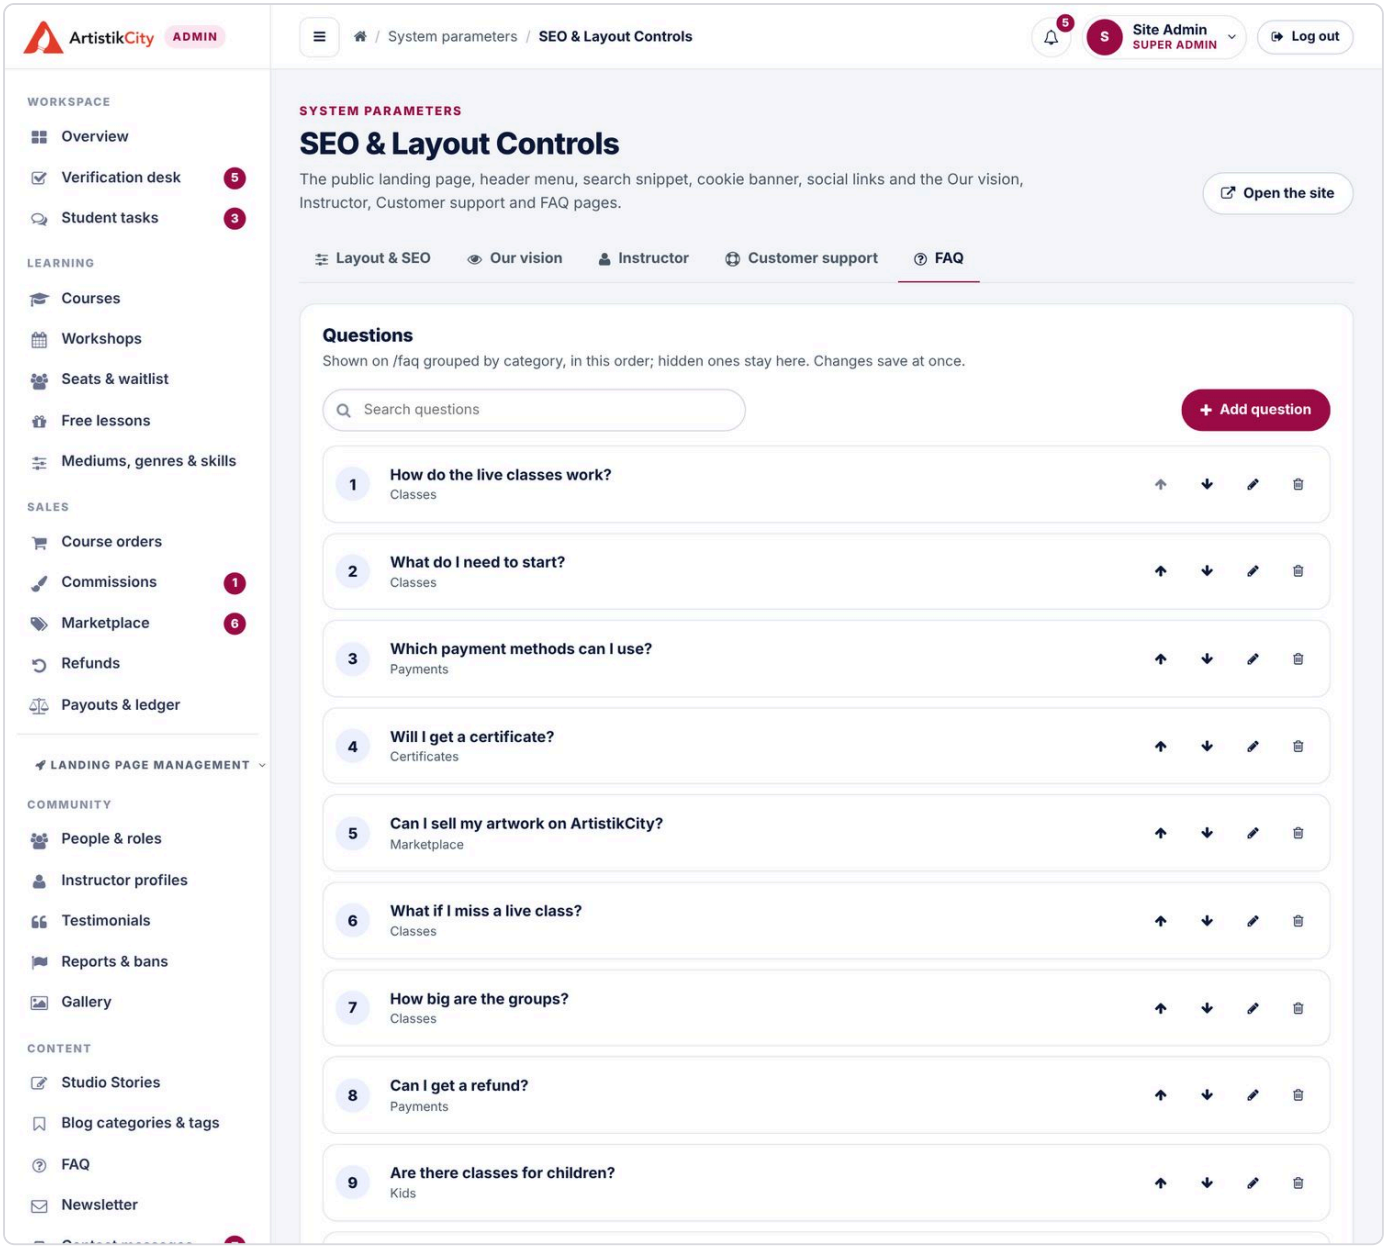

Figure 77. FAQ.

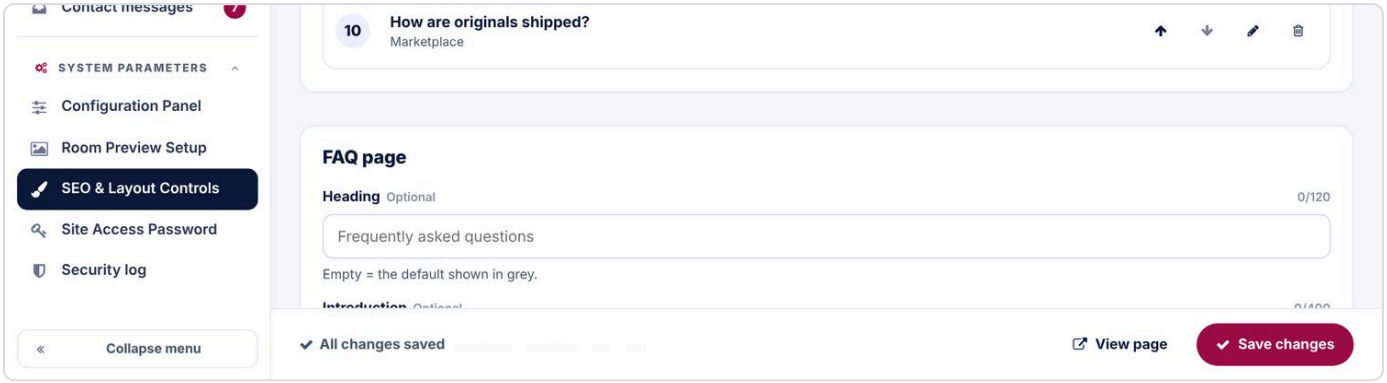

Figure 77. FAQ. (continued, part 2 of 2)

> **TIP** Links must be a site path (starting with /) or an https address. Empty settings fall back to the original texts, so clearing a field never leaves a blank page.

8.4 Site Access Password

Closes the public site behind a password (“Site under construction”) while you prepare something. Switch it on, type a password of at least 8 characters twice and save. Visitors then need the password; search engines are told not to index. The admin console, payment webhooks and signed-in staff are never locked out. Changing the password signs every visitor out of the preview.

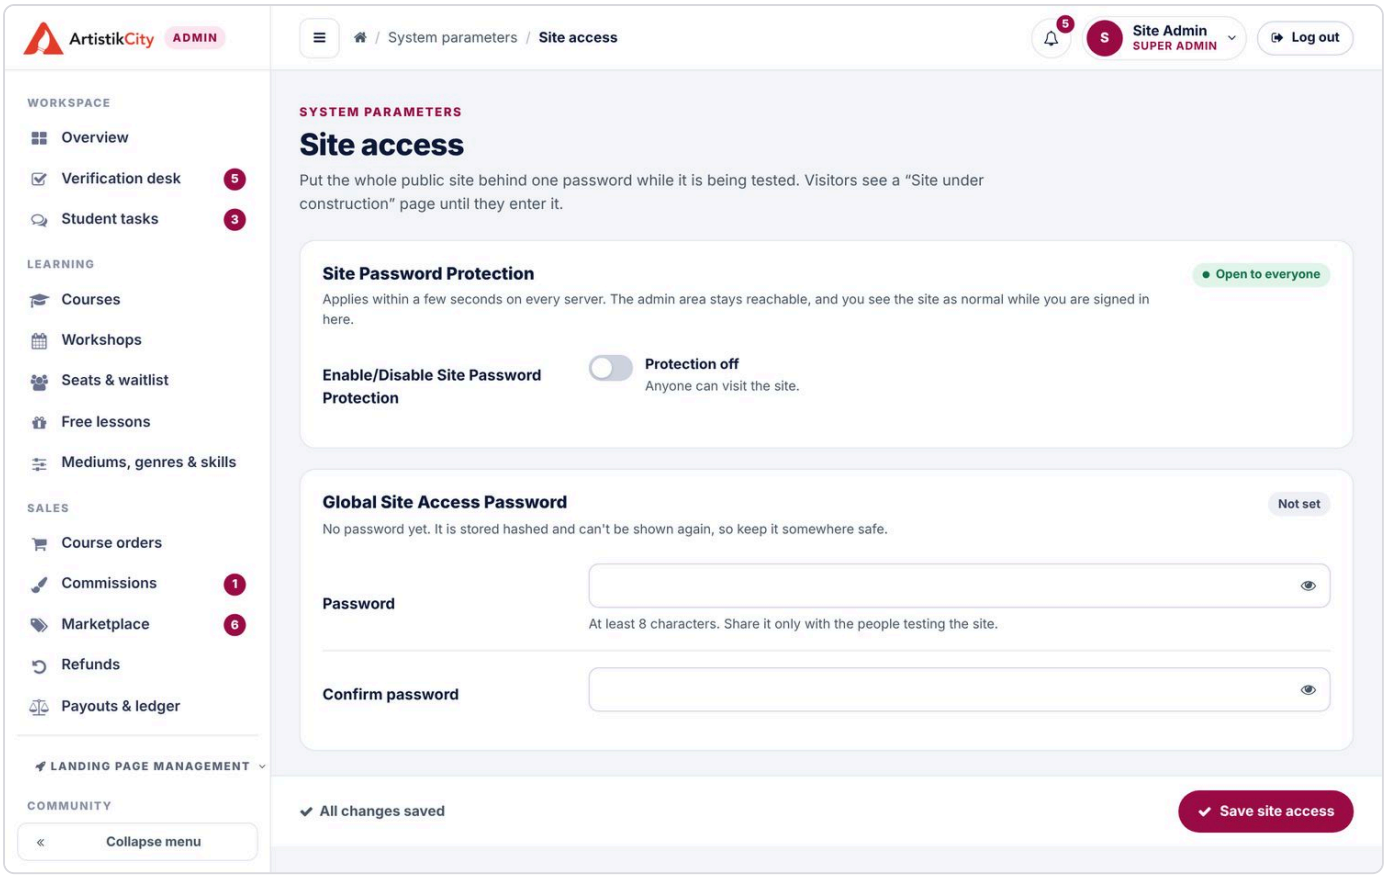

Figure 78. Site Access Password.

8.5 Security log

An append-only record of every important change and every refused admin request: who, what (create, update, delete, sign-in, export, denied), which record, when, from which IP and country. Open an entry for the before/after difference. Verify integrity re-checks that no entry has been altered; Export downloads the filtered list.

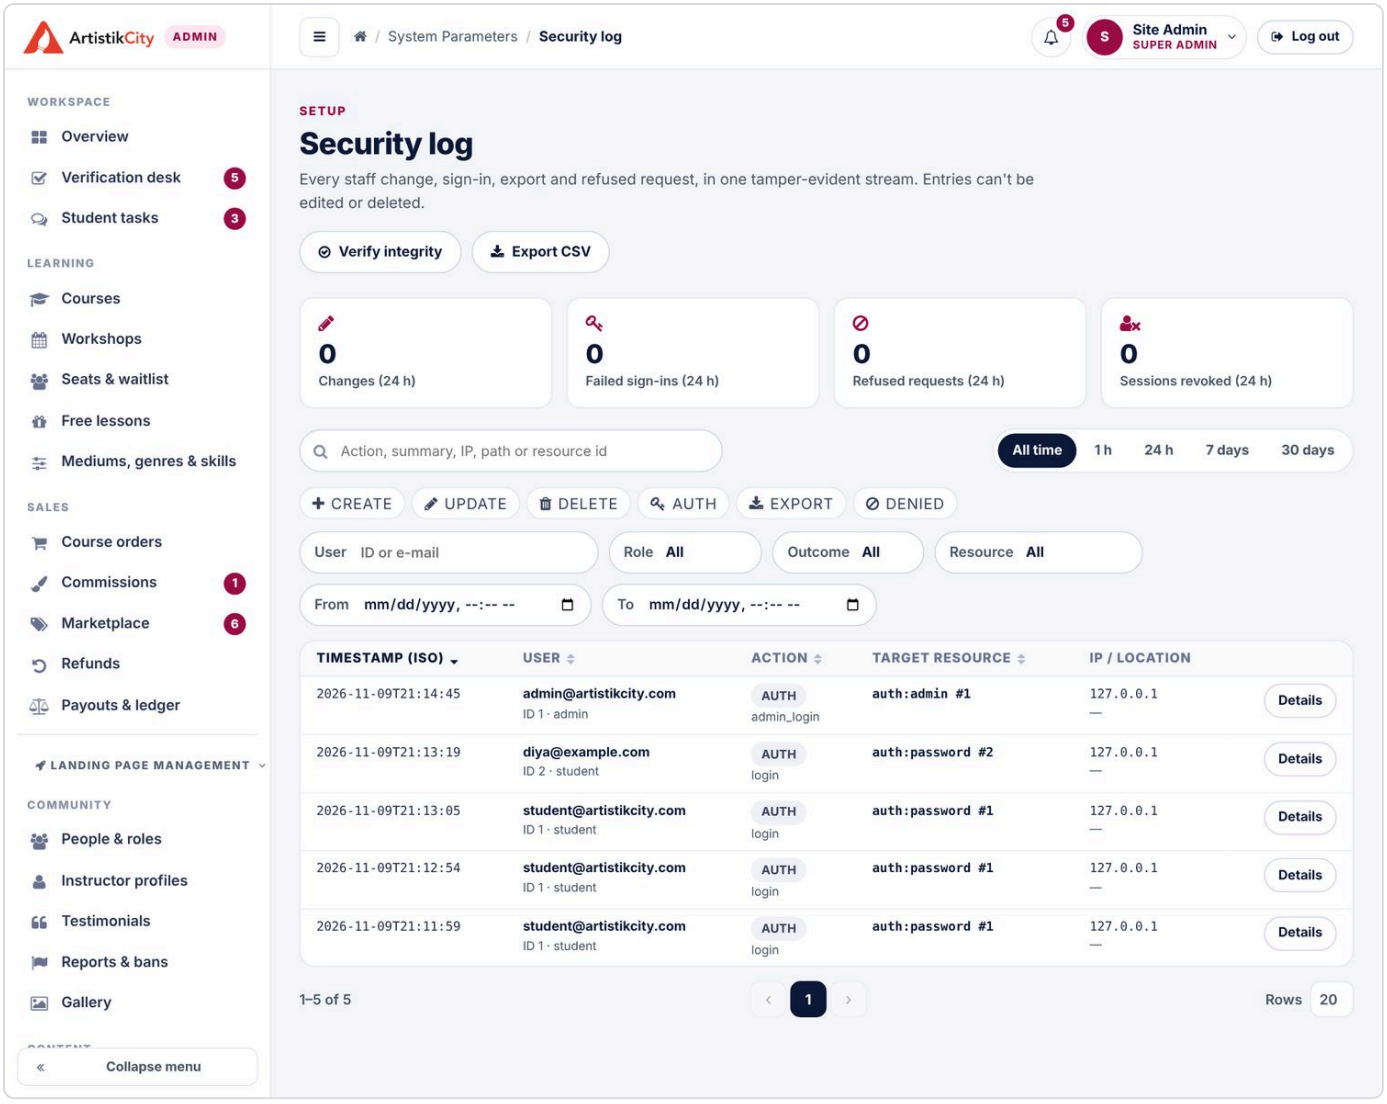

Figure 79. Security log.

CHAPTER 9

Playbooks: end-to-end workflows

The jobs you will do most often, from start to finish.

9.1 Launch a new course

1. Learning › Courses › New course. Fill in Basics, Category, Schedule & format, Pricing and Page content; add photos and the trailer. Leave Visible on the site off. Save.
2. Curriculum: add modules, lessons (video, notes, PDF), practice tasks and the course project.
3. If the class is small, set a seat limit in Learning › Seats & waitlist.
4. Check the course page with View page, on a phone too.
5. Switch on Visible on the site. It appears in the catalogue at once.
6. Optional: Landing Page Management › Create landing page for a campaign address with a launch price and coupon; publish it.
7. Announce it with a Newsletter campaign and a Studio Story.

9.2 From submission to certificate to sale

1. A student submits an assignment → it appears in the Verification desk (badge).
2. Review and approve it (or request changes with clear notes).
3. Once the student has finished every lesson and has one approved piece, their certificate is ready to claim in their studio. Course orders › order › Issue certificate if you need to issue it yourself.
4. The certified student lists the approved piece in Sell your art → it appears in Marketplace › Review queue.
5. Approve it: it goes live under Student paintings. Or send it back with notes.
6. When it sells, fulfil the order (next playbook). The artist share appears in Payouts & ledger › Artists and is paid in a weekly batch after the holding period.

9.3 Fulfil a marketplace order

1. Sales › Marketplace › Orders: new paid orders are at the top.
2. Open the order and check the items, the address and the phone number.
3. Pack it and click Mark packed.
4. Hand it to the courier, type the courier name and tracking number, click Mark shipped. The buyer sees a Track delivery link in Your orders.
5. When it arrives, click Mark delivered.
6. If a line cannot be supplied (for example an original sold twice in a race), the site has already marked it Refund required and queued it in Refunds.

9.4 Refund a customer

1. Find the order (Course orders, Marketplace › Orders or Landing pages › Orders) and check the payment.
2. Marketplace and landing-page orders have a Refund action on the order; refunds the site raised itself (paid twice, sold-out seat, cancelled run, item that could not be supplied) wait in Sales › Refunds.
3. Enter the reason and confirm (Refund now). The site asks the payment provider to send the money back and records the result.
4. Tell the customer; the refund reaches their account in the provider's usual time.

9.5 Run the weekly payout

1. Sales › Payouts & ledger › Payouts: open the draft batch for the week.
2. Check each line: artist, amount, and that no dispute is open.
3. Look up each artist's payout details (masked; the look is recorded) and send the money from the bank or PayPal.
4. Mark the batch paid. Artists see the amount under Paid out.

9.6 Run a campaign with an A/B test

1. Create the landing page, set price, payment methods and a coupon; publish.
2. Share the address in ads with UTM tags so Analytics can tell campaigns apart.
3. Make a change in the draft and start an A/B test at 50 %.
4. After enough visitors (a few hundred per version) look at conversion and confidence.
5. Promote the winner. The losing version stays in the version history.

9.7 Before announcing the site

- Configuration Panel: Razorpay and PayPal live keys connected; SMS provider set; Google sign-in.
- SEO & Layout Controls: contact e-mail, phone and address; Our vision, Instructor, Customer support and FAQ tabs.
- Terms & Conditions, Privacy Policy and the student Help page contain your real texts.
- Courses: real prices, dates and texts; hide anything not ready.
- People: instructors added; two-step verification on for every staff account.
- Buy a course as the test student with Simulate payment, then one real small payment with your own card; refund it.
- Site Access Password off; robots.txt allows crawling and /sitemap.xml lists the courses.

CHAPTER 10

Appendix: status reference

10.1 Orders and payments

WHERE	STATUSES
Course order (payment)	Pending · Paid (course opens) · Failed · Refunded · Paid twice (refund queued)
Marketplace order	Payment pending · Paid · Packed · Shipped · Delivered · Refund required · Refunded
Commission	Awaiting payment · Queued · Proof sent · In production · Shipped · Completed
